Gauze fabric, Tubular. J. V. Moore. 1,677,398; July 17.
Gear for wagons, Convertible running. C. A. Hagadone. 1,677,476; July 17.
Gear, Landing. E. H. Van Valkenberg. 1,677,418; July 17.
Gear mechanism, Planetary-. H. L. Burkhardt. Re17,039; July 17.
Gear of locomotive cranes, Controlling the driving. H. G. Steinbrenner. 1,677,374; July 17.
Gear, Steering. M. Wagner. 1,677,419; July 17.
Generator: *See*—
Steam generator.
Glass substitutes, Apparatus for producing. A. Zimmerli. 1,677,576; July 17.
Glass-teeming apparatus. H. H. Deuley. 1,677,275; July 17.
Glazing bar. E. L. Nelson. 1,677,650; July 17.
Glove. J. Fitz Gibbon. Des. 75,785; July 17.
Goggles. W. N. Cook. 1,677,747; July 17.
Goggles and the like. G. A. Peterson. 1,677,566; July 17.
Golf apparatus, Indoor. J. C. Hall. 1,677,442; July 17.
Golf club. R. E. McClure. 1,677,395; July 17.
Golf, Device for improving stance in connection with the game of. E. H. Williams. 1,677,261; July 17.
Gradient meter. R. Aernout, Baron van Lynden. 1,677,220; July 17.
Granule and producing the same. W. H. Alton. 1,677,701; July 17.
Grate. L. J. Binder. 1,677,809; July 17.
Grate. W. A. Knowlton. 1,677,788; July 17.
Grater. A. D. Hopkins. 1,677,448; July 17.
Grinding apparatus. J. A. Milliken. 1,677,484; July 17.
Guard, Automobile fender. O. H. Goetz. 1,677,765; July 17.
Guiding and feeding device for crank embroidery machines and the like, Combined. A. Koch. 1,677,539; July 17.
Gun, Trap. A. Makl. 1,677,394; July 17.
Gyroscopic apparatus. A. Chessin. 1,677,331; July 17.
Hair-waving solution. F. J. McKenna. 1,677,246; July 17.
Halogen derivative of the benzanthrone series and making same. O. Braunsdorf, E. Holzapfel, and P. Nawiasky. 1,677,545; July 17.
Hand bag. G. M. Engel-Kron and S. Trey. 1,677,142; July 17.
Handle: *See*—
Basket handle. Switch handle.
Handle for vacuum cleaners, etc. W. L. Lindgren. 1,677,721; July 17.
Handling apparatus, Automobile. T. Vogt. 1,677,695; July 17.
Handling apparatus, Materials. H. H. C. Grondahl. 1,677,181; July 17.
Handling tacky strip material, Method and apparatus for. F. Goodall. 1,677,861; July 17.
Harvesting machinery, Vertical sickle divider for grain. W. A. Barber. 1,677,668; July 17.
Hat pad. L. Cohen. 1,677,547; July 17.
Hat-size reducer. L. Cohen. 1,677,548; July 17.
Hauling apparatus, Sugar-. J. Schiftner. 1,677,733; July 17.
Headlight. A. Maurer. 1,677,678; July 17.
Heat-exchange unit. A. B. Modine. 1,677,457; July 17.
Heat indicator, Dashboard-type. W. L. Rohrer. 1,677,208; July 17.
Heat-interchange device. C. R. Houseman. 1,677,777; July 17.
Heater: *See*—
Air heater, Flue heater.
Electric heater.
Heating sheet material in preparation for folding, Apparatus for. G. Ritter. 1,677,492; July 17.
Heating unit, Electric. J. C. Woodson. 1,677,313; July 17.
Heel block and forming the same. N. L. Gulliford. 1,677,822; July 17.
Heels, Attaching. J. H. Pope. 1,677,292; July 17.
Hinge and support, Door. A. S. Parkin. 1,677,843; July 17.

Hoisting device, Automobile. R. Rother. 1,677,297; July 17.
Holder, Electrode. J. Dion. 1,677,712; July 17.
Holder for mops. W. T. Whitaker. 1,677,741; July 17.
Holder, Novelty. I. M. Foster. 1,677,820; July 17.
Holder, Sliding-window. R. M. Ahrens. 1,677,317; July 17.
Holder, Twine. R. Salvaggio. 1,677,799; July 17.
Holder, Wall pot. M. C. Fox. Des. 75,786; July 17.
Hook: *See*—
Snap hook.
Horn, Sound-amplifying. J. C. Hendricks. 1,677,782; July 17.
Hosiery protector. G. W. Parry. 1,677,683; July 17.
Hydraulic motor. I. Cornelissen. 1,677,431; July 17.
Hydrocarbon burner. F. Higgins and A. E. Nordstrom. 1,677,447; July 17.
Hydrocarbons, Cracking. E. C. Herthel and T. D. Tifft. 1,677,772; July 17.
Hydrometer. F. E. Sode. 1,677,801; July 17.
Ice-rescue device. H. E. Hodgson. 1,677,236; July 17.
Ice-water cooler, Melted-. J. L. Jones. 1,677,455; July 17.
Indicator: *See*—
Heat indicator.
Inner tubes, Apparatus for manufacturing. M. H. Pade. 1,677,868; July 17.
Instrument-board and gas-tank construction, Combined. H. Ford. 1,677,279; July 17.
Insulator. R. P. Jackson. 1,677,346; July 17.
Insulators, Apparatus for undercutting pinholes in the center shells of. W. H. Smith. 1,677,498; July 17.
Internal-combustion engine. D. Cole. 1,677,429; July 17.
Internal-combustion engine. A. L. Powell. 1,677,407; July 17.
Iron: *See*—
Pressing iron.
Iron manufacture. M. G. Woodman. 1,677,420; July 17.
Ironing board and support. C. A. Adams. 1,677,162; July 17.
Ironing machine. R. V. Weller. 1,677,666; July 17.
Irrigating apparatus. W. H. Coles. 1,677,228; July 17.
Jack: *See*—
Lifting jack.
Jar-trimming machine. J. L. Kivlan. 1,677,239; July 17.
Jig, Insulator-assembling. J. C. Robertson. 1,677,294; July 17.
Joint: *See*—
Universal joint.
Key mechanism for wood-wind instruments, Octave. A. Loomis. 1,677,563; July 17.
Kiln for firing, Updraft process of and muffle. T. Downs. 1,677,818; July 17.
Knitting machines, Striping attachment for. L. S. Herbert. 1,677,477; July 17.
Label or tab for use with goods which have to be dyed. O. Gunnell. 1,677,475; July 17.
Lamp, Arc. W. C. Spieth. 1,677,602; July 17.
Lamp, Electric reflecting. H. A. Douglas. 1,677,752; July 17.
Lamp, Extension. E. G. Appleton, A. C. Fischer, and R. Mooney. 1,677,163; July 17.
Lamp motor feed, Arc-. A. C. Roebuck. 1,677,657; July 17.
Lamp, Projector. T. Hall. 1,677,521; July 17.
Lamp standard. S. G. Edmondson. Des. 75,783; July 17.
Lanterns, Mounting for. W. E. Price. 1,677,489; July 17.
Latch for vehicle doors. R. V. Kalmer. Re17,035; July 17.
Latch, Locker. A. F. Foehrenbach. 1,677,278; July 17.
Lathe, Crank-pin. L. J. Kirchenbauer. Re17,040; July 17.
Laundry-classifying table. A. T. Moore. 1,677,648; July 17.
Lawn sprinkler. L. R. Nelson. 1,677,486; July 17.
Leather product. M. H. Cook. 1,677,125; July 17.
Leather, Waterproofing. H. V. Dunham. 1,677,435; July 17.
Lenses, Making and marking toric and like. L. W. Bugbee. 1,677,382; July 17.
Letter device, Changeable. J. K. K. Andersen. 1,677,319; July 17.
License plate and displaying the same. L. L. Barr. 1,677,613; July 17.
Lid, Journal-box. D. S. Barrows. 1,677,321; July 17.
Lifting jack. W. H. Walker, J. J. Mizer, and I. E. Dearsley. 1,677,466; July 17.
Lighting fixture. J. Zweig. Des. 75,817; July 17.
Lighting system, Exit-. R. T. Williams. 1,677,696; July 17.
Lining, Footwear. C. E. Bradley and C. D. Mason. 1,677,428; July 17.
Liquid draw-off. G. B. Stone and F. D. Michaels. 1,677,501; July 17.
Lister, Tractor. W. S. Graham. 1,677,474; July 17.
Lock: *See*—
Nut lock. Safety lock.
Lock for pneumatic tools, Handle. J. T. Nelson. 1,677,199; July 17.
Locking device. C. M. Graves. 1,677,768; July 17.
Locomotion on foot, Facilitating. J. D. M. Robinson. 1,677,728; July 17.
Locomotive boiler. W. L. Bean. 1,677,427; July 17.
Locomotive, Oil-motor-driven. J. Buchli. 1,677,704; July 17.
Logs and grates, Attachment for. F. G. Gross. 1,677,629; July 17.
Loom. E. Bauer and P. Miozzi. 1,677,542; July 17.
Loom. J. Lucas. 1,677,192; July 17.
Looms, Actuating mechanism in oriental-rug. M. A. Bauer. 1,677,426; July 17.
Louver ventilator. R. C. and G. L. Yager. 1,677,421; July 17.
Low-water alarm. G. W. Keller. 1,677,830; July 17.
Lubricant and process, Textile. J. J. Schaefer. 1,677,852; July 17.
Lubricating apparatus for stiff lubricants, Central. A. Schlosshauer. 1,677,661; July 17.
Lubricating device for hinges of doors and windows, Automatic. I. Gonyk. 1,677,441; July 17.
Lubricating mechanism for sprocket chains. E. C. Morgan. 1,677,649; July 17.
Lubricator: *See*—
Superpressure lubricator.
Machine for hobbing or cutting gears. C. H. Schurr. 1,677,853; July 17.
Machine for making covered boxes. A. F. Jones. 1,677,390; July 17.
Machine for making nut blanks and similar articles. H. D. Simkins and J. Burkhardt. 1,677,151; July 17.
Machine for making straps. E. W. Dunbar and E. J. Dempsey. 1,677,231; July 17.
Machine for operating on shoes. A. Bates. 1,677,322; July 17.
Magazine for air guns. R. T. Bond. 1,677,810; July 17.
Magnesium and magnesium alloys to inhibit corrosion, Treatment of. A. C. Zimmerman. 1,677,667; July 17.
Magnets, Producing permanent. L. E. Howard and A. D. Potts. 1,677,674; July 17.
Manicuring instrument. I. M. Eldridge. Des. 75,784; July 17.
Material-working machine. B. L. Whited. 1,677,159; July 17.
Mattress or cushion and boxing therefor and making same. J. F. Gall. 1,677,232; July 17.
Measuring and dispensing apparatus, Liquid. C. L. Merriman. 1,677,285; July 17.
Measuring a substance carried in suspension by a second substance. A. R. Smith. 1,677,691; July 17.
Measuring contact rebounding, System for. A. Weaver. 1,677,157; July 17.
Measuring, Gas. E. I. McKesson. 1,677,147; July 17.
Measuring instrument. W. Jandus. 1,677,864; July 17.
Mercury compound, Polyhydroxy-. H. Gunzler and O. Neubert. 1,677,823; July 17.
Metal, Bonding. F. C. Mathison. 1,677,354; July 17.
Metal-finishing machine. O. F. Tapley. 1,677,375; July 17.
Meter: *See*—
Gradient meter. Flow meter.
Meter. G. B. Linderman, jr. 1,677,834–5; July 17.
Meter for combining the measurement of demand and energy. L. A. Paine. 1,677,203; July 17.
Meter for fluids. E. S. Lindley. 1,677,189; July 17.
Methane, Chlorination of. E. Krause. 1,677,831; July 17.
Mirror or similar toilet article. W. S. Bechtold. Des. 75,765–8; July 17.
Mixer: *See*—
Concrete mixer.
Mixing amalgam for tooth fillings and stoppings, Device for. V. Wilming. 1,677,697; July 17.
Mixing plant, Asphalt-. F. H. Cummer. 1,677,274; July 17.
Modulating arrangement. O. H. Loynes. 1,677,190–1; July 17.
Moisture control, Automatic. W. C. Wright. 1,677,856; July 17.
Mold: *See*—
Battery mold.
Mop, Floor. S. N. Cragin. 1,677,748; July 17.
Motor: *See*—
Fluid motor. Rotary motor.
Hydraulic motor.
Motor and dynamo machine, Electric. C. L. Daun. 1,677,433; July 17.
Motor-assembling fixture. R. O. Gilburg. 1,677,762; July 17.
Motor-indicating system. E. A. Rockwell. 1,677,494; July 17.
Mounting for windshield cleaners. A. E. Doman. 1,677,175; July 17.
Mower attachment, Lawn-. F. M. Ritter. 1,677,250; July 17.
Mower, Lawn. W. H. Adkins. 1,677,377; July 17.
Muffler. C. E. Stade. 1,677,570; July 17.
Music roll for player pianos. O. Foss. 1,677,756; July 17.
Nail stripper. F. M. Murakoshi. 1,677,527; July 17.
Nozzle, Vaporizing. E. E. Goller. 1,677,766; July 17.
Nut lock. I. G. Brenneman. 1,677,266; July 17.
Nut, Nonremovable. T. N. Burghart. 1,677,269; July 17.
Oil burner. E. W. Rother. 1,677,871; July 17.
Oil burner. O. J. See. 1,677,800; July 17.
Oil composition and preparing same, Cylinder-. R. T. Howes. 1,677,389; July 17.

Oil in oil wells, Apparatus for lifting. T. Kallmeyer. 1,677,349; July 17.
Oil, Lubricating. J. H. Mackie. 1,677,244; July 17.
Oil or liquid-fuel charges into internal-combustion engines, Introducing. S. D. Olsen. 1,677,202; July 17.
Oils, Cracking hydrocarbon. E. C. Herthel and T. D. Tifft. 1,677,773–6; July 17.
Oils, Device for testing lubricating. A. A. Schaefer. 1,677,690; July 17.
Oiling device, Hog-. A. J. Koerner. 1,677,560; July 17.
Optical projection apparatus, Automatic focusing. E. K. Hunter. 1,677,778; July 17.
Ore concentration. R. R. Tunison. 1,677,416; July 17.
Overalls. M. E. St. Amour. 1,677,663; July 17.
Package-banding machine. A. M. English. 1,677,587; July 17.
Package for pile fabrics and the like. A. M. Durand. 1,677,515; July 17.
Packing ring. J. B. Wenel. 1,677,158; July 17.
Pad: *See*—
Draining pad. Hat pad.
Pail. H. E. Whitney. 1,677,222; July 17.
Panic bolt. W. J. Carroll. 1,677,271; July 17.
Paper, Method and machine for the producing of tightly-coiled. F. Schade. 1,677,599; July 17.
Paraformaldehyde, Manufacture of. K. Sator and W. Pfannmüller. 1,677,730; July 17.
Pattern mechanism or shed-forming machine, Apparatus for the driving of a. H. Stanbli. 1,677,235; July 17.
Pavement. C. H. Jack. 1,677,829; July 17.
Pavements, Construction of street. A. E. Schutte. 1,677,600; July 17.
Pencil carrier. G. W. Goodridge. 1,677,767; July 17.
Pencil container and lead magazine, Combination. A. F. Galdos. 1,677,387; July 17.
Pencil, Mechanical. J. Straka. 1,677,415; July 17.
Penholder. P. Z. Bloser. Des. 75,772; July 17.
Petroleums, Treating. W. W. Gary. 1,677,440; July 17.
Phonograph circuit, Electric. J. Weinberger. 1,677,806; July 17.
Photo-electric cell. V. K. Zworykin. 1,677,316; July 17.
Photography. E. A. Weaver. 1,677,665; July 17.
Pipe-flange wrench. J. H. Jones. 1,677,637; July 17.
Pipe flanges, Trimming soft-metal. P. Mueller and A. C. Schuermann. 1,677,792; July 17.
Pipe patch clamp. O. P. Eller. 1,677,623; July 17.
Pipes and products resulting therefrom, Producing earthenware. F., J. B., T., S., and F. Alassio. 1,677,808; July 17.
Piston and packing. J. A. Olson. Re17,042; July 17.
Piston-removing device. P. H. Kenney. 1,677,786; July 17.
Planographic presses, Dampening system for. R. F. Reed and W. Scholl. 1,677,655; July 17.
Planter, Cotton. S. K. Dennis. 1,677,469; July 17.
Planter, Tractor. J. L. Hippie. 1,677,478; July 17.
Plasterer's float. J. W. Pickering. 1,677,366; July 17.
Pliers, Adjustable. E. Peck. 1,677,365; July 17.
Pointing and threading machine, Automatic. J. A. Kinney. 1,677,238; July 17.
Polishing device. S. G. Wilson. 1,677,742; July 17.
Portable drier. H. E. Myers. 1,677,197; July 17.
Pot: *See*—
Chamber pot.
Poultice-making machine. R. H. Plass. 1,677,685; July 17.
Power press, High-pressure. J. G. Collins. 1,677,132; July 17.
Press: *See*—

Screen: *See*—
Window screen.
Screw driver. L. V. Walkley. 1,677,572; July 17.
Screw for center bearings for looms. W. E. Crain. 1,677,549; July 17.
Screw, Temper. L. McKillop. 1,677,358; July 17.
Screws, Lock and seal for F. H. Wood. 1,677,667; July 17.
Seal. Oil-tube water. J. A. Wintroath. 1,677,262; July 17.
Sealing mechanism for containers. J. Van Buren. 1,677,259; July 17.
Seam tube, Solidified. W. K. Herbst and R. H. Stone. 1,677,523; July 17.
Sear mechanism. W. T. Gorton. 1,677,588; July 17.
Seat: *See*—
Adjustable seat.
Securing mechanism, Loose-leaf- R. F. Power. 1,677,461; July 17.
Selvage-opening device. H. C. Smith. 1,677,303; July 17.
Separator. R. C. Benner. 1,677,512; July 17.
Septic tank. J. Frappy. 1,677,626; July 17.
Server of household articles. J. O. Naslin. 1,677,404; July 17.
Sewer flusher, Automatic. C. R. Lion. 1,677,352; July 17.
Sewing machines, Stop mechanism for. R. A. Gramse. 1,677,673; July 17.
Shade cleaner, Window. H. Schurr. 1,677,252; July 17.
Shade, Lamp. S. Sato. 1,677,660; July 17.
Shaping and finishing machine, Automatically-operating paper-box. I. A. Deline. 1,677,386; July 17.
Shaping machine, Collar. J. Harris. 1,677,771; July 17.
Shaping teacups or the like with integral handles. J. Bailey. 1,677,611; July 17.
Sharpener, Lawn-mower. J. H. Groetsch. 1,677,556; July 17.
Sheet material and making and mounting the same. T. J. Mell. 1,677,284; July 17.
Sheet metal, flat bars, and hoop iron, Apparatus for producing meshed. H. Frohnhauser. 1,677,438; July 17.

Shock absorber for motor vehicles. G. R. Pennington. 1,677,405; July 17.
Shoe. M. B. Banks. 1,677,226; July 17.
Shoe. C. C. Blake. 1,677,612; July 17.
Shoe and making same, Stitch-down. R. E. Howlett. 1,677,343; July 17.
Shoe, Football. E. E. Roewade. 1,677,370; July 17.
Short-circuiting switch. R. G. McCurdy. 1,677,193; July 17.
Side frame. B. W. Kadel. 1,677,347; July 17.
Sign, Display. J. B. Auerbach. Des. 75,764; July 17.
Signal: *See*—
Automobile signal. Vehicle traffic signal.
Signal apparatus, Railway. W. Daya. 1,677,816; July 17.
Signal-control switch. P. Koroknay. 1,677,141; July 17.
Signaling device, Automobile. I. G. Krieger. 1,677,351; July 17.
Signaling system, High-frequency. W. J. Brown. 1,677,268; July 17.
Size or dressing, Making n. A. Boidin and J. Effront. 1,677,614; July 17.
Sizing apparatus for coke or the like. A. G. Molin. 1,677,838; July 17.
Sizing device for grinding machines, Automatic. A. P. Steiner. 1,677,307; July 17.
Sleeve-valve engine, Segmental. P. H. Conklin. 1,677,582; July 17.
Slicing machine. J. Folk. 1,677,437; July 17.
Snap hook. R. B. Lloyd. 1,677,592; July 17.
Snap hook, Safety. O. R. and R. N. Close. 1,677,814; July 17.
Soldering device. R. Reinbold. 1,677,248; July 17.
Soot blower for steam boilers. C. A. Claflin. 1,677,383; July 17.
Sorting machine. G. Neuhaus. 1,677,247; July 17.
Sorting machine, Ceramic. R. P. Herrold. 1,677,862; July 17.
Sorting table. F. B. Roberts and W. G. Huntington. 1,677,656; July 17.
Sound reproducer. G. Strobino. 1,677,605; July 17.
Sound-wave transmitting and amplifying device. W. Hardeo. 1,677,632; July 17.
Spark plug. I. W. Farquharson. 1,677,516; July 17.
Speed control, Critical-. C. R. Sessions. 1,677,496; July 17.
Splicing fabric, Apparatus for. W. W. Benner and E. A. Hoener. 1,677,857; July 17.
Sprinkler: *See*—
Lawn sprinkler.
Sprinkler. L. R. Nelson. 1,677,485; July 17.
Stacker. C. Pearson. 1,677,488; July 17.
Stand: *See*—
Display stand. Switch stand.
Railway-switch stand.
Starch, Making cold swelling. E. Wulkan. 1,677,314; July 17.
Starch material and making it, Prepared. A. Boidin and J. Effront. 1,677,615; July 17.
Starch, Treating. J. Kantorowicz. 1,677,348; July 17.
Steam boiler. C. H. Hass and L. J. Mitchell. 1,677,630; July 17.
Steam boiler, Electric. S. Schneider. 1,677,299; July 17.
Steam generator. M. C. Gillett. 1,677,763; July 17.
Steam plant. J. Ruths. 1,677,798; July 17.
Steel, Increasing the permeability of silicon. J. C. Karcher. 1,677,139; July 17.
Steel retainer. W. Preilwitz. 1,677,530; July 17.
Steering wheel. A. E. Bronson. 1,677,616; July 17.
Stocking. E. O. Nebel. Des. 75,805; July 17.
Stocking frame. H. Sussmann. 1,677,219; July 17.
Stool and stepladder, Combination. J. H. Asselin. 1,677,610; July 17.
Stool, Pocket folding. T. N. Hansen. 1,677,339; July 17.
Stove construction. C. M. Dibble. 1,677,585; July 17.
Stove, Oil. M. Resek. 1,677,597; July 17.
Strand-working mechanism. C. O. Haase. 1,677,135; July 17.
Strand-working mechanism. F. S. Kochendorfer. 1,677,186; July 17.
Stretcher, Shoe. R. Lavoano, J. Alesse and S. Campagna. 1,677,591; July 17.
Stuffing box. C. L. Pruiett. 1,677,848; July 17.
Suction box, Oscillating. A. Aldrich. 1,677,128; July 17.
Suds-producing means. T. A. Luthander. 1,677,645; July 17.
Superpressure lubricator. F. W. Parker. 1,677,595; July 17.
Support for spare wheels, Fixed. L. Rouanet. 1,677,212; July 17.
Support, Portable. L. M. Fulton. 1,677,439; July 17.
Support, Yieldable. R. D. Parks. 1,677,796; July 17.
Surfaces, Making antique. R. J. Greene. 1,677,716; July 17.
Surfacing machine, Electrically-actuated. G. Staehle. 1,677,533; July 17.
Surgical instrument. D. K. Rose. 1,677,209; July 17.
Swimming device. C. Spurges. 1,677,254; July 17.
Swings, Stand or support for. W. H. Patton. 1,677,844; July 17.
Switch: *See*—
Electric switch. Thermostatic overload switch.
Short-circuiting switch.
Signal-control switch.
Switch handle, Rotary. A. W. Clauder. 1,677,706; July 17.
Switch mechanism. H. G. Baxter and H. K. Krantz. 1,677,323; July 17.
Switch stand, Automatic. W. M. Gray. 1,677,388; July 17.
Switching system, Automatic. W. N. Gittings. 1,677,715; July 17.
Table: *See*—
Laundry-classifying table. Sorting table.
Table cover or similar article. H. W. Dieck. Des. 75,775–81; July 17.
Tamping machine. J. D. Abram. 1,677,422; July 17.
Tank: *See*—
Septic tank.
Tapping machines, Electric reversing device for. B. S. T. Bishop and H. A. Jacobson. 1,677,744; July 17.
Tea bag. H. Mock. 1,677,397; July 17.
Teeth, Artificial. L. H. Sprinkle. 1,677,662; July 17.
Telegraphy and telephony, System of reception for modulated-wave. E. Y. Robinson. 1,677,797; July 17.
Telegraphy and telephony, Wireless. B. Rosenbaum. 1,677,296; July 17.
Telephone system. H. von Beckerath. 1,677,325; July 17.
Telephone system, Automatic. R. F. Stehlik. 1,677,415–14; July 17.
Telephone system, Semiautomatic. E. Jacobsen. 1,677,451; July 17.
Temperature regulator. A. Däniker. 1,677,710; July 17.
Temperature time-control device. A. J. Mottlau. 1,677,361; July 17.
Tension device. J. C. Hodge. 1,677,138; July 17.
Textile fabric. L. Biva. Des. 75,771; July 17.
Textile fibers from animal hair and bristles, Manufacture of. W. H. Schweitzer. 1,677,149; July 17.
Thermostatic overload switch. B. E. Getchell. 1,677,334; July 17.
Thermostatic regulator. C. H. Hapgood. 1,677,340; July 17.
Thrashers, Bagging platform and carrier attachment for harvester. C. R. Raney and A. E. W. Johnson. 1,677,490; July 17.
Tie: *See*—
Box strap tie.
Tie splice, Cotton-. P. L. Howlett. 1,677,828; July 17.
Tile or article of similar article. E. H. Gibian. Des. 75,790–1; July 17.
Tile or article of similar nature. L. Gunther and E. H. Gibian. Des. 75,793; July 17.
Tile or article of similar nature. F. Sohn and L. G. Marmion. Des. 75,812–13; July 17.
Tire. E. W. Coleman. Des. 75,774; July 17.
Tire. T. G. Graham and H. F. Schippel. Des. 75,792; July 17.
Tire carrier. A. B. Werdehoff. 1,677,574; July 17.
Tire, Cushion. A. L. Alaj. 1,677,124; July 17.
Tire deflator. E. P. Seghers. 1,677,301; July 17.
Tire-finishing machine. E. D. Putt. 1,677,871; July 17.
Tires, Method and machine for making cord. K. O. B. Textorius. Re17,036; July 17.
Tires or tire carcasses, Apparatus for making. H. I. Morris. 1,677,401–2; July 17.
Toaster, Electric. H. C. Drake. 1,677,177; July 17.
Tobacco press. T. Miller. 1,677,724; July 17.
Toilet-seat protector. N. C. Ross. 1,677,211; July 17.
Toll-service trunking system. J. Wicks. 1,677,876; July 17.
Tongs, Electric welding. C. L. Stancliff. 1,677,306; July 17.
Tool. E. J. Dreuil. 1,677,622; July 17.
Tool, Chain. J. W. Saffold. 1,677,251; July 17.
Tool, Chain. J. W. Saffold. 1,677,658–9; July 17.
Tool for boring and turning irregular surfaces, Machine. L. M. Cole, E. H. Halter, and R. H. Lewis. 1,677,131; July 17.
Tool for cutting box strapping and the like. S. W. Parsons. 1,677,684; July 17.
Tool holder for cross slides of lathes, Multiple. M. E. Lange and A. L. Evans. 1,677,143; July 17.
Tool retainer for pneumatic hammers. J. M. Butler and H. A. Torson. 1,677,270; July 17.
Toothbrush. A. Mendoza. 1,677,194; July 17.
Top and spinner therefor. F. X. Renetzky. 1,677,368; July 17.
Topper, Beet. O. H. Hansen. 1,677,444; July 17.
Towel bar. A. C. Gilbert. 1,677,280; July 17.
Toy aviation device. S. I. Berger. Des. 75,770; July 17.
Toy, Figure. C. A. Peck. 1,677,652; July 17.
Toy locomotives, Bell-ringing means for. H. S. Becker. 1,677,669; July 17.
Toy, Spring teetering. I. A. Shanton. 1,677,531; July 17.
Toy woodpecker. J. W. Suedeker. 1,677,463; July 17.
Traction wheel. L. E. Slauson. 1,677,568; July 17.
Tractor. T. C. Leake. 1,677,878; July 17.
Tractor attachment. A. C. Lindgren and A. D. Gallagher. 1,677,482; July 17.
Tractor cultivator attachment. C. Y. Thomson, sr. 1,677,505; July 17.
Tractor hitch. T. K. Martin. 1,677,639; July 17.
Tractors for haulage purposes on rail or tram lines, Adapting motor. R. Joughin. 1,677,184; July 17.
Traffic-controlling apparatus, Railway-. R. M. Gilson. 1,677,518; June 17.
Trailer, Industrial. C. G. Clement. 1,677,618; July 17.
Transfer mechanism for sugar canes. H. O. Scranton. 1,677,601; July 17.

Transformer. V. M. Montsinger. 1,677,681; July 17.
Transformer, Electric. W. S. Werner. 1,677,537; July 17.
Transmission lines, Pole top fixture for. W. G. Milne. 1,677,456; July 17.
Trap: *See*—
Animal trap. Bird trap.
Tray, Food. L. A. Deicken. 1,677,276; July 17.
Treating soils to promote plant growth. C. H. Spencer. 1,677,153; July 17.
Treatment of work under pressure, Apparatus for continuous. C. H. Oakley. 1,677,201; July 17.
Triangle. C. G. Mickel. 1,677,396; July 17.
Truck, Industrial. A. R. Goldrick. Re17,043; July 17.
Tube: *See*—
Seam tube. Vacuum tube.
Tubular structure. H. F. Frease. 1,677,714; July 17.
Tunneling machine, Multiple-air-drill. W. R. Collins. 1,677,430; July 17.
Turbine, Internal-combustion. E. W. Nalleigh. 1,677,198; July 17.
Twine ball. G. L. Rice. 1,677,491; July 17.
Typewriter. C. D. Youngberg. 1,677,315; July 17.
Typewriter and the like. W. E. Barnard. 1,677,165; July 17.
Typewriting machine. G. W. Campbell. 1,677,170; July 17.
Typewriting machine. G. F. Rose. 1,677,210; July 17.
Umbrella, Emergency. H. O. Gottesman. 1,677,520; July 17.
Underreamer. C. H. Brown. 1,677,812; July 17.
Universal joint. C. W. Weiss. 1,677,311; July 17.
Unwinding device, Material-. S. E. Borgeson. 1,677,167; July 17.
Unwinding device, Material-. J. N. Selvig. 1,677,217; July 17.
Urn, Coffee. L. Wertheimer. 1,677,221; July 17.
Utility case. F. Phillippi. 1,677,653; July 17.
Vacuum-cleaner handle. B. J. Tamarin. Des. 75,815; July 17.
Vacuum tube. E. Y. Robinson. 1,677,850; July 17.
Vacuum tube. E. Y. Robinson. 1,677,851; July 17.
Vacuum-tube control device. J. H. Pressley. 1,677,727; July 17.
Valve. H. W. Dennis. 1,677,126; July 17.
Valve. A. McGregor. 1,677,357; July 17.
Valve. M. Resek. 1,677,598; July 17.
Valve and pipe coupling, Combined. A. J. Weatherhead, jr. 1,677,740; July 17.
Valve, Built-in removable. P. and R. H. Mueller and W. J. Mix. 1,677,794; July 17.
Valve-controlling device for engines and motors. S. Diamant. 1,677,552; July 17.
Valve devices, Attachment for lavatory-outlet-. P. and L. W. Mueller and W. J. Mix. 1,677,793; July 17.
Valve, Float. D. Reed. 1,677,687; July 17.
Valve for gas lines, Automatic cut-off. C. L. Sams. 1,677,729; July 17.
Valve for gas-washing apparatus, By-pass. R. Rosner. 1,677,148; July 17.
Valve, Four-way diverter. L. Bloch. Re17,034; July 17.
Valve, Lubricated plug. H. P. MacGregor. 1,677,525; July 17.
Valve mechanism. A. W. Pope, jr. 1,677,460; July 17.
Valve, Plate. L. R. Huff. 1,677,717; July 17.
Valve, Rotary. W. J. Smith. 1,677,499; July 17.
Valves, Making sleeve. H. R. Ricardo. 1,677,249; July 17.
Vapor-converter substation, Automatically-controlled. W. V. Lovell. Re17,041; July 17.
Vapor electric device. L. T. Robinson and C. A. Sabbah. 1,677,689; July 17.
Vegetable cutter. J. A. Bogdonawich. 1,677,543; July 17.
Vehicle brake. B. A. Larevn. 1,677,481; July 17.
Vehicle, Child's. H. H. Edele. 1,677,586; July 17.
Vehicle gate, Automatic. A. L. Hughes. 1,677,345; July 17.
Vehicle, Land and water. G. E. Powell. 1,677,846; July 17.
Vehicle power brake, Motor-. A. W. Harrison. 1,677,633; July 17.
Vehicle traffic signal, Motor-. C. B. Ferro. 1,677,624; July 17.
Vehicles, Spring suspension for. H. W. Hyde. 1,677,675–6; July 17.
Vending machine. W. Goodchild and N. Sclar. 1,677,519; July 17.
Vending machine, Perfume-. S. M. Coffman. 1,677,468; July 17.
Ventilator: *See*—
Louver ventilator.
Ventilator. F. Dely. 1,677,711; July 17.
Vibrating mechanism. A. A. Frevert. 1,677,759; July 17.
Vigil light cup. E. Sheeley. Des. 75,810; July 17.
Visor, Sun. S. E. Leibson. 1,677,187; July 17.
Vulcanization of rubber and product thereof. R. V. Heuser. 1,677,235; July 17.
Vulcanizer, Continuous. C. E. Rett. 1,677,207; July 17.
Vulcanizing apparatus. C. H. Oakley. 1,677,200; July 17.
Wagon, Dump. F. W. Garvin. 1,677,555; July 17.
Wall bracket. C. Lehrman. Des. 75,801; July 17.
Wall-paper panel or the like. H. L. Hoffman. Des. 75,794; July 17.
Wallet, Pocket. H. H. Harnsberger. 1,677,770; July 17.
Washer: *See*—
Bottle washer. Can washer.
Washing machine. G. P. Anstiss. 1,677,320; July 17.
Washing-machine drive. H. D. Payne. 1,677,291; July 17.
Waste, Pop-up. P. Mueller and A. C. Schuermann. 1,677,791; July 17.
Watchcase. A. Laska. 1,677,144; July 17.
Water wheel. S. H. Taylor. 1,677,464; July 17.
Wetless fabric. F. B. Hanley. 1,677,359; July 17.
Welding, Electric. E. Pugh. 1,677,206; July 17.
Welding, Method of and device for electric. A. H. Adams. 1,677,161; July 17.
Welding of long seams, Electric. J. F. Lawson. 1,677,832; July 17.
Welding parts, Device for. E. Pugh. 1,677,205; July 17.
Wells and strainer shoes for the same, Producing. T. W. and G. E. Thorpe. 1,677,606; July 17.
Wheel: *See*—
Disk wheel. Traction wheel.
Ring wheel. Water wheel.
Steering wheel.
Wheel. J. G. Swain. 1,677,854; July 17.
Window cornice. H. L. Goodrow. 1,677,627; July 17.
Window, Double-hung. S. U. Barr. 1,677,578; July 17.
Window screen, Rolling. G. Mercurio. 1,677,230; July 17.
Window tag for binders, Removable. M. W. and J. D. Federbush. 1,677,277; July 17.
Wipers, Mounting for windshield. G. B. Sayre. 1,677,215; July 17.
Working articles, Method of and apparatus for. F. W. Colbeck and S. Thronsen. 1,677,172; July 17.
Wrench: *See*—
Pipe-flange wrench.
Wrench and screw driver, Socket. W. W. Gast. 1,677,473; July 17.
Wringer: *See*—
Clothes wringer.
Yeast, especially by the aeration process, Manufacture of. A. Pollak. 1,677,529; July 17.

CLASSIFICATION OF PATENTS

ISSUED JULY 17, 1928.

NOTE.—First number=class, second number=subclass, third number=patent number.

1— 749. 7: 1,677,527
2— 10: 1,677,187
14: 1,677,566
1,677,747
27: 1,677,258
78: 1,677,145
1,677,188
79: 1,677,663
141: 1,677,504
185: 1,677,547
1,677,548
4— 105: 1,677,550
41: 1,677,223
150: 1,677,160
203: 1,677,791
1,677,793
245: 1,677,211
5— 61: 1,677,218
337: 1,677,743
351: 1,677,232
7— 1: 1,677,473
8— 2: 1,677,283
5: 1,677,508
21: 1,677,149
9— 11: 1,677,450
17: 1,677,236
21: 1,677,254
10— 4: 1,677,238
25: 1,677,159
12— 51: 1,677,322
128. 3: 1,677,591
147: 1,677,292
15— 7: 1,677,533
13: 1,677,625
69: 1,677,571
104. 04: 1,677,836
135: 1,677,194
147: 1,677,741
209: 1,677,174
223: 1,677,742
231: 1,677,748

Bennitt, Mark, San Francisco, Calif. Fluid pump. 1,678,052; July 24.
Benz, Gustav A., Philadelphia, Pa. Snap fastener. 1,678,240; July 24.
Benz, Gustav A., Philadelphia, Pa. Shoe-fastening device. 1,678,241; July 24.
Bergen, Peter H., Goessel, Kans. Pick-up grain guard. 1,678,549; July 24.
Bergman, Bernard, New York, N. Y. Dirigible headlight. 1,678,495; July 24.
Bergman, Johan O., assignor to Rockford Novelty Furniture Cmpany, Rockford, Ill. Console radiocabinet. 1,678,032; July 24.
Birmingham and Prosser Co. (See Prosser, Henry G., assignor.)
Bernasconi, Charles, and R. M. Berthier, Chamber, Savoy, France. Electromechanical lamp. 1,678,496; July 24.
Bernz, Otto, Newark, N. J. Plumber's furnace. 1,678,310; July 24.
Berry, Earl E., Beloit, Wis., assignor to Beloit Iron Works, Removable-type Fourdrinier paper-making machine. 1,678,176; July 24.
Berry, Walter S. (See Gallant, Robert M., assignor.)
Berssenbrugge, William H., Milwaukee, Wis. Ash tray. 1,678,375; July 24.
Berthier, René M. (See Bernasconi, C., and Berthier.)
Bicknell, Rupert C., Toronto, Ontario, Canada. Spring suspension for automobile chassis frames. 1,677,948; July 24.
Bieberstein, Frank A., Milwaukee, Wis. Vest. 1,677,913; July 24.
Biggert, Florence C., jr., assignor to United Engineering & Foundry Company, Pittsburgh, Pa. Multiple shears. 1,678,458; July 24.
Billeter, Otto, E. Rothlin, and J. Peyer, assignors to Chemical Works formerly Sandoz, Basel, Switzerland. Manufacture of easily-soluble anæsthetics of the meta-amimobenzoic acid ester series. 1,678,317; July 24.
Blackstone Mfg. Co., The. (See More, G., and Oberg, assignors.)
Blaw-Knox Company. (See Sloan, Alonzo H., assignor.)
Blessing, John G., Oak Forest, assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Punching die. 1,678,319; July 24.
Blewett, Joseph A., Philadelphia, Pa. Watch charm or similar article. Des. 75,824; July 24.
Bliss, Chester T., Melrose Highlands, assignor to Chetlew Manufacturing Company, Malden, Mass. Electrical Christmas candles. 1,677,908; July 24.
Bloom, Carl G., assignor of one-half to C. M. Minardo, Detroit, Mich. Rim lock. 1,678,550; July 24.
Blocker, Samuel J., Dallas, Tex. Animated sign. 1,678,320; July 24.
Blunt, James G., Schenectady, N. Y. Truck for locomotive engines. 1,678,321; July 24.
Blunt, James G., Schenectady, N. Y. Four-wheel truck for railroad vehicles. 1,678,322; July 24.
Boax, John J., McKeesport, Pa., assignor to National Tube Company. Adjustable die holder. 1,678,000; July 24.
Boax, John J., McKeesport, and B. S. Robinoff, assignors to National Tube Company, Pittsburgh, Pa. Radial multiple-spindle drill. 1,677,999; July 24.
Bond, Charles E., Spencerville, Md. Shock absorber. 1,677,949; July 24.
Bonnell, Kirke L. (See Tohtz, H. W., and Bonnell.)
Bonney-Floyd Company, The. (See Edmunds, Glenn E., assignor.)
Bonos, Charles, Euston, Pa. Wire cutter. 1,678,551; July 24.
Boorum & Pease Company. (See Von Auw, Alwin, assignor.)
Bosco, George B., Chicago, Ill. Sleeper anchor. 1,677,882; July 24.
Bosco, George B., Chicago, Ill. Bracket for shores. 1,678,177; July 24.
Bostaph Engineering Co. (See Ramage, Alexander S., assignor.)
Boullion, Alexandre, Liege, Belgium. Laying tramway lines. 1,678,552; July 24.
Boving, Jens O., Westminster, London, England. Absorption refrigerating apparatus. 1,678,242; July 24.
Bowdan, Melvin, Los Angeles, Calif. Combination solid and pneumatic tire. 1,678,419; July 24.
Bower, Justus H., Rutherford, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Air-conditioning system. 1,678,101; July 24.
Bowland, Andreas, Wilkinsburg, Pa. Valve for fluid-fuel burners. 1,678,459; July 24.
Bowlus, Glenn H., Los Angeles, Calif. Oil-storage-tank breather. 1,678,376; July 24.
Bowman, Newton K., Bowdil, Ohio. Bit. 1,677,950; July 24.
Brace, Porter H., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Permanent-magnet steel. 1,678,091; July 24.
Brackett, Edward M., et al. (See Mulroney, John E., assignor.)
Brackett, Fred, et al. (See Mulroney, John E., assignor.)
Brackett Stripping Machine Company, The. (See Mulroney, John E., assignor.)
Bradford, Henry B., Wilmington, assignor to Edge Moor Iron Company, Edge Moor, Del. Water tube for furnace walls. 1,677,887; July 24.
Branch, Benjamin A., and C. Schnurr, Long Beach, Calif. Saw-filing machine. 1,678,279; July 24.
Brandegger, Willy, Stuttgart, Germany. Sound-producing instrument. 1,678,553; July 24.
Brandt, Rudolph, assignor to Petry and Brandt, San Francisco, Calif. Machine for drilling and countersinking brake linings. 1,678,207; July 24.
Branson, Earl, Vannack, Mont. Body brace. 1,678,584; July 24.
Brenzinger, Julius, Fairfield, assignor to The Max Ams Chemical Engineering Corporation, Bridgeport, Conn. Washing or dyeing material. 1,678,053; July 24.
Breslauer, Max, Leipzig, Germany. Photographic apparatus. 1,678,460; July 24.
Bresler, Benjamin R., Bridgeport, Conn. Waste-valve-operating mechanism. 1,678,102; July 24.
Brewer-Titchener Corporation. (See Higgins, George H., assignor.)
Breyer, Frank G. (See Singmaster, J. A., Breyer, and Bunce.)
Briesen, Fritz v., trustee. (See Terwilliger, Charles O., assignor.)
Brophy, James H., Deer Park, assignor of one-half to V. C. Emerick, Locke, Wash. Exterminating device for rats, squirrels, and other pests. 1,678,178; July 24.
Brotz, Frank G., Kohler, assignor to Kohler Company, Kohler, Wis. Swinging-spout valve. 1,678,377; July 24.
Brown and Sharpe Manufacturing Company. (See Graves, Benjamin P., assignor.)
Brown Company. (See Daw, Joseph, assignor.)
Brown Company. (See Richter, George A., assignor.)
Brown, Roy E., assignor of forty-nine per cent to P. C. Caffee, Portland, Oreg. Lock. 1,678,420; July 24.
Bruce, Alfred W., New York, N. Y. Frame for railroad vehicles. 1,678,323; July 24.
Bruce, Alfred W., New York, N. Y. Frame for railroad vehicles. 1,678,324; July 24.
Brucker, Henry, Newark, N. J., assignor to American Aluminum Ware Company. Spool. 1,677,051; July 24.
Brueck, Theodore M., assignor to Ilex Optical Company, Rochester, N. Y. Photographic shutter. 1,678,179; July 24.
Brumbaugh, Andrew K., assignor to The Autocar Company, Ardmore, Pa. Storage-battery container. 1,678,033; July 24.
Buckley, Edward H., Philadelphia, Pa. Tubular insulator. 1,678,054; July 24.
Budd, Edward G., Manufacturing Company, The. (See Ledwinka, Joseph, assignor.)
Budd, Howard L., Brooklyn, N. Y. Vase or similar article. Des. 75,825; July 24.
Buechler, Joseph C., Hague, N. Dak. Check-book clamp. 1,678,055; July 24.
Bunce, Earl H. (See Singmaster, J. A., Breyer, and Bunce.)
Burgess, George A., Waukegan, assignor to Chicago Hardware Foundry Company, North Chicago, Ill. Coin-controlled electric switch. 1,678,554; July 24.
Burmah Oil Company Limited, The. (See Moore, James, assignor.)
Burns, Katherine E., assignor to Franklin Simon & Company, Inc., New York, N. Y. Coat. Des. 75,826; July 24.

Bushnell, Charles S. (See Howe, W. K., and Bushnell.)
Butin, Emile A., and L. Girard, Lyon, France. Arrangement for directly reproducing on fabric the required pattern. 1,678,325; July 24.
Byrne, Kingston & Co. (See Carlston, William S., assignor.)
Byrnes, James H., Flushing, N. Y. Metal window. 1,677,952; July 24.
C. L. W. Patents Corporation. (See Wagner, Charles L., assignor.)
Cabral, Manuel T., Honolulu, Hawaii. Circuit closer for electric alarms. 1,678,555; July 24.
Caffee, Percy C. (See Brown, Roy E., assignor.)
Calafato, Gaetano, Westbury, N. Y. Radiocabinet or similar article. Des. 75,827; July 24.
California Almond Growers Exchange. (See Bailey, David R., assignor.)
California Cyanide Company. (See Poindexter, R. W., jr., and Dolley, assignors.)
Cameron, James A., assignor to Cameron Machine Company, Brooklyn, N. Y. Winding machine. 1,678,326; July 24.
Cameron Machine Company. (See Cameron, James A., assignor.)
Cameron Machine Company. (See Johnstone, Robert M., assignor.)
Campbell, Clarence J., Oakland, Calif. Cabinet. 1,678,378; July 24.
Campbell, Samuel, Charlottetown, Prince Edward Island, Canada. Implement for facilitating the handling of animals. 1,677,953; July 24.
Canfield, Albert H., Bridgeport, Conn. Rack for articles. Des. 75,828; July 24.
Carey-McFall Co. (See Reukauf, Edward, jr., assignor.)
Carlsen, Andrew E. (See Shadrick, Richard H., assignor.)
Carlsen, Einar F., Chicago, Ill. Automobile signal. 1,677,883; July 24.
Carlson, Carl E., and A. C. Grunwald, assignors to Precision Metal Workers, Chicago, Ill. Flowerpot. Des. 75,829; July 24.
Carlston, William S., Kokomo, Ind., assignor to Byrne, Kingston & Co. Regenerator manifold. 1,678,327; July 24.
Carr, Edward G., Milwaukee, Wis., assignor to The Lakewood Engineering Company, Lakewood, Ohio. Concrete-road machine. 1,678,624; July 24.
Carr, Richard H., and C. B. Watson, Columbus, Ohio, assignors to The Pure Oil Company, Chicago, Ill. Temperature controller for oil-separating towers. 1,678,328; July 24.
Carson, Harry Y., assignor to American Cast Iron Pipe Company, Birmingham, Ala. Well casing. 1,678,280; July 24.
Case, L. E., Inc. (See Deffebaugh, Mark A., assignor.)
Cassaday, Ernest S. (See Larrabee, B. G., Root, and Cassaday.)
Caverly, Harry C., East Orange, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Telephone system. 1,678,103; July 24.
Central Electric Tool Company. (See Weyandt, Carl S., assignor.)
Centre Lighting Fixture Mfg. Co., The. (See Novin, Joseph, assignor.)
Chaffee, Edward F., assignor to The O. M. Edwards Company, Inc., Syracuse, N. Y. Combined sash holder and starter. 1,678,243; July 24.
Chambers, Howard E., Los Angeles, Calif. Adjustable helmet and goggles. 1,678,208; July 24.
Chandler, Charles K., Headquarters of The Royal Air Force, India. Telegraphic and telephonic receiving circuits. 1,677,885; July 24.
Chapman, George A., Forest Hills, and E. W. Wilkinson, Queens Village, assignors to Minerals Separation North American Corporation, New York, N. Y. Coal briquette and making it. 1,678,379; July 24.
Chemical Works. (See Billeter, O., Rothlin, and Peyer, assignors.)
Cheney, Byron M., Chicago, Ill. Rail anchor. 1,678,461; July 24.
Chellew Manufacturing Company. (See Bliss, Chester T., assignor.)
Chicago Card Board Company. (See Ziemmerman, Henry, assignor.)
Chicago Hardware Foundry Company. (See Burgess, George A., assignor.)
Chuse, Harry A., assignor, by mesne assignments, to Mattoon Engine Works, Mattoon, Ill. Uniflow engine. 1,678,209; July 24.
Clarke, William H., and B. G. Cook, Lakewood, Ohio. Pick-up vehicle body and method of handling goods. 1,678,329; July 24.
Cleary, Roy L., Kerlin, Ark. Shaving combination. 1,677,954; July 24.
Cline Electric Manufacturing Company. (See Dresser, C. A., and Hammer, assignors.)
Clyne, Robert G., St. Louis, Mo. Container and producing the same. 1,678,330; July 24.
Cochrane Corporation. (See Gibson, George H., assignor.)
Cole, Eaton, Eureka Springs, Ark. Match-dispensing device. 1,678,281; July 24.
Cole, T. Bert. (See Herron, George A., assignor.)
Cole, Raul F., Mount Vernon, Ohio. Apparatus for drawing sheet glass. 1,678,104; July 24.
Coleman Lamp and Stove Co., The. (See Coleman, William C., assignor.)
Coleman, William C., assignor to Coleman Lamp and Stove Co., Wichita, Kans. Priming device for hydrocarbon burners. 1,678,057; July 24.
Coleman, William C., Wichita, Kans. Liquid-hydrocarbon burner. 1,678,058; July 24.
Colgin, Saladine E., Dallas, Tex. Making a meat curative. 1,678,056; July 24.
Commercial Shearing and Stamping Company, The. (See Proctor, R. V., and Schaab, assignors.)
Commonwealth Steel Company. (See Pflager, Harry M., assignor.)
Comstock-Castle Stove Company. (See Sandell, Joseph H., assignor.)
Concealed Door Check Co. (See Eastman, Floyd K., assignor.)
Conlon, Thomas A., Silver Springs, Md. Cart. 1,678,585; July 24.
Connelly, James A., Hamilton, Ohio. Joint packing. 1,677,884; July 24.
Connersville Blower Co., The. (See Benesh, Matthew E., assignor.)
Connors, Clarence A., assignor of one-third to F. McKnight, Detroit, Mich. Combination fan. 1,677,888; July 24.
Conover, Courtney, Crafton, assignor to The Selden Company, Pittsburgh, Pa. Plastic composition. 1,678,105; July 24.
Consolidated Instrument Company of America. (See Leopold, Joseph, assignor.)
Continuous Train Control Corporation. (See Coop, W. L., and Stone, assignors.)
Cook, Albert E., Evanston, assignor to C. B. Cook, Chicago, Ill. Auto marine vehicle. 1,678,180; July 24.
Cook, Byron G. (See Clarke, W. H., and Cook.)
Cook, Charles B. (See Cook, Albert E., assignor.)
Coop, William L., and C. B. Stone, assignors to Continuous Train Control Corporation, Detroit, Mich. Air-brake-control mechanism. 1,678,106; July 24.
Cooper, Jehangir M., Bombay, India. Printing process and apparatus therefor. 1,678,497; July 24.
Cooper, Thomas L. R., London, England. Dynamo-electric machine. 1,678,380; July 24.
Copson, Ernest D., Linwood, assignor to The Viscose Company, Marcus Hook, Pa. Pump. 1,678,556; July 24.
Corbilin, Henri, Paris, France. Refrigerator car. 1,678,421; July 24.
Coryell, Charles N., New York, N. Y. Article holder. 1,678,282; July 24.
Cotta Transmission Corporation. (See Tritz, John H., assignor.)
Covert, James D., Montclair, N. J. Smoke-chamber lining. 1,677,914; July 24.
Crafts, Curtis S., Oak Park, Ill., assignor to Goss Printing Press Company. Quick lock-up for plate cylinders. 1,677,955; July 24.
Cramer, Thomas M., Long Beach, Calif., assignor to Pacific Coast Borax Company. Production of commercial borax from $Na_2O.2B_2O_3.4H_2O$. 1,678,381; July 24.
Crane, Frank G., Montague, assignor of one-half to Detroit Sulphite Pulp & Paper Co., Detroit, Mich. Slitting machine. 1,677,915; July 24.
Cravey, James B., and P. R. Pierson, Montogemery, Ala. Gasoline-dispensing device. 1,678,586; July 24.
Crawford, Alfred, assignor to Crawford Manufacturing Company, New Brunswick, N. J. Trip mechanism for knitting-machine stop motions. 1,678,557; July 24.
Crawford Manufacturing Company. (See Crawford, Alfred, assignor.)
Crayssac, Léon, Cette, France. Press for the quick drying and glazing of photographic prints. 1,677,916; July 24.
Crimmel, Alvie C., Hartford City, Ind. Vitreous drawer pull. 1,678,498; July 24.
Cromer, Harry I., Oak Park, Ill. Reaping or harvesting machine for harvesting hemp or similar stalks or crops. 1,678,134; July 24.
Crosman, G. A., & Sons Co. (See Crosman G. L., and Nason, assignors.)
Crosman, George L., and A. P. Nason, Portland, assignor to G. A. Crosman & Sons Co., Deering Junction, Portland, Me. Snow scoop or shovel. 1,678,135; July 24.
Cucinotto, Francesco, New York, N. Y. Game apparatus. 1,678,462; July 24.
Cumpston, Frederick B., Blooming Grove, Tex. Cotton-boll breaker and cleaner. 1,678,210; July 24.
Cunniff, Edward A., Waltham, assignor to Draper Corporation. Hopedale, Mass. Feeler mechanism for looms. 1,678,587; July 24.
Curtis, James B. (See Curtis, Walter V. and J. B.)
Curtis, Walter V., Davenport, Iowa, and J. B. Curtis, Chicago, Ill. Hog ring and the like. 1,678,558; July 24.
Cutler-Hammer Mfg. Co., The. (See Wiegand, Henry J., assignor.)
Daradice, Michael. (See Nagy, Louis, assignor.)
D'Ardenne, Walter H., Philadelphia, Pa. Heater. 1,678,059; July 24.
Davidson, George F., Shortlands, England. Pneumatic tire. 1,678,211; July 24.
Davis, Florence P., executrix. (See Horne, John F.)

Davis, Robert W., Ozone Park, assignor to himself and Z. Littman, New York, N. Y. Resilient support. 1,678,034; July 24.

Davis, Robert W., assignor to himself and Z. Littman, New York, N. Y. Vehicle spring. 1,678,035; July 24.

Davis, Sewell, and A. La Fon, assignors to Polly Wiggin, Inc., Newark, N. J. Can opener. 1,678,244; July 24.

Davis, Walter T., assignor to Wheeling Stamping Company, Wheeling, W. Va. Cap-applying means for tube-working machines. 1,678,463; July 24.

Daw, Joseph, Quebec, Canada, assignor to Brown Company, Berlin, N. H. Material-handling device. 1,678,382; July 24.

Dean, Samuel W., Houlton, Me., assignor to American Telephone and Telegraph Company. Broadside antenna array. 1,677,956; July 24.

Dearsley, Irwin E., assignor to Walker Manufacturing Company, Racine, Wis. Lifting jack. Re17,050; July 24.

Delbaugh, Mark A., assignor to L. E. Case, Inc., Schenectady, N. Y. Combined table and casing for a washing machine or the like. Des. 75,830; July 24.

De Gerson, Francis, born R. J. Berthier, Paris, France. Bottle utilizable as a vase by turning it over. 1,678,588; July 24.

Delco-Light Company. (See Kellholtz, Lester S., assignor.)

Dennis, Walcott. (See Schlitt, J. L., and Dennis.)

Desautels, Charles H., Springfield, assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Apparatus for cutting rubber sheets. 1,678,036; July 24.

Despard, Victor R., and H. C. R. Popp, assignors to McGill Manufacturing Company, Valparaiso, Ind. Electric cluster lamp body and shade holder. 1,678,331; July 24.

Detroit Sulphite Pulp & Paper Co. (See Crane, Frank G., assignor.)

Deutsch, Leonhard, and I. Thorn, Vienna, Austria, assignors to The Selden Company, Pittsburgh, Pa. Producing light-colored and color-fast, hard, infusible, and insoluble products of condensation of phenols and aldehydes. 1,678,107; July 24.

Deutsch, Leonhard, and I. Thorn, Vienna, Austria, assignors to The Selden Company, Pittsburgh, Pa. Hardening the products of condensation of phenols and aldehydes. 1,678,108; July 24.

Devine, Joseph P., Buffalo, N. Y. Drying materials. 1,678,559; July 24.

Dewey, Clarence L., Elkhart, Ind., assignor to Outing Manufacturing Co. Stringed musical instrument. 1,678,136; July 24.

Dickinson, William E., and J. J. Morgan, New Haven, Conn. Car-unloading apparatus. 1,678,245; July 24.

Diebold, Pierre, Nancy, France. Ironing steam press. 1,678,464; July 24.

Diebold, Pierre, Nancy, France. Ironing steam press. 1,678,465; July 24.

Differ, George, Hamilton, Mont. Rotary box stamp. 1,678,589; July 24.

Dillon, James E., Masontown, Pa. Protective device for electrically-operated mining machines, and the like. 1,678,283; July 24.

Dixson, Harry, Des Moines, Iowa. Spring-roller assembly. 1,678,590; July 24.

Doll & Co. Aktiengesellschaft. (See Reiachl, Ludwig, assignor.)

Dolley, Paul T. (See Poindexter, R. W., jr., and Dolley.)

Domizi, David F., Cleveland, Ohio, assignor, by mesne assignments, to Relay Motor Products Corporation, Bridgeport, Conn. Motor-vehicle construction. 1,677,917; July 24.

Dorsey, Herbert G., Gloucester, and R. L. Williams, Newton, assignors to Submarine Signal Corporation, Boston, Mass. Apparatus for measuring distance. 1,678,560; July 24.

Douglas, Harry A., Bronson, Mich. Casing having light-transmitting closure. 1,678,137; July 24.

Douglas, Harry A., Bronson, Mich. Circuit connecter. 1,678,138; July 24.

Dow Chemical Company, The. (See Strosacker, C. J., and Kennedy, assignors.)

Drake, John L., assignor to The Libbey-Owens Sheet Glass Company, Toledo, Ohio. Sheet-glass-producing apparatus. 1,678,060; July 24.

Draper Corporation. (See Cunniff, Edward A., assignor.)

Draper Corporation. (See Northrop, Jonas, assignor.)

Draper Corporation. (See Tebo, William A., assignor.)

Drayer, Samuel E., assignor to The Guide Motor Lamp Manufacturing Company, Cleveland, Ohio. Side lamp for automobiles. 1,678,332; July 24.

Dresser, Charles A., Greenburg, N. Y., and E. W. Hammer, South Orange, N. J., assignors to Cline Electric Manufacturing Company, Chicago, Ill. Tension device for newspaper-roll stands. 1,678,109; July 24.

Dugdill, John, Hazel Grove, near Stockport, England. Movable support for electric light, gas, and other purposes. 1,678,422; July 24.

Duhsel, Ferdinand, Denver, Colo. Dustpan. 1,678,284; July 24.

Duisenberg, Walter, Los Gatos, and J. H. Macartney, San Francisco, Calif. Combined mill, conveyer, drier, and classifier. 1,678,002; July 24.

Dunn, Edward L., East Orange, N. J., assignor to Otis Elevator Company, New York, N. Y. Leveling device for elevators. 1,678,423; July 24.

Dunn Manufacturing Co. (See Dunn, William H., assignor.)

Dunn, William G., Clarinda, Iowa. Awning bracket. 1,678,561; July 24.

Dunn, William H., assignor to Dunn Manufacturing Co., Chicago, Ill. Cleansing machine. 1,678,037; July 24.

Du Pont, E. I., de Nemours & Company. (See Lawrie, James W., assignor.)

Duquesne Steel Foundry Company. (See Troutman, William E., assignor.)

Durgin, Leon A., Danvers, Mass. Measuring and recording machine. 1,678,181; July 24.

Eagon, Lloyd L., New York, N. Y., assignor to American Telephone and Telegraph Company. Telephone system. 1,677,957; July 24.

Eastman, Floyd K., assignor to Concealed Door Check Co., Kokomo, Ind. Doorcheck. 1,678,499; July 24.

Eaton, Philip K., Olympia, Wash. Marking X-ray films. 1,678,038; July 24.

Eddins, Web M., Barnett, Miss. Combination trimming saw and slab kicker. 1,677,958; July 24.

Edens, Louis M., Cabool, Mo. Medicinal instrument. 1,678,562; July 24.

Edge Moor Iron Company. (See Bradford, Henry B., assignor.)

Edison Storage Battery Company. (See Payne, Paul D., assignor.)

Edison, Thomas A., Incorporated. (See Edison, Thomas A., assignor.)

Edison, Thomas A., Llewellyn Park, assignor to Thomas A. Edison, Incorporated, West Orange, N. J. Production of alkali-metal compounds from silicates containing them. 1,678,246; July 24.

Edmunds, Glenn E., assignor to The Bonney-Floyd Company, Columbus, Ohio. Mine car. 1,678,563; July 24.

Edwards, Clarence G., Los Angeles, Calif. Counterthrust pressure motor. 1,678,424; July 24.

Edwards, O. M., Company, The. (See Chaffee, Edward F., assignor.)

Eichwede, Heinz. (See Wagner, H., Eichwede, and Fischer.)

Eldred, Byron E., Kensington, N. Y. Aiding audition. 1,678,564; July 24.

Eldred, Byron E., New York, N. Y. Utilizing air waves for aural kinesitherapy. 1,678,565; July 24.

Electrolux Servel Corporation. (See Von Platen, B. C., and Munters, assignors.)

Electro Metallurgical Company. (See Mitchell, Walter M., assignor.)

Elliott-Fisher Company. (See Lentz, Lawrence E., assignor.)

Ellis, Russell S., Philadelphia, Pa. Concrete lamp stand. 1,678,500; July 24.

Ellis, Wilson R., Berkeley, Calif. Agitator. 1,678,425; July 24.

Emerick, Vincent C. (See Brophy, James H., assignor.)

Ericksen, John C., Falls City, Nebr. Fluid-pressure-control device. 1,677,959; July 24.

Erickson, Knute E., Portland, Oreg. Street traffic signal. Des. 75,831; July 24.

Ernst, Wilhelm E., Berlin-Schoneberg, Germany. Auxiliary combustion space in internal-combustion engines. 1,678,212; July 24.

Eskholme, John W., Glen Ridge, N. J. Door stop and latch. 1,677,960; July 24.

Estes, Marion S., assignor to Western Electric Company, Incorporated, New York, N. Y. Transmitter for high-frequency sound signaling. 1,678,182; July 24.

Fahrbach, Ferdinand G., Pelham Manor, N. Y. Repair device for auto skid chains. 1,678,003; July 24.

Fahrenwald, Frank A., Chicago, Ill. Apparatus for testing abrasion resistance. 1,678,110; July 24.

Falkiner, Ralph S., Melbourne, Victoria, Australia. Cane-harvesting machine. 1,678,285; July 24.

Fay, Joseph G., Seattle, Wash. Governor. 1,677,961; July 24.

Feldman, Abraham G., Chicago, Ill. Nursery seat. 1,678,501; July 24.

Fentress, George E., Los Angeles, Calif. Band-wheel counterweight. 1,678,286; July 24.

Fentress, George E., Los Angeles, Calif. Belt tightener. 1,678,287; July 24.

Ferngren, Enoch T., assignor to The Owens Bottle Company, Toledo, Ohio. Feeding and shaping molten glass. 1,678,247; July 24.

Ferris, William S., Elkhart, Ind. Chair. 1,678,004; July 24.

Field, Herbert D., assignor of one-half to R. C. McCrystal, Los Angeles, Calif. Carton knock-out. 1,678,426; July 24.

Figge, Carroll C., Chicago, Ill. Roof and shingle securing means. 1,678,333; July 24.

Finley, Thomas M., St. Louis, Mo. Flying machine. 1,677,962; July 24.

Firsching, Joseph A., Utica, N. Y. Drying machine. 1,678,383; July 24.

Fischer, Erich. (See Wagner, H., Eichwede, and Fischer.)

Fischer, Frank F., Oklahoma City, Okla. Memorial grave marker. Des. 75,832; July 24.

Fischer, Oskar, Berlin-Friedenau, Germany, assignor to N. V. Machina Maatschappij vor Handel en Industrie, Amsterdam, the Netherlands. Keyboard for typewriting machines. 1,678,334; July 24.

Fisher, Garfield W. (See Jones, L. S., Fisher, and Henrikson.)

Fisk Rubber Company, The. (See Desautels, Charles H., assignor.)

Fisk Rubber Company, The. (See Hansen, Raymond, assignor.)

Fisk Rubber Company, The. (See Hennessy, Daniel E., assignor.)

Fisk Rubber Company, The. (See Melvin, Ernest W., assignor.)

Fisk Rubber Company, The. (See Midgley, Thomas, assignor.)

Flanigan, E. B., Incorporated. (See Flanigan, Edwin B., assignor.)

Flanigan, Edwin B., assignor to E. B. Flanigan, Incorporated, Wilkes-Barre, Pa. Vehicle brake. 1,678,427; July 24.

Fleming, Samuel N., Hopkinsville, Ky. Accessory for radio signal receivers. 1,678,288; July 24.

Ford, Bruce, Philadelphia, Pa. Treatment of wood and product thereof. 1,677,963; July 24.

Forney, Arthur, Baltimore, Md. Check-controlled vending machine. 1,678,502; July 24.

Fortier, Charles L., assignor to Johnson Service Company, Milwaukee, Wis. Temperature regulation. 1,678,213; July 24.

Foster Wheeler Corporation. (See Keenan, Walter F., jr., assignor.)

Foster Wheeler Corporation. (See Nellis, Joseph J., assignor.)

Found, Ernest E., Hillsdale, Mich. Stair-rod holder. Des. 75,833; July 24.

Fourneau, Ernest, Paris, France, assignor to Les Etablissements Poulenc Freres. Salts of 3-acetylamino-4-hydroxyphenylarsenic acid and preparing the same. 1,677,964; July 24.

Fowler, Edward, and J. V. Lewis, Chattanooga, Tenn. Insecticide distributor. 1,678,061; July 24.

Fowler, William S., assignor to Hampden Glazed Paper & Card Company, Holyoke, Mass. Cover paper or the like. Des. 75,834; July 24.

Franco, Attilio, Milan, Italy. Articulated coupling for rigid-frame units. 1,678,428; July 24.

Frank, Harry S., Brooklyn, N. Y. Piston ring. 1,678,248; July 24.

Franklin Simon & Company. (See Burns, Katherine E., assignor.)

Frantz, Walter A., Cleveland, Ohio. Suction cleaner. 1,678,111; July 24.

Frasca, Philip. (See Martino, N., Frasca, and Oster.)

Frederics, E., Inc. (See Frederics, Ernest O., assignor.)

Frederics, Ernest O., assignor to E. Frederics, Inc., New York N. Y. Fixture. 1,678,249; July 24.

Freeland, F. B., et al. (See Weston, Charles W., assignor.)

French Battery Company. (See Meisekothen, Edwin E., assignor.)

Friedrich, Robert, Philadephia, Pa. Hosiery. Des. 75,835; July 24.

Friendly, Herbert M., Chicago, Ill. Automatic telephone system. 1,678,503; July 24.

Frigidaire Corporation. (See King, J. G., and Hull, assignors.)

Friis, Harald T., Cliftwood, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Signal reception. 1,678,183; July 24.

Frost, Albert N., Vancouver, British Columbia, Canada. Can opener. 1,678,112; July 24.

Fruit Belt Preserving Company. (See Bartleson, Alfred F., assignor.)

Fruwirth, Arthur, Brooklyn, N. Y. Producing designs for reproduction. 1,677,965; July 24.

Fulweiler, Walter H., Wallingford, assignor to The U. G. I. Contracting Company, Philadelphia, Pa. Quantitative determination of naphthalene in illuminating gas. 1,678,591; July 24.

Furber, Frederick M., Revere, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Method of and apparatus for softening shoe materials. 1,678,139; July 24.

Furber, Frederick M., Revere, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Apparatus for heating and softening shoes and parts thereof. 1,678,140; July 24.

Fur Guide Machine Corporation. (See Ross, Harry, assignor.)

Furst, John K. (See Allen, L. E., and Furst.)

Gairing, Emil, Detroit, Mich. Universal machine-shop fixture. 1,677,889; July 24.

Gallant, Robert M., assignor of one-half to W. S. Berry, Boston, Mass. Stocking protector. 1,678,566; July 24.

Gallistel, Clarence P., assignor to Mid-West Box Company, Chicago, Ill. Shipping box for articles. 1,677,918; July 24.

Gams, Alphonse, and P. Scheidegger, Basel, assignors to the firm Society of Chemical Industry in Basle, Basel, Switzerland. Organic gold compounds and making same. 1,678,429; July 24.

Garabrant, Joseph E. (See Herbert, F. D., Kraemer, and Garabrant.)

Garey, John P., Elmira Heights, N. Y. Spinning frame. 1,678,039; July 24.

Garlock Packing Company, The. (See Hubbard, Cecil R., assignor.)

Garner, James B., and G. B. Leyden, Pittsburgh, Pa., assignors to Standard Oil Development Company. Treating oil wells. 1,678,592; July 24.

Gaston, Ralph M., assignor to Mall Tool Company, Chicago, Ill. Flexible shaft. 1,678,335; July 24.

General Electric Company. (See Bennett, Ralph S., assignor.)

General Fuel Briquette Corporation, The. (See Stillman, Albert L., assignor.)

General Railway Signal Company. (See Howe, Winthrop K., assignor.)

General Railway Signal Company. (See Howe, W. K., and Bushnell, assignors.)

General Railway Signal Company. (See Loftin, Edward H., assignor.)

General Railway Signal Company. (See Preston, Neil D., assignor.)

General Railway Signal Company. (See Ross, Oscar A., assignor.)

General Rubber Company. (See Smith, Omar H., assignor.)

General Zeolite Company. (See Green, Walter H., assignor.)

Gerrard Company, The. (See Weeks, Charles S., assignor.)

Getchell, Benjamin E., assignor to The Trumbull Electric Manufacturing Company, Plainville, Conn. Motor-starting switch. 1,678,336; July 24.

Gibson, George H., Montclair, assignor to Cochrane Corporation, Philadelphia, Pa. Heating, deaerating, and evaporating water. 1,677,890; July 24.

Gibson, Incorporated. (See Altermatt, George, assignor.)

Giese, Richard S., Sewickley Heights Township, Allegheny County, Pa. Glass tumbler. Des. 75,836; July 24.

Gilbert, John J., Port Washington, assignor to Western Electric Company, Incorporated, New York, N. Y. Submarine signaling. 1,678,184; July 24.

Gill, John W., Glendale, Calif. Wall-bracket lighting fixture. Des. 75,837; July 24.

Girard, Louis. (See Butin, E. A., and Girard.)

Glover, Charles W., Pinner, England. Building construction. 1,678,504; July 24.

Goldhammer, Leo, assignor to A. Hch. Rietzschel G. m. b. H., Munich, Germany. Spool holder for film cameras. 1,678,430; July 24.

Gousett, Robert R., assignor of one-half to A. J. Smith, one-eighth to W. D. Spencer, and one thirty-second to V. V. Ullom, Los Angeles, Calif. Time-controlled circuit controller. 1,678,217; July 24.

Goodrich, B. F., Company, The. (See Livermore, George A., assignor.)

Goodrich, Chauncey M., Windsor, Ontario, Canada. Overhead support. 1,678,431; July 24.

Goss Printing Press Company. (See Crafts, Curtis S., assignor.)

Graham, Alfred, et al., executor. (See Graham, Edward A.)

Graham Amplion Limited. (See Graham, Edward A., assignor.)

Graham, Edward A., deceased, Brockley, London; M. Graham, executrix, Beckenham, and A. Graham, executor, Forest Hills, London, assignors to Graham Amplion Limited, London, England. Acoustic amplifier and radiator. 1,678,214; July 24.

Graham, Maria, et al., executrix. (See Graham, Edward A.)

Grant, John. (See Phipps, John T., assignor.)

Grasselli Dyestuff Corporation. (See Laska, L., and Zletscher, assignors.)

Grasselli Dyestuff Corporation. (See Wagner, H., Eichwede, and Fischer, assignors.)

Grasselli Dyestuff Corporation. (See Winterhalder, Wilhelm, assignor.)

Graves, Benjamin P., Cranston, R. I., assignor to Brown and Sharpe Manufacturing Company. Variable-speed driving mechanism. 1,678,384; July 24.

Greathouse, Josephine A. (See Winsboro, William A.)

Green, Estill I., East Orange, N. J., assignor to American Telephone and Telegraph Company. Carrier signaling system. 1,677,966; July 24.

Green, Walter H., assignor to General Zeolite Company, Chicago, Ill. Water-softening apparatus. 1,677,891; July 24.

Greene, Albert C., Willesden Junction, London, England. Marker. 1,678,215; July 24.

Greenhouse, Martin E., Philadelphia, Pa. Shock absorber for vehicles. 1,678,040; July 24.

Greer, Benjamin J., assignor of one-half to M. A. Jackson, Athens, Tex. Wrench. 1,678,216; July 24.

Gregory, Eugene, Ann Arbor, Mich. Finger-tip pencil. 1,678,505; July 24.

Griffin, Elbert, Terre Haute, Ind. Panel for furniture. Des. 75,839; July 24.

Griffin, Gordon, et al. (See Weston, Charles W., assignor.)

Griffith, Graves, San Francisco, Calif. Range finder. 1,678,062; July 24.

Griffiths, William U., Philadelphia, Pa. Drain board. 1,678,041; July 24.

Grill, Philip, assignor to the firm Grill & Schwartz, New York, N. Y. Finger ring. Des. 75,838; July 24.
Grill & Schwartz. (See Grill, Philip, assignor.)
Grothey, Ivan W., Laconia, N. H., assignor to Scott & Williams, Incorporated, New York, N. Y. Circular-knitting machine. 1,678,385; July 24.
Grothey, Ivan W., Laconia, N. H., assignor to Scott & Williams, Incorporated, New York, N. Y. Drop-stitch mechanism for knitting machines. 1,678,386; July 24.
Grunwald, Albert C. (See Carlson, C. E., and Grunwald.)
Gruss, Roland M., San Francisco, Calif. Antiglare shield and making the same. 1,678,218; July 24.
Guide Motor Lamp Manufacturing Company, The. (See Drayer, Samuel E., assignor.)
Guillet, Albert M., Charlotte, N. C. Roll rack. 1,678,506; July 24.
Gunckel, Zenas W., Guthrie, Okla. Foot-rest attachment for closets. 1,678,466; July 24.
Gustafson, Carl A., assignor to Russell Grader Manufacturing Co., Minneapolis, Minn. Road-maintenance machine. 1,678,113; July 24.
Gustafson, Carl A., assignor to Russel-Grader Manufacturing Company, Minneapolis, Minn. Draft appliance. 1,678,114; July 24.
Hadermann, Frederick E., White Plains, assignor to University Manufacturing & Sales Co. Inc., New York, N. Y. Bracket for lighting fixtures or similar articles. Des. 75,840; July 24.
Hails, Edward T., Montgomery, Ala., assignor to Steiner Sales Company, Salt Lake City, Utah. Sanitary roll-towel cabinet. 1,678,220; July 24.
Hale, Robert M., assignor to Minerals Separation North American Corporation, New York, N. Y. Briquette and producing it. 1,678,387; July 24.
Halifax, Daniel F., Newark, N. J. Toaster. 1,678,337; July 24.
Hallerman, Frank W. A., St. Louis, Mo. Bail handle. 1,678,005; July 24.
Hallquist, Burt E. (See Hanson, E. C., and Hallquist.)
Hammer, Edwin W. (See Dresser, C. A., and Hammer.)
Hampden Glazed Paper & Card Company. (See Fowler, William S., assignor.)
Hancock, William G., and L. T. Stromswold, assignors to Magic Grain Dump Company, Minot, N. Dak. Wagon and truck dump. Re17,046; July 24.
Hanley Company. (See Hendryx, Dwight B., assignor.)
Hanon, Cyrus E., St. Louis, Mo. Gasoline gauge. 1,678,115; July 24.
Hansen, Albert, and M. J. Torp, Harlan, Iowa. Governor for explosive engines. 1,678,219; July 24.
Hansen, Albert E., Chicago, Ill. Radio receiving set cabinet. Des. 75,841; July 24.
Hansen, Christian, Woodcliff, N. J. Interchangeable sign or bulletin board. 1,677,919; July 24.
Hansen, John, Milltown, Mont. Fishing and retrieving otter. 1,678,593; July 24.
Hansen, Raymond, Cudahy, Wis., assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Vulcanizing. 1,678,042; July 24.
Hanson, Edward C., and E. Hallquist, assignors to O. B. McClintock Company, Minneapolis, Minn. Entrance door for a depository. Des. 75,842; July 24.
Harper, Robert W., East Orange, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Telephone system. 1,678,185; July 24.
Harrison, George D. (See Myers, W. L., and Harrison.)
Harrison, Henry C., Port Washington, assignor to Western Electric Company, Incorporated, New York, N. Y. Device for the transmission of mechanical vibratory energy. 1,678,116; July 24.
Harrison Radiator Corporation. (See Muir, Wellington, W., assignor.)
Hart, George H., West Hartford, Conn. Automatically-controlled switch. 1,678,507; July 24.
Hart, Gerald W., West Hartford, assignor to The Hart Manufacturing Company, Hartford, Conn. Electric switch. 1,678,508; July 24.
Hart Manufacturing Company, The. (See Hart, Gerald W., assignor.)
Harter, Charles, St. Louis, Mo. Carline reenforcement and load-lifting arrangement. 1,678,509; July 24.
Harter, Charles, St. Louis, Mo. Carline reenforcement and load-lifting arrangement. 1,678,510; July 24.
Hartford-Empire Company. (See Howard, George E., assignor.)
Hartmann, Anton V., assignor of one-half to V. H. Stevens, St. Paul, Minn. Variable-speed gearing. 1,678,289; July 24.
Haslacher, Alfred B., Farmington, Calif. Game device. 1,678,432; July 24.
Headley, Frederick H., Northfield, near Birmingham, England. Metallic chair, stool, seat, and the like. 1,678,006; July 24.
Heaphy, Edward T., et al. (See Marshall, Arthur J., assignor.)
Heaphy, William A., et al. (See Marshall, Arthur J., assignor.)
Hebb, Ammon W., New York, N. Y. Connecting device. 1,678,467; July 24.
Hebbard Manufacturing Company. (See Shackelford, Edward H., jr., assignor.)
Hedberg, Leonore F. C. C. W., née Ilse, Stockholm, Sweden. Hair-undulating apparatus. 1,678,433; July 24.
Heffernan, Edward, Gladesville, near Sydney, assignor to D. O. Y. Narme, Sydney, Australia. Stay for casement windows and the like. 1,678,511; July 24.
Heinz, John L. C., Chicago, Ill. Hinge means for casement windows. 1,678,512; July 24.
Hendey, George A., and R. A. Schatzel, Rome, N. Y., said Schatzel assignor to said Hendey. Reflector shield for headlights. 1,678,250; July 24.
Hendryx, Dwight B., assignor to Hanley Company, Bradford, Pa. Superstructure for tunnel-kiln cars. 1,678,251; July 24.
Hennessy, Daniel E., Milwaukee, Wis., assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Bead-forming device. 1,678,043; July 24.
Henrikson, Carl G. (See Jones, L. S., Fisher, and Henrikson.)
Herbert, Frederick D., Upper Montclair, N. J., W. L. Kraemer, Brooklyn, N. Y., and J. E. Garabrant, Bloomfield, N. J., assignors to Metal Edge Filter Corporation. Filter. 1,677,892; July 24.
Herchert, Edwin J., Guttenberg, Iowa. Cross member for nonskid chains. 1,678,063; July 24.
Herron, George A., assignor of 51 per cent to T. B. Cole, Ottawa, Ontario, Canada. Operating mechanism for whippers. 1,678,468; July 24.
Hewitt, Edward R., Midvale, N. J., and A. F. Masury, assignors to International Motor Company, New York, N. Y. Air filter. 1,678,044; July 24.
Heyman, Joseph J., assignor to Milano Furniture Company, Chicago, Ill. Table or similar article. Des. 75,843; July 24.
Heyman, Joseph J., assignor to Milano Furniture Company, Chicago, Ill. Table or similar article. Des. 75,844; July 24.
Heywood-Wakefield Company. (See Lloyd, Marshall B., assignor.)
Hickok Manufacturing Company. (See Beck, Alwin H., assignor).
Higgins, George H., assignor to The Brewer-Titchener Corporation, Cortland, N. Y. Forging insulator caps. 1,678,594; July 24.
Hill, William H., Canton, Ohio. Fuel vaporizer. 1,678,045; July 24.
Hillery, John J., Boonton, N. J. Attachment for automotive vehicles. 1,678,007. July 24.
Hiltz, Harry B., New York, assignor, by mesne assignments, to Autosales Corporation, Long Island City, N. Y. Coin-controlled mechanism. 1,677,893; July 24.
Hindle, John H. and T., Haslingden, England. Loom for weaving. 1,678,434; July 24.
Hindle, Thomas. (See Hindle, John H. and T.)
Hines, Gail H., Lansing, Mich. Power-control device. 1,678,595; July 24.
Hird-Anderson Machinery Co. (See Hird, John B., Jr., assignor).
Hird, John B., Jr., Seattle, Wash., assignor to Hird-Anderson Machinery Co. Internal-combustion engine. 1,678,221; July 24.
Hoagland, Frank O., Bridgeport, Conn., assignor to Pratt & Whitney Company, New York, N. Y. Adjustable snap gauge. 1,678,290; July 24.
Hoelzel, Herman E., Elmhurst, Ill. Pattern cutter. 1,678,186; July 24.
Hoerr, Louis A., assignor to Western Railway Equipment Company, St. Louis, Mo. Draft gear. 1,678,141; July 24.
Hoffman, Arthur M. A., Passaic, N. J. Stocking. Des. 75,846. July 24.
Holden, Joseph B., Canastota, N. Y. Combination floor and ceiling plate. 1,678,388; July 24.
Holden, William H. T., Brooklyn, N. Y., assignor to American Telephone and Telegraph Company, Radio signaling system. 1,677,967; July 24.
Holmes, Arthur, Newark, N. J., assignor to The Holmes Automobile Company, Canton, Ohio. Oil thermometer. 1,678,389; July 24.
Holmes Automobile Company, The. (See Holmes, Arthur, assignor.)
Holmes, Dyer B., Los Angeles, Calif. Maturation of fruit. 1,678,046; July 24.
Holmes, Morris P., Claremont, N. H., assignor to Sullivan Machinery Company. Centrifugal cleaner. 1,678,338; July 24.
Holmes, William H., Mount Vernon, N. Y. Self-teaching device. 1,678,621; July 24.
Homberg, Felix, Barmen, Germany, assignor to American Nuplax Corporation, New York, N. Y. Molding albumen-containing masses. 1,678,117; July 24.
Hopkins, Arthur C., assignor to National-Standard Company, Niles, Mich. Lifting jack. 1,678,460; July 24.
Hopkins, James E., Denver, Colo. Apparatus and method for recovering precious metals. 1,678,142; July 24.
Horne, John F., deceased; F. P. Davis, executrix, Portland, Me. Clamping band. 1,678,622; July 24.
Horwitt, Paul H., assignor to Independent Paper Mills, Inc., Brooklyn, N. Y. Dispenser. 1,678,339; July 24.

Hosford, William F., Maplewood, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Working fibrous material. 1,678,390; July 24.
Horlid, Norman G., Longmont, Colo., assignor to Belden Manufacturing Company, Chicago, Ill. Ignition-timer wiring assembly. 1,678,118; July 24.
Howard, Charles L., Chicago, Ill., assignor to Western Railway Equipment Co., St. Louis, Mo. Floor clip. 1,678,143; July 24.
Howard, George E., Butler, Pa., assignor, by mesne assignments, to Hartford-Empire Company, Hartford, Conn. Method and apparatus for feeding molten glass. 1,678,291; July 24.
Howe, James F., Worcester, Mass., assignor to The American Steel and Wire Company of New Jersey. Cable. 1,678,292; July 24.
Howe, Winthrop K., assignor to General Railway Signal Company, Rochester, N. Y. Train control. 1,678,614; July 24.
Howe, Winthrop K., and C. S. Bushnell, assignors to General Railway Signal Company, Rochester, N. Y. Train control. 1,678,615; July 24.
Hower, John B., and J. V. Zeller, assignors to The Akron-Selle Company, Akron, Ohio. Liquid gauge. 1,678,513; July 24.
Howland, Joseph L., Cleveland, Ohio. Abrasive wheel. 1,678,596; July 24.
Höyer, Sigurd, Oslo, Norway. Permanent dam and weir. 1,678,515; July 24.
Hubbard, Cecil R., Newark, assignor to The Garlock Packing Company, Palmyra, N. Y. Making brushes. 1,677,920; July 24.
Hubbard, Henry L., Cleveland, Ohio. Automobile heater. 1,678,567; July 24.
Hubbell, Harvey, deceased, Bridgeport, Conn., L. E. Hubbell, executrix. Adjustable candle socket. 1,678,144; July 24.
Hubbell, Louie E., executrix. (See Hubbell, Harvey, assignor.)
Hudson Motor Car Company. (See Toncray, Millard H., assignor.)
Hufft, John M., Tuscon, Ariz. Rail joint. 1,678,391; July 24.
Hughes, William, Taunton, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Fastener-applying device. 1,677,968; July 24.
Hulbert, William P., Middleburg, Va. Saddle girth. 1,678,514; July 24.
Hull, Harry B. (See King, J. G., and Hull.)
Hulme, George, Detroit, Mich. Signal device. 1,678,470; July 24.
Hummert, Robert H., assignor to The S. H. Thomson Manufacturing Company, Dayton, Ohio. Radiator cap. Des. 75,847; July 24.
Humphrey, Andrew, Glenlyon, Pa. Attachment for sound-reproducing machines. 1,678,568; July 24.
Hünnebeck, Emil M., Hosel, Germany. Self-contained latticework. 1,678,435; July 24.
Hunter, David E., assignor to Shaw-Walker Company, Muskegon, Mich. Heat resisting filing device. 1,678,471; July 24.
Hursh, Henry B., C. J. Anderson, and W. M. Bartels, Syracuse, N. Y. Bench leg. 1,678,392; July 24.
Hutnikow, Theodore, Brooklyn, N. Y., assignor to Voices Incorporated, Newark, N. J. Doll's voice. 1,678,222; July 24.
Hutnikow, Theodore, Brooklyn, N. Y., assignor to Voices Incorporated, Newark, N. J. Sound-producting device. 1,678,223; July 24.
Ilex Optical Company. (See Brueck, Theodore M., assignor.)
Ilex Optical Company. (See Klein, Rudolph, assignor.)
Illingworth, William H., Halifax, England. Electrical cut-out. 1,678,187; July 24.
Independent Paper Mills, Inc. (See Horwitt, Paul H., assignor.)
Indianapolis Pump & Tube Company. (See Noblitt, Quintin G., assignor.)
International Motor Company. (See Hewitt, E. R., and Masury, assignors.)
International Motor Company. (See Wirrer, Gottfried, assignor.)
J. & C. G. Bolinders Mek. Verkstads Aktiebolag. (See Liffiander, Johan O., assignor.)
Jackman, J. W., & Company Limited. (See Neville, Frederick W., assignor.)
Jackson, Joseph G., Chicago, Ill. Baking pan. 1,678,008; July 24.
Jackson, Merriott A. (See Greer, Benjamin J., assignor.)
Jacobus, David S., Jersey City, assignor to The Babcock & Wilcox Company, Bayonne, N. J. Steam boiler. 1,677,969; July 24.
Jaeger, Alphons O., Hamburg, N. Y., assignor to The Selden Company, Pittsburgh, Pa. Reviving catalysts. 1,678,626; July 24.
Jaeger, Alphons O., Hamburg, N. Y., assignor to The Selden Company, Pittsburgh, Pa. Regenerating catalysts. 1,678,627; July 24.
Janette, John T., Chicago, Ill. Safety device for fuel systems. 1,677,970; July 24.
Janssen, William, Lagrange, Tex. Dump truck. 1,678,569; July 24.
Johnson, Arthur L., Oak Park, Ill. Chair back. Des. 75,848; July 24.
Johnson & Johnson. (See Mathee, William H., assignor.)
Johnson, Jonas G., Baltimore, Md. Fireplace. Des. 75,849; July 24.
Johnson, Jules K., Pittsburgh, Pa. Vacuum cleaner. 1,677,921; July 24.
Johnson, Lane, assignor to United Engineering and Foundry Company, Pittsburgh, Pa. Reel. 1,678,472; July 24.
Johnson Service Company. (See Fortier, Charles L., assignor.)
Johnson, Waldo P., Chicago, Ill. Poultry-car ventilator. 1,678,393; July 24.
Johnston, Joseph C., Minneapolis, Minn. Motor using projectiles. 1,678,047; July 24.
Johnstone, Robert M., Roselle Park, N. J., assignor to Cameron Machine Company, Brooklyn, N. Y. Slitting machine. 1,678,340; July 24.
Jones, Aley E., Cuyahoga Falls, assignor to Lambert Tire & Rubber Co., Barberton, Ohio. Tire. Des. 75,850; July 24.
Jones, Louis S., G. W. Fisher, and C. G. Henrikson, assignors to The National Tile Company, Anderson, Ind. Machine for treating tile. 1,678,064; July 24.
Juengst, Fred W., assignor to Landers, Frary & Clark, New Britain, Conn. Cover for washing-machine tubs. 1,678,516; July 24.
Kaber, Joseph W., Cleveland, Ohio. Transfer sign. 1,678,341; July 24.
Kanarek, Jay H. (See Badler, Abraham A., assignor.)
Kappel, William J., assignor to M. and I. Sax, copartners doing business as Sax Bros., Milwaukee, Wis. Combination she flexor and stretcher. 1,678,394; July 24.
Karst, Howard C., Philadelphia, Pa. Thumb tack. 1,678,473; July 24.
Kastelic, Anthony, Richmond, Calif. Lead storage battery. 1,678,224; July 24.
Kasztler, John, Chicago, Ill. Hand-operated cutting implement. 1,677,922; July 24.
Kearney, Edward J., Wauwatosa, assignor to Kearney & Trecker Corporation, West Allis, Wis. Milling-machine-arbor drive and support. 1,678,048; July 24.
Kearney, Edward J., Wauwatosa, assignor to Kearney & Trecker Corporation, West Allis, Wis. Fluid-control device. 1,678,049; July 24.
Kearney, Edward J., Wauwatosa, assignor to Kearney & Trecker Corporation, West Allis, Wis. Adjustable fluid-control device. 1,678,050; July 24.
Kearney & Trecker Corporation. (See Kearney, Edward J., assignor.)
Keasbey & Mattison Company. (See Mattison, Richard V., assignor.)
Keenan, Walter F., jr., Pelham, assignor to Foster Wheeler Corporation, New York, N. Y. Superheater boiler. 1,677,894; July 24.
Kellholtz, Lester S., assignor, by mesne assignments, to Delco-Light Company, Dayton, Ohio. Fuel-supply system. 1,677,895; July 24.
Kellems, Edgar E., Syracuse, N. Y. Self-loading trailer. 1,678,395; July 24.
Kellogg Switchboard and Supply Company. (See Nielsen, Emil J., assignor.)
Kelly, Mervin J., assignor to Western Electric Company, Incorporated, New York, N. Y. Electron-discharge device. 1,678,145; July 24.
Kendall, Ira H., assignor to The Kendall Patents, Inc., Potsdam, N. Y. Can-washing device. 1,678,252; July 24.
Kendall Patents, Inc., The. (See Kendall, Ira H., assignor.)
Kendrick, Samuel W., and J. E. Martin, Great Falls, Mont. Shaving brush. 1,678,146; July 24.
Kennedy, Chester C. (See Strosacker, C. J., and Kennedy.)
Khoury, Harry E., New Bedford, Mas. Warp stop motion. 1,678,253; July 24.
Khoury, Harry E., New Bedford, Mass. Warp stop motion. 1,678,254; July 24.
Khoury, Harry E., New Bedford, Mass., assignor to Khoury Warp Stop Motion, Inc. Warp stop motion. 1,678,255; July 24.
Khoury Warp Stop Motion, Inc. (See Khoury, Harry E., assignor.)
Kienzle Uhrenfabriken Aktiengesellschaft. (See Riegger, Paul, assignor.)
Kilgore Foundry Co. (See Kilgore, Joseph D., assignor.)
Kilgore, Joseph D., assignor to Kilgore Foundry Co., Columbus, Ohio. Toy pistol. 1,678,597; July 24.
Kincade, Jerry W., Lethbridge, Alberta, Canada. Agitator for chemically purifying oil. 1,678,225; July 24.
King, Edgar B., Berenice, Idaho. Tool. 1,678,598; July 24.
King, Jesse G., and H. B. Hull, Dayton, Ohio, assignor, by mesne assignments, to Frigidaire Corporation. Valved fitting for refrigerating apparatus. 1,678,147; July 24.
Kinnear, Peter, Columbus, Ohio. Ice-cream holder. 1,678,436; July 24.
Klar, Max, Holzminden, Germany. Manufacturing white acetate of lead solutions or crystals out of pyroligneous acid. 1,678,256; July 24.
Klein, Rudolph, assignor to Ilex Optical Company, Rochester, N. Y. Photographic shutter. 1,678,119; July 24.

Kling, Fred E., Youngstown, and C. E. Malley, Springfield, Ohio. Furnace damper. 1,678,342; July 24.
Knowles, Carroll, Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y. Gear grinder. 1,678,293; July 24.
Koch, Earl L., Pittsburgh, assignor to F. S. McCullough, Wilkinsburg, Pa. Radiotube and operating same. 1,677,896; July 24.
Koehring Company. (See Lichtenberg, Erich H., assignor.)
Koenig, Joseph, Manitowoc, Wis. Heater for hot-air engines. 1,678,396; July 24.
Koenig, Joseph, Manitowoc, assignor, to Metal Ware Corporation, Two Rivers, Wis. Toy electric engine. 1,678,397; July 24.
Kohler Company. (See Brotz, Frank G., assignor.)
Kootz, Arthur C. (See Schneider, William H., assignor.)
Koro Corporation. (See Kotchi, C., and Rode, assignors.)
Kotchi, Charles, Bay City, Mich., and F. J. Rode, Chicago, assignors, by mesne assignments, to Koro Corporation, Waukegan, Ill. Apparatus for producing rods for welding. 1,678,148; July 24.
Kraemer, Waldo L. (See Herbert, F. D., Kraemer, and Garabrant.)
Kraft-Phenix Cheese Company. (See Robinson, Sanford K., assignor.)
Krause, Max, Chicago, Ill. Upholstery construction. 1,678,474; July 24.
Kretzer, Charles D., Portland, Oreg. Plow. 1,678,343; July 24.
Krüssmann, Hermann. (See Petersen, F., and Krüssmann.)
Küttner, Firm Fr. (See Wagner, Albert, assignor.)
La Fon, Alphonse. (See Davis, S., and La Fon.)
Lakewood Engineering Company, The. (See Carr, Edward G., assignor.)
Lamb, Carl J., Philadelphia, Pa., assignor to Westinghouse Electric & Manufacturing Company. Turbine. 1,678,065; July 24.
Lamb, Carl J., Philadelphia, Pa., assignor to Westinghouse Electric and Manufacturing Company. Turbine-cooling means. 1,678,066; July 24.
Lamb, Carl J., Philadelphia, Pa., assignor to Westinghouse Electric and Manufacturing Company. Turbine cooling means. 1,678,067; July 24.
Lamb, Frederick B., London, assignor to Roadless Traction, Limited, Hounslow, Middlesex, England. Endless track for vehicles. 1,678,149; July 24.
Lambert, John W., Birmingham, Ala. Key-controlled operating mechanism. 1,678,491; July 24.
Lambert, John W., Birmingham, Ala. Electromagnetic attachment for key-controlled mechanisms. 1,678,492; July 24.
Lambert Tire & Rubber Co. (See Jones, Aley E., assignor.)
Landers, Frary & Clark. (See Juengst, Fred W., assignor.)
Lange, Edward C., Mill Valley, Calif. Fuel nozzle and control. 1,678,398; July 24.
Langley, Frank F., assignor to Universal Button Fastening & Button Co., Detroit, Mich. Button-affixing machine. 1,678,616; July 24.
Larrabee, Bert G., H. A. Root, and E. S. Cassaday, assignors to Portable Self-Serving Store Company, Houston, Tex. Vending-machine casing. Des. 75,851; July 24.
Larsen, Charles F., New York, N. Y. Cover for cans. 1,678,399; July 24.
Larsh, Everett P., Dayton, Ohio. Short-circuiting device for motor commutators. 1,678,517; July 24.
Laska, Leopold, and A. Zitscher, Offenbach-on-the-Main, Germany, assignors to Grasselli Dyestuff Corporation, New York, N. Y. Azo dyestuffs from 2-3-hydroxynaphthoic acid arylides and making the same. 1,678,599; July 24.
Lasker, William W., Brooklyn, assignor, by mesne assignments, to Remington Rand Inc., New York, N. Y. Analyzer unit for tabulating machines. 1,677,897; July 24.
La Vigne, Jerome R. (See Moore, R. A., and La Vigne.)
Lawrie, James W., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Production of glycerin by fermentation. 1,678,150; July 24.
Ledwinka, Joseph, assignor to The Edward G. Budd Manufacturing Company, Philadelphia, Pa. Automobile body. Re17,051; July 24.
Leigh, Itura R., Grantville, Ga. Toy representing a turkey gobbler. 1,678,226; July 24.
Leland Electric Company, The. (See Leland, George H., assignor.)
Leland, George H., assignor of one-half to The Leland Electric Company, Dayton, Ohio. Short-circuiting device for motors. 1,678,437; July 24.
Leland, George H., assignor of one-half to The Leland Electric Company, Dayton, Ohio. Motor mounting. 1,678,438; July 24.
Lelong, Lucien, Inc. (See Lelong, Lucien, assignor.)
Lelong, Lucien, Paris, France, assignor to Lucien Lelong, Inc., New York, N. Y. Bottle. Des. 75,852; July 24.
Lentz, Lawrence E., Harrisburg, Pa., assignor to Elliott-Fisher Company, New York, N. Y. Carbon roll and core for manifolding machines. 1,677,971; July 24.
Leonard-Rooke Company. (See Nicholas, Serril W., assignor.)
Leopold, Joseph, New York, N. Y., assignor to Consolidated Instrument Company of America. Straight-line indicating mechanism. 1,678,009; July 24.
Le Roy, Georges, Marly le Roi, France. Leaded glass-work. 1,678,439; July 24.
Les Etablissements Poulenc Freres. (See Fourneau, Ernest, assignor.)
Leveillee, Raphael, Esmond, R. I. Pattern-reversing mechanism. 1,678,121; July 24.
Levis, John H., jr., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y. Manual telephone system. 1,678,068. July 24.
Lewando, Charles, Brooklyn, N. Y. Antitheft device. 1,678,440; July 24.
Lewis Invisible Stitch Machine Company. (See Mueller, Charles W., assignor.)
Lewis, John V. (See Fowler, E., and Lewis.)
Lewis, William, Utica, N. Y. Spring cushion. 1,678,400; July 24.
Leyden, George B. (See Garner, J. B., and Leyden.)
Libbey-Owens Sheet Glass Company, The. (See Drake, John L., assignor.)
Lichtenberg, Erich H., assignor to Koehring Company, Milwaukee, Wis. Crane attachment. 1,678,010; July 24.
Liffander, Johan O., assignor to J. & C. G. Bolinders Mek. Verkstads Aktiebolag, Stockholm, Sweden. Planing cutter. 1,677,898; July 24.
Light, Arthur H., Oakland, Calif. Piston structure. 1,678,151; July 24.
Liljenroth, Frans G., Stocksund, Sweden. Making a mixture of nitrogen and hydrogen. 1,678,518; July 24.
Lissfelt, Harry L., New York, N. Y., assignor to Macbeth-Evans Glass Company, Charlerol, Pa. Glass tumbler. Des. 75,853; July 24.
Littman, Zeno. (See Davis, Robert W., assignor.)
Livermore, George A., Joplin, Mo., assignor to The B. F. Goodrich Company, New York, N. Y. Blasting-cap protector. 1,678,257; July 24.
Lloyd, Marshall B., Menominee, Mich., assignor to Heywood-Wakefield Company, Boston, Mass. Reed-weaving machine. 1,678,011; July 24.
Lloyd, Marshall B., Menominee, Mich., assignor to Heywood-Wakefield Company, Boston, Mass. Reed-weaving machine. 1,678,012; July 24.
Loftin, Edward H., New York, assignor to General Railway Signal Company, Rochester, N. Y. Continuous inductive train-control system for railroads. 1,678,617; July 24.
Long, Charles A., jr., Philadelphia, Pa. Advertising and display device. 1,678,475; July 24.
Longcor, William H., assignor of one-half to O. Nialson, Dinuba, Calif. Fruit-gatherer's knife. 1,678,570; July 24.
Lower, Melvin S., Barberton, Ohio, assignor to Sun Rubber Company. Tip for hydrometer syringes. 1,678,600; July 24.
Lubonia, Sotir K. (See Mas, G. N., and Lubonia.)
Lucas, Jonathan, Savannah, Ga., assignor to Lucas-Lamborn Loom Corporation, New York, N. Y. Automatic stop mechanism for looms. 1,677,899; July 24.
Lucas-Lamborn Loom Corporation. (See Lucas, Jonathan, assignor.)
Luttrell, Nicholas, J., Liverpool, N. Y. Electrothermostatic switch. 1,678,401; July 24.
Lynch, George B., Tucson, Ariz. Figure wheeled toy. 1,678,519; July 24.
Macartney, John H. (See Duisenberg, W., and Macartney.)
Macbeth-Evans Glass Company. (See Lissfelt, Harry L., assignor.)
MacDonald, Clayton F., Asheville, N. C. Hydraulic vacuum cleaning device. 1,678,258; July 24.
Macway, Ignace, Brussels, Belgium. Lubricating device for axle boxes. 1,678,294; July 24.
Madvig, Gunnar, Oakland, Calif. Center ornament for drapery poles and rods. Des. 75,855; July 24.
Madvig, Gunnar, Oakland, Calif. Center ornament for drapery poles and rods. Des. 75,856; July 24.
Madvig, Gunnar, Oakland, Calif. Center ornament for drapery poles and rods. Des. 75,857; July 24.
Magic Grain Dump Company. (See Hancock, W. G., and Stromswold, assignors.)
Magni, Karl G., Linkoping, assignor to Aktiebolaget Baltic, Stockholm, Sweden. Audible speed indicator. 1,678,402; July 24.
Mahan, Frederic O., Eugene, Oreg. Overalls. Re17,047; July 24.
Malkin, Bernard A. (See Russell, A. N., and Malkin.)
Mall Tool Company. (See Gaston, Ralph M., assignor.)
Malley, Charles E. (See Kling, F. E., and Malley.)
Manly, Basil M., et al., executors. (See Manly, Charles M.)
Manly, Charle M., Richmond Hill, deceased; J. M., W. G., and B. M. Manly, executors, assignors to Overman Cushion Tire Company, Inc., New York, N. Y. Tire. 1,678,014; July 24.
Manly, John M., et al., executors. (See Manly, Charles M.)
Manly, William G., et al., executors (See Manly, Charles M.)
Manofsky, Herman E., Chicago, Ill. Line holder. 1,678,344; July 24.

Manson, Ray H., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y. Pawl-and-ratchet mechanism. 1,678,069; July 24.
Marbelite Corporation of America. (See Waggoner, Ralph, assignor.)
Marden, William L., assignor to Neptune Meter Company, New York, N. Y. Gasoline filling station and plate forboilers. 1,678,923; July 24.
Markatos, Spiros C., New York, N. Y. Supporting iron plate for boilers. 1,678,295; July 24.
Marks, Emanuel S., Brooklyn, N. Y. Electrically-illuminated artificial tree. 1,677,972; July 24.
Marquard, Frank F., Clairton, Pa. Quenching coke. 1,677,973; July 24.
Marshall, Arthur J., Dalton, assignor of one-fourth to E. T. Heaphy, Lee, and one-fourth to W. A. Heaphy, Pittsfield, Mass. Side light. 1,678,261; July 24.
Martin, Felix E., Los Angeles, Calif. Door controller. 1,678,122; July 24.
Martin, Harold G., Philadelphia, Pa., and M. H. Newgirg, assignors to Martin & Newgirg, Inc., Baltimore, Md. Bearing. 1,678,152; July 24.
Martin, Harold S., Garfield, Utah. Concentrating mixed sulphide ores. 1,678,259; July 24.
Martin, John E. (See Kendrick, S. W., and Martin.)
Martin, Karl, Rathenow, Germany. Price-indicating balance. 1,678,153; July 24.
Martin & Newgirg, Inc. (See Martin, H. G., and Newgirg, assignors.)
Martin, Rhetherford B., assignor to Minerals Separation North American Corporation, New York, N. Y. Production of oxidized products. 1,678,403; July 24.
Martino, Natale, P. Frasca, and J. E. Oster, New York, N. Y. Humidor. 1,678,260; July 24.
Mas, George N., and S. K. Lubonia, Washington, D. C. Bottle. Des. 75,854; July 24.
Maschinenfabrik Augsburg-Nuernberg Aktiengesellschaft. (See Wilhelm, Ottmar, assignor.)
Masury, Alfred F. (See Hewitt, E. R., and Masury.)
Mathee, William H., assignor to Johnson & Johnson, New Brunswick, N. J. Counter display appliance. Des. 75,858; July 24.
Mathes, Robert C., Wyoming, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Electric wave transmission. 1,678,188; July 24.
Mattison, Richard V., Ambler, Pa., assignor to Keasbey & Mattison Company. Millboard product and process. 1,678,345; July 24.
Mattison, Richard V., Ambler, Pa., assignor to Keasbey & Mattison Company. Millboard product and process. 1,678,346; July 24.
Mattoon Engine Works. (See Chuse, Harry A., assignor).
Maudsley, Reginald W., Coventry, England. Roof for closed vehicle bodies. 1,678,262; July 24.
Max Ams Chemical Engineering Corporation, The. (See Brenzinger, Julius, assignor.)
Maxmoor Corporation. (See Moore, Arlington, assignor.)
McCaffrey, Henry G., Galt, Ontario, Canada. Air-circulating device for air ducts. 1,677,974; July 24.
McCall, Arthur B., Springfield, Ill. Loud-speaker extension. Des. 75,859; July 24.
McClintock, O. B., Company. (See Hanson, E. C., and Hallquist, assignors.)
McClure, Ralph R., San Francisco, Calif. Method of and apparatus for lubricating friction surfaces. 1,678,347; July 24.
McCrystal, Robert C. (See Field, Herbert D., assignor.)
McCullough, Frederick S. (See Koch, Earl L., assignor.)
McCullough, Frederick S., Wilkinsburg, Pa. Degasifying radiotubes 1,677,900; July 24.
McGhee, George, Tollcross, Scotland. Brake for vehicles. 1,678,227; July 24.
McGill Manufacturing Company. (See Despard, V. R., and Popp, assignors.)
McGrew, Earl E., assignor to McGrew Machine Company, Lincoln, Nebr. Folding camp bed. 1,678,441; July 24.
McGrew Machine Company. (See McGrew, Earl E., assignor.)
McIntyre, Robert L., Toronto, Ontario, Canada. Structural-steel fabrication. 1,678,013; July 24.
McKee, Mierley T., Zanesville, Ohio. Cementing oil wells. 1,677,975; July 24.
McKnight, Frank. (See Connors, Clarence A., assignor.)
McLaughlin, William J., Owatonna, Minn. Delactating dairy products. 1,677,976; July 24.
McVey, Leland S., Fontana, Calif. Game apparatus. 1,678,189; July 24.
Meisekothen, Edwin E., assignor to French Battery Company, Madison, Wis. Dry battery and method of manufacture. 1,678,601; July 24.
Melvin, Ernest W., Milwaukee, Wis., assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Making inner tubes. 1,678,015; July 24.
Menasco, James H., Cushing, Okla. Checker's pad holder. 1,677,977; July 24.
Menasha Wooden Ware Company. (See Smith, Mowry, assignor.)
Menke, Robert F., Bessmay, Tex. Key-ring holder. 1,678,016; July 24.
Mensing, Carl E., Somerville, and R. E. Wiley, Plainfield, N. J. Special package of hydroscopic material. 1,678,154; July 24.

Menz, Gustav, Berlin-Charlottenburg, assignor to Siemens-Schuckertwerke Gesellschaft mit beschränkter Haftung, Berlin-Siemensstadt, Germany. Runner blade for steam turbines. 1,678,263; July 24.
Mercer, Alexander, Wainfleet, Ontario, Canada. Fire safety device for dwellings and factories. 1,678,520; July 24.
Mesple, John L., San Francisco, Calif. Brake equalizer. 1,678,155; July 24.
Messer, George H., Newark, N. J. Oil-supply-controlling apparatus for liquid-fuel burners. 1,677,978; July 24.
Metal Edge Filter Corporation. (See Herbert, F. D., Kraemer, and Garabrant, assignors.)
Metal Ware Corporation. (See Koenig, Joseph, assignor.)
Metcalf, Howard H., assignor to Battle Creek Bread Wrapping Machine Co., Battle Creek, Mich. Wrapping machine. 1,677,924; July 24.
Metropolitan Lamp Co. (See Zweig, Joseph, assignor.)
Meyer, Friedrich W., Wismar, Germany. Purifying sugar solutions. 1,678,571; July 24.
Midgley, Thomas, Hampden, assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Flex-testing machine. 1,678,017; July 24.
Mid-West Box Company. (See Gallistel, Clarence P., assignor).
Milano Furniture Company. (See Heyman, Joseph J., assignor).
Milk Oil Corporation, The. (See North, Charles E., assignor.)
Miller Company, The. (See Wolter, Herman H., assignor.)
Miller, Ernest B. (See Patrick, W. A., and Miller.)
Miller, Ernest B., assignor to The Silica Gel Corporation, Baltimore, Md. Apparatus for treating liquids to remove or recover substances therefrom. 1,678,299; July 24.
Minardo, Cosimo M. (See Bloom, Carl G., assignor.)
Minerals Separation North American Corporation. (See Chapman, G. A., and Wilkinson, assignors.)
Minerals Separation North American Corporation. (See Hale, Robert M., assignor.)
Minerals Separation North American Corporation. (See Martin, Rhetherford B., assignor.)
Minneapolis Honeywell Regulator Company. (See Shivers, Paul F., assignor.)
Mitchell, Joseph S., Chicago, Ill., assignor to Sullivan Machinery Company. Core drill. 1,677,925; July 24.
Mitchell, Walter M., Philadelphia, Pa., assignor, by mesne assignments, to Electro Metallurgical Company. Casting articles having chromium-alloy surfaces. 1,677,979; July 24.
Mitchell, William J., Waco, Tex. Display box. 1,678,521; July 24.
Monforts, Joseph, Munich-Gladbach, Germany. Fabric-shearing machine. 1,678,572; July 24.
Monitor Controller Company. (See Whittingham, George H., assignor.)
Monroe, Helen G., Santa Barbara, Calif. Pitcher. Des. 75,860; July 24.
Montelius, Carl O. J., Stockholm, Sweden. Rotary pump, motor, meter, or the like. 1,677,980; July 24.
Moore, Arlington, assignor, by mesne assignments, to Maxmoor Corporation, New York, N. Y. Combustion chamber for internal-combustion engines. 1,678,348; July 24.
Moore, Arlington, assignor, by mesne assignments, to Maxmoor Corporation, New York, N. Y. Antidetonating cylinder head for internal-combustion engines. 1,678,349; July 24.
Moore, George L., and J. R. Steele, Owego, N. Y. Rail anchor. 1,678,404; July 24.
Moore, James, Burmah, British India, assignor, to The Burmah Oil Company Limited, Glasgow, Scotland. Apparatus for cooling oil or other liquids. 1,678,070; July 24.
Moore, Roswell A., and J. R. La Vigne, assignors to Waterbury Buckle Co., Waterbury, Conn. Slide buckle. 1,678,264; July 24.
More, Glenn, and G. Oberg, assignors to The Blackstone Mfg. Co., Jamestown, N. Y. Gearing for washing machines. 1,678,018; July 24.
Morgan, Joseph J. (See Dickinson, W. E., and Morgan.)
Morris, Charles E., Newark, N. J. Circuit-closing device. 1,678,228; July 24.
Morris, Max C., Castlebellingham, Ireland. Carburetor. 1,677,926; July 24.
Mortimer, Louis A., Hohokus, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Telephone system. 1,678,190; July 24.
Mueller, Adolf, New York, N. Y. Sanitary seat cover. 1,678,296. July 24.
Mueller, Charles W., assignor to Lewis Invisible Stitch Machine Company, St. Louis, Mo. Feeding mechanism for sewing machines. 1,678,191; July 24.
Muir, Wellington W., assignor to Harrison Radiator Corporation, Lockport, N. Y. Cooling internal-combustion engines. 1,677,981; July 24.
Müller, Heinrich, J., Schaffhausen, Switzerland. Adjustable couch and the like. 1,678,071; July 24.

Mulroney, John E., deceased, Chicago, Ill.; M. B. Mulroney, executrix, assignor to E. M. Brackett and F. Brackett, copartners doing business as The Brackett Stripping Machine Company, Topeka, Kans. Paper-cutting machine and gauge and carrier therefor. 1,678,156; July 24.

Mulroney, Margaret B., executrix. (See Mulroney, John E., assignor.)

Munden, Isaac W., Tampa, Fla. Wheel-aligning gauge. 1,678,157; July 24.

Munters, Carl G. (See Von Platen, B. C., and Munters.)

Murdoch, James B., Milwaukee, Wis. Store-shelving front unit. 1,678,522; July 24.

Myers, Harry S., Van, Pa. Hoist attachment for tractors. 1,678,158; July 24.

Myers, L. A., jr., Inc. (See Myers, W. L., and Harrison, assignors.)

Myers, William L., Newark, and G. D. Harrison, Belleville, assignors to L. A. Myers, jr., Inc., Newark, N. J. Button cover. 1,678,265; July 24.

N. V. Machina Maatschappij vor Handel en Industrie. (See Fischer, Oskar, assignor.)

Nagy, Louis, Hamilton, Ontario, Canada, assignor of three-tenths to M. Daradice. Aeroplane. 1,678,523; July 24.

Nakashima, Yozo, Brooklyn, N. Y. Amusement device. 1,678,573; July 24.

Narme, David O. Y. (See Heffernan, Edward, assignor.)

Nasmith, John W., assignor to Nasmith's Patents Limited, Manchester, England. Automatic feed device. 1,678,159; July 24.

Nasmith's Patents Limited. (See Nasmith, John W., assignor.)

Nason, Arthur P. (See Crosman, G. L., and Nason.)

National-Standard Company. (See Hopkins, Arthur C., assignor.)

National Supply Company of Delaware, The. (See Timbs, E., and Zerbe, assignors.)

National Tile Company, The. (See Jones, L. S., Fisher, and Henrikson, assignors.)

National Tube Company. (See Boax, John J., assignor.)

National Tube Company. (See Boax, J. J., and Robinoff, assignors.)

Neiman, Howard S. (See Roeger, Fred, assignor.)

Nelis, Joseph J., Brooklyn, assignor to Foster Wheeler Corporation, New York, N. Y. Marine steam-generating unit. 1,677,901; July 24.

Nelson, Ashton T., Wilton Junction, Iowa. Memorial building. Des. 75,862; July 24.

Neptune Meter Company. (See Marden, William L., assignor.)

Nerney, George E., assignor to Bay State Optical Company, Attleboro, Mass. Combined temple bar and end piece for ophthalmic mountings. Des. 75,861; July 24.

Neville, Frederick W., assignor to J. W. Jackman & Company Limited, Vulcan Works, Salford, England. Tumbling barrel. 1,678,072; July 24.

Newgirg, Michael H. (See Martin, H. G., and Newgirg.)

New Jersey Zinc Company, The. (See Singmaster, J. A., Breyer, and Bunce, assignors.)

Nialson, Ola. (See Longoor, William H., assignor.)

Nicholas, Serril W., assignor to Leonard-Rooke Company, Providence, R. I. Handle for a thermostatic valve. Des. 75,863; July 24.

Niederbayerische Cellulosewerke. (See Schneider, Adolf, assignor.)

Nielsen, Emil J., Oak Park, assignor to Kellogg Switchboard and Supply Company, Chicago, Ill. Control button. 1,678,524; July 24.

Niemeyer, Henry, New York, N. Y. Photographic electric lamp. 1,678,574; July 24.

Niestradt, Ernest S., Denver, Colo., assignor to The Northwestern Terra Cotta Company, Chicago, Ill. Making molds for building blocks and the like. 1,678,266; July 24.

Niestradt, Ernest S., Denver, Colo., assignor to The Northwestern Terra Cotta Company, Chicago, Ill. Apparatus for making molds for building blocks. 1,678,267; July 24.

Niles-Bement-Pond Company. (See Randolph, Clifford F., assignor.)

Noblitt, Quintin G., assignor to Indianapolis Pump & Tube Company, Indianapolis, Ind. Automobile hood latch. 1,678,192; July 24.

Noller, Carl R. (See Adams, R., Noller, and Arvin.)

North, Charles E., Montclair, N. J., assignor to The Milk Oil Corporation, Wilmington, Del. Producing agglomerated cream. 1,678,476; July 24.

North, Charles E., Montclair, N. J., assignor to The Milk Oil Corporation, Wilmington, Del. Whipping or agitating cream. 1,678,477; July 24.

North, Charles E., Montclair, N. J., assignor to The Milk Oil Corporation, Wilmington, Del. Churning cream into butter fat and apparatus therefor. 1,678,478; July 24.

Northrop, Jonas, assignor, by mesne assignments, to Draper Corporation, Hopedale, Mass. Picker-stick-controlling means for looms. 1,678,268; July 24.

Northwestern Terra Cotta Company, The. (See Niestradt, Ernest S., assignor.)

Notz, Felix, and G. Royan, assignors to American Oven & Machine Company, Chicago, Ill. Dough-mixing machine. 1,678,193; July 24.

Notz, Felix, and G. Royan, assignor to American Oven & Machine Company, Chicago, Ill. Packing retainer for dough-mixing machines and the like. 1,678,194; July 24.

Novin, Joseph, assignor to The Centre Lighting Fixture Mfg. Co., New York, N. Y. Chandelier. Des. 75,864; July 24.

Oates, Norford L., Seattle, Wash. Calculating device. 1,678,019; July 24.

Oberg, Gunnard. (See More, G., and Oberg.)

O'Brien, Thomas, Sharon, and R. E. Zimmerman, assignors to American Sheet and Tin Plate Company, Pittsburgh, Pa. Cleaning tin plate. 1,678,297; July 24.

Ohm, Albert J. D., Oak Park, assignor to R. Williamson & Company, Chicago, Ill. Lighting fixture. Des. 75,865; July 24.

Ohm, Albert J. D., Oak Park, assignor to R. Williamson & Company, Chicago, Ill. Lighting fixture. Des. 75,866; July 24.

Ohm, Albert J. D., Oak Park, assignor to R. Williamson & Company, Chicago, Ill. Lighting-fixture shade. Des. 75,867; July 24.

Oldfield, Guy G., Pullman, Wash. Toy construction outfit. 1,678,602; July 24.

Olsen, Einar J., Minneapolis, assignor of one-half to Sealy Mattress Company of Minnesota, St. Paul, Minn. Method and apparatus for cleaning and separating hair. 1,678,525; July 24.

Oppenheim, René, assignor to Société Anonyme le Carbone, Levallois-Perret, France. Rendering gas-absorbent bodies air-tight in liquids. 1,678,405; July 24.

Osborn, F. E., et al. (See Weston, Charles W., assignor.)

Oster, John E. (See Martino, N., Frasca, and Oster.)

Oswald, Arthur A., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Electric-wave-translation system. 1,678,160; July 24.

Otis Elevator Company. (See Anderson, John N., assignor.)

Otis Elevator Company. (See Dunn, Edward L., assignor.)

Ott, William N., Bloomfield, N. J. Electric clamp connecter. 1,678,350; July 24.

Outing Manufacturing Co. (See Dewey, Clarence L., assignor.)

Overman Cushion Tire Company. (See Manly, Charles M., assignor.)

Ovestrud, Melvin, assignor to Twin City Forge & Foundry Company, Stillwater, Minn. Mechanism for conveying and water cooling tie plates. 1,678,195; July 24.

Owens Bottle Company, The. (See Ferngren, Enoch T., assignor.)

Owens Bottle Company, The. (See Soubier, Leonard D., assignor.)

Pacific Coast Borax Company. (See Cramer, Thomas M., assignor.)

Packard Electric Company, The. (See Tuttle, George H., assignor.)

Palky, Frank J., Dorchester, Nebr. Timer. 1,678,161; July 24.

Palmer, William H., jr., Wayne, Pa. Combined packing case and tray for storage-battery cells. 1,677,982; July 24.

Paper and Textile Machinery Company, The. (See Russell, A. N., and Malkin, assignors.)

Paper Service Company, The. (See Rowe, William W., assignor.)

Pappert, Emanuel, New York, N. Y. Bridge for spectacles. Des. 75,868; July 24.

Parisi, Rino, Rimer, Pa. Curtain and operating means therefor. 1,678,229; July 24.

Parker, Ralzemond D., Brooklyn, N. Y., and D. B. Perry, Maplewood, N. J., assignors to American Telephone and Telegraph Company. Printing-telegraph exchange system. 1,677,983; July 24.

Parkhill, James, Flint, Mich. Vehicle spring. 1,678,526; July 24.

Parr, George T., St. Paul, Minn. Ice-cream disher. 1,677,984; July 24.

Patch, James A., Stoneham, Mass. Apparatus for removing oil from cod livers. 1,678,123; July 24.

Patrick, Walter A., Mount Washington, and E. B. Miller, assignors to The Silica Gel Corporation, Baltimore, Md. Refining oils and waxes. 1,678,298; July 24.

Patten, Ernest L. O., Lakewood, Ohio, and R. E. Patten, Detroit, Mich. Window. 1,678,479; July 24.

Patten, Raymond E. (See Patten, Ernest L. O. and R. E.)

Patterson, M. F., Dental Supply Co. (See Andresen, Lauritz B., assignor.)

Payne, Nora D., New York, N. Y. Device for projecting marbles and the like. 1,678,527; July 24.

Payne, Paul D., Irvington, assignor to Edison Storage Battery Company, West Orange, N. J. Electric safety lantern. 1,678,351; July 24.

Payton, James L., Jefferson City, Mo. Chain fastener. 1,678,575; July 24.

Pearl, Frank A., North Milwaukee, Wis. Permanent-wave clip. 1,678,352; July 24.

Pearl, Frank A., New York, N. Y. Sublimator. 1,678,442; July 24.

Pedersen, John D., Springfield, Mass. Cartridge. 1,678,162; July 24.

Peelle, Charles W., New York, assignor to The Peelle Company, Brooklyn, N. Y. Elevator door. 1,678,196; July 24.

Peelle Company, The. (See Peelle, Charles W., assignor.)

Penn Electric Switch Company. (See Penn, Ralph, assignor.)

Penn, Ralph, Des Moines, Iowa, assignor to Penn Electric Switch Company. Automatic electric switch. 1,678,603; July 24.

Pennsylvania Engineering Works. (See Allen, L. E., and Furst, assignors.)

Perin, Donald W., Brookline, Mass., assignor, by mesne assignments, to American Freight Service, Inc., New York, N. Y. Loading elevator. 1,678,528; July 24.

Perreault, Gedeon, Gardner, Mass. Screw driver. 1,678,124; July 24.

Perry, Donald B. (See Parker, R. D., and Perry.)

Perry, John W., Wheeling, W. Va. Sheet-heating furnace. 1,678,300; July 24.

Peters, Robert B., Brooklyn, N. Y. Steadying device for rotatable flag standards or poles. 1,678,529; July 24.

Petersen, Fritz, and H. Krüssmann, assignors to firm of Tischler & Leichter, Recklinghausen-Sud, Germany. Device for opening and closing attic windows. 1,678,020; July 24.

Peterson, Eugene, assignor to Western Electric Company, Incorporated, New York, N. Y. Modulation. 1,678,163; July 24.

Petrescu, Mary, Wheat Stone, Saskatchewan, Canada. Sleeping bag. 1,678,125; July 24.

Petry and Brandt. (See Brandt, Rudolph, assignor.)

Pettee, Allen D., Mount Vernon, N. Y. Cable-marking machine. 1,677,927; July 24.

Peyer, Julius. (See Billeter, O., Rothlin, and Peyer.)

Pfeiffer, Richard, Newark, N. J. Lightning-fixture guard. Des. 75,869; July 24.

Pflager, Harry M., St. Louis, Mo., assignor to Commonwealth Steel Company, Granite City, Ill. Locomotive structure. 1,677,985; July 24.

Phillipp, Ernest, Los Angeles, Calif. Card game. 1,678,576; July 24.

Phillips, Darius T., Chicago, Ill. Wheel. 1,678,530; July 24.

Phillips, William L., Houston, Tex. Machine for topping cans. 1,677,928; July 24.

Phipps, John T., Huntington Park, assignor to J. Grant, Los Angeles, Calif. Well apparatus. 1,678,073; July 24.

Phipps, John T., Huntington Park, assignor to J. Grant, Los Angeles, Calif. Well apparatus. 1,678,074; July 24.

Phipps, John T., assignor to J. Grant, Los Angeles, Calif. Expansible rotary underreamer. 1,678,075; July 24.

Pickup, George E., assignor to The Wehrle Company, Newark, Ohio. Cookstove. 1,678,269; July 24.

Pierson, Paul R. (See Cravey, J. B., and Pierson.)

Pippert, Willis J., Ridlonville, Me. Printing impression plate and making same. 1,677,929; July 24.

Poindexter, Robert W., jr., Los Angeles, and P. T. Dolley, Los Angeles County, Calif., assignors to California Cyanide Company, Incorporated, New York, N. Y. Apparatus for the production of alkali-metal cyanides. 1,677,986; July 24.

Pointon, John E., Peterborough, England, assignor to Baker Perkins Company Incorporated, New York, N. Y. Baking oven. 1,678,076; July 24.

Pokorny, Ermin, Prague, Czechoslovakia. Evaporating apparatus. 1,677,987; July 24.

Poleske, Ernest, and S., Manilla, Iowa. Grinding machine. 1,677,988; July 24.

Poleske, Sears. (See Poleske, Ernest and S.)

Pollak, Joseph. Tool and Stamping Company. (See Averill, William H., assignor.)

Pomeroy, Timothy C., Minneapolis, Minn. Lifting jack. 1,678,531; July 24.

Popp, Hans C. R. (See Despard, V. R., and Popp.)

Portable Self-Serving Store Company. (See Larabee, B. G., Root, and Cassady, assignors.)

Potomac Glass Company, The. (See Beam, Charles C., assignor.)

Potter, John C. (See Rorty, M. C., and Potter.)

Powell, Winfred T., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y. Thermionic-tube circuits. 1,678,077; July 24.

Pratt & Whitney Company. (See Hoagland, Frank O., assignor.)

Pratt & Whitney Company. (See Knowles, Carroll, assignor.)

Pratt, Don W., Santa Monica, Calif. Direction signal. 1,678,197; July 24.

Preble Box Toe Co. (See Preble, George L., assignor.)

Preble, George L., assignor to Preble Box Toe Co., Lynn, Mass. Molded article and making same. 1,678,021; July 24.

Precision Metal Workers. (See Carlson, C. E., and Grunwald, assignors.)

Preece, Terence Q., Westbury, N. Y. Bit for horses. 1,678,532; July 24.

Pressley, Charles W., Hollywood, Calif. Golden harp piano. Des. 75,870; July 24.

Preston, Neil D., assignor to General Railway Signal Company, Rochester, N. Y. Adjustable trailing switch connection for railroads. 1,678,618; July 24.

Proctor, Robert V., and H. M. Schaab, assignors to The Commercial Shearing and Stamping Company, Youngstown, Ohio. Pallet. 1,678,443; July 24.

Progress Gesellschaft für Textilmaschinen mit beschränkter Haftung. (See Wolff, Herbert, assignor.)

Prosch, Floyd F., assignor of one-half to R. L. Wailine, McPherson, Kans. Pin-holding tool. 1,678,270; July 24.

Prosser, Henry G., Chicago, Ill., assignor to Bermingham and Prosser Co., Kalamazoo, Mich. Writing paper. 1,677,930; July 24.

Pure Oil Company, The. (See Carr, R. H., and Watson, assignors.

Pym, Arthur F., Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Relasting machine. 1,678,164; July 24.

Pym, Arthur F., Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Manufacture of shoes. 1,678,165; July 24.

Quassowski, Paul, Berlin, assignor to Siemens & Halske Aktiengesellschaft Wernerwerk, Siemenstadt, near Berlin, Germany. Selecting device for telephone systems. 1,678,301; July 24.

Ramage, Alexander S., assignor to Bostaph Engineering Co., Detroit, Mich. Transforming light paraffin hydrocarbons into other products. 1,678,078; July 24.

Randolph, Clifford F., Plainfield, N. J., assignor to Niles-Bement-Pond Company, New York, N. Y. Manually-controlled feeding mechanism for planers. 1,678,302; July 24.

Reach, William F., Springfield, Mass., assignor to A. G. Spalding & Bros., New York, N. Y. Holder for golf clubs. 1,678,353; July 24.

Reed, Arthur W., Boston, Mass. Vehicle sanding mechanism. 1,678,804; July 24.

Reek, Earl, Oakland, Calif. Toy. Des. 75,871; July 24.

Rehder, Philip L., Bay View, Idaho. Fisherman's hat. 1,678,198; July 24.

Reischl, Ludwig, assignor to Doll & Co. Aktiengesellschaft, Nuremberg, Germany. Rail-joint connection for toy railways. 1,678,079; July 24.

Relay Motor Products Corporation. (See Domizi, David F., assignor.)

Remington Rand Inc. (See Lasker, William W., assignor.)

Rentn, Philip A., New York, N. Y. Electric car-control apparatus. 1,678,533; July 24.

Renz, Frederick, Brooklyn, N. Y. Cutting mechanism. 1,678,080; July 24.

Repay, Theodore, assignor to F. Spangenberg, Los Angeles, Calif. Separable fastener. 1,678,166; July 24.

Rettenmeyer, Francis X., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Oscillation generator. 1,678,199; July 24.

Reukauf, Edward, jr., assignor to Carey-McFall Co., Philadelphia, Pa. Securing draw sticks in window shades. 1,678,534; July 24.

Reynolds, Michael J., West Haven, assignor, by mesne assignments, to The Strouse Adler Company, New Haven, Conn. Reducing corset. 1,677,989; July 24.

Rice, Harold G., Chicago, Ill. Bottle capper. 1,678,303; July 24.

Rice, Louis W., assignor to Bernard Rice's Sons, Inc., New York, N. Y. Tray or similar article. Des. 75,872; July 24.

Rice, Louis W., assignor to Bernard Rice's Sons, Inc., New York, N. Y. Bottle or similar article. Des. 75,873; July 24.

Rice's, Bernard, Sons, Inc. (See Rice, Louis W., assignor.)

Richardson, Rodney G., assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Automatic telephone system. 1,678,304; July 24.

Richter, George A., assignor to Brown Company, Berlin, N. H. Production of high-alpha-cellulose fiber. 1,678,230; July 24.

Richter, George A., assignor to Brown Company, Berlin, N. H. Rayon manufacture. 1,678,354; July 24.

Riddell, W. A., Company. (See Stuckey, Robert B., assignor.)

Rieger, Paul, Villingen, Baden, assignor to Kienzle Uhrenfabriken Aktiengesellschaft, Schwenningen-on-the neckar, Germany. Fare indicator. 1,678,480; July 24.

Rimpler, Julius, Hoboken, N. J. Garment. 1,678,081; July 24.

Riser, Sarah, Philadelphia, Pa. Necktie. Des. 75,874; July 24.

Roadless Traction, Limited. (See Lamb, Frederick B., assignor.)

Robbins, Percy A., Highland Park, Ill. Speedometer. 1,677,990; July 24.

Roberts, Albert J., Warren, Ohio. Telephone receiver. 1,678,271; July 24.

Roberts, Charles C., Bridgeport, Conn. Cigarette-delivery box. 1,678,355. July 24.

Roberts, Joseph D., Springfield, Ill. Electric fuse. 1,678,481; July 24.

Robeson-Rochester Corporation. (See Schott, Howard H., assignor.)

Robinoff, Boris S. (See Boax, J. J., and Robinoff.)

Robinson, Joseph, Morristown, N. J. Automatic train-pipe connecter. 1,677,902; July 24.

Robinson, Morris, New York, N. Y. Machine for making artificial flowers. 1,678,482; July 24.
Robinson, Sanford K., assignor, by mesne assignments, to Kraft-Phenix Cheese Company, Chicago, Ill. Remaking cheese. 1,678,167; July 24.
Rockenfelder, Dewey E., Montpelier, Ohio. Tuning device. 1,678,535; July 24.
Rockford Novelty Furniture Company. (See Bergman, Johan O., assignor.)
Rode, Fredrich J. (See Kotchi C., and Rode.)
Roedl, George C., West Allis, Wis. Window-sash counterbalance. 1,678,444; July 24.
Roeger, Fred, Hasbrouck Heights, N. J., assignor of one-half to H. S. Neiman, New York, N. Y. Memorandum pad. 1,678,445; July 24.
Rone, Lucien E. (See Scott, H. T., and Rone.)
Root, Harry A. (See Larrabee, B. G., Root, and Cassaday.)
Rorty, Malcolm C., Paris, France, and J. C. Potter, Madrid, Spain, assignors, by, mesne assignments, to Western Electric Company, Incorporated, New York, N. Y. Telephone receiver. 1,678,200; July 24.
Roseman, Leo, Newark, N. J. Garment-fastener means. 1,677,903; July 24.
Roseman, Leo, Newark, N. J. Garmen-fastener tape. 1,677,904; July 24.
Ross, Harry, assignor to Fur Guide Machine Corporation, New York, N. Y. Needle plate for fur-sewing machines. 1,677,991; July 24.
Ross, Oscar A., Brooklyn, assignor to General Railway Signal Company, Gates, N. Y. Automatic train-control system or the like. 1,678,577; July 24.
Rothlin, Ernst. (See Billeter, O., Rothlin, and Peyer.)
Rottenburg, Henry, Cambridge, England. Plug-and-socket connecter and the like. 1,678,082; July 24.
Rowe, William W., Cincinnati, assignor to The Paper Service Company, Lockland, Ohio. Car liner. 1,678,356; July 24.
Royan, George. (See Notz, F., and Royan.)
Rubber Service Laboratories Co., The. (See Scott, Winfield, assignor.)
Rue, Hans, Los Angeles, Calif. Butt extinguisher and tray. 1,678,406; July 24.
Ruggiero, John, New York, N. Y. Can-handling device and bearing. 1,678,483; July 24.
Rushmore, Samuel W., Plainfield, N. J. Lubricating and oil-separator apparatus. 1,678,272; July 24.
Rushmore, Samuel W., Plainfield, N. J. Cooling system. 1,678,484; July 24.
Russell, Andrew N., and B. A. Malkin, Lachine, Quebec, Canada, assignors to The Paper and Textile Machinery Company, Sandusky, Ohio. Suction roll. 1,678,083; July 24.
Russell Grader Manufacturing Co. (See Gustafson, Carl A., assignor.)
Russell, Samuel G., and P. Workman, jr., assignors to Shakespeare Company, Kalamazoo, Mich. Fishing reel. 1,678,446; July 24.
Sadtler, Helena S., Springfield Township, Montgomery County, Pa. Steel printing body and producing the same. 1,678,231; July 24.
Salisbury, Orange J., Salt Lake City, Utah. Continuous process apparatus for forming articles from pulp. 1,677,905; July 24.
Sampson, Erick, sr., assignor to Art Metal Construction Company, Jamestown, N. Y. Locking means for index cards and the like. 1,678,357; July 24.
Samuelson, John P., Compton, Calif. Rotary drill bit. 1,678,201; July 24.
Sandell, Joseph H., Chicago, assignor to Comstock-Castle Stove Company, Quincy, Ill. Coal and wood ranges. Des. 75,875; July 24.
Sax Bros. (See Kappel, William J.)
Sax, Isidore, et al. (See Kappel, William J., assignor.)
Sax, Marcus, et al. (See Kappel, William J., assignor.)
Schaab, Harry M. (See Proctor, R. V., and Schaab.)
Schatzel, Rudolph A. (See Hender, G. A., and Schatzel.)
Scheidegger, Paul. (See Gams, A., and Scheidegger.)
Schlitt, Joseph L., and W. Dennis, Elizabeth, N. J., assignors to Air Reduction Company, Incorporated, New York, N. Y. Refrigeration. 1,678,485; July 24.
Schneider, Adolf, Kelheim, assignor to Niederbayerische Celluloscwerke, Kelheim-on-the-Danube, Germany. Circulation of liquids in preheaters and steam generators. 1,678,536; July 24.
Schneider, William H., assignor to A. C. Kootz, Milwaukee, Wis. Christmas-tree ornament and the like and manufacture thereof. 1,678,358; July 24.
Schnurr, George. (See Branch, B. A., and Schnurr.)
Schoell, Reinhold, Kelsey City, Fla. Transmission. 1,678,486; July 24.
Schonbrun, Max, New York, N. Y. Parachute. 1,678,537; July 24.
Schoonmaker, James M., jr., Sewickley, Pa., assignor, by mesne assignments, to The Texas Company, New York, N. Y. Process and apparatus for cracking mineral oil. 1,678,126; July 24.
Schott, Howard H., assignor to Robeson-Rochester Corporation, Rochester, N. Y. Combined casserole and band. Des. 75,876; July 24.
Schraeder, Frank J., jr. (See Skala, Ljubomir W., assignor.)
Schrader, Harold D., Denver, Colo. Gas burner. 1,678,086; July 24.
Schulte, Louis, Pittsburgh, Pa., assignor to Allegheny Steel Company. Treating metal articles. 1,678,359; July 24.
Schutz, Konrad, Brooklyn, N. Y. Fastening device for shoes. 1,678,273; July 24.
Schutz, Konrad, Brooklyn, N. Y. Strengthening device for shoes. 1,678,274; July 24.
Schwenke, Robert, Berlin-Charlottenburg, Germany. Driving device for the front wheels of motor cars. 1,678,447; July 24.
Scott, Austin J., Gladwin, Mich. Combination salt and pepper shaker. 1,678,487; July 24.
Scott, David C. (See Valentine, F. A., and Scott.)
Scott, Henry L., Company. (See Valentine, F. A., and Scott, assignors.)
Scott, Henry T., and L. E. Rone, Wichita Falls, Tex. Safety device for tanks. 1,678,605; July 24.
Scott & Williams, Incorporated. (See Grothey, Ivan W., assignor.)
Scott, Winfield, assignor to The Rubber Service Laboratories Co., Akron, Ohio. Producing vulcanized rubber. 1,678,084; July 24.
Scott, Winfield, assignor to The Rubber Service Laboratories Co., Akron, Ohio. Producing vulcanized rubber. 1,678,085; July 24.
Scougal, De Witt C., Seattle, Wash. Auxiliary vise automatic. 1,678,360; July 24.
Sealy Mattress Company of Minnesota. (See Olsen, Elnar J., assignor.)
Seghers, Emiel P., Chicago, Ill. Trap. 1,678,168; July 24.
Selden Company, The. (See Conover, Courtney, assignor.)
Selden Company, The. (See Deutsch, L., and Thorn, assignors.)
Selden Company, The. (See Jaeger, Alphons O., assignor.)
Sentinel Mfg. Co., The. (See Tyler, Victor M., assignor.)
Serpas, Ernest J., New Orleans, La. Regulating apparatus. 1,677,992; July 24.
Seymour, Ralph C., Short Hills, N. J. Printing press. 1,677,931; July 24.
Shackelford, Edward H., jr., assignor to Hebbard Manufacturing Company, Joplin, Mo. Flotation machine. 1,678,087; July 24.
Shadrick, Richard H., assignor to A. E. Carlsen, Minneapolis, Minn. Thermostatic cut-out for gas valves. 1,678,169; July 24.
Shakespeare Company. (See Russell, S. G., and Workman, assignors.)
Shalkhauser, Eric G., Peoria, Ill. Combined radiator, lamp casing, and hood for motor vehicles. Des. 75,877; July 24.
Shannon, Jesse P., Lake Geneva, Wis. Fishing lure. 1,678,448; July 24.
Sharp & Smith. (See Shearon, Clarence G., assignor.)
Shaw-Walker Company. (See Hunter, David E., assignor.)
Shearon, Clarence G., Evanston, assignor to Sharp & Smith, Chicago, Ill. Surgical needle. 1,678,361; July 24.
Shivers, Paul F., Wabash, Ind., assignor, by mesne assignments, to Minneapolis Honeywell Regulator Company, Minneapolis, Minn. Electric valve. 1,678,202; July 24.
Sideman, Reuben, San Francisco, Calif. Show case. 1,678,088; July 24.
Siemens & Halske Aktiengesellschaft Wernerwerk. (See Quassowski, Paul, assignor.)
Siemens-Schuckertwerke Gesellschaft mit beschränkter Haftunk. (See Menz, Gustav, assignor.)
Siemens-Schuckertwerke Gesellschaft mit beschränkter Haftung. (See Stender, Waldemar, assignor.)
Silica Gel Corporation, The. (See Miller, Ernest B., assignor.)
Silica Gel Corporation, The. (See Patrick, W. A., and Miller, assignors.)
Simons Bros. Company. (See Simons, Frederick M., assignor.)
Simons, Frederick M., Bowling Green, Pa., assignor to Simons Bros. Company. Display tray. 1,678,449; July 24.
Singer, Grove C., Oakland, Ind. Electric lamp. 1,678,606; July 24.
Singmaster, James A., Bronxville, N. J., and F. G. Breyer and E. H. Bunce, Palmerton, Pa., assignors to The New Jersey Zinc Company, New York, N. Y. Metallurgy of zinc. 1,678,607; July 24.
Skala, Ljubomir W., Riverside, assignor of forty-five one-hundredths to F. J. Schraeder, jr., Glenn Ellyn, Ill. Television. 1,678,132; July 24.
Slade, Edward, New York, N. Y. Brake lining. 1,678,305; July 24.
Sloan, Alonso H., Detroit, Mich., assignor to Blaw-Knox Company, Pittsburgh, Pa. 1,678,362; July 24.
Smith, Amory J., et al. (See Gonsett, Robert R., assignor.)
Smith, Francis B., San Francisco, Calif. Positioning and aligning structures in aqueous bodies. 1,678,127; July 24.
Smith, George W., Forbes, N. Dak. Pail. 1,677,906; July 24.
Smith, Mowry, Neenah, assignor to Menasha Wooden Ware Company, Menasha, Wis. Tub cover. 1,678,306; July 24.

Smith, Neal D., assignor to United States Gypsum Company, Chicago, Ill. Weight-supporting tile. 1,677,907; July 24.
Smith, Omar H., assignor to General Rubber Company, New York, N. Y. Treating rubber latex and products obtained thereby. 1,678,022; July 24.
Smithers, Vernon L., Cuyahoga Falls, Ohio. Machine for investigating the properties of tires under loads. 1,678,363; July 24.
Smythe, Edwin H., Evanston, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Communicating and switching system. 1,678,203; July 24.
Socher, Hans, Zurich-Hongg, Switzerland. Foot-arch support. 1,678,608; July 24.
Société Anonyme le Carbone. (See Oppenheim, René, assignor.)
Society of Chemical Industry in Basle. (See Gams, A., and Scheidegger, assignors.)
Soubier, Leonard D., assignor to The Owens Bottle Company, Toledo, Ohio. Glass feeder. 1,678,232; July 24.
Soubier, Leonard D., assignor to The Owens Bottle Company, Toledo, Ohio. Glass-forming machine. 1 678,233; July 24.
Soubier, Leonard D., assignor to The Owens Bottle Company, Toledo, Ohio. Glassware-annealing leer. 1,678,234; July 24.
Southern Textile Machinery Company. (See Steere, William J., assignor.)
Spalding, A. G., & Bros. (See Reach, William F., assignor.)
Spangenberg, Fernando. (See Repay, Theodore, assignor.)
Spangler, Earl G. (See Walker, Thomas H., assignor.)
Spanier, Fritz, Karlsruhe, Germany. Toothpick. 1,678,609; July 24.
Spearman, Henry, San Mateo, Calif. Sectional magazine rack. 1,678,275; July 24.
Spencer, John A., Revere, assignor to Spencer Thermostat Company, Cambridge, Mass. Thermostat. 1,678,407; July 24.
Spencer Thermostat Company. (See Spencer, John A., assignor.)
Spencer, Wesley D., et al. (See Gonsett, Robert R., assignor.)
Sproull, Clarence W., Edgewood Borough, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,678,276; July 24.
Srulowitz, Hermann, Vienna, Austria. Shutting-off device for steam pipes and the like. 1,678,204; July 24.
Stadden, William H., Springfield, Mass. Valve. 1,677,993; July 24.
Standard Oil Development Company. (See Adams, Gale L., assignor.)
Standard Oil Development Company. (See Garner, J. B., and Leyden, assignors.)
Stebbins, Albert H., Los Angeles, Calif. Concentrator table. 1,678,364; July 24.
Steele, James R. (See Moore, G. L., and Steele.)
Steere, William J., Rockwood, Tenn., assignor to Southern Textile Machinery Company, Paducah, Ky. Sewing machine. 1 677,932; July 24.
Steiner Sales Company. (See Halls, Edward T., assignor.)
Stender, Waldemar, Berlin-Charlottenburg, assignor to Siemens-Schuckertwerke Gesellschaft mit beschränkter Haftung, Siemensstadt, near Berlin, Germany. Steam boiler. 1,678,235; July 24.
Stetson-Ross Machine Company. (See Webb, Orra W., assignor.)
Stevens, Victor H. (See Hartmann, Anton V., assignor.)
Stillman, Albert L., Plainfield, N. J., assignor to The General Fuel Briquette Corporation, New York, N. Y. Briquette and making the same. 1,677,994; July 24.
Stillwaggon, John J., Jersey City, N. J. Scraper. 1,678,488; July 24.
Stites, Joseph D., Whitestone N. Y. Canoe with steerable pontoon. 1,678,023; July 24.
Stone, Charles B. (See Coop, W. L., and Stone.)
Stone, Frederick Spokane, Wash. Earth-boring machine. 1,678,307; July 24.
Stoulil, Charles R., Pocahontas, Iowa. Dirigible headlight for automobiles. 1,678,308; July 24.
Stromberg-Carlson Telephone Manufacturing Company. The. (See Levis, John H., jr., assignor.)
Stromberg-Carlson Telephone Manufacturing Company, The. (See Manson, Ray H., assignor.)
Stromberg-Carlson Telephone Manufacturing Company, The. (See Powell, Winfred T., assignor.)
Stromswold, Leonard T. (See Hancock, W. G., and Stromswold.)
Strosacker, Charles J., and C. C. Kennedy, assignors to The Dow Chemical Company, Midland, Mich. Manufacture of indigo. 1,678,619; July 24.
Strouse, Adler Company, The. (See Reynolds, Michael J., assignor.)
Stuckey, Robert B., assignor to W. A. Riddell Company, Bucyrus, Ohio. Gate for leers, ovens, and the like. 1,677,933; July 24.
Sturtevant, Harold E., assignor to The Whitney Mfg. Co., Hartford, Conn. Chain and part therefor. 1,678,450; July 24.
Submarine Signal Corporation. (See Dorsey, H. G., and Williams, assignors.)
Submarine Signal Corporation. (See Williams, Robert L., assignor.)
Sulentic, Nicholas, Waterloo, Iowa. Spring recompressor. 1,677,934; July 24.
Sullivan Machinery Company. (See Holmes, Morris P., assignor.)
Sullivan Machinery Company. (See Mitchell, Joseph S., assignor.)
Sullivan Machinery Company. (See Wyman, Charles W. assignor.)
Sun Rubber Company. (See Lower, Melvin S., assignor.)
Sundberg, Karl, Rasunda, assignor to Aktiebolaget Elektrisk Malmletning, Stockholm, Sweden. Method and device for detecting and locating ores in an electromagnetic way. 1,678,489; July 24.
Sutliff, Wayne N., Brea, Calif. Slush-pump piston. 1,678,365; July 24.
Swartwout, Everett W., White Plains, N. Y. Steam engine. 1,678,309; July 24.
Tann, James H., Lansing, Mich. Vehicle signal. 1,678,366; July 24.
Tanner, Arnold J., North Haven, Conn. Dispensing and display container or box. 1,678,538; July 24.
Tarkington, Byron G., Shorewood, and O. F. Winsinger, Milwaukee, Wis., assignors to American Resistor Corporation, Philadelphia, Pa. Electrical heating appliance. Des. 75,878; July 24.
Taylor, James H., Oak Park, Ill. Apparatus for making nozzles. 1,678,451; July 24.
Tebo, William A., Anthony, R. I., assignor to Draper Corporation, Hopedale, Mass. Shuttle-thread tension for replenishing looms. 1,678,610; July 24.
Terwilliger, Charles O., Mount Vernon, assignor to F. v. Briesen, trustee, New York, N. Y. Condensation product and making the same. 1,678,024; July 24.
Texas Company, The. (See Schoonmaker, James M., jr., assignor.)
Thayer, Lou V., Adamsville, Pa. Potato digger. 1,678,490; July 24.
Thomas M. Klutts, Portland, Oreg. Washing machine. 1,678,120; July 24.
Thomas, Pacific J., Pittston, Pa. Reeling machine. 1,678,367; July 24.
Thomas, Pacific J., Wyoming, Pa. Prong clearing fork. 1,678,368; July 24.
Thompson, Augustus F., Huntington, W. Va. Radiant gas heater. Des. 75,879; July 24.
Thomson, S. H., Manufacturing Company, The. (See Hummert, Robert H., assignor.)
Thordarson, Chester H., Chicago, Ill. Adjustable electric condenser. 1,677,935; July 24.
Thordarson, Chester H., Chicago, Ill. Electric motor. 1,677,936; July 24.
Thordarson, Chester H., Chicago, Ill. Adjustable bearing structure. 1,677,937; July 24.
Thorn, Isak. (See Deutsch, L., and Thorn.)
Thorp, Kermit O., River Edge, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Transmission-control system. 1,678,128; July 24.
Tiechurst, George L., Bakersfield, Calif. Oil-reservoir safety appliance. 1,678,539; July 24.
Tiedemann, Henry F., assignor to Theo. Tiedemann & Sons, Inc., New York, N. Y. Textile fabric. Des. 75,880; July 24.
Tiedemann, Theo., & Sons, Inc. (See Tiedemann, Henry F., assignor.)
Timbs, Edward, Los Angeles, and L. E. Zerbe, Moneta, Calif., assignors to The National Supply Company of Delaware, New York, N. Y. Chain-drive sand reel attachment. 1,678,236; July 24.
Tischler & Seichter. (See Petersen, F., and Krüssmann, assignors.)
Tjaden, Alex S., Sioux City, Iowa. Light-control device for headlights. 1,678,170; July 24.
Tohtz, Helmuth W., and K. L. Bonnell, St. Louis, Mo. Refrigerator. 1,678,171; July 24.
Tohtz, Helmuth W., and K. L. Bonnell, St. Louis, Mo. Refrigerating system. 1,678,172; July 24.
Tonceray, Millard H., assignor to Hudson Motor Car Company, Detroit, Mich. Hood latch for automobiles. 1,678,025; July 24.
Torp, Morten J. (See Hansen, A., and Torp.)
Tournier, Edward P., Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Tool. 1,678,173; July 24.
Trenner, Simeon, Philadelphia, Pa. Pipette. 1,678,540; July 24.
Tritz, John H., Clinton, Iowa, assignor to Cotta Transmission Corporation, Rockford, Ill. Mixing valve. 1,677,995; July 24.
Troutman, William E., assignor to Duquesne Steel Foundry Company, Pittsburgh, Pa. Annealing box. 1,678,452; July 24.
Trumbull Electric Manufacturing Company, The. (See Getchell, Benjamin, assignor.)
Tucker, Andrew, Fairfield, Conn. Wall-bracket lighting fixture. Des. 75,881; July 24.
Tumey, Charles H., sr., San Antonio, Tex. Headlight lens. 1,678,408; July 24.
Tupper, Frank H., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Making ventilating strips for transformers. Re17,048; July 24.

Tuttle, George H., assignor to The Packard Electric Company, Warren, Ohio. Tap changer. 1,678,129; July 24.

Twin City Forge & Foundry Company. (See Ovestrud, Melvin, assignor.)

Tyler, Victor M., assignor to The Sentinel Mfg. Co., New Haven, Conn. Time-controlled gas-burning apparatus. 1,678,130; July 24.

U. G. I. Contracting Company. (See Fulweiler, Walter H., assignor.)

Ullmann, Gustav, Vienna, Austria. Method of and apparatus for cleaning high-pressure boiling apparatus. 1,678,089; July 24.

Ullom, Virgil V., et al. (See Gonsett, Robert R., assignor.)

Union Switch & Signal Company, The. (See Sproull, Clarence W., assignor.)

United Engineering & Foundry Company. (See Biggert, Florence C., jr., assignor.)

United Engineering and Foundry Company. (See Johnson, Lane, assignor.)

United Shoe Machinery Corporation. (See Furber, Frederick M., assignor.)

United Shoe Machinery Corporation. (See Hughes, William, assignor.)

United Shoe Machinery Corporation. (See Pym, Arthur F., assignor.)

United States Gypsum Company. (See Smith, Neal D., assignor.)

Universal Button Fastening & Button Co. (See Langley, Frank F., assignor.)

University Manufacturing & Sales Co. Inc. (See Hadermann, Frederick E., assignor.)

University Patents, Inc. (See Zucker, Theodore F., assignor.)

Utrilla, José M., Guanabacoa, Habana, Cuba. Attachment for writing implements. 1,678,578; July 24.

Valentine, Frank A., Apponaug, and D. C. Scott, assignors to Henry L. Scott Company, Providence, R. I. Testing machine. 1,678,369; July 24.

Valley Electric Company. (See Ballman, Edwin C., assignor.)

Vallone, Charles, assignor to Barcalo Manufacturing Company, Buffalo, N. Y. Crib or bed and the like structure. 1,678,237; July 24.

Van Albada, Lieuwe E. W., Amsterdam, Netherlands, assignor to the firm Carl Zeiss, Jena, Germany. Finder for photographic cameras. 1,678,493; July 24.

Van Sickle, Wilton, Lincoln Nebr. Server for slices of bread and the like. 1,677,938; July 24.

Vaughan, Frank P., assignor to Bay West Paper Co., Green Bay, Wis. Carton. 1,678,370; July 24.

Vaughn, Thomas L., jr., Charlotte, N. C. Safety fuse. 1,678,131; July 24.

Vincent, Perlo, Gloversville, N. Y. Skate. 1,678,579; July 24.

Vinogradov, Eugene, New York, N. Y. Automatic newspaper-vending machine. 1,677,939; July 24.

Viscose Company, The. (See Copson, Ernest D., assignor.)

Voices Incorporated. (See Hutnikow, Theodore, assignor.)

Volare, Fred, Scotch Plains, N. J., assignor to The Aeolian Company. Pitman for pneumatic motors. 1,677,908; July 24.

Von Auw, Alwin, assignor to Boorum & Pease Company, Brooklyn, N. Y. Visible card index. 1,678,541; July 24.

Von Platen, Baltzar C., and C. G. Munters, Stockholm, Sweden, assignors to Electrolux Servel Corporation, New York, N. Y. Refrigeration. 1,678,277; July 24.

Voorhees, John R., Cedar Falls, Iowa. Friction clutch. 1,678,026; July 24.

Wade, Benjamin O., White Pigeon, Mich. Wrench. 1,677,909; July 24.

Wade, Clem F., Evanston, Ill. Refrigerator. Des. 75,882; July 24.

Waggoner, Ralph, assignor to Marbelite Corporation of America, Los Angeles, Calif. Pedestal. Des. 75,883; July 24.

Wagner, Albert, Gross-Zschachwitz, near Dresden, Germany, assignor to the firm Fr. Küttner, Pirna, Saxony. Spinning machine for spinning artificial silk. 1,677,940; July 24.

Wagner, Charles L., Boonton, N. J., assignor to C. L. W. Patents Corporation. Heater. 1,678,027; July 24.

Wagner, Hermann, Soden-on-the-Taunus, and H. Eichwede and E. Fischer, Hoechst-on-the-Main, Germany, assignors to Grasselli Dyestuff Corporation, New York, N. Y. Dyeing mixed textile goods. 1,678,611; July 24.

Walker Manufacturing Company. (See Dearsley, Irwin E., assignor.)

Walker, Thomas H., Kansas City, Mo., assignor to E. G. Spangler. Pumping device. 1,678,612; July 24.

Wallace, Charles F., Westfield, and J. C. Baker, Nutley, assignors to Wallace & Tiernan Products, Inc., Belleville, N. J. Apparatus for the therapeutic application of chlorine. 1,678,625; July 24.

Wallace & Tiernan Products, Inc. (See Wallace, C. F., and Baker, assignors.)

Wallau, Alexander L., Cedarhurst, N. Y. Filler for cigar lighters. 1,678,494; July 24.

Walline, Ruben L. (See Prosch, Floyd F., assignor.)

Ward, Ernest, Independence, Mo. Lock washer. 1,678,409; July 24.

Warrington, William W., Summer Hill, New South Wales, Australia. Machine for preparing paper to enable portions to be easily detached. 1,678,410; July 24.

Waterbury Buckle Co. (See Moore, R. A., and La Vigne, assignors.)

Watkins, Walter W., Moulton, Ala. Cotton chopping machine. 1,678,542; July 24.

Watson, Cornelius B. (See Carr, R. H., and Watson.)

Watson, Reid, Lawrenceville, N. J. Coffee percolator. 1,678,543; July 24.

Webb, Orra W., assignor to Stetson-Ross Machine Company, Seattle, Wash. Hold-over guide for lumber-finishing machines and adjusting means therefor. 1,678,371; July 24.

Weeks, Charles S., South Orange, N. J., assignor, by mesne assignments, to The Gerrard Company, Inc., San Francisco, Calif. Package banding machine. 1,677,941; July 24.

Wees, Edward J., Omaha, Nebr. Shrine. Des. 75,884. July 24.

Wehrle Company, The. (See Pickup, George E., assignor.)

Wehrle, Otto, Emmendingen, Germany. Casing for electric transformers and the like. 1,678,090; July 24.

Weiss, Albert, Jacksonville, Fla. Method and apparatus for making building blocks. 1,678,613; July 24.

Weissberg, Hyman D., New York, N. Y. Bird cage. Des. 75,885; July 24.

Welch, Lyman W., assignor to Welch Manufacturing Company, Grand Rapids, Mich. Door structure for display cabinets. 1,678,453; July 24.

Welch Manufacturing Company. (See Welch, Lyman W., assignor.)

Western Electric Company. (See Bower, Justus H., assignor.)

Western Electric Company. (See Estes, Marion S., assignor.)

Western Electric Company. (See Friis, Harald T., assignor.)

Western Electric Company. (See Gilbert, John J., assignor.)

Western Electric Company. (See Harrison, Henry C., assignor.)

Western Electric Company. (See Hosford, William F., assignor.)

Western Electric Company. (See Kelly, Mervin J., assignor.)

Western Electric Company. (See Mathes, Robert C., assignor.)

Western Electric Company. (See Oswald, Arthur A., assignor.)

Western Electric Company. (See Peterson, Eugene, assignor.)

Western Electric Company. (See Rorty, M. C., and Potter, assignors.)

Western Electric Company. (See Smythe, Edwin H., assignor.)

Western Electric Company. (See Thorp, Kermit O., assignor.)

Western Electric Company. (See Tournier, Edward P., assignor.)

Western Electric Company. (See Wolfe, Wallace V., assignor.)

Western Railway Equipment Co. (See Howard, Charles L., assignor.)

Western Railway Equipment Company. (See Hoerr, Louis A., assignor.)

Westinghouse Electric & Manufacturing Company. (See Brace, Porter H., assignor.)

Westinghouse Electric & Manufacturing Company. (See Lamb, Carl J., assignor.)

Westinghouse Electric & Manufacturing Company. (See Tupper, Frank H., assignor.)

Westinghouse Gear and Dynamometer Company. (See Allen, Robert C., assignor.)

Westmoreland, Ennes L., Ogden, Utah. Extensible chassis for automobiles. 1,678,411; July 24.

Weston, Charles W., Pampa, assignor of one-fourth to Z. Wilson, Hidalgo County, and one-half to F. E. Osborn, F. B. Freeland, and G. Griffin, McAllen, Tex. Wall-paper border. Des. 75,886; July 24.

Wetzell, Clare A., Sterling, Ill., Wheel bearing figure toy. Des. 75,887; July 24.

Wetzell, Clare A., Sterling, Ill. Wheel bearing figure toy. Des. 75,888; July 24.

Weyandt, Carl S., Pittsburgh, Pa., assignor to Central Electric Tool Company. Reciprocating electric motor. 1,678,278; July 24.

Wheeler, Harry J., Kansas City, Mo. Fuse plug. 1,678,412; July 24.

Wheeling Stamping Company. (See Davis, Walter T., assignor.)

Whitaker, William T., Greenville, S. C. Harness strap. 1,678,544; July 24.

White, John F., assignor to White Products Company, Chicago, Ill. Theft-preventing device. 1,678,174; July 24.

White Products Company. (See White, John F., assignor.)

Whitmore, Wilbur W., Denver, Colo. Electric traffic signal. 1,677,942; July 24.

Whitney Mfg. Co., The. (See Belcher, Warren J., assignor.)

Whitney Mfg. Co., The. (See Sturtevant, Harold E., assignor.)

Whittingham, George H., assignor to Monitor Controller Company, Baltimore, Md. Electrically-operated thermostat. 1,678,372; July 24.

Wiegand, Henry J., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Resistance control apparatus. 1,678,028; July 24.

Wiesenfeld, Hattie M., executrix. (See Wiesenfeld, Joseph.)

Wiesenfeld, Joseph, deceased, Baltimore, Md.; H. M. Wiesenfeld, executrix. Saddle girth. 1,678,373; July 24.

Wiggin, Polly, Inc. (See Davis, S., and La Fon, assignors.)

Wiley, Roy E. (See Mensing, C. E., and Wiley.)

Wilhelm, Ottmar, assignor to the firm: Maschinenfabrik Augsburg-Nuernberg Aktiengesellschaft, Augsburg, Germany. Adjusting the proportion of color to thinning agent in connection with intaglio printing machines. 1,678,091; July 24.

Wilkinson, Eltoft W. (See Chapman, G. A., and Wilkinson.)

Williams, Robert L. (See Dorsey, H. G., and Williams.)

Williams, Robert L., Newton, assignor to Submarine Signal Corporation, Boston, Mass. Method and apparatus for measuring distance. 1,677,943; July 24.

Williams, Robert L., Newton, assignor to Submarine Signal Corporation, Boston, Mass. Method and apparatus for distance and direction measurement. 1,677,944; July 24.

Williams, Robert L., Newton, assignor to Submarine Signal Corporation, Boston, Mass. Method and apparatus for sound transmission. 1,677,945; July 24.

Williamson, R., & Company. (See Ohm, Albert J. D., assignor.)

Wills, Charles M., Atlantic City, N. J., assignor to The American Transom Co. Inc., Philadelphia, Pa. Flexible ventilator. 1,677,910; July 24.

Wilson, Zack, et al. (See Weston, Charles W., assignor.)

Wingquist, Sven G., Gottenborg, Sweden. Hydraulic change-speed gear. 1,677,996; July 24.

Winsboro, William A., Los Angeles, Calif., assignor to J. A. Greathouse. Lamp. Des. 75,889; July 24.

Winsinger, Otto F. (See Tarkington, B. G., and Winsinger.)

Winterhalder, Wilhelm, Frankfort-on-the-Main, Germany, assignor to Grasselli Dyestuff Corporation, New York, N. Y. Dyeing with vat and azo dyestuffs. 1,678,580; July 24.

Wirrer, Gottfried, Plainfield, N. J., assignor to International Motor Company, New York, N. Y. Selective change-speed mechanism with two reverse gears. 1,678,029; July 24.

Witham, George S., jr., Hudson Falls, N. Y. Moisture indicating and recording. Re17,049; July 24.

Withycombe, Robert M., Sydney, New South Wales, Australia. Making rubber brushes. 1,678,545; July 24.

Wolfe, Wallace V., Glen Ridge, assignor to Western Electric Company, Incorporated, New York, N. Y. Power-line signaling. 1,678,133; July 24.

Wolff, Herbert, Polzig, assignor to Progress Gesellschaft für Textilmaschinen mit beschränkter Haftung, Nuremberg, Germany. Crank-shaft mechanism for the slay of looms. 1,678,238; July 24.

Wolock, Morris, Chicago, Ill. Shoe box. Des. 75,891; July 24.

Wolter, Herman H., assignor to The Miller Company, Meriden, Conn. Lamp standard. Des. 75,890; July 24.

Wood, William H., South Euclid, Ohio. Automobile lamp. 1,678,092; July 24.

Wood, William H., South Euclid, Ohio. Vehicle headlight. 1,678,093; July 24.

Woodruff, Henry S., Schenectady, N. Y. Smoothing iron. 1,678,310; July 24.

Work, Samuel D., Minerva, Ohio. Locomotive-cylinder cock. 1,678,581; July 24.

Workman, Peter, jr. (See Russell, S. G., and Workman.)

Wright, Parvin, Chicago, Ill. Box-strapping machine. 1,677,911; July 24.

Wyman, Charles W., Claremont, N. H., assignor to Sullivan Machinery Company. Blow-out device. 1,678,205; July 24.

Yount, Horace J., Indianapolis, Ind. Micrometer caliper. 1,678,030; July 24.

Zähringer, Alexander, Stuttgart, Germany. Grinding machine. 1,678,413; July 24.

Zeiss, Firm Carl. (See Van Albada, Lieuwe E. W., assignor.)

Zeller, Joseph V. (See Hower, J. B., and Zeller.)

Zerbe, Lewis E. (See Timbs, E., and Zerbe.)

Ziemmerman, Henry, assignor to Chicago Card Board Company, Chicago, Ill. Display dispenser. 1,678,094; July 24.

Zimmerman, Rufus E. (See O'Brien, T., and Zimmerman.)

Zitscher, Arthur. (See Laska, L., and Zitscher.)

Zucker, Theodore F., assignor, by mesne assignments, to University Patents, Inc., New York, N. Y. Obtaining certain remedial principles of oils. 1,678,454; July 24.

Zweig, Joseph, Brooklyn, assignor to Metropolitan Lamp Co., Inc., New York, N. Y. Telephone cabinet. Des. 75,845; July 24.

Zwiebel, Ambrose A., Wilkes-Barre, Pa. Umbrella. 1,678,414; July 24.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 24TH DAY OF JULY, 1928.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Abrasive wheel. J. L. Howland. 1,678,596; July 24.
Acetate of lead solutions or crystals out of pyroligneous acid, Manufacturing white. M. Klar. 1,678,256; July 24.
Acids, Cyclopentenyl-substituted aliphatic. R. Adams, C. R. Noller, and J. A. Arvin. 1,678,175; July 24.
Advertising and display device. C. A. Long, jr. 1,678,475 July 24.
Aeroplane. L. Nagy. 1,678,423; July 24.
Agitator. W. R. Ellis. 1,678,425; July 24.
Agitator for chemically purifying oil. J. W. Kincade. 1,678,225; July 24.
Air circulating device for air ducts. H. G. McCaffrey. 1,677,974; July 24.
Air-conditioning system. J. H. Bower. 1,678,101; July 24.
Air waves for aural kinesitherapy, Utilizing. B. E. Eldred. 1,678,565; July 24.
Alarms, Circuit closer for electric. M. T. Cabral. 1,678,555; July 24.
Alkali-metal compounds from silicates containing them, Production of. T. A. Edison. 1,678,246; July 24.
Amplifier and radiator, Acoustic. E. A. Graham. 1,678,214; July 24.
Amusement device. Y. Nakashima. 1,678,573; July 24.
Anæsthetics of the metaaminobenzoic acid ester series, Manufacture of easily-soluble. O. Billeter, E. Rothlin, and J. Peyer. 1,678,317; July 24.
Anchor, Rail. B. M. Cheney. 1,678,461; July 24.
Anchor, Rail. G. L. Moore and J. R. Steele. 1,678,404; July 24.
Anchor, Sleeper. G. B. Bosco. 1,677,882; July 24.
Annealing box. W. E. Troutman. 1,678,452; July 24.
Antenna array, Broadside. S. W. Dean. 1,677,956; July 24.
Antitheft device. C. Lewando. 1,678,440; July 24.
Audition, Aiding. B. E. Eldred. 1,678,564; July 24.
Automobile body. J. Ledwinka. Re17,051; July 24.
Automobile heater. H. L. Hubbard. 1,678,567; July 24.
Automobile signal. E. F. Carlsen. 1,677,883; July 24.
Awning bracket. W. G. Dunn. 1,678,561; July 24.
Azo dyestuffs from 2-3-hydroxynaphthoic acid arylids and making the same. L. Laska and A. Zitscher. 1,678,599; July 24.
Bag: *See*—
Sleeping bag.
Ball handle. F. W. A. Hallerman. 1,678,005; July 24.
Baking pan. J. G. Jackson. 1,678,008; July 24.
Banding machine, Package-. C. S. Weeks. 1,677,941; July 24.
Barrel, Tumbling. F. W. Neville. 1,678,072; July 24.
Bath fixture, Combination. J. H. Balmer. Des. 75,819–20; July 24.
Battery: *See*—
Storage battery.
Battery and method of manufacture, Dry. E. E. Meisekothen. 1,678,601; July 24.
Bead-forming device. D. E. Hennessy. 1,678,043; July 24.
Bearing. H. G. Martin and M. H. Newgirg. 1,678,152; July 24.
Bearing structure, Adjustable. C. H. Thordarson. 1,677,937; July 24.
Bed, Folding camp. E. E. McGrew. 1,678,441; July 24.
Belt tightener. G. E. Fentress. 1,678,287; July 24.
Bench leg. H. B. Hursh, C. J. Anderson, and W. M. Bartels. 1,678,392; July 24.
Bit: *See*—
Drill bit.
Bit. N. K. Bowman. 1,677,960; July 24.
Bit for horses. T. Q. Preece. 1,678,532; July 24.
Blade for steam turbines, Runner. G. Menz. 1,678,263; July 24.
Blow-out device. C. W. Wyman. 1,678,205; July 24.
Board: *See*—
Drain board.
Body brace. E. Branson. 1,678,584; July 24.
Boiler: *See*—
Steam boiler. Superheater boiler.
Boilers, Supporting iron plate for. S. C. Markatos. 1,678,295; July 24.
Book clamp, Check. J. C. Buechler. 1,678,055; July 24.
Borax from $Na_2O.2B_2O_3.4H_2O$, Production of commercial. T. M. Cramer. 1,678,381; July 24.
Boring machine, Earth. F. Stone. 1,678,307; July 24.
Bottle. L. Lelong. Des. 75,852; July 24.
Bottle. G. N. Mas and S. K. Lubonia. Des. 75,854. July 24.
Bottle or similar article. L. W. Rice. Des. 75,873; July 24.
Bottle utilizable as a vase by turning it over. F. de Gerson. 1,678,588; July 24.
Box: *See*—
Annealing box. Display box.
Cigarette-delivery box.
Box for articles, Shipping. C. P. Gallistel. 1,677,918; July 24.
Box-strapping machine. P. Wright. 1,677,911; July 24.
Brace: *See*—
Body brace.

Awning bracket. Shore bracket.
Brake: *See*—
Vehicle brake.
Brake-control mechanism, Air. W. L. Coop and C. B. Stone. 1,678,106; July 24.
Brake equalizer. J. L. Mesple. 1,678,155; July 24.
Brake for vehicles. G. McGhee. 1,678,227; July 24.
Brake lining. E. Slade. 1,678,305; July 24.
Bridge for spectacles. E. Pappert. Des. 75,868; July 24.
Briquette and making the same. A. L. Stillman. 1,677,994; July 24.
Briquette and producing it. R. M. Hale. 1,678,387; July 24.
Brush, Shaving. S. W. Kendrick. 1,678,146; July 24.
Brushes, Making. C. R. Hubbard. 1,677,920; July 24.
Brushes, Making rubber. R. M. Withycombe. 1,678,545; July 24.
Buckle, Belt. A. H. Beck. 1,678,417; July 24.
Buckle, Slide. R. A. Moore and J. R. La Vigne. 1,678,264. July 24.
Building blocks, Method and apparatus for making. A. Weiss. 1,678,613; July 24.
Building construction. C. W. Glover. 1,678,504; July 24.
Building, Memorial. A. T. Nelson. Des. 75,862; July 24.
Burner: *See*—
Gas burner. Oil burner.
Hydrocarbon burner.
Burners, Priming device for hydrocarbon. W. C. Coleman. 1,678,057; July 24.
Button-affixing machine. F. F. Langley. 1,678,616; July 24.
Button, Control. E. J. Nielsen. 1,678,524; July 24.
Button cover. W. L. Myers and G. D. Harrison. 1,678,265; July 24.
Cabinet. C. J. Campbell. 1,678,378; July 24.
Cabinet, Collapsible shoe. M. W. Ahles. 1,678,415; July 24.
Cabinet, Radio receiving set. A. E. Hansen. Des. 75,841; July 24.
Cabinet, Sanitary roll-towel. E. T. Halls. 1,678,220; July 24.
Cabinet, Telephone. J. Zweig. Des. 75,845; July 24.
Cable. J. F. Howe. 1,678,292; July 24.
Cage, Bird. H. D. Weissberg. Des. 75,885; July 24.
Calculating device. N. L. Oates. 1,678,019; July 24.
Caliper, Micrometer. H. J. Yount. 1,678,030; July 24.
Cameras, Finder for photographic. L. E. W. Van Albada. 1,678,493; July 24.
Can opener. A. N. Frost. 1,678,112; July 24.
Candles, Electrical Christmas. C. T. Bliss. 1,677,998; July 24.
Canoe with steerable pontoon. J. D. Stites. 1,678,023; July 24.
Capper, Bottle. H. G. Rice. 1,678,303; July 24.
Car-control apparatus, Electric. P. A. Renta. 1,678,533; July 24.
Car liner. W. W. Rowe. 1,678,356; July 24.
Car, Mine. G. B. Edmunds. 1,678,563; July 24.
Car, Refrigerator. H. Corbin. 1,678,421; July 24.
Car ventilator, Poultry-. W. P. Johnson. 1,678,393; July 24.
Cars, Superstructure for tunnel-kiln. D. B. Hendryx. 1,678,251; July 24.
Carbon roll and core for manifolding machines. L. E. Lentz. 1,677,971; July 24.
Carburetor. M. C. Morris. 1,677,926; July 24.
Carline reenforcement and load-lifting arrangement. C. Harter. 1,678,509–10; July 24.
Cart. T. A. Conlon. 1,678,585; July 24.
Carton. F. P. Vaughan. 1,678,370; July 24.

Carton knock-out. H. D. Field. 1,678,426; July 24.
Cartridge. J. D. Pedersen. 1,678,162; July 24.
Case: *See*—
Show case.
Case and tray for storage-battery cells, Combined packing. W. H. Pelmer, jr. 1,677,982; July 24.
Casing having light-transmitting closure. H. A. Douglas. 1,678,137; July 24.
Casing, Vending-machine. P. G. Larrabee, H. A. Root, and E. S. Cassaday. Des. 75,851; July 24.
Casing, Well. H. Y. Carson. 1,678,280; July 24.
Casserole and band, Combined. H. H. Schott. Des. 75,876; July 24.
Casting articles having chromium-alloy surfaces, W. M. Mitchell. 1,677,979; July 24.
Catalysts, Regenerating. A. O. Jaeger. 1,678,627; July 24.
Catalysts, Reviving. A. O. Jaeger. 1,678,626; July 24.
Cellulose fiber, Production of high-alpha-. G. A. Richter. 1,678,230; July 24.
Cementing oil wells. M. T. McKee. 1,677,975; July 24.
Centrifugal cleaner. M. P. Holmes. 1,678,338; July 24.
Chain and part therefor. H. E. Sturtevant. 1,678,450; July 24.
Chain-drive sand-reel attachment. E. Timbs and L. S. Zerbe. 1,678,236; July 24.
Chains, Cross member for nonskid. E. J. Herchert. 1,678,063; July 24.
Chair. W. S. Ferris. 1,678,004; July 24.
Chair back. A. L. Johnson. Des. 75,848; July 24.
Chair, stool, seat, and the like, Metallic. F. H. Headley. 1,678,006; July 24.
Chandelier. J. Novin. Des. 75,864; July 24.
Chassis for automobiles, Extensible. E. L. Westmoreland. 1,678,411; July 24.
Cheese, Remaking. S. K. Robinson. 1,678,167; July 24.
Chlorine, Apparatus for the therapeutic application of. C. F. Wallace and J. C. Baker. 1,678,625; July 24.
Chopping machine, Cotton. W. W. Watkins. 1,678,542; July 24.
Churning cream into butter fat and apparatus therefor. C. E. North. 1,678,478; July 24.
Cigarette-delivery box. C. C. Roberts. 1,678,355; July 24.
Circuit-closing device. C. E. Morris. 1,678,228; July 24.
Circuit connecter. H. A. Douglas. 1,678,138; July 24.
Circuit controller, Time-controlled. R. R. Gonsett. 1,678,217; July 24.
Circuits, Thermionic-tube. 1,678,077; July 24.
Clamp: *See*—
Book clamp.
Clamp connecter, Electric. W. N. Ott. 1,678,350; July 24.
Clamping band. J. F. Horne. 1,678,622; July 24.
Cleaner: *See*—
Centrifugal cleaner. Vacuum cleaner.
Suction cleaner.
Cleaning and separating hair, Method and apparatus for. E. J. Olsen. 1,678,525; July 24.
Cleaning device. Hydraulic vacuum. C. F. MacDonald. 1,678,258; July 24.
Cleaning high-pressure boiling apparatus, Method of and apparatus for. G. Ullmann. 1,678,089; July 24.
Cleaning tin plate. T. O'Brien and R. E. Zimmerman. 1,678,297; July 24.
Cleansing machine. W. H. Dunn. 1,678,037; July 24.
Clip: *See*—
Floor clip. Permanent-wave clip.
Closets, Foot-rest attachment for. Z. W. Gunckel. 1,678,466; July 24.
Clutch, Friction. J. R. Voorhees. 1,678,026; July 24.
Coal briquette and making it. G. A. Chapman and E. W. Wilkinson. 1,678,379; July 24.
Cont. K. E. Burns. Des. 75,826; July 24.
Cock, Locomotive-cylinder. S. D. Work. 1,678,581; July 24.
Coin-controlled mechanism. H. B. Hilts. 1,677,893; July 24.
Coke, Quenching. F. F. Marquard. 1,677,973; July 24.
Collar holder. L. E. Baer. Des. 75,818; July 24.
Color to thinning agent in connection with intaglio printing machines, Adjusting the proportion of. O. Wilhelm. 1,678,091; July 24.
Communicating and switching system. E. H. Smythe. 1,678,208; July 24.
Concentrator table. A. H. Stebbins. 1,678,364; July 24.
Concrete-road machine. E. C. Carr. 1,678,624; July 24.
Condensation product and making the same. C. O. Terwilliger. 1,678,024; July 24.
Condenser, Adjustable electric. C. H. Thordarson. 1,677,935; July 24.
Connecting device. A. W. Hebb. 1,678,467; July 24.
Container and producing the same. R. G. Clyne. 1,678,330; July 24.
Container, Fuse. R. S. Bennett. Des. 75,823; July 24.
Container or box, Dispensing and display. A. J. Tanner. 1,678,538; July 24.
Container, Storage-battery. A. K. Brumbaugh. 1,678,033; July 24.
Control apparatus, Resistance. H. J. Wiegand. 1,678,028; July 24.
Control device, Fluid-pressure-. J. C. Ericksen. 1,677,959; July 24.
Controlled switch, Automatically-. G. H. Hart. 1,678,507; July 24.
Conveying and water cooling tie plates, Mechanism for. M. Overstrud. 1,678,195; July 24.
Cooking and apparatus used in such method, Method of. A. F. Bartleson. 1,677,912; July 24.
Cooling internal-combustion engines. W. W. Muir. 1,677,981; July 24.
Cooling oil or other liquids, Apparatus for. J. Moore. 1,678,070; July 24.
Cooling system. S. W. Rushmore. 1,678,484; July 24.
Core drill. J. S. Mitchell. 1,677,925; July 24.
Corset, Reducing. M. J. Reynolds. 1,677,989; July 24.
Cotton-boll breaker and cleaner. F. B. Cumpston. 1,678,210; July 24.
Couch and the like, Adjustable. H. J. Müller. 1,678,071; July 24.
Counterweight, Band-wheel. G. E. Fentress. 1,678,286; July 24.
Coupling for rigid-frame units, Articulated. A. Franco. 1,678,428; July 24.
Cover, Can. C. F. Larsen. 1,678,399; July 24.
Cover for washing-machine tubs. F. W. Juengst. 1,678,516; July 24.
Cover, Tub. M. Smith. 1,678,306; July 24.
Crane attachment. E. H. Lichtenberg. 1,678,010; July 24.
Cream, Producing agglomerated. C. E. North. 1,678,476; July 24.
Crib or bed and the like structure. C. Vallone. 1,678,237; July 24.
Curtain and operating means therefor. R. Parisik. 1,678,229; July 24.
Cushion: *See*—
Spring cushion.
Cut-out, Electrical. W. H. Illingworth. 1,678,187; July 24.
Cut-out for gas valves, Thermostatic. R. H. Shadrick. 1,678,169; July 24.
Cutter: *See*—
Pattern cutter. Wire cutter.
Planing cutter.
Cutting implement, Hand-operated. J. Kasztler. 1,677,922; July 24.
Cutting mechanism. F. Renz. 1,678,080; July 24.
Cutting rubber sheets, Apparatus for. C. H. Desautels. 1,678,036; July 24.
Cyanides, Apparatus for the production of alkali metal. R. W. Poindexter, jr., and P. T. Dolley. 1,677,986; July 24.
Cylinder head for internal-combustion engines, Antidetonating. A. Moore. 1,678,349; July 24.
Cylinders, Quick lock-up for plate. C. S. Crafts. 1,677,955; July 24.
Dairy products, Delactating. W. J. McLaughlin. 1,677,976; July 24.
Dam and weir, Permanent. S. Höyer. 1,678,515; July 24.
Damper, Furnace. F. E. Kling and C. E. Malley. 1,678,342; July 24.
Dental handpieces, Bearing for angle attachments for. L. Andresen. 1,678,097; July 24.
Dental handpieces, Contra-angle atachment for. L. B. Andresen. 1,678,096; July 24.
Designs for reproduction, Producing. A. Fruwirth. 1,677,965; July 24.
Die: *See*—
Punching die.
Digger: *See*—
Potato digger.

Pump, motor, meter, or the like, Rotary. C. O. J. Montelius. 1,677,980; July 24.
Pumping device. T. H. Walker. 1,678,612; July 24.
Punching die. J. G. Blessing. 1,678,319; July 24.
Purifying sugar solutions. F. W. Meyer. 1,678,571; July 24.
Rack: *See*—
Magazine rack. Roll rack.
Rack for articles. A. H. Canfield. Des. 75,828; July 24.
Radiator cap. R. H. Hummert. Des. 75,847; July 24.
Radiator, lamp casing, and hood for motor vehicles, Combined. E. G. Shalkhauser. Des. 75,877; July 24.
Radiocabinet, Console. J. O. Bergman. 1,678,032; July 24.
Radiocabinet or similar article. G. Calafato. Des. 75,827; July 24.
Radio signal receivers, Accessory for. S. N. Fleming. 1,678,288; July 24.
Radio signaling system. W. H. F. Holden. 1,677,967; July 24.
Radiotube and operating same. E. L. Koch. 1,677,896; July 24.
Radiotubes, Degasifying. F. S. McCullough. 1,677,900; July 24.
Rail joint. J. M. Hufft. 1,678,391; July 24.
Railroad-vehicle frame. A. W. Bruce. 1,678,323-4; July 24.
Range, Coal and wood. J. H. Sandell. Des. 75,875; July 24.
Range finder. G. Grimth. 1,678,062; July 24.
Rayon manufacture. G. A. Richter. 1,678,354; July 24.
Reaping or harvesting machine for harvesting hemp or similar stalks or crops. H. I. Cromer. 1,678,134; July 24.
Recompressor, Spring. N. Sulentic. 1,677,934; July 24.
Reel: *See*—
Fishing reel.
Reel. L. Johnson. 1,678,472; July 24.
Reeling machine. P. J. Thomas. 1,678,367; July 24.
Refining oils and waxes. W. A. Patrick and E. B. Miller. 1,678,298; July 24.
Refrigerating apparatus, Absorption. J. O. Boving. 1,678,242; July 24.
Refrigerating apparatus, Valved fitting for. J. G. King and H. B. Hull. 1,678,147; July 24.
Refrigerating plant. I. Amundsen. Re17,045; July 24.
Refrigerating system. H. W. Tohtz and K. L. Bonnell. 1,678,172; July 24.
Refrigeration. J. L. Schiltt and W. Dennis. 1,678,485; July 24.
Refrigeration. B. C. von Platen and C. G. Munters. 1,678,277; July 24.
Refrigerator. H. W. Tohtz and K. L. Bonnell. 1,678,171; July 24.
Refrigerator. C. F. Wade. Des. 75,882; July 24.
Regulating apparatus. E. J. Serpas. 1,677,992; July 24.
Relasting machine. A. F. Pym. 1,678,164; July 24.
Repair device for auto skid chains. F. G. Fahrbach. 1,678,003; July 24.
Retainer for dough-mixing machines and the like, Packing. F. Notz and G. Royan. 1,678,194; July 24.
Revivifying of spent decolorizing materials. O. L. Barnebey. 1,677,947; July 24.
Rim lock. C. G. Bloom. 1,678,550; July 24.
Ring: *See*—
Piston ring.
Ring and the like, Hog. W. V. and J. B. Curtis. 1,678,558; July 24.

Road-maintenance machine. C. A. Gustafson. 1,678,113; July 24.
Rods for welding, Apparatus for producing. C. Kotchi and F. J. Rode. 1,678,148; July 24.
Roll rack. A. M. Guillet. 1,678,506; July 24.
Roller assembly, Spring-. H. Dixson. 1,678,590; July 24.
Roof and shingle securing means. C. C. Figge. 1,678,333; July 24.
Roof for closed vehicle bodies. R. W. Maudslay. 1,678,262; July 24.
Rubber, Producing vulcanized. W. Scott. 1,678,084-5; July 24.
Safety appliance, Elevator. J. N. Anderson. 1,678,031; July 24.
Safety appliance, Oil-reservoir. G. L. Ticehurst. 1,678,539; July 24.
Salts of 3-acetylino-4-hydroxyphenyl arsenic acid and preparing the same. E. Fourneau. 1,677,964; July 24.
Sanding mechanism, Vehicle. A. W. Reed. 1,678,604; July 24.
Sanitary seat cover. A. Mueller. 1,678,296; July 24.
Sash counterbalance, Window-. G. C. Roedl. 1,678,444; July 24.
Sash holder and starter, Combined. E. F. Chaffee. 1,678,243; July 24.
Saw and slab kicker, Combination trimming. W. M. Eddins. 1,677,958; July 24.
Scoop or shovel, Snow. G. L. Crosman and A. P. Nason. 1,678,135; July 24.
Scraper. J. J. Stillwaggon. 1,678,488; July 24.
Screw driver. G. Perrault. 1,678,124; July 24.
Seat: *See*—
Nursery seat.
Seeds to augment their cultural value, Treating. A. C. Bennett. 1,678,418; July 24.
Server for slices of bread and the like. W. Van Sickle. 1,677,938; July 24.
Sewing machine. W. J. Steere. 1,677,932; July 24.
Sewing machines, Feeding mechanism for. C. W. Mueller. 1,678,191; July 24.
Shade, Lighting-fixture. A. J. D. Ohm. Des. 75,867; July 24.
Shades, Securing draw sticks in window. E. Reukauf, jr. 1,678,534; July 24.
Shaft, Flexible. R. M. Gaston. 1,678,335; July 24.
Shaft mechanism for the slay of looms, Crank-. H. Wolff. 1,678,238; July 24.
Shaker, Combination salt and pepper. A. J. Scott. 1,678,487; July 24.
Shaving combination. R. L. Cleary. 1,677,954; July 24.
Shearing machine, Fabric-. J. Monforts. 1,678,572; July 24.
Shield and making the same, Antiglare. R. M. Gruss. 1,678,218; July 24.
Shield for headlights, Reflector. G. A. Hendey and R. A. Schatzel. 1,678,250; July 24.
Shock absorber. C. E. Bond. 1,677,949; July 24.
Shock absorber for vehicles. M. E. Greenhouse. 1,678,040; July 24.
Shoe box. M. Wolock. Des. 75,891; July 24.
Shoe materials, Method of and apparatus for softening. F. M. Furber. 1,678,139; July 24.
Shoes and parts thereof, Apparatus for heating and softening. F. M. Furber. 1,678,140; July 24.
Shoes, Manufacture of. A. F. Pym. 1,678,165; July 24.
Shoes, Strengthening device for. K. Schutz. 1,678,274; July 24.
Shore bracket. G. B. Bosco. 1,678,177; July 24.
Show case. R. Sideman. 1,678,088; July 24.
Shrine. E. J. Wees. Des. 75,884; July 24.
Side light. A. J. Marshall. 1,678,261; July 24.
Sign, Animated. S. J. Blocker. 1,678,320; July 24.
Sign or bulletin board, Interchangeable. C. Hansen. 1,677,919; July 24.
Sign, Transfer. J. W. Kaber. 1,678,341; July 24.
Signal: *See*—
Automobile signal. Traffic signal.
Direction signal. Vehicle signal.
Signal device. G. Hulme. 1,678,470; July 24.
Signal reception. H. T. Friis. 1,678,183; July 24.
Signaling, Power-line. W. V. Wolfe. 1,678,133; July 24.
Signaling, Submarine. J. J. Gilbert. 1,678,184; July 24.
Signaling system, Carrier. E. I. Green. 1,677,966; July 24.
Skate. P. Vincent. 1,678,579; July 24.
Sleeping bag. M. Petrescu. 1,678,125; July 24.
Slitting machine. F. G. Crane. 1,677,915; July 24.
Slitting machine. R. M. Johnstone. 1,678,340; July 24.
Smoke-chamber lining. J. D. Covert. 1,677,914; July 24.
Smoker's article. A. A. Badler. 1,677,946; July 24.
Smoothing iron. H. S. Woodruff. 1,678,310; July 24.
Snap gauge, Adjustable. F. O. Hoagland. 1,678,290; July 24.
Socket, Adjustable candle. H. Hubbell. 1,678,144; July 24.
Sound-producing device. T. Hutnikow. 1,678,223; July 24.
Sound-producing instrument. W. Brandegger. 1,678,553; July 24.
Sound-reproducing machine, Attachment for. A. Humphrey. 1,678,568; July 24.
Sound transmission, Method and apparatus for. R. L. Williams. 1,677,945; July 24.
Speed driving mechanism, Variable-. B. P. Graves. 1,678,384; July 24.
Speed indicator, Audible. K. G. Magni. 1,678,402; July 24.
Speed mechanism with two reverse gears, Selective change. G. Wirrer. 1,678,029; July 24.
Speedometer. P. A. Robbins. 1,677,990; July 24.
Spindle drill, Radial multiple-. J. J. Boax and B. S. Robinoff. 1,677,999; July 24.
Spinning frame. J. P. Garey. 1,678,039; July 24.
Spinning machine for spinning artificial silk. A. Wagner. 1,677,940; July 24.
Spool. H. Brucker. 1,677,951; July 24.
Spring: *See*—
Vehicle spring.
Spring cushion. W. Lewis. 1,678,400; July 24.
Spring suspension for automobile chassis frames. R. C. Bicknell. 1,677,948; July 24.
Stamp, Rotary box. G. Differ. 1,678,589; July 24.
Stand: *See*—
Display stand. Lamp stand.
Steadying device for rotatable flag standards or poles. R. B. Peters. 1,678,529; July 24.
Steam boiler. D. S. Jacobus. 1,677,969; July 24.
Steam boiler. W. Stender. 1,678,235; July 24.
Steam engine. E. W. Swartwout. 1,678,309; July 24.
Steam-generating unit, Marine. J. J. Nellis. 1,677,901; July 24.
Steam press, Ironing. P. Diebold. 1,678,464-5; July 24.
Steel fabrication, Structural-. R. L. McIntyre. 1,678,013; July 24.
Steel printing body and producing the same. H. S. Sadtler. 1,678,231; July 24.
Stocking. A. M. A. Hoffman. Des. 75,846; July 24.
Storage battery, Lead. A. Kastelic. 1,678,224; July 24.
Store-shelving front unit. J. B. Murdoch. 1,678,522; July 24.
Stove, Cook. G. E. Pickup. 1,678,269; July 24.
Strand-severing mechanism. E. F. Baldwin. 1,678,100; July 24.
Strap: *See*—
Harness strap.
Sublimator. F. A. Pearl. 1,678,442; July 24.
Suction cleaner. W. A. Frantz. 1,678,111; July 24.
Suction roll. A. N. Russell and B. A. Malkin. 1,678,083; July 24.
Superheater boiler. W. F. Keenan, jr. 1,677,894; July 24.
Support, Foot-arch. H. Sochor. 1,678,608; July 24.
Support for electric light, gas, and other purposes, Movable. J. Dugdill. 1,678,422; July 24.
Support, Overhead. C. M. Goodrich. 1,678,431; July 24.
Support, Resilient. R. W. Davis. 1,678,034; July 24.
Surgical needle. C. G. Shearon. 1,678,361; July 24.
Switch: *See*—
Controlled switch. Electrothermostatic switch.
Electric switch. Motor-starting switch.
Switch connection for railroads, Adjustable trailing. N. D. Preston. 1,678,618; July 24.
Switching system, Automatic. A. Barnay. 1,678,318; July 24.
Syringes, Tip for hydrometer. M. S. Lower. 1,678,600; July 24.
Table: *See*—
Concentrator table.
Table and casing for a washing machine or the like, Combined. M. A. Defibaugh. Des. 75,830; July 24.
Table or similar article. J. J. Heyman. Des. 75,843-4; July 24.
Tabulating machines, Analyzer unit for. W. W. Lasker. 1,677,897; July 24.
Tack, Thumb. H. C. Karst. 1,678,473; July 24.
Tank breather, Oil-storage-. G. H. Bowlus. 1,678,376; July 24.
Tanks, Safety device for. H. T. Scott and L. E. Rone. 1,678,605; July 24.
Tap changer. G. H. Tuttle. 1,678,129; July 24.
Teaching device, Self-. W. H. Holmes. 1,678,621; July 24.
Telegraph exchange system, Printing-. R. D. Parker and D. B. Perry. 1,677,983; July 24.
Telegraphic and telephonic receiving circuits. C. K. Chandler. 1,677,885; July 24.
Telephone receiver. A. J. Roberts. 1,678,271; July 24.

Water-softening apparatus. W. H. Green. 1,677,891; July 24.
Water tube for furnace walls. H. B. Bradford. 1,677,887; July 24.
Weaving machine, Reed-. M. B. Lloyd. 1,678,011–12; July 24.
Well apparatus. J. T. Phipps. 1,678,073–4; July 24.
Wheel: *See*—
Abrasive wheel.
Wheel. D. T. Phillips. 1,678,530; July 24.
Wheel-aligning gauge. I. W. Munden. 1,678,157; July 24.
Whippers, Operating mechanism for. G. A. Herron. 1,678,468; July 24.
Whipping or agitating cream. C. E. North. 1,678,477; July 24.
Winding machine. J. A. Cameron. 1,678,326; July 24.
Window. E. L. O. and R. E. Patten. 1,678,479; July 24.
Window, Metal. J. H. Byrnes. 1,677,952; July 24.
Windows and the like, Stay for casement. E. Heffernan. 1,678,511; July 24.
Windows, Device for opening and closing attic. F. Petersen and H. Krüsmann. 1,678,020; July 24.
Wire cutter. C. Bonon. 1,678,551; July 24.
Wood and product thereof, Treatment of. B. Ford. 1,677,963; July 24.
Wrapping machine. H. H. Metcalf. 1,677,924; July 24.
Wrench. R. J. Greer. 1,678,216; July 24.
Wrench. B. O. Wade. 1,677,969; July 24.
Writing implements, Attachment for. J. M. Utrilla. 1,678,578; July 24.
Zinc, Metallurgy of. J. A. Singmaster, F. G. Breyer, and E. H. Bunce. 1,678,607; July 24.

CLASSIFICATION OF PATENTS

ISSUED JULY 24, 1928.

NOTE.—First number=class, second number=subclass, third number=patent number.

1— 45: 1,678,596
2— 14: 1,678,208
43: 1,677,989
44: 1,678,584
102: 1,677,913
146: 1,678,374
179: 1,678,198
224: 1,678,081
230: R. 17,047
265: 1,677,903
1,677,904
4— 203: 1,678,102
239: 1,678,501
243: 1,678,296
254: 1,678,466
5— 69: 1,678,071
100: 1,678,237
112: 1,678,441

CLASS 9.

Matches. Service Grocer Company. 244,856; July 31; Serial No. 264,387; published May 22, 1928.
Matches. Vulcan Match Co. 244,987; July 31; Serial No. 262,136; published Apr. 17, 1928.

CLASS 10.

Fertilizer. Synthetic Nitrogen Products Corporation. 244,971; July 31; Serial No. 264,209; published May 22, 1928.
Fertilizers. American Fertilizing Company. 69,475; renewed June 16, 1928.

CLASS 13.

Hitches and other like cordage, Rope. Midland Company. 245,012; July 31.
Pipe fittings, valves, etc., Metal. Cleveland Heater Company. 244,817; July 31; Serial No. 237,405; published May 22, 1928.
Sheets, Shower. Bartmann & Bixer Inc. 244,984; July 31; Serial No. 262,642; published May 22, 1928.
Wire cloth, window screen cloth, hooks, etc., Woven. Wickwire Spencer Steel Company. 244,825; July 31; Serial No. 221,343; published May 22, 1928.

CLASS 14.

Alloy, Metal. Buffalo Bronze Die Cast Corporation. 244,934; July 31; Serial No. 262,804; published May 15, 1928.
Alloys, Antifriction. Manganese Bronze and Brass Co. Limited. 69,044; renewed May 19, 1928.
Alloys, Metallic. Manganese Bronze and Brass Co. Limited. 69,043; renewed May 19, 1928.
Alloys, Metallic. Manganese Bronze and Brass Co. Limited. 69,067; renewed May 19, 1928.
Metal, Perforated. Edward C. Bowers and Charles L. Feldman, receivers. 244,832; July 31; Serial No. 260,204; published May 15, 1928.
Steels, Tool. Carpenter Steel Company. 244,863; July 31; Serial No. 263,686; published May 15, 1928.
Welding rods. Fusion Welding Corporation. 244,838; July 31; Serial No. 258,684; published May 15, 1928.

CLASS 15.

Gasoline. Transcontinental Oil Company. 244,941; July 31; Serial No. 261,594; published May 22, 1928.
Gasoline. Warner-Quinlan Company. 244,931; July 31; Serial No. 262,945; published May 22, 1928.
Gasoline, lubricants, and fuel oil. Loughborough Oil Co. 244,826; July 31; Serial No. 214,372; published Mar. 1, 1927.
Oil, Lubricating. Texas Pacific Coal and Oil Company. 244,937; July 31; Serial No. 262,381; published May 22, 1928.
Oils and greases, Lubricating. Moreland Bros. Co. 244,833; July 31; Serial No. 259,965; published May 22, 1928.
Oils and greases, Lubricating. Pierce Petroleum Corporation. 245,010; July 31.
Oils, Motor-lubricating. Texas Pacific Coal and Oil Company. 244,829; July 31; Serial No. 260,967; published May 22, 1928.

CLASS 16.

Enamel and varnish. Smith-Alsop Paint and Varnish Co. 244,902; July 31; Serial No. 264,123; published May 15, 1928.
Filler, lacquers, varnishes, brush wash, etc., White wood. L. S. Finch Chemical Corporation. 244,839; July 31; Serial No. 257,794; published May 22, 1928.
Paint enamels, varnishes, etc. Pittsburgh Plate Glass Company. 244,911; July 31; Serial No. 257,251; published May 8, 1928.
Paint pigments and paints. L. A. Sanders, jr. 244,903; July 31; Serial No. 253,608; published May 15, 1928.
Paint remover and ready-mixed paints. Non-Parel Paint Co. 244,819; July 31; Serial No. 234,627; published May 22, 1928.
Paints, Ready-mixed. Everseal Manufacturing Co. Inc. 244,860; July 31; Serial No. 264,292; published May 22, 1928.
Paints, varnishes, prepared shellacs, and paint enamels. Hetson Company. 244,836; July 31; Serial No. 259,171; published May 22, 1928.
Painter's size. Double Tooth Size Manufacturing Company. 244,939; July 31; Serial No. 261,951; published May 22, 1928.
Paste and ready-mixed paints and lacquers. W. J. Day. 244,938; July 31; Serial No. 262,349; published May 22, 1928.
Polish, Furniture. Great American Tea Co. 244,904; July 31; Serial No. 252,380; published May 8, 1928.
Varnish. Patek Brothers, Inc. 244,889; July 31; Serial No. 260,653; published May 15, 1928.
Varnishes, japans, lacquers, etc. Cleveland Varnish Company. 70,301; renewed Aug. 18, 1928.

CLASS 17.

Cigars. A. Gutierrez. 244,924; July 31; Serial No. 264,164; published May 22, 1928.
Cigars. Eduardo Suarez Murias y Compañia. 244,925; July 31; Serial No. 263,416; published May 22, 1928.

CLASS 19.

Shock absorbers for automobiles. Societe des Amortisseurs Reglables pour Automobiles. 244,979; July 31; Serial No. 263,355; published May 22, 1928.
Vehicle wheels and rims therefor. Michelin et Cie. 244,985–6; July 31; Serial Nos. 262,523–4; published May 22, 1928.
Vehicles and parts thereof. Daimler-Motoren-Gesellschaft. 69,756; renewed June 30, 1928.

CLASS 20.

Coated fabric similar to imitation leather. Table Art Mat Company. 244,978; July 31; Serial No. 263,521; published May 22, 1928.

CLASS 21.

Batteries. R. Horowitz. 245,005; July 31.
Dishwashers, Electric. Friedley-Voshardt Co. 244,849; July 31; Serial No. 249,055; published May 22, 1928.
Electron-discharge tubes, amplifier tubes, etc. B. F. Miessner. 245,008; July 31.
Fans, electric liquid and plastic food mixers, etc., Electric. A. C. Gilbert Company. 244,834; July 31; Serial No. 259,243; published May 22, 1928.
Heaters, electric ventilling fans, etc. A. C. Gilbert Company. 244,835; July 31; Serial No. 259,242; published May 22, 1928.
Illuminating outfits, Electrical. Eastman Kodak Company. 244,933; July 31; Serial No. 262,904; published May 22, 1928.
Insulated wire. National India Rubber Co. 70,737; renewed Sept. 29, 1928.
Insulated wires. Safety Insulated Wire and Cable Company. 31,329; renewed Feb. 22, 1928.
Light installation unit and outfit, Electric. Curtis Lighting, Inc. 244,926; July 31; Serial No. 263,378; published May 22, 1928.
Radio receiving sets. A. H. Grebe & Co. 244,824; July 31; Serial No. 222,454; published April 6, 1926.
Radio receiving sets. Premier Grand Piano Corporation. 244,827; July 31; Serial No. 210,924; published May 22, 1928.
Water heater, Electric. C. S. Newcomb. 244,822; July 31; Serial No. 224,670; published May 22, 1928.

CLASS 22.

Balls, clubs, tees, and bags, Golf. Burke Golf Company. 244,887; July 31; Serial No. 260,871; published May 8, 1928.
Dolls, doll houses, doll buggies, etc. J. C. Penney Company. 244,917; July 31; Serial No. 259,966; published May 15, 1928.
Golf balls. Advertising Golf Ball Corporation. 244,897–9; July 31; Serial Nos. 263,910–12; published May 15, 1928.
Golf practice machines, golf bags, tees, etc. Playgolf, Inc. 245,013; July 31.
Swings, Whirling. Merry-Whirl Swing Manufacturing Co. 244,914; July 31; Serial No. 260,340; published May 15, 1928.

CLASS 23.

Conveyors, shaker conveyors, etc., Belt. Mining Engineering Company. 244,965; July 31; Serial No. 269,184; published May 22, 1928.
Diggers, Posthole. Henry Disston & Sons, Incorporated. 70,859; renewed Oct. 13, 1928.
Files. Nicholson File Company. 71,833; renewed Dec. 15, 1928.
Hoes. Norvell-Shapleigh Hardware Company. 69,776; renewed July 7, 1928.
Machinery. Bartz, Wygant & Brown, Inc. 69,658; renewed June 30, 1928.
Machines. C. G. Haubold Aktiengesellschaft. 244,876; July 31; Serial No. 255,062; published May 22, 1928.
Machines, Centrifugal. Hydro-Centrifugals, Inc. 244,951; July 31; Serial No. 246,553; published May 22, 1928.
Pumps and agitating, thickening, classifying, and flotation apparatus. Hydrotator Company. 244,865; July 31; Serial No. 263,873; published May 22, 1928.
Razors and safety-razor blades, Safety. Treet Safety Razor Corporation. 244,922; July 31; Serial No. 264,662; published May 22, 1928.
Saws. Henry Disston & Sons, Incorporated. 70,860; renewed Oct. 13, 1928.
Screw drivers. Henry Disston & Sons, Incorporated. 70,857; renewed Oct. 13, 1928.
Screw drivers, Hand-operated. Henry Disston & Sons, Incorporated. 71,131; renewed Nov. 3, 1928.
Shaft supports, shaft hangers, bearings, etc. Dodge Manufacturing Corporation. 244,945; July 31; Serial No. 205,323; published May 22, 1928.
Tools, Gliding. W. H. Coe Manufacturing Company. 70,821; renewed Aug. 18, 1928.

CLASS 24.

Washboards. F. Martin, sr. 244,859; July 31; Serial No. 264,244; published May 22, 1928.

CLASS 26.

Devices designed to be applied to automobiles, Oil. McClellan and Seward. 244,910; July 31; Serial No. 256,960; published May 22, 1928.
Film, Motion-picture. S. M. Marcus. 244,952; July 31; Serial No. 246,917; published May 22, 1928.
Machine, Calculating. A. C. Meyer. 244,874; July 31; Serial No. 253,475; published May 22, 1928.
Meters, voltmeters, etc., Current. Siemens-Schuckertwerke Gesellschaft mit beschränkter Haftung. 244,845; July 31; Serial No. 253,962; published May 22, 1928.
Meters, voltmeters, water meters, etc., Current. Siemens & Halske Aktiengesellschaft. 244,846; July 31; Serial No. 253,959; published May 22, 1928.

CLASS 27.

Watches. Sprechnle & Company. 71,970; renewed Dec. 22, 1928.
Watches and watchcases. M. Lugerman. 244,912; July 31; Serial No. 257,424; published May 15, 1928.
Watches and watchcases. South Bend Watch Co. 244,999; July 31.
Watches, watch movements, and watchcases. Dinhofer Bros. Inc. 244,929; July 31; Serial No. 263,117; published May 22, 1928.

CLASS 28.

Badges, lapel buttons, cuff links, etc., Fraternity. Honor Society of Phi Kappa Phi. 244,811; July 31; Serial No. 245,985; published May 22, 1928.
Badges, lapel buttons, cuff links, etc., Fraternity. Pi Beta Phi Fraternity. 244,812; July 31; Serial No. 245,028; published May 22, 1928.
Badges, lapel buttons, cuff links, etc., Fraternity. Sigma Kappa Sorority. 244,810; July 31; Serial No. 246,127; published May 22, 1928.
Fraternity badges, shields, lockets, etc. Sigma Nu Fraternity. 244,879; July 31; Serial No. 251,105; published May 15, 1928.
Jewelry. Oscar Heyman & Brothers. 244,935; July 31; Serial No. 262,848; published May 22, 1928.
Jewelry. O. Pennino. 244,906; July 31; Serial No. 255,465; published May 15, 1928.
Jewelry, Fraternal. Omicron Pi Sigma Fraternity. 244,818; July 31; Serial No. 236,334; published May 22, 1928.
Pearls, necklaces, earrings, hatpins, etc. Cohn & Rosenberger, Inc. 244,928; July 31; Serial No. 263,199; published May 22, 1928.

Rings, bar pins, bracelets, watch chains, watch tabs, etc. Dinhofer Bros. Inc. 244,930; July 31; Serial No. 263,116; published May 22, 1928.
Rings, Finger. Henry Rufelsen, Inc. 244,847; July 31; Serial No. 252,914; published May 22, 1928.
Rings, gold and platinum badges, etc., Finger. Wefferling, Berry, Wallraff Co. 244,943; July 31; Serial No. 261,087; published May 22, 1928.
Studs, Shirt. Baer & Wilde Company. 245,009; July 31.

CLASS 30.

Porcelain and china ware of all kinds. Rosenthal China Corporation. 244,852; July 31; Serial No. 264,699; published May 22, 1928.

CLASS 32.

Cabinets, folding beds, etc., Phone. A. P. Willis. 244,953; July 31; Serial No. 250,587; published May 22, 1928.

CLASS 33.

Bottles, Glass. Standard Glass Co. 71,949; renewed Dec. 22, 1928.

CLASS 34.

Heaters using gas as a fuel, Water. E. R. Parker. 244,840; July 31; Serial No. 257,438; published May 22, 1928.
Liquid fuel burners. Silent Automatic Corporation. 244,983; July 31; Serial No. 262,775; published May 22, 1928.

CLASS 35.

Belting, Rubber and fabric machinery. Mining Engineering Company. 244,966; July 31; Serial No. 260,185; published May 22, 1928.
Packing, Asbestos. New Jersey Asbestos Company. 71,237; renewed Nov. 10, 1928.

CLASS 36.

Musical instruments. C. L. Farrand. 245,006; July 31.
Needles, Phonograph. Oke Phonograph Corporation. 244,927; July 31; Serial No. 263,226; published May 22, 1928.
Pianos and player actions for player pianos and wind musical instruments, Player. Pratt Read Player Action Company. 244,830; July 31; Serial No. 260,910; published May 15, 1928.
Pianos and player pianos. C. C. Harvey Company. 245,007; July 31.
Pianos, Player. Rudolph Wurlitzer Company. 245,011; July 31.
Reeds for clarinets, saxophones, etc. E. J. Amundson. 244,942; July 31; Serial No. 261,474; published May 22, 1928.

CLASS 37.

Books. United States Corporation Company. 69,715; renewed June 30, 1928.
Fabrics for walls and ceilings, Decorative. Sanative Company. 70,610; renewed Sept. 15, 1928.
Paper. Neenah Paper Company. 245,008; July 31.
Paper and box board, Wrapping. Hersey Paper Company. 244,996; July 31.
Paper, envelops, tablets, and blank books. J. C. Blair Company. 71,143; renewed Nov. 3, 1928.
Paper knives, pad holders, letter openers, paper weights, etc. J. E. Mergott Company. 244,940; July 31; Serial No. 261,900; published Apr. 3, 1928.
Pencils, Lead. Eagle Pencil Company. 71,223; renewed Nov. 10, 1928.
Pens and pencils, Safety clips for fountain. L. E. Waterman Company. 71,855; renewed Dec. 15, 1928.

CLASS 38.

Magazine. E. Hubbard. 69,910; renewed July 14, 1928.

CLASS 39.

Boots and shoes of leather, cloth, and satin. Frank Brothers. 71,578; renewed Dec. 1, 1928.
Hosiery. Burson Knitting Company. 71,429–30; renewed Nov. 24, 1928.
Hosiery. Lord & Taylor. 71,201; renwed Nov. 10, 1928.
Moccasins. Shields Brothers. 70,187; renewed Aug. 11, 1928.
Shoes and slippers. H. C. Godman Company. 70,102; renewed July 28, 1928.

CLASS 42.

Cotton piece goods. Pomona Mills, Inc. 245,001; July 31.
Cotton, rayon, and alpaca, and combinations of the same, Piece goods of. Robinson & Golluber. 244,854; July 31; Serial No. 264,696; published May 22, 1928.
Curtains and lace and muslin for making curtains, Window. Martin Manufacturing Company. 70,892–3; renewed Oct. 13, 1928.
Elastic fabrics. George C. Moore Company. 244,821; July 31; Serial No. 224,878; published May 22, 1928.
Fabrics in the piece of silk, artificial silk, etc. Frank & Cohen Silk Corp. 244,853; July 31; Serial No. 264,677; published May 22, 1928.
Goods, Piece. Safety Glass and Xetal Products, Limited. 244,848; July 31; Serial No. 249,926; published May 22, 1928.
Muslin. Martin Manufacturing Company. 70,891; renewed Oct. 13, 1928.
Robes, steamer rugs, and camel-hair blankets, Motor. Hurwitt Co. Inc. 244,981; July 31; Serial No. 263,154; published May 22, 1928.
Silk, cotton, and wool piece goods. Haas Brothers Fabrics Corporation. 244,857; July 31; Serial No. 264,301; published May 22, 1928.
Silk piece goods. Empire Silk Company. 244,851; July 31; Serial No. 264,813; published May 22, 1928.
Silk piece goods. Holman & Frans, Inc. 244,976; July 31; Serial No. 263,825; published May 22, 1928.
Silk piece goods. Stehlisilks Corporation. 244,980; July 31; Serial No. 263,231; published May 1, 1928.
Silk piece goods and silk-mixed piece goods. Susquehanna Silk Mills. 71,693; renewed Dec. 8, 1928.
Woolen cloth. A. L. Goldfine. 244,989; July 31; Serial No. 261,956; published May 22, 1928.
Woolen piece goods. Forstmann & Huffmann Company. 244,855; July 31; Serial No. 264,575; published May 22, 1928.
Woolen piece goods. Forstmann & Huffmann Company. 244,982; July 31; Serial No. 263,143; published May 22, 1928.

CLASS 44.

Cotton, absorbent gauze, and sanitary napkins, Absorbent. San-Nap-Pak Mfg. Co. Inc. 244,842; July 31; Serial No. 256,218; published May 22, 1928.
Electrotherapeutic pads and belts. J. Wieden. 244,850; July 31; Serial No. 248,337; published July 19, 1927.
Inhalers. G. W. McDonald. 244,861; July 31; Serial No. 264,245; published May 22, 1928.
Light and vibration massage device, Electrical. A. B. Walker. 244,993; July 31; Serial No. 258,053; published May 15, 1928.
Massaging appliances. Exersaager Corporation. 244,890; July 31; Serial No. 260,437; published May 15, 1928.
Pads and shields for corns, etc. Scholl Mfg. Co. Inc. 244,932; July 31; Serial No. 262,939; published May 22, 1928.
Sheeting, Hospital rubber and sanitary rubber. J. C. Penney Company. 244,888; July 31; Serial No. 260,845; published May 8, 1928.

CLASS 45.

Beverage, Tonic. F. H. Keron. 70,731; renewed Sept. 29, 1928.
Ginger ale and beverages. H. Woerts. 244,948; July 31; Serial No. 242,645; published May 22, 1928.

CLASS 46.

Alimentary pastes. Westchester Macaroni Co. 244,991; July 31; Serial No. 257,718; published May 15, 1928.
Bacon. Kingan and Company. 71,667; renewed Dec. 8, 1928.
Bread. Texas Bread Company. 244,882; July 31; Serial No. 244,800; published May 15, 1928.
Butter and cheese. New Zealand Dairy-Produce Control Board. 244,843; July 31; Serial No. 254,976; published Feb. 21, 1928.
Candy. Freeser Co. 244,878; July 31; Serial No. 256,108; published May 22, 1928.
Candy. Mexican Pecan Candy Company. 244,913; July 31; Serial No. 257,429; published May 22, 1928.
Candy. New England Confectionery Company. 244,923; July 31; Serial No. 264,182; published May 22, 1928.
Candy. Seeman Brothers, Inc. 244,844; July 31; Serial No. 254,692; published Nov. 1, 1927.
Candy and bars, Box. Keeley's Candies, Inc. 244,998; July 31.
Canned corn. Warrensburg Canning Co. 244,808; July 31; Serial No. 246,865; published May 31, 1927.
Canned fish. Seeman Brothers, Inc. 244,877; July 31; Serial No. 255,318; published May 1, 1928.
Canned fresh cape lobster. H. Dubler. 71,780; renewed Dec. 15, 1928.
Canned fruits and fruit preserves, etc. J. T. Fargason Grocer Co. 244,813; July 31; Serial No. 244,144; published May 22, 1928.
Canned fruits and vegetables. S. Ruby. 244,950; July 31; Serial No. 245,454; published May 1, 1928.
Canned fruits, canned vegetables, etc. I. Dickman & Sons. 244,815; July 31; Serial No. 238,777; published May 22, 1928.

Canned vegetables. Strasbaugh, Silver & Co. 69,713; renewed June 30, 1928.
Carob in paste or powdered form, Preparation of. Borden & Remington Co. 244,841; July 31; Serial No. 256,394; published May 22, 1928.
Cheese. Emmental Cheese Corporation. 244,904–5; July 31; Serial Nos. 255,236–7; published May 15, 1928.
Cheese. Royal Importing Co. 244,837; July 31; Serial No. 259,017; published Feb. 14, 1928.
Coffee compound. C. M. Watson. 244,816; July 31; Serial No. 237,523; published Jan. 18, 1927.
Cookies. Martin Baking Company. 244,886; July 31; Serial No. 211,690; published May 8, 1928.
Extracts, Flavoring. Virginia Dare Extract Company. 244,988; July 31; Serial No. 262,007; published May 22, 1928.

Extracts for foods, Flavoring. Finn Chemical Company. 245,015; July 31.
Flour, Wheat. Noblesville Milling Company. 31,557; renewed May 17, 1928.
Flour, Wheat. Vignes-Bombet Grocer Co. Inc. 244,997; July 31.
Fruits, Chocolate-covered frozen. Southern Cone Manufacturing Company. 244,994–5; July 31; Serial Nos. 263,977–8; published May 22, 1928.
Fruits, Fresh citrus. Sweetwater Fruit Company. 244,946; July 31; Serial No. 234,324; published May 22, 1928.
Gelatin. Crystal Gelatine Company. 70,410; renewed Aug. 25, 1928.
Grapes, Fresh. Lodi Fruit Growers Association. 245,000; July 31.
Honey. I. Rokeach & Sons, Inc. 244,918; July 31; Serial No. 260,959; published May 15, 1928.
Honey and hay. C. B. Justice. 244,820; July 31; Serial No. 228,318; published May 22, 1928.
Honey, orange honey, etc. Southwest Honey Producers Syndicate. 244,880; July 31; Serial No. 247,976; published May 15, 1928.
Ice-cream cones. Preferred Baking Co. 244,972; July 31; Serial No. 264,197; published May 22, 1928.
Margarine, Nut. Northern Cocoanut Products Corporation. 244,900; July 31; Serial No. 263,885; published May 15, 1928.
Nuts, R. L. Hatch. 69,688; renewed June 30, 1928.
Oranges, lemons, and grapefruit. San Fernando Heights Orange Association. 244,866; July 31; Serial No. 263,896; published May 22, 1928.
Peanut butter. G. H. Blood, jr. 244,893; July 31; Serial No. 264,008; published May 15, 1928.
Peanut butter and bottled fruit preserves and fruit jellies. Griggs, Cooper & Company. 244,964; July 31; Serial No. 260,115; published May 15, 1928.
Pecans. Southern Pecan Co., Inc. 244,828; July 31; Serial No. 224,160; published May 1, 1928.
Potatoes, Fresh Irish. Cardwell Brokerage Co. 244,968; July 31; Serial No. 260,555; published May 22, 1928.
Sugars, flour, dried beans, etc. B. A. Railton Co. 244,828; July 31; Serial No. 186,928; published Feb. 8, 1927.
Syrup and extract, Malt. R. Paoli & Company. 244,973; July 31; Serial No. 264,187; published May 22, 1928.
Syrup, canned vegetables, canned sauerkraut, Malt. A. F. Schwahn & Sons Co. 245,004; July 31.
Syrup, Malt. Green River Malt Co. of Massachusetts. 244,995; July 31; Serial No, 251,903; published May 15, 1928.
Syrup, Malt. Pabst Corporation. 244,891; July 31; Serial 260,345; published May 15, 1928.
Syrup, Table. Griggs, Cooper & Company. 244,916; July 31; Serial No. 260,118; published May 15, 1928.
Wafers. H. G. Cubbison. 244,901; July 31; Serial No. 264,082; published May 15, 1928.
Wheat breakfast food. Cream of Wheat Company. 244,892; July 31, Serial No. 264,021; published May 15, 1928.
Wheat breakfast food. Cream of Wheat Company. 244,896; July 31; Serial No. 263,929; published May 15, 1928.

CLASS 48.

Beer. A. Schreiber Brewing Co. 69,271; renewed June 2, 1928.
Beverages. M. K. Goetz Brewing Company. 244,967; July 31; Serial No. 260,500; published May 22, 1928.
Malt beverage. Peter Schoenhofen Brewing Company. 71,166–7; renewed Nov. 3, 1928.
Malt preparations. J. B. Weyermann. 66,433; renewed Nov. 26, 1928.

ALPHABETICAL LIST OF LABELS.

Airtite Tube Patch. For Tire Patches. Miller Motor Specialties, Inc. 34,377; July 31.
Beech-Nut Brand Chewing Gum. Fruit Flavored (6). For Chewing Gum. Beech-Nut Packing Company. 34,366; July 31.
Beech-Nut Brand Chewing Gum, Licorice (3). For Chewing Gum. Beech-Nut Packing Company. 34,364; July 31.
Beech-Nut Brand Chewing Gum, Licorice (4). For Chewing Gum. Beech-Nut Packing Company. 34,365; July 31.
Beech-Nut Brand Chewing Gum, Wintergreen (1). For Chewing Gum. Beech-Nut Packing Company. 34,362; July 31.
Beech-Nut Brand Chewing Gum, Wintergreen (2). For Chewing Gum. Beech-Nut Packing Company. 34,363; July 31.
Circular Handles. For Circular Handles for Umbrellas, Flagstaffs, Canes, Toys, Etc. M. C. Gardine. 34,370; July 31.
Country Candy Ham. For Candy. C. E. Gheens. 34,371; July 31.
Edmonson's Original Curatone Ointment. For Ointment. D. C. Edmonson. 34,368; July 31.
Facel Cleansing Tissues. For Cleansing Tissues. National Cellulose Corporation. 34,379; July 31.
Faith. For Pillowcases and Sheets. Riverside & Dan River Cotton Mills, Inc. 34,384; July 31.
From Buddy Squirrel's Nut Shops. For All Varieties, Forms, and Grades of Edible and Nonedible Nuts, Nut Butters, Nut Pastes, Nut Emulsions, Nut Confections, Nut Drinks and Specialties, Nut Sundae Nuts, Nut Health Foods, and Other By-Products. Continental Nut Company. 34,367; July 31.
Hovena Cleansing. For a Cleaning Preparation for Clothing, Draperies, Upholsteries, Etc. C. F. Hovey Company. 34,374; July 31.
Hoz-Ald. For Powdered Alum. Roberts Products Company. 34,385; July 31.
Improved 0 6 6, System Tonic. For Medicinal Preparation. Rothenberg Drug Co. 34,386; July 31.
Jus-Rite. For Hair Pomade. R. S. Andrews. 34,361; July 31.
La Belle. For Hairpins. Stering Pin Co. 34,388; July 31.
Odeurs—Go. For Deodorant. R. E. Flagler. 34,369; July 31.
Old Kwong. For Tonic. C. Lain. 34,375; July 31.
Merit Mello-Fit. For Hats. Trade Lithograph & Printing Company. 34,389; July 31.
Prescription No. 77. For Medicinal Tablet. Home Drug Company. 34,378; July 31.
Prosperity. For Malt Syrup. H. Sadur. 34,387; July 31.
Purity Cake. For Cake. Purity Cake Company. 34,383; July 31.
St. Patrick. For Candy. Puritan Chocolate Company. 34,382; July 31.
Saneen. For Pads for Sanitary Napkins. National Cellulose Corporation. 34,380; July 31.
Silver-Flash. For a Dirt and Grease Remover or a General Cleaner. S. R. Lester. 34,376; July 31.
Silvitol Volatile Oil. For Preparation for the Relief of Muscular Pains, Insect Bites, Etc. Dr. W. D. Hammond. 34,372; July 31.
Sippel's Kreme Whipt Honey. For Honey. Mountain States Honey Producers Association. 34,378; July 31.
Sta-Strate. For Article of Men's Furnishing Goods. A. D. Williams. 34,390; July 31.
Wiola Breath Gum. For Chewing Gum. P. Pasarick 34,381; July 31.

ALPHABETICAL LIST OF PRINTS.

Do a Hand-Spring. For Athletic Underwear. B. V. D. Company. 11,125; July 31.
Eat it in Delicious Muffins. For Post's Bran Flakes. Postum Company. 11,132; July 31.
Elizabeth Arden is Personally Interested in You. For Venetian Toilet Preparations. Elizabeth Arden, Inc. 11,123; July 31.
4 Million Dollar Clothing Plan. For Men's and Boys' Clothing. Moe Levy & Son. 11,131; July 31.
Frozen Peanut Bar. For Ice Cream Bar. Henry W., Inc. 11,130; July 31.
How Easy it is to Shave When You Control Hydrolysis. For Shaving Cream. E. R. Squibbs & Sons. 11,134; July 31.
In Loose-Fitting 'B. V. D.' Union Suits. For Athletic Underwear. B. V. D. Company. 11,124; July 31.
Odeurs—Go. For Deodorant. R. E. Flagler. 11,128; July 31.
Peasant Art Industry Made in Czechoslovakia. For Examples of Peasant Art. Czecho Peasant Art Co. 11,126; July 31.

When You Travel Light Travel Right. For Wardrobe Hand Luggage. Hartmann Trunk Company. 11,128; July 31.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 31ST DAY OF JULY, 1928.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

Aalborg, Christian, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Thermal relay. 1,678,841; July 31.

Aarons, Jacob M., Cleveland Heights, Ohio. Setting structure for lumber kilns and the like. 1,679,197; July 31.

Abramson, Alexander, Prague, Czechoslovakia. Power-transmission mechanism for the driving wheels of motor vehicles. 1,678,757; July 31.

Adams, Edward T., Phoenix, Ariz., assignor to Fairbanks, Morse & Co., Chicago, Ill. Internal-combustion engine. 1,678,897; July 31.

Addressograph Company. (See Isaksen, Robert C., assignor.)

Adjusta Company. (See Hirsh, Fred, assignor.)

Advance Machine Company. (See Richardson, M. H., and Antoine, assignors.)

Affel, Herman A. (See Espenschied, L., Affel, and Anderson.)

Affel, Herman A., Maplewood, N. J., assignor to American Telephone and Telegraph Company. High-frequency measuring system. 1,678,665; July 31.

Agasote Millboard Company, The. (See Becher, Hubert L., assignor.)

Aiken, Joseph E., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Microphone. 1,678,842; July 31.

Ainsworth, George, Great Neck, N. Y. Combined electric-light socket and cover. 1,679,110; July 31.

Albright, Andrew, jr., Miami, Fla., assignor to Rubber and Celluloid Products Company, Newark, N. J. Lather brush or similar article. Des. 75,892; July 31.

Alden Manufacturing Company. (See Alden, Milton, assignor.)

Alden, Milton, Springfield, assignor to Alden Manufacturing Company, Brockton, Mass. Electrical appartus. 1,678,717; July 31.

Alexander, Zeno, Kansas City, Mo. Transmission. 1,679,287; July 31.

Allegrezza, Frank, Chicago, Ill. Reminder. 1,679,198; July 31.

Allen, George H., Clinton, N. Y. Weatherproof sign. 1,679,288; July 31.

Allen, James B., Shidler, Okla., and E. O. Hamilton, Columbus, Ohio. Electric car. 1,679,068; July 31.

Allen, Robert C., Swarthmore, Pa., assignor to Westinghouse Electric & Manufacturing Company. Turbine-cylinder support. 1,678,968; July 31.

Allied Packers, Inc. (See Cushman, Arthur W., assignor.)

Altuna, Pedro, San Sebastian, Spain. Resilient vehicle wheel. 1,678,969; July 31.

Alvea, Charles B., Downers Grove, Ill. Pneumatic pump. 1,679,111; July 31.

American Cable Company. (See Scott, Rumsey W., assignor.)

American Car and Foundry Motors Company. (See Hall, Elbert J., assignor.)

American Chain Company. (See Fageol, Rollie B., assignor.)

American Cyanamid Company. (See Barsky, George, assignor.)

American Cyanamid Company. (See Buchanan, G. H., and Griffith, assignors.)

American Foundry Equipment Company, The. (See Minich, Verne E., assignor.)

American Hardware Corporation, The. (See Moore, Wallace F., assignor.)

American Heat Economy Bureau. (See Fischer, Carl, assignor.)

American Optical Company. (See Baker, Nelson M., assignor.)

American Optical Company. (See Baker, N. M., and Ljunglof, assignors.)

American Optical Company. (See Maynard, Albert E., assignor.)

American Optical Company. (See Tully, G. L., and Lacasse, assignors.)

American Radiator Company. (See Eggleston, Lewis W., assignor.)

American Smelting and Refining Company. (See Morrison, William M., assignor.)

American Stamping Co. (See Sherman, H. B., and Ordway, assignors.)

American Telephone and Telegraph Company. (See Affel, Herman A., assignor.)

American Telephone and Telegraph Company. (See Espenschied, L., Affel, and Anderson, assignors.)

American Telephone and Telegraph Company. (See Koenig, Walter, jr., assignor.)

American Telephone and Telegraph Company. (See Potter, Ralph K., assignor.)

American Telephone and Telegraph Company. (See Toomey, John F., assignor.)

American Telephone and Telegraph Company. (See Wilson, Leon T., assignor.)

American Window Company. (See Lewis, Claude A., assignor.)

American Woodlite Corporation. (See Wood, William G., assignor.)

Amerine, De Witt C., Vincennes, Ind. Washing cooked straw. 1,678,718; July 31.

Ames, Cortlandt F., jr., Mount Vernon, N. Y., assignor to The Barrett Company. Shingle holder. 1,678,804; July 31.

Ammonia Corporation, The. (See Svanoe, Hans, assignor.)

Anderson, Carl L., Chicago, Ill. Dispensing apparatus. 1,678,628; July 31.

Anderson, Clifford N. (See Espenschied, L., Affel, and Anderson.)

Andren, Birger T., assignor to A. O. Smith Corporation, Milwaukee, Wis. Spring hanger and gusset for automobile frames. 1,678,930; July 31.

Antoine, Alfred D. (See Richardson, M. H., and Antoine.)

Appling, Grady S., El Campo, Tex., assignor of one-half to N. R. Appling, Hollywood, Calif. Douche case. 1,679,146; July 31.

Appling, Nadine R. (See Appling, Grady S., assignor.)

Arlen, Olga L., New York, N. Y. Facial bandage. 1,678,970; July 31.

Armstrong, Arthur N., assignor of one-half to H. J. Sommers, Norwich, N. Y. Striker attachment for animal traps. 1,678,898; July 31.

Arnold, Carl, Nuremberg, Germany. Spark-producing figure wheeled toy. 1,678,797; July 31.

Arnold, Edwin E., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Ironing machine. 1,678,843; July 31.

Ashley, Frank M. (See Benz, A. R., and Ashley.)

Ashton, William S., assignor to Hood Rubber Company, Watertown, Mass. Boot-tree or last. 1,679,016; July 31.

Ashworth, George B., Amsterdam, N. Y. Locomotive trailing truck. 1,679,147; July 31.

Asprooth, Axel H., Baltimore, Md., and A. M. Leoni, assignors to Electro-Motive Devices, Inc., Philadelphia, Pa. Effecting power transmission. 1,678,798; July 31.

Asprooth, Axel H., Baltimore, Md., and A. M. Leoni, assignors to Electro-Motive Devices, Inc., Philadelphia, Pa. Two-motor drive for vehicles. 1,678,799; July 31.

Athans, John M., New York, N. Y. Service table. 1,679,017; July 31.

Automatic Electric Inc. (See Madsen, Fred T., assignor.)

Autostrop Patents Corporation. (See Gaisman, Henry J., assignor.)

Bach, Oscar B., New York, N. Y. Upright for an andiron. Des. 75,893; July 31.

Bachmann, Wilhelm. (See Karplus, H., and Bachmann.)

Bähr, Hans, Chicago, Ill., assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Converting hydrogen sulphide into sulphur dioxide. 1,678,630; July 31.

Baillot, Alphonse E., Hull, assignor of fifty-one one-hundredths to A. H. Coplan, Ottawa, Ontario, and forty-nine one-hundredths to A. H. Coplan, Hull, Quebec, Canada. Cupola. 1,678,899; July 31.

Baker, John S., assignor to The Cook Electric Company, Chicago, Ill. Heat coil. 1,678,800; July 31.

Baker, Nelson M., assignor to American Optical Company, Southbridge, Mass. Machine lubrication. 1,679,199; July 31.

Baker, Nelson M., assignor to American Optical Company, Southbridge, Mass. Grindstone honing device. 1,679,200; July 31.

Baker, Nelson M., and G. L. Ljunglof, assignors to American Optical Company, Southbridge, Mass. Universal stone mounting. 1,679,201; July 31.

Baldridge, Charles W., Chicago, Ill. Rail anchor. 1,679,112; July 31.

Barber-Colman Company. (See Colman, Howard D., assignor.)

Barclay, William J., assignor of one-half to W. A. King, Springfield, Mo. Attachment for checkrow planters. 1,678,758; July 31.

Barker, John, London, England. Vehicle tire. 1,678,631; July 31.
Barrett Company, The. (See Ames, Cortlandt F., jr., assignor.)
Barrett Company, The. (See Gerges, Wesley R., assignor.)
Barrett Company, The. (See Miller, S. P., and Hill, assignor.)
Barsky, George, assignor to American Cyanamid Company, New York, N. Y. Making esters. 1,678,719; July 31.
Bartling, Friedrich, Munich, Germany. Gas-tight seal for relatively moving parts of. 1,679,018; July 13.
Bass, E. & J., Inc. (See Tennhardt, Elsa, assignor.)
Basskin, Benjamin, St. Louis, Mo. Trousers. 1,679,148; July 31.
Baumgärtner, Friedrich W., Berlin-Schoneberg, assignor to F. A. Baumgartner, Dr. Katz & Co. G. m. b. H., Elswerder-Spandau, Germany. Manufacture of hollow bodies from fibrous-material pulp. 1,678,759; July 31.
Bausch & Lomb Optical Co. (See Poser, Max, assignor.)
Beall, Charles R., Edgewood Borough, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,679,015; July 31.
Becher, Hubert L., Trenton, assignor to The Agasote Millboard Company, Ewing Township, N. J. Sizing fibers. 1,678,720; July 31.
Beehman, Henry F., assignor to Duplex Printing Press Company, Battle Creek, Mich. Changeable rotary folder. 1,679,289; July 31.
Becker, Joseph, assignor to The Koppers Company, Pittsburgh, Pa. Coking retort oven. 1,678,801; July 31.
Becker, Joseph, assignor to The Koppers Company, Pittsburgh, Pa. Coking retort oven. 1,678,802; July 31.
Becton, Dickinson & Co. (See Marschalek, Alexander, assignor.)
Benbow, James D., assignor to Western Wheeled Scraper Company, Aurora, Ill. Fluid-pressure-operated mechanism for dump cars. 1,678,900; July 31.
Bennett, William A. (See Talley, Gus E., assignor.)
Benz, Alice R., and F. M. Ashley, Brooklyn, N. Y. Shirt for men's wear. 1,678,629; July 31.
Berg, Christian P., Chicago, Ill. Hydrating lime. 1,679,149; July 31.
Bergesen, John, sr., Brooklyn, N. Y. Portable metal structure. 1,678,971; July 2.
Berkshire Magneto Co. (See Brown, Avery E., assignor.)
Berner, Gotthold P. (See Pinkel, A. F., and Brunner, assignors.)
Bernhardt, Roy P., and V. D. Black, jr., Livermore, Calif. Axle gauge. 1,678,761; July 31.
Beskow, Bernhard M., New Haven, Conn. Golf register. 1,678,762; July 31.
Bessler, Vetal, Brooklyn, N. Y. Upright piano. 1,679,290; July 31.
Betzold, Nicholas W., Brainerd, Minn. Furnace hood. 1,679,150; July 31.
Bierbrauer, Otto A. (See Helland, N. E., Harrison, and Bierbrauer.)
Binz, Arthur, Berlin, and C. Räth, Rangsdorf, Germany. Preparation of arsenic compounds. 1,678,760; July 31.
Bird, Clifton, Hardesty, Okla. Automobile abstract. 1,678,666; July 31.
Birbaum, Harry A., assignor of one-half to A. S. Cobden, Troy, N. Y. Dispensing device. 1,679,237; July 31.
Bishop, Joseph W., Muskegon, Mich., assignor to The Brunswick-Balke-Collender Company, Chicago, Ill. Toilet-seat hinge. 1,679,202; July 31.
Black, Nathaniel S., Newtonville, assignor to The Casey Foster Co., Boston, Mass. Convertible hand truck and vehicle. 1,679,325; July 31.
Black, Victor D., jr. (See Bernhardt, R. P., and Black.)
Blackburn, Guy W., Elgin, Ill. Speedometer. 1,679,203; July 31.
Blaw-Knox Company. (See Bradshaw, Grant D., assignor.)
Blumberg, Harry, and M. A. Mikesh, assignors to A. O. Smith Corporation, Milwaukee, Wis. Production of pipe couplings by centrifugal casting. 1,678,931; July 31.
Blunt, James G., Schenectady, N. Y. Truck for railroad vehicles. 1,679,151; July 31.
Boehringer, John A., Springfield, assignor to Star Chandelier Co., Inc., New York, N. Y. Front plate for an electric wall bracket or similar article. Des. 75,894; July 31.
Boehringer, John A., Springfield, assignor to Star Chandelier Co., Inc., New York, N. Y. Electric wall bracket or similar article. Des. 75,895; July 31.
Boehringer, John A., Springfield, assignor to Star Chandelier Co., Inc., New York, N. Y. Chandelier or similar article. Des. 75,896; July 31.
Boehringer, John A., Springfield, assignor to Star Chandelier Co., Inc., New York, N. Y. Combined strap and arm for lighting fixtures or similar articles. Des. 75,897; July 31.
Boehringer, John A., Springfield, assignor to Star Chandelier Co., Inc., New York, N. Y. Electric wall bracket or similar article. Des. 75,898; July 31.
Boles, Henry A., Middlebury, Vt. Seat back. 1,679,238; July 31.
Bolzer, Thomas P., Gloucester, Mass. Chemical-can rack for ice-cream cabinets. 1,678,763; July 31.
Booth, William N., Detroit, Mich. Vehicle wheel. 1,679,113; July 31.
Borden Company, The. (See Green, Lee B., assignor.)
Bossert Corporation, The. (See Clement, Walter J., assignor.)
Bowen, George W., San Diego, Calif. Hydrocarbon burner. 1,679,152; July 31.
Boyce, William D., New York, N. Y. Smoke consumer and soot blower. 1,678,764; July 31.
Brackett, Edward M. and F. M., Topeka, Kans. Cut-off mechanism for stripping machines. 1,678,667; July 31.
Brackett, Fred M. (See Brackett, Edward M. and F. M.)
Bradshaw, Grant D., Pittsburgh, assignor, by mesne assignments, to Blaw-Knox Company, Blawnox, Pa. Fluid separator. 1,678,844; July 31.
Braun, Philip N., assignor to the Prosperity Company Inc., Syracuse, N. Y. Pressing machine. 1,679,019; July 31.
Brent, George F., Eugene, Oreg. Piston. 1,679,020; July 31.
Bridgeport Brass Company. (See Oakley, Erastus G., assignor.)
Briggs, Frederick, assignor to Briggs Packing Co., Washington, D. C. Scrapple package. 1,678,632; July 31.
Briggs Packing Co. (See Briggs, Frederick, assignor.)
Britsch, Otto C. (See Rothenberg, H., and Britsch.)
Bronberger, Frank, Northport, N. Y. Air cushion. 1,678,972; July 31.
Brown, Avery E., assignor to Berkshire magneto Co., Pittsfield, Mass. Magneto-electric machine. 1,679,069; July 31.
Brown, John L., Catonsville, Md. Thermostatic device. 1,679,070; July 31.
Brown, Vincent H., Ozone Park, N. Y., assignor to Radio Corporation of America. Signal-monitoring system. 1,678,973; July 31.
Bruce, Alfred W., New York, N. Y. Locomotive truck. 1,679,153; July 31.
Brunnell, Earl C., Stratford, Conn., assignor to J. J. King, New York, N. Y. Safety razor. 1,678,933; July 31.
Brunner, Matthew J. (See Pinkel, A. F., and Brunner.)
Brunswick-Balke-Collender Company, The. (See Bishop, Joseph W., assignor.)
Bryan, William E., assignor to Slack & Parr Limited, Kegworth, Derby, England. Petrol and other measured-quantity delivery pump. 1,679,021; July 31.
Bryant Heater and Manufacturing Company, The. (See Fox, Otto, assignor.)
Buchanan, Guy H., Westfield, and P. W. Griffith, Elizabeth, N. J., assignors to American Cyanamid Company, New York, N. Y. Recovering combined nitrogen from crude calcium cyanamide. 1,678,721; July 31.
Bucher, Armin. (See Staudinger, H., Tobler, Stocker, Müller, and Bucher.)
Bucky, Gustav, New York, N. Y. X-ray tube. 1,679,332; July 31.
Budd Wheel Company. (See Smith, John W., assignor.)
Bühler, Georg, Steinenkirch, near Geislingen-on-the-Steige, Germany. Suction apparatus. 1,678,932; July 31.
Burchartz, Heinrich, Gelsenkirchen, Germany, assignor, by mesne assignments, to Centrifugal Pipe Corporation. Casting pipe. 1,678,633; July 31.
Burner, William L., Koppel, Pa., and O. E. Kantenwein, Oak Park, Ill., assignors to Koppel Industrial Car and Equipment Company, Pittsburgh, Pa. Dump car. 1,678,765; July 31.
Burton, Paul C. (See Galloway, R. M., and Burton.)
Busch-Sulzer Bros.-Diesel Engine Company. (See Philipp, Otto, assignor.)
Busch-Sulzer Bros.-Diesel Engine Company. (See Schaer, Charles, assignor.)
Butler, James A., assignor to Pneumatic Scale Corporation, Ltd., Norfolk Downs, Mass. Package-labeling machine. 1,678,805; July 31.
Byers, Stanley, Bedford, Ind. Cushioning handle for pneumatic tools. 1,679,291; July 31.
Caldwell, Otto H., Houston, Tex. Cutter. 1,679,022; July 31.
California Card Manufacturing Company. (See Helmquest, William J., assignor.)
Campbell, James, Montrose, Calif. Brick hammer. 1,679,071; July 31.
Carlson, Walter C., assignor to Milwaukee Paper Box Company, Milwaukee, Wis. Picture-display device for candy boxes or the like. 1,678,722; July 31.
Carmichael, John R., Dormont, Pa. Bowling pin. 1,679,072; July 31.
Carmichael, John R., Dormont, Pa. Billiard cue. 1,679,073; July 31.
Carrey, John O., assignor to Carrey-Morse Engineering Company, St. Louis, Mo. Cooling tank. 1,679,292; July 31.
Carrey-Morse Engineering Company. (See Carrey, John O., assignor.)
Carroll Corporation. (See Carroll, Edward M., assignor.)
Carroll, Edward M., Sanford, Fla., assignor to Carroll Corporation, Atlanta, Ga. Side arch brick. Re17,052; July 31.
Carter, Ray L., Phoenix, N. Y. Template for guiding routers. 1,679,074; July 31.
Casey Foster Co., The. (See Black, Nathaniel S., assignor.)

Cassereau, Henri, Mexico, Mexico. Photographic-film drier. 1,679,239; July 31.
Cawley, George, Montclair, N. J., assignor to The Permutit Company, New York, N. Y. Process of and apparatus for treating water. 1,678,766; July 31.
Centorrino, Marcello, New York, N. Y. Instructing device. 1,678,689; July 31.
Centrifugal Pipe Corporation. (See Burchartz, Heinrich, assignor.)
Centrifugal Pipe Corporation. (See Holthaus, Johann, assignor.)
Chandler, Edward F., Brooklyn, N. Y. Remote control system. 1,678,634; July 31.
Chemipulp Process, Inc. (See Dunbar, Thomas L., assignor.)
Cherry, Oscar A., and C. F. Chosa, assignors to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Plastic composition and production thereof. 1,678,635; July 31.
Chicago Telephone Supply Company. (See Frost, Herbert H., assignor.)
Chicago Telephone Supply Co. (See Schellenger, Newton C., assignor.)
Chocolat Tobler Holding Co. Aktiengesellschaft. (See Egli, Arnold A., assignor.)
Chosa, Cletus F. (See Cherry, O. A., and Chosa.)
Christensen, Niels A., Cleveland, Ohio. Transmission brake mechanism. 1,679,154; July 31.
Chryst, William A., assignor, by mesne assignments, to Delco-Remy Corporation, Dayton, Ohio. Ignition apparatus. 1,678,934; July 31.
Churchward, Jack, New Haven, Conn. Vulcanizing pan. 1,679,114; July 31.
Clark, J. B., Company, The. (See Kalgren, John E., assignor.)
Clark, Paul L., Brooklyn, N. Y. Electrical phototelescopic apparatus. 1,678,974; July 31.
Clement, Walter J., assignor to The Bossert Corporation, Utica, N. Y. Rotary-hammer grinding mill. 1,678,723; July 31.
Cleveland Hardware Company, The. (See Riordan, John M., assignor.)
Clum Manufacturing Company. (See Winning, Robert K., assignor.)
Coates, William A., Chorlton-cum-Hardy, and D. R. Davies, Stretford, Manchester, England, assignors to Westinghouse Electric & Manufacturing Company. Electrical switch gear. 1,678,845; July 31.
Coates, William A., Chorlton-cum-Hardy, and G. E. Gittins and D. R. Davies, Manchester, England, assignors to Westinghouse Electric & Manufacturing Company. Electrical switch gear. 1,678,845; July 31.
Cobden, Alan S. (See Birnbaum, Harry A., assignor.)
Cochran, James M. (See Scott, G. A., and Cochran.)
Cocker, George B., Gastonia, N. C. Yarn-winding apparatus. 1,678,975; July 31.
Coder, Joseph and L., St.-Marcel-les-Marseille, France. Hoisting mechanism for dumping trucks. 1,679,075; July 31.
Coder, Louis. (See Coder, Joseph and L.)
Coleman Auto Spring Suspension Company. (See Coleman, Stephen L. C., assignor.)
Coleman, Stephen L. C., Fredericton, New Brunswick, Canada, assignor to Coleman Auto Spring Suspension Company, Limited. Vehicle suspension. 1,678,847; July 31.
Collier, David R., assignor to Collier-Keyworth Company, Gardner, Mass. Tilting chair. 1,678,668; July 31.
Collier, David R., assignor to Collier-Keyworth Company, Gardner, Mass. Wheel. 1,678,669; July 31.
Collier-Keyworth Company. (See Collier, David R., assignor.)
Colman, Howard D., assignor to Barber-Colman Company, Rockford, Ill. Bobbin skewer. 1,678,806; July 31.
Commonwealth Steel Company. (See Sheehan, William M., assignor.)
Copey, James D., and B. Garlius, assignors to Star Service Hanger Co., Detroit, Mich. Wireworking machine. 1,679,204; July 31.
Conili, Fernan O., Marseille, France. Refrigeration. 1,679,205; July 31.
Connell, Edwin L. (See Schneider, F., and Connell.)
Connell, Edwin L., assignor to The Van Dorn Electric Tool Company, Cleveland, Ohio. Power hand tool. 1,679,155; July 31.
Connell, James F., Lincoln, Nebr. Baking device. 1,678,690; July 31.
Cook Electric Company, The. (See Baker, John S., assignor.)
Cooper, Roy D., Oakland, Calif. Combination tool. 1,678,807; July 31.
Coplan, Archibald H., et al. (See Baillot, Alphonse E., assignor.)
Cox, Edwin, Richmond, Va., assignor to Tobacco By-Products and Chemical Corporation, Louisville, Ky. Testing nicotine solutions. 1,678,636; July 31.
Craig, Edward, St. Joseph, assignor to Saranac Automatic Machine Corporation, Benton Harbor, Mich. Machine for making baskets. 1,678,848; July 31.
Craig, Edward, St. Joseph, Mich., assignor to Saranac Automatic Machine Corporation, Benton Harbor, Mich. Machinery for converting sheet material into receptacles. 1,678,901; July 31.
Cram, Wilbur D. (See Parker, Robert C., assignor.)
Crawford, Howard H., assignor to Detroit Motor Appliance Company, Detroit, Mich. Radiator attachment. 1,678,670; July 31.
Crawford, Max. (See Lockard, Obe, assignor.)
Creveling, John L., near Tucson, Ariz., assignor, by mesne assignments, to Simplex Equipment Company, Inc., New York, N. Y. Electric system. 1,678,808; July 31.
Crossingham, James H., Germantown, Pa. Undergarment. 1,679,206; July 31.
Csanyi, Henry, New York, N. Y. Antenna. 1,679,240; July 31.
Curtin, Leo P., Freehold, N. J. Making alkali-metal hydroxide. 1,678,767; July 31.
Cusack, Thomas, Company. (See Ehnborn, Charles B., assignor.)
Cushman, Arthur W., Winnetka, assignor to Allied Packers, Inc., Chicago, Ill. Preparing smoked joint meats. 1,678,809; July 31.
Cutler-Hammer Mfg. Co., The. (See Cherry, O. A., and Chosa, assignors.)
Cutler-Hammer Mfg. Co., The. (See Schmidt, Edwin X., assignor.)
Cutler-Hammer Mfg. Co., The. (See Wiegand, Henry J., assignor.)
Darco Sales Corporation. (See Lewis, George C., assignor.)
David, Michel, Jemeppe sur Meuse, Belgium. Grinding and mixing apparatus. 1,679,241; July 31.
Davies, David R. (See Coates, W. A., and Davies.)
Davies, David R. (See Coates, W. A., Gittins, and Davies.)
Davis & Furber Machine Co. (See Stevenson, Henry J., assignor.)
Davis, Lewis R., San Francisco, Calif. Piston. 1,678,768; July 31.
Davis, Thomas C., Greeley, Colo. Pressure-controlling means for wringer rolls. 1,678,849; July 31.
Dawley, Clarence A., Plainfield, N. J. Meter. 1,679,293; July 31.
Debrie, André L. V. C., Paris, France. Camera view finder. 1,678,902; July 31.
Degener Cushion Universal Corporation. (See Degener, Edward K., assignor.)
Degener, Edward K., Huntington Park, assignor to Degener Cushion Universal Corporation, Los Angeles, Calif. Universal joint. 1,679,076; July 31.
De Haen, E., A.-G. (See Karplus, H., and Bachmann, assignors.)
De la Cierva, Juan, Madrid, Spain. Aircraft with rotative wings. 1,678,935; July 31.
De la Cuesta, Francisco and M. M., J. Parapar, and S. Fals, Habana, Cuba. Advertisement holder. 1,678,691; July 31.
De la Cuesta, Manuel M. (See de la Cuesta, Francisco and M. M., Parapar, and Fals.)
Delany, Edward L., Brooklyn, N. Y. Float valve. 1,678,769; July 31.
Delco-Remy Corporation. (See Chryst, William A., assignor.)
Delco-Remy Corporation. (See Kroeger, Frederick C., assignor.)
Delco-Remy Corporation. (See Parker, Leslie O., assignor.)
Delco-Remy Corporation. (See Norviel, Harry E., assignor.)
Delco-Remy Corporation. (See Wilson, Charles E., assignor.)
Delfoe, Edward F., Brooklyn, N. Y. Fire extinguisher. 1,679,207; July 31.
De-Lite-Us Spring Clasp Corporation. (See Fridolph, J. S., and Duchesneau, assignors.)
Deming, William L., Salem, Ohio. Rotary cleanser. 1,678,850; July 31.
Denda, Friedrich W., Cleveland, Ohio. Parachute. 1,679,242; July 31.
Denison Manufacturing Company. (See McKeeby, James S., assignor.)
De Pamphilis, Gennaro, New York, N. Y. Printing-press gauge. 1,678,724; July 31.
Det Norske Aktieselskab for Elektrokemisk Industri of Norway. (See Westly, Jens, assignor.)
Detroit Motor Appliance Company. (See Crawford, Howard H., assignor.)
De Vilbiss Company, The. (See De Vilbiss, Thomas A., assignor.)
De Vilbiss, Thomas A., assignor to The De Vilbiss Company, Toledo, Ohio. Atomizer. Des. 75,899; July 31.
De Vilbiss, Thomas A., assignor to The De Vilbiss Company, Toledo, Ohio. Atomizer support. Des. 75,900; July 31.
De Vilbiss, Thomas A., assignor to The De Vilbiss Company, Toledo, Ohio. Atomizer top. Des. 75,901; July 31.
De Vilbiss, Thomas A., assignor to The De Vilbiss Company, Toledo, Ohio. Atomizer top. Des. 75,902; July 31.
Diamond State Fibre Company. (See Landt, Gustave E., assignor.)
Diamond State Fibre Company. (See McIntosh, James, assignor.)
Dietzsch, Ferdinand, Kingston-on-Thames, England. Treatment of ores of copper and other metals. 1,679,294; July 31.

Dodge, Alfred W., Zanesville, Ohio, assignor to Hazel-Atlas Glass Co., Wheeling, W. Va. Bridge wall for glass tanks. 1,679,295; July 31.

Dohse, Louis H., Toledo, Ohio. Air-brake-piston clamp. 1,678,937; July 31.

Domenico, Anthony, Brooklyn, N. Y. Brake device. 1,678,692; July 31.

Douglas, Harry A., Bronson, Mich. Circuit connecter. 1,679,333; July 31.

Douglas, Harry A., Bronson, Mich. Electric switch. 1,679,334; July 31.

Douglas, Harry A., Bronson, Mich. Circuit-continuing device. 1,679,335; July 31.

Douty, Alfred. (See Gravell, J. H., and Douty.)

Dräger, Alexander B., deceased, Lubeck, Germany; E. Dräger, née Stange, executrix. Spring clamp for breathing bags. 1,679,115; July 31.

Dräger, Alexander B., deceased, Lubeck, Germany; E. Dräger, née Stange, executrix. Breathing tube for self-rescue apparatus. 1,679,116; July 31.

Dräger, Elfriede, née Stange, executrix. (See Dräger, Alexander B.)

Drake, Herbert W., East Orange, N. J., assignor to The Western Union Telegraph Company, New York, N. Y. Potential-indicating system. 1,679,326; July 31.

Drevitson, Carl B., Somerville, Mass. Golf club. 1,678,637; July 31.

Dry Zero Corporation. (See Lindsay, Harvey B., assignor.)

Duchesneau, Jean B. A. (See Fridolph, J. S., and Duchesneau.)

Duffield, David W., assignor to Yawman & Erbe Manufacturing Co., Rochester, N. Y. Combination card container and tray. 1,678,671; July 31.

Dunbar, Thomas L., assignor, by mesne assignments, to Chemipulp Process, Inc., Watertown, N. Y. Method and apparatus for continuous cooking of fibrous material. 1,679,336; July 31.

Dunham, George W., assignor to Savage Arms Corporation, Utica, N. Y. Clutch. 1,678,638; July 31.

Dunsmore, Alexander F., Glasgow, Scotland. Hydro-extractor or centrifugal machine. 1,678,938; July 31.

Dupiech, Henry A., St. Louis, Mo. Bottle. Des. 75,903; July 31.

Duplex Printing Press Company. (See Bechman, Henry F., assignor.)

Durfee, Joseph A., Steubenville, Ohio. Method of and apparatus for casting ingots. 1,678,976; July 31.

Duro Company, The. (See Eisenhauer, Charles P., assignor.)

Dye, Clayton D., Denver, Colo. Furniture fender. 1,679,117; July 31.

Dykeman, John A., Boston Mass. Book. 1,678,673; July 31.

Eald, John R., Chicago, Ill., assignor to The Peoples Trust and Savings Bank of Chicago, trustee. Spring wheel. 1,678,693; July 31.

Eastman Kodak Company. (See Sheppard, Samuel E., assignor.)

Eaton Axle & Spring Company, The. (See Robie, Frederick C., assignor.)

Economy Products Corporation. (See Keas, Charles E., assignor.)

Economy Products Corporation. (See Voight, George F., assignor.)

Egbert, Alfred G., Pleasanton, Kans. Poultry-scalding means. 1,678,936; July 31.

Eggleston, Lewis W., Buffalo, assignor to American Radiator Company, New York, N. Y. Air-vent valve for radiators. 1,678,851; July 31.

Egli, Arnold A., Hamburg, Germany, assignor to Chocolat Tobler Holding Co., Aktiengesellschaft, Schaffhausen, Switzerland. Method and apparatus for the aligning of type carriers. 1,678,694. July 31.

Egloff, Gustav, assignor to Universal Oil Products Company, Chicago, Ill. Cracking petroleum oil. 1,679,208; July 31.

Ehnborn, Charles B., Glen Ellyn, assignor to Thomas Cusack Company, Chicago, Ill. Illuminated sign and letter therefor. 1,679,296; July 31.

Ehrenfeld, Ralph, East Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Terminal Cover. 1,678,852; July 31.

Ehrler, Albert, New York, N. Y. Method and apparatus for placing poles. 1,679,297; July 31.

Einfeldt, Ernest E., assignor, by mesne assignments, to French & Hecht, Inc., Davenport, Iowa. Tire mounting for traction wheels. 1,679,023; July 31.

Eisenhauer, Charles P., assignor to The Duro Company, Dayton, Ohio. Tank. 1,678,770; July 31.

Eksergian, Edward, St. Louis, Mo., and Wallenthin, Attleboro, Mass., said Wallenthin assignor to said Eksergian. Cigarette holder. 1,679,209; July 31.

Electrical Development & Machine Company. (See Stevenson, Robert R., assignor.)

Electro-Motive Devices, Inc. (See Asprooth, A. H., and Leoni, assignors.)

Elkins, Albert J., Coral, Mich. Marl-digging machine. 1,679,118; July 31.

Ellis Adding Typewriter Company. (See Perkins, N. W., and Ens, assignors.)

Elyria Iron and Steel Company, The. (See Sussman, Maxwell H., assignor.)

Ens, Emil J. (See Perkins, N. W., and Ens.)

Esmond, Alva R., Union Grove, Wis. Lifting jack. 1,679,210; July 31.

Espenschied, Lloyd, Hollis, H. A. Affel, Brooklyn, and C. N. Anderson, New York, N. Y., assignors to American Telephone and Telegraph Company. Two-way radio telephone system. 1,678,672; July 31.

Esterow, Harry, New York, N. Y. Cigar lighter. Des. 75,904; July 31.

Evans, Silas M., Sand Springs, Okla. Gas burner. 1,679,298; July 31.

Evans, William S., Palisades Park, N. J., assignor to Lucey Manufacturing Corporation of Tennessee, Chattanooga, Tenn. Crown block. 1,679,327; July 31.

Everbrite Stove Company, The. (See Klse, William K. assignor.)

F. A. Baumgartner, Dr. Katz & Co. G. m. b. H. (See Baumgärtner, Friedrich W., assignor.)

Faber, Henry B., Buffalo, assignor to National Aniline & Chemical Company, Inc., New York, N. Y. Sulphonation. 1,679,211; July 31.

Fageol, Rollie B., Los Angeles, Calif., assignor to American Chain Company, Inc., Bridgeport, Conn. Bumper tip. 1,678,855; July 31.

Fairbanks, Morse & Co. (See Adams, Edward T., assignor.)

Fairbanks, Morse & Co. (See Goldberg, Morris J., assignor.)

Fairbanks, Morse & Co. (See Jahnke, Charles B., assignor.)

Fals, Santiago. (See de la Cuesta, Francisco and M. M., Larapar, and Fals.)

Farmer, Clyde C., Pittsburgh, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Signal-valve device. 1,679,024; July 31.

Fasul, Dominick, New York, N. Y. Fire extinguisher. 1,679,243; July 31.

Fausse, Joseph, Boston, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for use in the manufacture of shoes. 1,678,854; July 31.

Fedders Manufacturing Company Inc. (See Slagel, Franklin G., assignor.)

Federal Pressed Steel Company. (See Hansen, F. D., and Tinker, assignors.)

Fegley, Thomas J., and G. O. Leopold, assignors to North Bros. Mfg. Co., Philadelphia, Pa. Chuck. 1,679,299; July 31.

Fekete, Stephen I., assignor to Hudson Motor Car Company, Detroit, Mich. Latch spindle and lock assembly. 1,679,026; July 31.

Fekete, Stephen I., and M. H. Toncray, assignors to Hudson Motor Car Company, Detroit, Mich. Body for automobiles. 1,679,025; July 31.

Fenneman, Mary K. (See Fenneman, William H., assignor.)

Fenneman, William H., Taft, Calif., assignor to M. K. Fenneman. Well-drill pitman bearing. 1,679,077; July 31.

Ferguson, Joseph W., Pawhuska, Okla. Sand-green scraper. 1,678,695; July 31.

Findlay, Robert, Manufacturing Company. (See Schwartz, Frederick, assignor.)

Finn, Matthew J., Pittsburgh, Pa. Pump. 1,678,977; July 31.

Fiorita, Anthony R., assignor to The Wine-Dip Company, Moberly, Mo. Jug. Des. 75,905; July 31.

Fisch, William, Atlanta, Ga. Artificial-surf bathing pool. 1,679,156; July 31.

Fischer, Carl, West Homestead, assignor to American Heat Economy Bureau, Pittsburgh, Pa. Burner. 1,679,300; July 31.

Fishel, Alvin S., Cleveland, Ohio. Brake supporting and operating mechanism. 1,678,696; July 31.

Fitz-Empire Double Pivot Last Company. (See Fitz, Guy B., assignor.)

Fitz, Guy B., assignor to Fitz-Empire Double Pivot Last Company, Auburn, Me. Last. 1,678,771; July 31.

Fitzgerald Manufacturing Company, The. (See Fitzgerald, Patrick J., assignor.)

Fitzgerald, Patrick J., assignor to The Fitzgerald Manufacturing Company, Torrington, Conn. Antirattler. 1,679,244; July 31.

Flauder, Alfred J., Bridgeport, Conn. Salt and pepper shaker. Des. 75,906; July 31.

Flauder, Alfred J., Bridgeport, Conn. Salt and pepper shaker. Des. 75,907; July 31.

Fleissner, Hans, Leoben, Austria. Drying coal and like fuels. 1,679,078; July 31.

Flint Automatic Heater Company. (See Shoemaker, John T., assignor.)

Florin, Philip. (See Miller, Gordon, assignor.)

Flynn, Mortimer F., West New Brighton, assignor to New Nap System, Inc., New York, N. Y. Apparatus for reconditioning felts of paper-making machines. 1,678,978; July 31.

Forman, Paris R., Rahway, N. J., assignor to National Pneumatic Company, New York, N. Y. Pressure-actuated motor for operating doors or the like. 1,679,212; July 31.

Forshee, Frank F., Mansfield, Ohio, assignor to Westinghouse Electric & Manufacturing Company. Counterbalance for oven doors. 1,678,855; July 31.

Forshee, Frank F., Flint, Mich., assignor, by mesne assignments, to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Current-indicating and illuminating means for electric ranges. 1,678,856; July 31.

Forsyth Draft-Gear Corporation. (See Forsyth, Joseph E., assignor.)

Forsyth, Joseph E., Chicago, Ill., assignor to Forsyth Draft-Gear Corporation. Draft gear. 1,679,301; July 31.

Foster, Herman J., Stowe, Vt. Milk-cooling device. 1,679,302; July 31.

Fowler, Harry P., assignor to The Waterbury Tool Company, Waterbury, Conn. Power-transmitting device. 1,679,213; July 31.

Fox, Harold E., Pittsburgh, Pa., assignor to Syntron Company. Electric percussive tool. 1,678,979; July 31.

Fox, Otto, Lakewood, assignor to The Bryant Heater and Manufacturing Company, Cleveland, Ohio. Water heater. 1,679,120; July 31.

Frankenburger, Walter. (See Müller, C., Frankenburger, and Grassner.)

Freedman, William M., Brooklyn, assignor to Sell-Best Novelty Candy Co. Inc., Brooklyn, N. Y. Box. 1,679,121; July 31.

French & Hecht, Inc. (See Einfeldt, Ernest E., assignor.)

French, Louis O., Milwaukee, Wis. Fuel-injection system. 1,679,158; July 31.

French, Louis O., Milwaukee, Wis. Circuit-control mechanism for internal-combustion engines. 1,679,159; July 31.

Fridolph, John S., New York, N. Y., and J. B. A. Duchesneau, Leominster, Mass., assignors to De-Lite-Us Spring Clasp Corporation, New York, N. Y. Pin wheel. Des. 75,908; July 31.

Friedman, Albert J., Chicago, Ill. Wedding ring. Des. 75,909; July 31.

Fries, Horace S., Madison, Wis. Milk strainer. 1,679,122; July 31.

Frommann, Gustav H. (See Wilkinson, Thomas H., assignor.)

Frost, Herbert H., Chicago, Ill. assignor, by mesne assignments, to Chicago Telephone Supply Company, Elkhart, Ind. Telephone plug. 1,678,772; July 31.

Fruhof, Phillip, Norfolk, Nebr. Belt coupling. 1,679,303; July 31.

Fuller, Claud E., assignor to New York Brick Handling Corporation, New York, N. Y. Container. 1,679,328; July 31.

Fulper, William H., Flemington, N. J. Receptacle. 1,678,810; July 31.

Furber, Eric L., Liverpool, England. Moisture-absorbing device for stoppered containing vessels. 1,678,939; July 31.

Furber, Frederick M., Revere, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Treating apparatus. 1,678,773; July 31.

Gabrielson, Carl, and A. Meldrum, Syracuse, N. Y. Drilling machine. 1,679,027; July 31.

Gaertner, Gustav, assignor of one-half to the firm: Joh. Kremenezky, Vienna, Austria. Apparatus for preventing disturbances of the state of health due to seesaw and rotary motions. 1,679,245; July 31.

Gagnier, George E. (See Place, Blon C., assignor.)

Galsman, Henry J., New York, N. Y., assignor to Autostrop Patents Corporation, Dover, Del. Blade holder. 1,679,329; July 31.

Gallman, Charles E., Tulsa, Okla., assignor to Oil Well Supply Company, Pittsburgh, Pa. Polished-rod clamp. 1,679,028; July 31.

Galloway, Robert M., Richmond, Ind., and P. C. Burton, Clarendon Hills, Ill., assignors to The National Automatic Tool Company, Richmond, Ind. Snap switch for motor control. 1,678,725; July 31.

Gams, Alphonse, and G. Widmer, assignors to the firm "Society of Chemical Industry in Basle", Basel, Switzerland. Recovery of insoluble urea formaldehyde resins. 1,679,246; July 31.

Gardiner, John B. W., New York, N. Y. Protective coating for metal and the like. 1,678,980; July 31.

Garilus, Bernt. (See Coney, J. D., and Garilus.)

Gartin, Elmer G., Claremont, N. H., assignor to Sullivan Machinery Company. Fluid-pressure motor. 1,679,128; July 31.

Gartin, Elmer G., Claremont, N. H., assignor to Sullivan Machinery Company. Drilling mechanism. 1,679,139; July 31.

Gartin, Elmer G., Claremont, N. H., assignor to Sullivan Machinery Company. Drilling mechanism. 1,679,141; July 31.

Genter, Albert L., Salt Lake City, Utah, assignor to United Filters Corporation, New York, N. Y. Scraper for rotary filters. 1,678,639; July 31.

George, Enoch, jr., assignor to The McConway & Torley Company, Pittsburgh, Pa. Car coupler. 1,678,774; July 31.

Gerges, Wesley R., Philadelphia, Pa., assignor to The Barrett Company. Producing resin by polymerization. 1,679,214; July 31.

Gesellschaft für Drahtlose Telegraphie m. b. H. (See Schröter, Fritz, assignor.)

Gesellschaft für Drahttose Telegraphie m. b. H. (See von Bronk, Otto, assignor.)

Gibian, Eric H. (See Sohn, F., Marmion, and Gibian.)

Gibson, Calder C., Buffalo, N. Y. Seal press. 1,679,029; July 31.

Gibson, Louis M., Niangua, Mo. Ratchet wrench. 1,678,903; July 31.

Giebeler, Charles H., Plainfield, N. J. Thread moistener. 1,678,697; July 31.

Gilbert Bindometer Corporation. (See Gilbert, Max, assignor.)

Gilbert, Max, Bronx, assignor to Gilbert Bindometer Corporation, Brooklyn, N. Y. Measuring device. 1,679,157; July 31.

Giller, Charles W., assignor to The Shelby Salesbook Company, Shelby, Ohio. Aviator's manifolding log. 1,678,981; July 31.

Gilson, Robert M., Pittsburgh, and A. A. Skene, Wilkinsburg, assignors to The Union Switch & Signal Company, Swissvale, Pa. Railway traffic controlling apparatus. 1,679,014; July 31.

Giovannoni, Egisto. (See Pourfillet, G., and Giovannoni.)

Gittins, George E. (See Coates, W. A., Gittins, and Davies.)

Glass, Perley R., Wayland, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Fastener-inserting machine. 1,678,904; July 31.

Goldberg, Morris J., Beloit, Wis., assignor to Fairbanks, Morse & Co., Chicago, Ill. Pressure-relief means. 1,678,905; July 31.

Goldkamp, Otto B., assignor of one-half to San Diego Consolidated Gas and Electric Company and one-fourth to S. R. Siebert, San Diego, Calif. Fluid regulator. 1,679,215; July 31.

Gordon, Samuel, Brooklyn, N. Y. Toy automobile. Des. 75,910; July 31.

Graham, James G., Butte, Mont., assignor to Sullivan Machinery Company. Cleansing means for rock drills. 1,679,131; July 31.

Graham, James G., Butte, Mont., assignor to Sullivan Machinery Company. Drilling mechanism. 1,679,140; July 31.

Grant, Walter S., St. Louis, Mo. Container. 1,678,726; July 31.

Grassner, Friedrich. (See Müller, C., Frankenburger, and Grassner.)

Gravell, James H., Elkins Park, Pa. Storage and transportation of acid mixtures in steel drums. 1,678,775; July 31.

Gravell, James H., and A. Douty, Elkins Park, Pa.; said Douty assignor to said Gravell. Metal pickling. 1,678,776; July 31.

Graves, George A., Newton Center, Mass. Knife sharpener. 1,678,998; July 31.

Green, Lee B., Lakewood, assignor to The Borden Company, Warren, Ohio. Washing machine. 1,679,123; July 31.

Greene, Fred E., Berkeley, assignor to A. B. Humphrey Company, Escalon, Calif. Air-circulating device for refrigerator cars. 1,679,124; July 31.

Griffin, James C., assignor to Griffin Manufacturing Company, Erie, Pa. Spring bolt. 1,678,982; July 31.

Griffin, Joseph F., Teaneck, N. J., assignor to The Superheater Company, New York, N. Y. Locomotive-smokebox arrangement. 1,678,727; July 31.

Griffin Manufacturing Company. (See Griffin, James C., assignor.)

Griffin, Palmer W. (See Buchanan, G. H., and Griffin.)

Gstalder, Francis P., Cleveland, Ohio. Sign. 1,679,097; July 31.

Gundlach, Herman, et al. (See Sweet, Andrew T., assignor.)

Gutmann, Victor. (See Steiner, L., and Guttmann.)

Hadaway, William S., jr., New Rochelle, assignor, by mesne assignments, to The Texas Company, New York, N. Y. Treating hydrocarbon oils. 1,678,728; July 31.

Hall, Arthur J., Gloucestershire, England, and P. L. Mardis, Swissvale, Pa., assignors to Westinghouse Electric & Manufacturing Company. Control apparatus. 1,678,857; July 31.

Hall, Charles W., Larchmont, N. Y. Fitting for aircraft and the like. 1,678,640; July 31.

Hall, Edward N., Meadville, Pa. Method of and apparatus for forming permanent waves. 1,678,983; July 31.

Hall, Edwin W., Wallingford, assignor to Simeon L. and George H. Rogers Company, Hartford, Conn. Spoon or similar article. Des. 75,911; July 31.

Hall, Elbert J., Detroit, Mich., assignor to American Car and Foundry Motors Company, New York, N. Y. Bus-body-frame construction. 1,678,811; July 31.

Halleck, Frank A., Chicago, Ill., assignor to Sullivan Machinery Company. Forging machine. 1,679,129; July 31.

Halleck, Frank A., Chicago, Ill., assignor to Sullivan Machinery Company. Drilling apparatus. 1,679,137; July 31.

Hallett, Robert L., Brooklyn, assignor to National Lead Company, New York, N. Y. Refining petroleum oils with doctor solution. 1,678,984; July 31.

Halloway, Dayton S., Albany, Oreg. Milk-bottle lock. 1,679,080; July 31.

Hallowell, Louis S., assignor to The Prosperity Company Inc., Syracuse, N. Y. Spring-pad construction. 1,679,030; July 31.

Hamilton, Ernest O. (See Allen, J. B., and Hamilton.)

Hamilton, Paul H. (See Thomas, M. W., and Hamilton.)

Hammond, John H., jr., Gloucester, Mass. Exposure-indicating device for cameras. 1,678,729; July 31.
Hancock, Randolph B., Gary, Ind. Looping and guiding device for rolling mills. 1,679,304; July 31.
Haneberg, Hugo, New York, N. Y. Valve. 1,679,081; July 31.
Hansen, A. L., Manufacturing Company. (See Hansen, Augie L., assignor.)
Hansen, Augie L., Chicago, assignor to A. L. Hansen Manufacturing Company, Cook County, Ill. Display stand. 1,679,082; July 31.
Hansen, Frederick D., and H. W. Tinker, assignors to Federal Pressed Steel Company, Milwaukee, Wis. Brake drum and liner. 1,678,777; July 31.
Harmon, James E., et al. (See Rodgers, Ralph S., assignor.)
Harrison, Clifford C. (See Helland, N. E., Harrison, and Bierbrauer.)
Harter, Hans, Wurzburg, Germany. Apparatus for carrying out chemical reactions between gases, or vapors, or gases and vapors. 1,678,778; July 31.
Hatvani, Gabriel, Medina, Ohio. Hot-air furnace; 1,679,247; July 31.
Hauser, Emil, New York, N. Y. Table. Des. 75,912; July 31.
Hays Manufacturing Company. (See Hitchcock, Otto G., assignor.)
Hazel-Atlas Glass Co. (See Dodge, Alfred W., assignor.)
Hedström, Erik G., Stockholm, Sweden. Root-filling substance. 1,678,940; July 31.
Heimbach, William H. (See Switzer, Henry W., assignor.)
Helland, Nyman E., C. C. Harrison, and O. A. Bierbrauer, Seattle, Wash. Football-game-reporting device. 1,679,160; July 31.
Heller, H. Howard. Sound Beach, Conn. Atomizer. 1,679,305; July 31.
Helman, August E., assignor to The W. S. Tyler Company, Cleveland, Ohio. Making woven-wire screens. 1,678,941; July 31.
Helmquest, William J., assignor to California Card Manufacturing Company, San Francisco, Calif. Picture holder. 1,679,983; July 31.
Hemingray Glass Company, The. (See Holmes, Minot K., assignor.)
Henley, James T., Inverness, Miss. Vegetable and fruit display apparatus. 1,679,031; July 31.
Henry, Marion J., Kansas City, Kans. Grease cup. 1,679,216; July 31.
Herr, Shirl, Crawfordsville, Ind. Hidden-metal detector. 1,679,339; July 31.
Hill, Joseph B. (See Miller, S. P., and Hill.)
Hirsh, Fred, assignor to Adjusta Company, New York, N. Y. Slide buckle. 1,679,306; July 31.
Hitchcock, Otto G., assignor to Hays Manufacturing Company, Erie, Pa. Soap-dish support. 1,679,032; July 31.
Hoaglind, Albert J., Villa Park, Ill., assignor to National Malleable and Steel Castings Company, Cleveland, Ohio. Manufacture of cylindrical castings and the like. 1,679,217; July 31.
Hobson, Arthur E., Meriden, Conn. Candlestick. Des. 75,913; July 31.
Hodgkins, Charles H., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Switch mechanism. 1,678,858; July 31.
Holdsworth, Fred D., Claremont, N. H., assignor to Sullivan Machinery Company. Vacuum pump. 1,679,132; July 31.
Holdsworth, Fred D., Claremont, N. H., assignor to Sullivan Machinery Company. Cooling system. 1,679,144; July 31.
Holmes, Frederick M., Springfield, assignor to Tryco Products, Inc., Westfield, Mass. Strainer. 1,679,033; July 31.
Holmes, Minot K., assignor to The Hemingray Glass Company, Muncie, Ind. Mechanical movement. 1,678,942; July 31.
Holmes, Morris P., Claremont, N. H., assignor to Sullivan Machinery Company. Cutter chain. 1,679,135; July 31.
Holthaus, Johann, Gelsenkirchen, Germany, assignor, by mesne assignments, to Centrifugal Pipe Corporation. Process of and apparatus for centrifugal casting. 1,678,641; July 31.
Hood Rubber Company. (See Ashton, William S., assignor.)
Hood Rubber Company. (See Soderlund, Carl, assignor.)
Hooper, Rebecca E., Half Moon Bay, Calif. Pad holder and ruler. 1,679,084; July 31.
Horii, Shinjiro, Tokyo, Japan. Stencil sheet. 1,679,034; July 31.
Horix, Carl, Chicago, Ill. Combined penholder and calendar. Des. 75,914; July 31.
Hornig, Fred R., Milwaukee, Wis. Mold for composite articles. 1,678,812; July 31.
Hotstream Heater Company, The. (See Morrow, Clarance H., assignor.)
Howie, Kenneth, assignor to Wildman Mfg. Co., Norristown, Pa. Needle-selector mechanism for knitting machines. 1,678,906; July 31.
Howie, Kenneth, assignor to Wildman Mfg. Co., Norristown, Pa. Trick wheel for knitting machines. 1,678,907; July 31.
Hudson Motor Car Company. (See Fekete, Stephen L., assignor.)
Hudson Motor Car Company. (See Fekete, S. I., and Toncray, assignors.)
Huelsdonk, William A., Merced Falls, Calif. Concentrator. 1,679,035; July 31.
Huff, Lyman C., assignor to Universal Oil Products Company, Chicago, Ill. Safety or automatic release valve. 1,679,218; July 31.
Huff, Lyman C., assignor to Universal Oil Products Company, Chicago, Ill. Multiorifice valve. 1,679,219; July 31.
Hull, Luther J., Seattle, Wash. Hydraulic resistance control apparatus. 1,679,085; July 31.
Humphrey, A. B., Company. (See Greene, Fred E., assignor.)
Hupp Motor Car Corporation. (See Punke, John J., assignor.)
Hutchison, William G., Portsmouth, Ohio. Air circulator for stoves. 1,679,307; July 31.
Hyman, Henry. (See Rothenberg, H., and Britsch, assignors.)
I. G. Farbenindustrie Aktiengesellschaft. (See Bähr, Hans, assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Meyer, K. H., and Schütte, assignors.)
I. G. Farbenindustrie Aktiengesellschaft. (See Müller, C., Frankenburger, and Grassner, assignors.)
I. G. Farbenindustrie Aktiengesellschaft. (See Seidel, Walter, assignor.)
Igou, Samuel C., St. Louis, Mo. Transmission. 1,679,036; July 31.
International Milling Company. (See Smith, Louis E., assignor.)
International Nickel Company, The. (See Pilling, N. B., and Schoener, assignors.)
International Paper Company. (See Maxim, W. D., and Mahannah, assignors.)
International Postal Supply Company of New York, The. (See Muller, William F., assignor.)
International Sugar and Alcohol Company, The. (See Koch, Fritz, assignor.)
Isaksen, Robert C., Flushing, N. Y., assignor, by mesne assignments, to Addressograph Company, Chicago, Ill. Printing-plate blank and method of making. 1,678,859; July 31.
Jackson, Benjamin B., Delphi, Ind. Bottle brush. 1,678,943; July 31.
Jacobsen, Norman R., Wellington, New Zealand. Golf tee. 1,678,944; July 31.
Jahnke, Charles B., Beloit, Wis., assignor to Fairbanks, Morse & Co., Chicago, Ill. Governor control for internal-combustion engines. 1,678,908; July 31.
Jahnke, Charles B., Beloit, Wis., assignor to Fairbanks, Morse & Co., Chicago, Ill. Ignition system. 1,679,220; July 31.
Jenkins, Charles F., Washington, D. C. Spiral-mounted lens disk. 1,679,086; July 31.
Jennings, Irving C., South Norwalk, Conn. Pumping apparatus for handling gases and liquids. 1,678,909; July 31.
Jennings, James W., Providence, R. I., assignor to Quaker Silver Company, Attleboro, Mass. Salt and pepper shaker or similar article. Des. 75,915; July 31.
Jennings, James W., Providence, R. I., assignor to Quaker Silver Company, Attleboro, Mass. Salt and pepper shaker or similar article. Des. 75,916; July 31.
Jennings, James W., Providence, R. I., assignor to Quaker Silver Company, Attleboro, Mass. Salt and pepper shaker or similar article. Des. 75,917; July 31.
Jennings, James W., Providence, R. I., assignor to Quaker Silver Company, Attleboro, Mass. Salt and pepper shaker or similar article. Des. 75,918; July 31.
Jennings, James W., Providence, R. I., assignor to Quaker Silver Company, Attleboro, Mass. Salt and pepper shaker or similar article. Des. 75,919; July 31.
Johns, Herman S., Ada, Okla. Meat tednerer. 1,678,699; July 31.
Johnson, Charles J., assignor to Swanberg Mfg. Co., Chicago, Ill. Container for leads. 1,678,642; July 31.
Johnson, Frank W., Philadelphia, Pa. Changeable-combination key lock. 1,679,087; July 31.
Johnson, John H., Santa Barbara, Calif. Food-preserving cabinet. 1,678,730; July 31.
Johnston, Arthur A. (See Stump, F., and Johnston.)
Jones, Charles E., Bradford, England. Frictional driving mechanism for machines having stop motions. 1,678,945; July 31.
Jones, Edmund H., assignor to Milwaukee Corrugating Company, Milwaukee, Wis. Corner bead. 1,678,813; July 31.
Jones & Lamson Machine Company. (See Lovely, John E., assignor.)
Jones, Wendell A. (See Sanctuary, W. C., and Jones.)
Jordan, Carl C. (See Ladd, J. W., and Jordan.)
Jordan, Carl C. (See Ladd, J. W., Williams, and Jordan.)
Jordan, Franz, Wickede-on-the-Ruhr, Germany. Plating metals with aluminum. 1,679,308. July 31.
Joyce, Bryan P., Davenport, Iowa. Cylinder head and packing. 1,678,946; July 31.
Jungk, Herbert G., Pittsburgh, Pa., assignor to Westinghouse Electric and Manufacturing Company. Flexible cradle mounting. 1,678,860; July 31.

Justus, Henry W., Napanoch, N. Y. Steam trap. 1,679,309; July 31.
Kalgren, John E., assignor to The J. R. Clark Company, Minneapolis, Minn. Routing machine. 1,678,814; July 31.
Kalkner, Friedrich, Mogeldorf, near Nuremberg, Germany, assignor to Westinghouse Electric & Manufacturing Company. Searchlight. 1,678,861; July 31.
Kalman Steel Company. (See White, William E., assignor.)
Kantenwein, Oscar E. (See Burner, W. L., and Kantenwein.)
Kaplan, Frank. (See Stein, B. L., and Kaplan.)
Karplus, Hans, Frankfort-on-the-Main, and W. Bachmann, assignors to the firm E. de Haen A.-G., Seelze, near Hanover, Germany. Boiler composition and making same. 1,679,037; July 31.
Kasseheer, William, Lihue, Hawaii. Sugar-cane planter. 1,678,643; July 31.
Katayama, Yoshitaro, San Bernardino, Calif. Liquid cleaning compound. 1,678,815; July 31.
Keas, Charles E., assignor to Economy Products Corporation, Los Angeles, Calif. Making corner beads and nail spacers. 1,679,248; July 31.
Keller, Lee L., Wellington, Colo. Agricultural implement. 1,678,910; July 31.
Kelley, Marion S., South Bend, Wash. Dirigible headlight. 1,678,911; July 31.
Kelm, Richard W., Binghamton, N. Y. Sighting attachment for guns. 1,679,221; July 31.
Kendig, Julian H., Edgewood, Pa., assignor to Westinghouse Electric & Manufacturing Company. Switch mechanism. 1,678,862; July 31.
Kent, Arthur A., Ardmore, Pa. Detector apparatus. 1,679,310; July 31.
Keystone Watch Case Corporation. (See Ritschard, Victor, assignor.)
Klie, Clifford S., Hutchinson, Kans. Dental bridge. 1,678,779; July 31.
Kimball, A., Company. (See Laencher, Frederick W., assignor.)
Kinahan, James B., Detroit, Mich. Reflector arch for furnaces. 1,678,816; July 31.
Kindervater, Julius, Richmond, Va. Flexible stay bolt. 1,679,161; July 31.
King, Horace W., assignor to King-Seeley Corporation, Ann Arbor, Mich. Depth-indicating device. 1,679,222; July 31.
King, John J. (See Bunnell, Earl C., assignor.)
King-Seeley Corporation. (See King, Horace W., assignor.)
King, W. A. (See Barclay, William J., assignor.)
Kingman, Russell B., Orange, assignor to Useful Products Company, West Orange, N. J. Doorcheck. 1,678,817; July 31.
Kise, William K., assignor to The Everbrite Stove Company, Kansas City, Mo. Oil stove. Re17,053; July 31.
Kispert, Joseph J., Branford, assignor to I. Newman & Sons, Inc., New Haven, Conn. Corset. 1,678,818; July 31.
Kitchen, Joseph M. W., East Orange, N. J. Preburning preparation of fuels. 1,678,863; July 31.
Klancher, John. (See Van Brimer, G., Magrath, Klancher, and Soots.)
Klauset, Nikolai K., Christiansand, Norway. Lubricator. 1,678,731; July 31.
Knaus, Peter J., Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Grinding and polishing apparatus. 1,678,732; July 31.
Knott, Admiral S., Columbus, Ohio. Automatic advertising projecting and display apparatus. 1,679,311; July 31.
Koch, Fritz, Geneva, Switzerland, assignor to The International Sugar and Alcohol Company, Limited, London, England. Removing hydrochloric acid from sugar solutions. 1,678,819; July 31.
Koehler, Albert T., Pontiac, Mich. Electric brazing machine. 1,679,088; July 31.
Koenig, Walter, jr., New York, N. Y., assignor to American Telephone and Telegraph Company. Method and apparatus for computation. 1,678,674; July 31.
Köhler, Josef, Herne, Germany. Rock drill. 1,678,985; July 31.
Kohut, Michael, Elmhurst, assignor to S. H. Pomeroy Company, Inc., New York, N. Y. Metal window. 1,679,089; July 31.
Koolhoven, Sytse F. W., Rijswijk, Netherlands. Aeroplane with three centers of propulsion arranged in a triangle. 1,679,038; July 31.
Koppel Industrial Car and Equipment Company. (See Burner, W. L., and Kantenwein, assignors.)
Koppers Company, The. (See Becker, Joseph, assignor.)
Koppers Company, The. (See Van Ackeren, Joseph, assignor.)
Koppers Development Corporation, The. (See Koppers, Heinrich, assignor.)
Koppers, Heinrich, Essen-Ruhr, Germany, assignor to The Koppers Development Corporation, Pittsburgh, Pa. Coke-oven-door-operating apparatus. 1,678,864; July 31.
Kremenezky, Firm: Joh. (See Gaertner, Gustav, assignor.)
Kroeger, Frederick C., Anderson, Ind., assignor, by mesne assignments, to Delco-Remy Corporation, Dayton, Ohio. Ignition timer. 1,678,947; July 31.
Kromann, Einar, Odense, Denmark. Cable socket for accumulators. 1,678,733; July 31.
Kucera, George, Grand Island, Nebr. Tool. 1,679,039; July 31.
Kühn, Wilhelm, Frankfort-on-the-Main, Germany. Fluid-operated tool. 1,678,734; July 31.
L. G. S. Devices Corporation. (See Starkey, William C., assignor.)
Lacasse, Solomon. (See Tully, G. L., and Lacasse.)
Ladd, John W., Company. (See Ladd, J. W., and Jordan, assignors.)
Ladd, John W., Company. (See Ladd, J. W., Williams, and Jordan, assignors.)
Ladd, John W., Co. (See Williams, Henry B., assignor.)
Ladd, John W., and C. C. Jordan, assignors to John W. Ladd Company, Detroit, Mich. Bottle washing, rinsing, and sterilizing apparatus. 1,678,780; July 31.
Ladd, John W., H. B. Williams, and C. C. Jordan, assignors to John W. Ladd Company, Detroit, Mich. Bottle-washing machine. 1,678,781; July 31.
Laencher, Frederick W., Elmhurst, assignor to A. Kimball Company, New York, N. Y. Marking-ticket strip. 1,678,675; July 31.
Lake, Simon, Milford, Conn. Concrete building construction. 1,679,040; July 31.
Lammert, Ferinand E., Chicago, Ill. Fluid separator and heater. 1,679,090; July 31.
Landt, Gustave E., Norristown, assignor to Diamond State Fibre Company, Bridgeport, Pa. Synthetic resin and making same. 1,679,312; July 31.
Lanz, Heinrich, Aktiengesellschaft. (See Sipp, Karl, assignor.)
Larsen, Alfred E., assignor to Unique Lamp & Casting Company, Chicago, Ill. Electric ceiling fixture. Des. 75,920; July 31.
Larsen, Alfred E., assignor to Unique Lamp & Casting Company, Chicago, Ill. Electric ceiling fixture. Des. 75,921; July 31.
Larson, Victor P., Racine, Wis. Mixing machine. 1,678,735; July 31.
Lawless, John J., Atlantic City, N. J. Soldering torch. 1,679,249; July 31.
Lawson, John F., Brooklyn, N. Y. Electric welding. 1,678,986; July 31.
Ledin, Charles, assignor to The Yale & Towne Manufacturing Company, Stamford, Conn. Trunk lock. 1,678,736; July 31.
Leeper, James A., Wilkinsburg, and R. J. Strong, Oakmont, assignors to The Westinghouse Air Brake Company, Wilmerding, Pa. Electric welding machine. 1,679,041; July 31.
Lemex, John D., Tulsa, Okla. Link. 1,679,042; July 31.
Leoni, Alfonso M. (See Asprooth, A. H., and Leoni.)
Leopold, George O. (See Fegley, T. J., and Leopold.)
Lewis, Claude A., Houston, Tex., assignor to American Window Company. Window. Re17,054; July 31.
Lewis, Frank D. (See Wildmann, E. A., and Lewis.)
Lewis, George C., New Dorp, assignor to Darco Sales Corporation, New York, N. Y. Purification of liquids. 1,678,676; July 31.
Lincoln, Rollo R., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufactnring Company. Temperature-control system. 1,678,865; July 31.
Lind, Otto, Dusseldorf, Germany. Urease preparation. 1,679,250; July 31.
Lindsay, Harvey B., Oakland, Calif., assignor to Dry Zero Corporation, Wilmington, Del. Body formed of separate fibers. 1,679,251; July 31.
Lingo, Archibald E., Collingswood, N. J. Flagpole construction. 1,679,313; July 31.
Little, Alice, Santa Cruz, Calif. Cover for toilets. Des. 75,922; July 31.
Ljunglof, George L. (See Baker, N. M., and Ljunglof.)
Lockard, Obe, assignor of one-half to M. Crawford, Commodore, Pa. Rail joint. 1,679,162; July 31.
Locker, John B., St. Louis, Mo. Antislip device. 1,679,314; July 31.
Lockwood, Mary A., Margaretville, N. Y. Windshield for automobiles. 1,679,252; July 31.
Locomotive Firebox Company. (See Nicholson, John L., assignor.)
Losey, John B., and W. R. Stone, Syracuse, N. Y. Rubber-composition flooring. 1,678,948; July 31.
Loth, William A., assignor to Société Industrielle des Procedes W. A. Loth, Paris, France. System of radiogoniometry. 1,678,737; July 31.
Lovely, John E., assignor to Jones & Lamson Machine Company, Springfield, Vt. Auxiliary grooving or facing attachment for Fay lathes. 1,679,043; July 31.
Low, Archie E., Ottawa, Ontario, Canada. Sealing means. 1,679,315; July 31.
Lucey Manufacturing Corporation of Tennessee. (See Evans, William S., assignor.)
Ludeman Brothers, Incorporated. (See Ludeman, Oscar H., assignor.)
Ludeman, Oscar H., Glen Ridge, N. J., assignor to Ludeman Brothers, Incorporated, New York, N. Y. Controlling mechanism. 1,679,044; July 31.
Luery, Michael, Chicago, Ill. Garment bag and hanger. 1,679,091; July 31.
Lutter, Clemens. (See Schranz, K., and Lutter.)
Macdonald, Laurie S., and J. E. Small, Brockton, Mass. Boot and shoe. 1,678,739; July 31.

MacMahon, James D., Niagara Falls, assignor to The Mathieson Alkali Works, New York, N. Y. Hypochlorite composition. 1,678,987; July 31.
MacMillan, Daniel J., Brooklyn, N. Y. Pneumatic-dispatch carrier. 1,679,223; July 31.
Macomber, Stanley, Massillon, assignor to The Macomber Steel Company, Canton, Ohio. Structural element. 1,678,738; July 31.
Macomber Steel Company, The. (See Macomber, Stanley, assignor.)
Madsen, Fred T., Forest Park, assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Testing equipment for automatic telephone systems. 1,679,316; July 31.
Madvig, Gunnar, Oakland, Calif. Bracket for drapery pole or rod. Des. 75,923; July 31.
Madvig, Gunnar, Oakland, Calif. Bracket for drapery pole or rod. Des. 75,924; July 31.
Madvig, Gunnar, Oakland, Calif. Bracket for drapery pole or rod. Des. 75,925; July 31.
Magis, Auguste A. G., Paris, France, assignor to The Superheater Company, New York, N. Y. Joining pipes. 1,678,740; July 31.
Magrath, Homer A. (See Van Brimer, G., Magrath, Klancher, and Soots.)
Mahannah, Everett A. (See Maxim, W. D., and Mahannah.)
Maier, Charles, New York, N. Y. Flowerpot holder. 1,678,988; July 31.
Maimin, H., Company Incorporated. (See Maimin, Hyman, assignor.)
Maimin, Hyman, assignor to H. Maimin Company Incorporated, New York, N. Y. Cloth-cutting machine. 1,678,989; July 31.
Mallory, Harry C., deceased, Long Island City, N. Y.; S. R. Mallory, administratrix. Cooling system for internal-combustion engines. 1,678,644; July 31.
Mallory, Sue R., administratrix. (See Mallory Harry C.)
Mandery, Roy J., Lincoln, Nebr. Combined scooter, side car, and wagon. 1,679,045; July 31.
Manly, Charles M., Richmond Hill, N. Y., assignor to Overman Cushion Tire Company, Inc. Making vehicle tires. 1,678,866; July 31.
Mansfield, James F., Floral Park, N. Y. Motor clock mounting. 1,678,990; July 31.
Manville, E. J., Machine Company, The. (See Praeny, John E., assignor.)
Mardis, Paul L. (See Hall, A. J., and Mardis.)
Mares, Matthew, Racine, Wis. Plow. 1,678,741; July 31.
Markatos, Spiros C., New York, N. Y. Combination steam chamber. 1,679,253; July 31.
Markel Electric Products, Inc. (See Yokel, Frank, assignor.)
Mariatt, George E., Pasadena, Calif. Typographical machine. 1,679,317; July 31.
Mariatt, George E., Pasadena, Calif. Typographical assembling and distributing machine. 1,679,318; July 31.
Marmion, Louis G. (See Sohn, F., Marmion, and Gibian.)
Marschalek, Alexander, East Rutherford, assignor to Becton, Dickinson & Co., Rutherford, N. J. Plunger clip for syringes. 1,678,991; July 31.
Marshall, Horace M., Vicksburg, Miss. Sheet piling. 1,679,319; July 31.
Marshall, John R., McKean, Pa. Insulator. 1,678,992; July 31.
Marshall, John R., McKean, Pa. Hook. 1,678,993; July 31.
Martin, Dorr R., Detroit, Mich. Automatic cut-off device for fuel-oil burners. 1,679,163; July 31.
Marx, W., & Co. (See Scholz, Richard, assignor.)
Mason, George E. (See McLeod, R. S., Mason, and Stansfield.)
Mason, George N., assignor to Reading Hardware Corporation, Reading, Pa. Door lock. 1,678,994; July 31.
Masson, Charles P., Nancy, France. Support for the pylons of staging and the like. 1,679,254; July 31.
Massuere, Mark H., Hollywood, Calif. Attachment for hydraulic brake systems. 1,678,677; July 31.
Mathieson Alkali Works, The. (See MacMahon, James D., assignor.)
Matthews, Jesse, Absecon, N. J. Speed-warning device. 1,679,320; July 31.
Mattison Machine Works. (See Medholdt, Louis T., assignor.)
Mattison Machine Works. (See Vivarttas, William O., assignor.)
Maxim, William D., and E. A. Mahannah, New York, N. Y., assignors to International Paper Company. Mechanism for the control of electric steam generators. 1,678,995; July 31.
Maxson, Louis A., Claremont, N. H., assignor to Sullivan Machinery Company. Compressor-controlling mechanism. 1,679,133; July 31.
Maynard, Albert E., assignor to American Optical Company, Southbridge, Mass. Edging machine. 1,679,224; July 31.
McBride, Arthur C., San Diego, Calif. Vehicle steering wheel. 1,679,164; July 31.
McConway & Torley Company, The. (See George, Enoch, jr., assignor.)
McConway & Torley Company, The. (See Regan, William J., assignor.)
McCormick, Harold V., Long Beach, N. Y., assignor, by mesne assignments, to Shur Loc Elevator Safety Corporation, Newark, N. J. Elevator. 1,679,092; July 31.
McCreary, Edward J. (See McCreary, John and E. J.)
McCreary, John and E. J., Cohoes, N. Y. Machine for treating blankets or fabrics. 1,679,255; July 31.
McElroy Robert L. (See Nolen, James G., assignor.)
McEwan, Andrew J., Tulsa, Okla. Combined vacuum and pressure relief valve for receiving and storage tanks. 1,678,700; July 31.
McEwen, Horace C., Iroquois Falls, Ontario, Canada. Belt tightener. 1,678,645; July 31.
McGee, Frank R., Steubenville, Ohio. Valve. 1,678,867; July 31.
McIntosh, James, Norristown, Pa., assignor to Diamond State Fibre Company, Elsmere, Del. Synthetic resin and making same. 1,679,322; July 31.
McKay, Richard F., Brooklyn, N. Y. Pipe cutter. 1,679,321; July 31.
McKeehy, James S., assignor to Dennison Manufacturing Company, Framingham, Mass. Jewelry box or similar article. Des. 75,926; July 31.
McKenzie, John. (See Walton, F. S., and McKenzie.)
McKinnie, Henry, Pittsburgh, Pa. Burner. 1,678,996; July 31.
McKune, Frank B., Hamilton, Ontario, Canada, assignor, by mesne assignments, to Open Hearth Combustion Company, Chicago, Ill. Metallurgical furnace. 1,679,340; July 31.
McLean, Barnet W., Philadelphia, Pa. Chair. Des. 75,927; July 31.
McLeod, Robert S., Manchester, G. E. Mason, Hale, and W. Stansfield, Chorlton-cum-Hardy, England. Electric motor. 1,678,912; July 31.
McMurry, John D., Memphis, Tenn. Combination collar and hame. 1,678,782; July 31.
Meynieu, Jean G., Bordeaux, France. Construction of refrigerator chambers. 1,678,742; July 31.
Medholdt, Louis T., assignor to Mattison Machine Works, Rockford, Ill. Cutter head. 1,678,820; July 31.
Meldrum, Alexander. (See Gabrielson, C., and Meldrum.)
Mellin, George E., New York, N. Y. Idler for belt conveyers. 1,678,997; July 31.
Menefee, Elmer, assignor of one-half to A. H. Stanley, Zanesville, Ohio. Spring-shoe amusement device. 1,679,046; July 31.
Menk, Rudolph W., Joliet, Ill. Air circulator for furnaces. 1,679,047; July 31.
Menzies, William E., Irwin, Pa., assignor to Westinghouse Electric & Manufacturing Company. Regulator system. 1,678,868; July 31.
Mercer, Henry H., Claremont, N. H., assignor to Sullivan Machinery Company. Percussive tool. 1,679,130; July 31.
Mercer, Henry H., Claremont, N. H., assignor to Sullivan Machinery Company. Channeler mechanism. 1,679,136; July 31.
Merrifield, John D., assignor to Reed Manufacturing Company, Erie, Pa. Pipe cutter. 1,679,225; July 31.
Metals Production Company of North America Incorporated. (See Moulden, J. C., and Taplin, assignors.)
Meyer, Kurt H. and H. Schütte, Mannheim, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Tanning hides. 1,678,998; July 31.
Mifsud, Jose L. (See Schauman, K. O., Yancey, and Mifsud.)
Mikesh, Martin A. (See Blumberg, H., and Mikesh.)
Milkes, Leah G., Chicago, Ill. Overshoe or similar article. Des. 75,928; July 31.
Miller, Gordon, New York, assignor to Philip Florin, Woodmere, N. Y. Portable savings bank. 1,678,646; July 31.
Miller, Ranse W., Dublin, Ga. Detachable choke piece. 1,679,048; July 31.
Miller, Stuart P., and J. B. Hill, Philadelphia, Pa., assignors to The Barrett Company. Polymerization and purification of hydrocarbons. 1,679,093; July 31.
Miller, William S., Rochester, N. Y. Ventilator. 1,678,743; July 31.
Milwaukee Corrugating Company. (See Jones, Edmund H., assignor.)
Milwaukee Paper Box Company. (See Carlson, Walter C., assignor.)
Miner, W. H., Inc. (See O'Connor, John F., assignor.)
Minieh, Verne E., Scarsdale, assignor to The American Foundry Equipment Company, New York, N. Y. Sand cutting, screening, and piling machine. 1,678,702; July 31.
Mitro, John R., Kincaid, Ill. Air compressor. 1,679,226; July 31.
Moesta, Marvin W., assignor to Murray Body Corporation, Detroit, Mich. Vehicle body construction. 1,679,094; July 31.
Montan- und Industrialwerke vormals Joh. Dav. Starck. (See Szücs, Josef, assignor.)
Moore, Charles A., Edina, Minn. Refrigerating and air-circulating system. 1,678,678; July 31.
Moore, Wallace F., Meriden, assignor to The American Hardware Corporation, New Britain, Conn. Door closer. 1,678,701; July 31.
Morgan, Edmund C., deceased, New York, N. Y.; O. E. Morgan, executrix. Method and apparatus for mining coal. 1,678,821; July 31.
Morgan, Olive E., executrix. (See Morgan, Edmund C.)

Morrison, Montford, Chicago, Ill. Static dissipator. 1,678,869; July 31.
Morrison, William M., Tacoma, Wash., assignor to American Smelting and Refining Company, New York, N. Y. Filtering device. 1,678,704; July 31.
Morrow, Clarence H., assignor to The Hotstream Heater Company, Cleveland, Ohio. Thermostatic valve. 1,679,165; July 31.
Mortlock, Clarence E., Wilmington, Del. Window-cleaning apparatus. 1,679,323; July 31.
Moser, Arthur, Northampton, Pa. Hydraulic brake-operating means. 1,678,949; July 31.
Moulden, John C., and B. Taplin, London, England, assignors to Metals Production Company of North America Incorporated, New York, N. Y. Heat treatment and concentration of copper ores. 1,679,337; July 31.
Mouromtseff, Ilia E., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Vacuum-tube device. 1,678,870; July 31.
Mueller, Adolph, trustee. (See Mueller, Philip, assignor.)
Mueller, Philip, assignor to A. Mueller, trustee, Decatur, Ill. Bath and shower combination. 1,678,703; July 13.
Müller, Carl, Mannheim, W. Frankenburger, Ludwigshafen-on-the-Rhine, and F. Grassner, Mannheim, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Purifying organic liquid. 1,679,256; July 31.
Müller, Jakob. (See Staudinger, H., Tobler, Stocker, Müller, and Bucher.)
Muller, William F., assignor to The International Postal Supply Company of New York, Brooklyn, N. Y. Printing mechanism. 1,678,705; July 31.
Murdock, Walter S., Houston, Tex. Rotary toothbrush. 1,679,166; July 31.
Murray Body Corporation. (See Moesta, Marvin W., assignor.)
Murray, Henry H., Riverton, N. J., assignor to Victor Talking Machine Company. Motor mounting. 1,678,999; July 31.
Murray, Thomas E., Brooklyn, N. Y. Valve bonnet and the like. 1,679,324; July 31.
Nagel-Chase Mfg. Co., The. (See Schultze, Edward, assignor.)
Nasmith, John W., Heaton Mersey, Manchester, England. Combing machine. 1,678,822; July 31.
National Aniline & Chemical Company. (See Faber, Henry B., assignor.)
National Aniline & Chemical Company. (See Rogers, Donald G., assignor.)
National Automatic Tool Company, The. (See Galloway, R. M., and Burton, assignors.)
National Lead Company. (See Hallett, Robert L., assignor.)
National Malleable and Steel Castings Company. (See Hoaglind, Albert J., assignor.)
National Pneumatic Company. (See Forman, Paris R., assignor.)
National Pump and Compressor Company. (See Wilson, Edward, assignor.)
Neebe, Lawrence L., Woodbury, N. J. Throttle valve. 1,679,257; July 31.
Nefczesauskas, Joseph S., Cleveland, Ohio. Door-handling mechanism. 1,679,227; July 31.
Neilson, Albert H., Tulsa, Okla. Swivel rope socket. 1,678,706; July 31.
Nelson, Carl G., deceased, Pittsburgh, Pa.; H. C. Nelson, executrix. Trousers hanger. 1,678,679; July 31.
Nelson, Hulda C., executrix. (See Nelson, Carl G.)
Nelson, Ike J., et al. (See Rodgers, Ralph S., assignor.)
Nelson, Sven T., Chicago, Ill., assignor to Sullivan Machinery Company. Cutting tool. 1,679,049; July 31.
Nelson, Sven T., Oak Park, Ill., assignor to Sullivan Machinery Company. Heat-exchange device. 1,679,134; July 31.
Neu, Eugene C., Ridgefield, assignor to The Schwarzenbach-Huber Company, Union City, N. J. Thread cleaner. 1,679,268; July 31.
Newman, Almyr L., Warwick, R. I. Clasp for bracelets. 1,678,707; July 31.
Newman, Hugo, New York, N. Y. Supporting device. 1,678,950; July 31.
Newman, I., & Sons, Inc. (See Kispert, Joseph J., assignor.)
Newman, Lewis, Cleveland, Ohio. Spring suspension for motor vehicles. 1,679,050; July 31.
New Nap System, Inc. (See Flynn, Mortimer F., assignor.)
New York Brick Handling Corporation. (See Fuller, Claud E., assignor.)
Nicholson, John L., assignor to Locomotive Firebox Company, Chicago, Ill. Thermic siphon for locomotives. 1,679,051; July 31.
Nicolai, Niccola, Chicago, Ill. Window structure. 1,679,260; July 31.
Nilsson, Freeman, Troy, N. Y. Brush construction. 1,678,950; July 31.
Nolan, Thaddeus A., Cincinnati, Ohio. Sign. 1,679,167; July 31.
Nolen, James G., New York, N. Y., assignor to R. L. McElroy, Charlottesville, Va. Method and apparatus for testing signaling systems. 1,679,228; July 31.
North Bros. M'f'g. Co. (See Fegley, T. J., and Leopold, assignors.)
North, Clayton O., Tallmadge Township, Summit County, assignor to The Rubber Service Laboratories Co., Akron, Ohio. Rubber softening and compounding ingredient. 1,679,000; July 31.
Norviel, Harry E., Anderson, Ind., assignor, by mesne assignments, to Delco-Remy Corporation, Dayton, Ohio. Electric switch. 1,678,951; July 31.
Norwood, Joseph C., San Francisco, Calif. Multigraph type. 1,679,261; July 31.
Oakley, Erastus G., Southport, assignor to Bridgeport Brass Company, Bridgeport, Conn. Waste connection. 1,678,783; July 31.
O'Brien, James F., Seattle, Wash. Adjustable stilt. 1,679,168; July 31.
O'Brien, James F., Seattle, Wash. Toy vehicle. 1,679,169; July 31.
O'Brien James F., Seattle, Wash. Velocipede. 1,679,170; July 31.
O'Connor, John F., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner Inc. Center bearing. 1,678,871; July 31.
Officer, Charles B., Winnetka, Ill., assignor to Sullivan Machinery Company. Mining machine. 1,679,127; July 31.
Ohno, Wilhelm Seebach, Zurich, Switzerland. Tonguing and grooving apparatus. 1,678,784; July 31.
Oil Well Supply Company. (See Gallman, Charles E., assignor.)
Okel, Harry A., Pleasanton, W. Va., assignor to The Ferdinand Strauss Corporation, New York, N. Y. Mechanical clown toy. 1,679,262; July 31.
Olsen, Julius C., Racine, assignor to Western Metal Specialty Co., Milwaukee, Wis. Making pipe elbows. 1,678,744; July 31.
Open Hearth Combustion Company. (See McKune, Frank B., assignor.)
Ordway, Donald P. (See Sherman, H. B., and Ordway.)
O'Rourke, Daniel J., Chicago, Ill., assignor to Sullivan Machinery Company. Forging machine. 1,679,126; July 31.
Osgood, Charles F., Claremont, N. H., assignor to Sullivan Machinery Company. Feeding mechanism. 1,691,138; July 31.
Overman Cushion Tire Company. (See Manly, Charles M., assignor.)
Owen, Frederick C., Fayetteville, N. C. Transformer for electric-arc cutting, repairing, and welding apparatus. 1,679,263; July 31.
Page, George E., assignor, by mesne assignments, to P. S. Paulson, Rochester, N. Y. Apparatus for baking food products. 1,679,052; July 31.
Parapar, Justo. (See de la Cuesta, Francisco and M. M., Parapar, and Fals.)
Parker, Leslie O., Anderson, Ind., assignor, by mesne assignments, to Delco-Remy Corporation, Dayton, Ohio. Ignition-timer distributor. 1,678,913; July 31.
Parker, Robert C., assignor of 40/100 to W. D. Cram, La Porte, Ind. Transmission gearing. 1,679,264; July 31.
Parrott, D. R. (See Thrower, Marion R., assignor.)
Pathe Phonograph & Radio Corporation. (See Wilmann, E. A., and Lewis, assignors.)
Pattinson, William, Derby, England. Door. 1,678,952; July 31.
Patton, George, Bicknell, Ind. Magazine hammer. 1,678,680; July 31.
Paulson, Paul S. (See Page, George E., assignor.)
Payne, Alice B. (See Smith, George, assignor.)
Pedle Company, The. (See Saurer, Paul R., assignor.)
Penta, Patrick W., Medford, assignor to Wilson Manufacturing Company, Boston, Mass. Key case. 1,679,001; July 31.
Peoples Trust and Savings Bank of Chicago, The, trustee. (See Enid, John R., assignor.)
Perkins, Nathan W., East Orange, and E. J. Ens, assignors to Ellis Adding Typewriter Company, Newark, N. J. Adding and subtracting accumulator. 1,679,265; July 31.
Permutit Company, The. (See Cawley, George, assignor.)
Pfaffenbarger, Hans, Nuremberg, Germany. Toy vehicle. 1,678,785; July 31.
Philipp, Otto, Winterthur, Switzerland, assignor to Busch-Sulzer Bros.-Diesel Engine Company, St. Louis, Mo. Piston cooling. 1,678,957; July 31.
Phonograph Company, The. (See Seabolt, Frank J., assignor.)
Pickard, Greenleaf W., Newton Center, assignor to Wireless Specialty Apparatus Company, Boston, Mass. Closed turned coil or loop aerial. 1,679,095; July 31.
Pickell, Thetus D., assignor to A. V. Victorius & Company, New York, N. Y. Cleaning attachment for circular-knitting machines. 1,679,171; July 31.
Pickens, Glen S., et al. (See Shope, David F., assignor.)
Pieters, Ray G., Chicago, Ill., assignor of one-half to A. N. Terry, Minneapolis, Minn. Steam applicator for wall-paper-removing apparatus. 1,679,172; July 31.
Pilling, Norman B., Elizabeth, and J. G. Schoener, Bayonne, N. J., assignors to The International Nickel Company, New York, N. Y. Welding electrodes. 1,679,002; July 31.
Pilling, Norman B., Elizabeth, and J. G. Schoener, Bayonne, N. J., assignors to The International Nickel Company, Inc., New York, N. Y. Welding rod. 1,679,003; July 31.

Pinkel, Albert F., and M. J. Brunner; said Brunner assignor of his entire right to G. P. Berner, Buffalo, N. Y. Apparatus for storing and cutting block material. 1,679,004; July 31.

Place, Blon C., assignor of one-half to G. E. Gagnier, Detroit, Mich. Fastener. 1,679,106; July 31.

Pneumatic Scale Corporation, Ltd. (See Butler, James A., assignor.)

Pomeroy, S. H., Company. (See Kohut, Michael, assignor.)

Poser, Max, assignor to Bausch & Lomb Optical Co., Rochester, N. Y. Ophthalmoscope. 1,678,681; July 31.

Potter, Ralph K., New York, N. Y., assignor to American Telephone and Telegraph Company. Method and apparatus for producing musical sounds. 1,678,872; July 31.

Pourfillet, Georges, Leonia, and E. Giovannoni, Fort Lee, N. J., assignors to Universal Pictures Corporation, New York, N. Y. Film-treating apparatus. 1,679,096; July 31.

Pracny, John E., assignor to The E. J. Manville Machine Company, Waterbury, Conn. Roll feed for metal-heading machines. 1,678,647; July 31.

Prosperity Company Inc., The. (See Braun, Philip N., assignor.)

Prosperity Company Inc., The. (See Hallowell, Louis S., assignor.)

Punke, John J., assignor to Hupp Motor Car Corporation, Detroit, Mich. Door-window-regulator handle. Des. 75,929; July 31.

Pym, Arthur F., Marblehead, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Upper-shaping machine. 1,678,873; July 31.

Pyzel, Daniel, Oakland, assignor to Simplex Refining Company, San Francisco, Calif. Circulating dephlegmator. 1,678,823; July 31.

Quaker Silver Company. (See Jennings, James W., assignor.)

Rachlin, Max, New York, N. Y. Gutter hanger. 1,678,874; July 31.

Radio Corporation of America. (See Brown, Vincent H., assignor.)

Rand, James H., jr., Tonawanda, assignor, by mesne assignments, to Remington Rand, Inc., New York, N. Y. Index device. 1,679,005; July 31.

Rastetter, William C., Fort Wayne, Ind. Folding chair. 1,679,173; July 31.

Räth, Curt. (See Binz, A., and Räth.)

Rauen, Peter F., Omaha, Nebr. Milk-can cover. 1,678,953; July 31.

Rauh, Herbert S., New York, N. Y. Legging. 1,678,954; July 31.

Rawlings Manufacturing Company. (See Scudder, Mason, assignor.)

Raynor, John S., Philadelphia, Pa. Clip for fastening metal laths. 1,679,006; July 31.

Reading Hardware Corporation. (See Mason, George N., assignor.)

Reagan, George D., Oklahoma City, Okla. Mortar distributor. 1,679,007; July 31.

Record Cement-Industrie G. m. b. H. (See Tetens, Oskar, assignor.)

Reed Manufacturing Company. (See Merrifield, John D., assignor.)

Regan, William J., Wilkinsburg, assignor to The McConway & Torley Company, Pittsburgh, Pa. Coupler-release rigging. 1,678,786; July 31.

Reller, Edwin L., and V. R. A. Stroh, St. Louis, Mo., assignors, by mesne assignments, to Remington Rand Inc., New York N. Y. Account-finding machine. 1,679,008; July 31.

Remick, Walter L., Philadelphia, Pa. Leaching apparatus. 1,678,787; July 31.

Remick, Walter L., New York, N. Y. Process of and apparatus for the treatment of solid-bearing liquids. 1,678,788; July 31.

Remington Arms Company. (See Tillmanns, Carl W., assignor.)

Remington Rand Inc. (See Rand, James H., jr., assignor.)

Remington Rand Inc. (See Reller, E. L., and Stroh, assignors.)

Renault, Anita M., Chicago, Ill. Face mask. 1,678,649; July 31.

Replogle, Harry H., Upper Montclair, N. J., assignor of one-half to J. Young, Caldwell, N. J. Edible-dye composition. 1,678,648; July 31.

Republic Brass & Mfg. Co. (See Slining, Henry W., assignor.)

Rice, Louis W., assignor to Bernard Rice's Sons, Inc., New York, N. Y. Box or similar article. Des. 75,930; July 31.

Rice, William G., et al. (See Sweet, Andrew T., assignor.)

Rice's, Bernard, Sons, Inc. (See Rice, Louis W., assignor.)

Richards, Edwin H. and F. A., Pomona, Calif. Body-punch resistance developer. 1,679,174; July 31.

Richards, Frank A. (See Richards, Edwin H. and F. A.)

Richardson, Henry, Chicago, Ill. Corner lock for bedsteads. 1,678,708; July 31.

Richardson, Myron H., and A. D. Antoine, assignors to Advance Machine Company, Chicago, Ill. Vending machine. 1,678,650; July 31.

Richardson, Rodney G., Chicago, Ill. Speed governor. 1,678,914; July 31.

Riddle, George W., Chillicothe, Mo. Hose clamp. 1,678,915; July 31.

Ridler, Edward L., St. Paul, Minn. Floor and ceiling plate. Re17,056; July 31.

Rieger, Clara, Reutlingen, Germany. Combined walking stick and tripod. 1,679,267; July 31.

Rigney, Tom A., Laurel, Mont. Shock absorber. 1,679,268; July 31.

Riordan, John M., East Cleveland, assignor to The Cleveland Hardware Company, Cleveland, Ohio. Profiling attachment for machine tools. 1,678,651; July 31.

Rioseco, Pedro, New York, N. Y. Locking safety pin. 1,679,229; July 31.

Ritschard, Victor, Riverton, N. J., assignor to Keystone Watch Case Corporation, Philadelphia, Pa. Watchcase. Des. 75,931; July 31.

Robie, Frederick C., assignor to The Eaton Axle & Spring Company, Cleveland, Ohio. Bumper. 1,678,916; July 31.

Rockenbauer, Otto, Westville, N. J. Tampering-indicating device for gas meters. 1,678,955; July 31.

Rodgers, Ralph S., assignor of one-fourth to J. E. Harmon and one-fourth to I. J. Nelson, Pittsburgh, Pa. Sectional abrasive reamer. 1,679,269; July 31.

Rogers, Donald G., Buffalo, assignor to National Aniline & Chemical Company, Inc., New York, N. Y. Purification of indanthrene. 1,679,230; July 31.

Rogers, Simeon L. and George H., Company. (See Hall, Edwin W., assignor.)

Rohn, Wilhelm, Hanau-on-the-Main, assignor to Siemens-Schuckertwerke Gesellschaft mit beschränkter Haftung, Siemensstadt, near Berlin, Germany. Electric bright-annealing furnace. 1,678,875; July 31.

Rohn, Wilhelm, Hanau-on-the-Main, assignor to Siemens-Schuckertwerke Gesellschaft mit beschränkter Haftung, Siemensstadt, near Berlin, Germany. Electric bright-annealing furnace for continuously bright annealing. 1,678,876; July 31.

Rolka, Ignatz, Gallitzin, Pa. Antiskid device for automobiles. 1,679,270; July 31.

Rostek, Vincent R., Philadelphia, Pa. Brooder for chickens. 1,679,009; July 31.

Rothenberg, Harry, West Norwood, N. J., and O. C. Britsch, Woodhaven, assignors to H. Hyman, Brooklyn, N. Y. Lamp socket. 1,679,338; July 31.

Roush, Clarence P., Spokane, Wash. Folding machine. 1,678,917; July 31.

Rubber and Celluloid Products Company. (See Albright, Andrew, jr., assignor.)

Rubber Service Laboratories Co., The. (See North, Clayton O., assignor.)

Ruben Rectifier Corporation of Delaware. (See Ruben, Samuel, assignor.)

Ruben, Samuel, New York, N. Y., assignor to Ruben Rectifier Corporation of Delaware. Electric-current rectifier. 1,678,824; July 31.

Ruben, Samuel, New York, N. Y., assignor to Ruben Rectifier Corporation, Englewood, N. J. Electric-current rectifier. 1,678,825; July 31.

Ruben, Samuel, New York, N. Y., assignor to Ruben Rectifier Corporation, Englewood, N. J. Electric-current rectifier. 1,678,826; July 31.

Rumney, Fred A., Boston, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Fastener-inserting machine. 1,678,877; July 31.

Sabin, Ernest E., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Work locating and punching apparatus. 1,678,789; July 31.

Saiesse, Joseph T., Ottawa, Ontario, Canada. Awning-roller automatic stop. 1,678,790; July 31.

Sanctuary, William C., and W. A. Jones, Amherst, Mass. Brooder. 1,679,271; July 31.

San Diego Consolidated Gas and Electric Company et al. (See Goldkamp, Otto B., assignor.)

Sandin, Maurits J., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Switch mechanism. 1,678,878; July 31.

Sands Manufacturing Company, The. (See Thomas, M. W., and Hamilton, assignors.)

Saranac Automatic Machine Corporation. (See Craig, Edward, assignor.)

Sauer, Joseph. (See Stark, N. I., and Sauer.)

Saurer, Paul R., Floral Park, N. Y., assignor to The Peelle Company, Brooklyn, N. Y. Fireproof elevator door. 1,678,652; July 31.

Savage Arms Corporation. (See Dunham, George W., assignor.)

Schaer, Charles, Langenthal, Switzerland, assignors to Busch-Sulzer Bros.-Diesel Engine Company, St. Louis, Mo. Internal-combustion engine. 1,678,956; July 31.

Schauman, Karl O., S. R. Yancey, and J. L. Mifsud, assignors to Sure-Guard Corporation, New York, N. Y. Spring control. 1,679,181; July 31.

Schellenger, Newton C., assignor to Chicago Telephone Supply Co., Elkhart, Ind. Terminal. 1,678,745; July 31.

Schellenger, Newton C., assignor to Chicago Telephone Supply Co., Elkhart, Ind. Jack. 1,678,746; July 31.

Schillinger, Christian, Scranton, Pa. Boiler furnace. 1,678,827; July 31.

Schleicher, Frank J., St. Louis, Mo. Box. 1,678,958; July 31.

Schmidt, Edwin X., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Apparatus for determining and also indicating the total heating value of flowing combustible fluid. 1,678,918; July 31.

Schneider, Franklin, and E. L. Connell, assignors to The Van Dorn Electric Tool Company, Cleveland, Ohio. Chuck. 1,679,175; July 31.

Schneider, Philipp, St. Louis, Mo. Punch. 1,679,176; July 31.

Schoener, John G. (See Pilling, N. B., and Schoener.)

Scholz, Richard, Berlin, assignor to the firm: W. Marx & Co., Halle-on-the-Saale, Germany. Dough-kneading machine for the production of dough portions ready for baking. 1,678,747; July 31.

Schram, Lester J., Chicago, Ill. Collapsible radiator cover. 1,678,791; July 31.

Schrans, Karl, Elberfeld, and C. Lutter, Barmen-Langenfeld, Germany, assignors to Winthrop Chemical Company, Inc., New York, N. Y. 1-alkoxymethyl-3,7-dimethylxanthines. 1,679,053; July 31.

Schröter, Fritz, assignor to Gesellschaft für drahtlose Telegraphie m. b. H., Berlin, Germany. System for reducing static disturbances. 1,678,653; July 31.

Schryver, Washington I., Prophetstown, Ill. Signal lamp for vehicles. Des. 75,932; July 31.

Schultz, Charles, North Milwaukee, Wis. Windshield wiper. 1,679,097; July 31.

Schultz, Edward, assignor to The Nagel-Chase Mfg. Co., Chicago, Ill. Vapor burner. 1,678,828; July 31.

Schultz, Frederick A., Hasbrouck Heights, N. J. Heel. 1,679,272; July 31.

Schumacher, John, Los Angeles, Calif. Edge-protected board. 1,678,959. July 31.

Schürmann, Walter, Dusseldorf, Germany. Sectional or link shaft. 1,678,709; July 31.

Schütte, Hermann. (See Meyer, K. H., and Schütte.)

Schwannecke, Frederick A., New Rochelle, N. Y. Container. 1,678,960; July 31.

Schwartz, Frederick, assignor to Robert Findlay Manufacturing Company, Inc., Brooklyn, N. Y. Combined radiotable and loud-speaker casing. Des. 75,933; July 31.

Schwartz, Henry. (See Schwartz, Saul, assignor.)

Schwartz, Saul, assignor to H. Schwartz, Chicago, Ill. Container. 1,679,273; July 31.

Schwarzenbach-Huber Company, The. (See Neu, Eugene C., assignor.)

Scott, Glenn A., and J. M. Cochran, Ventura, Calif. Packer slip socket. 1,678,829; July 31.

Scott, Rumsey W., Montclair, N. J., assignor to American Cable Company, Inc. Attachment for wire rope. 1,678,961; July 31.

Scudder, Mason, assignor to Rawlings Manufacturing Company, St. Louis, Mo. Casing for footballs, basket balls, and the like. 1,678,830; July 31.

Seabolt, Frank J., Schenectady, N. Y., assignor to The Phonograph Company. Automatic phonograph. 1,679,054; July 31.

Seaholm, Martin A., Chicago, Ill. Pump and motor. 1,678,831; July 31.

Seaman, David S., Providence, R. I. Method of and apparatus for spinning yarn. 1,678,919; July 31.

Seeburg, Justus P. (See Tenow, Olof A. A., assignor.)

Seidel, Walter, Leverkusen, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Crystallization apparatus. 1,679,055; July 31.

Selah, Howard A., Homewood, Pa., assignor to Westinghouse Electric and Manufacturing Company. Fitting for tubular switchboards. 1,678,879; July 31.

Sell-Best Novelty Candy Co. Inc. (See Freedman, William M., assignor.)

Selvig, John N., Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Material-spooling mechanism. 1,678,710; July 31.

Settle, Douglas, San Diego, Calif. Key container. 1,679,274; July 31.

Seymour, William, Paterson, N. J. Mixing device. 1,679,177; July 31.

Shahpar, Ahmad N., Highland Park, Mich. Differential driving arrangement. 1,679,098; July 31.

Shaw, Wesley J., Haverhill, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Machine for turning wood heels. 1,678,792; July 31.

Shears, Sumner S. (See Wilson, E. R., and Shears.)

Shechan, William M., St. Louis, Mo., assignor to Commonwealth Steel Company, Granite City, Ill. Locomotive mud ring. 1,678,880; July 31.

Shelby Salesbook Company, The. (See Giller, Charles W., assignor.)

Sheldon, Waldo, Greenwich, Conn. Well-drilling apparatus. 1,678,881; July 31.

Shelton, Harry J., University City, Mo. Grinder. 1,679,182; July 31.

Sheppard, Samuel E., assignor to Eastman Kodak Company, Rochester, N. Y. Photographic light-sensitive material and making the same. 1,678,832; July 31.

Sherman, Howard B., and D. P. Ordway, assignors to American Stamping Co., Battle Creek, Mich. Combination holder for razor blades and paper. 1,679,231; July 31.

Shiflett, Samuel B., Del Ray, Alexandria, Va. Bedroom lamp stand and circuit-controlling mechanism therefor. 1,678,920; July 31.

Shillman, Nathan H., Baltimore, Md. Tape casing. 1,679,178; July 31.

Shipman, Lewis H., Boston, Mass. Solar-heat drier. 1,678,711; July 31.

Shlick, Leo, Montreal, Quebec, Canada. Beating engine. 1,679,056; July 31.

Shlick, Leo, Boston, Mass. Beating engine. 1,679,057; July 31.

Shlick, Leo, Boston, Mass. Beating engine. 1,679,058; July 31.

Shlick, Leo, Boston, Mass. Beating engine. 1,679,059; July 31.

Shoemaker, John T., Flint, Mich., assignor to Flint Automatic Heater Company. Curling-iron heater. 1,679,275; July 31.

Shope, David F., Portland, Oreg., assignor of one-half to G. S. Pickens, Fort Sheridan, Ill., and one-half to B. S. Snyder, Duluth, Minn. Building blocks. 1,678,882; July 31.

Shur Loc Elevator Safety Corporation. (See McCormick, Harold V., assignor.)

Shure, Julius, Chingford, England. Fountain-pen and pencil clip. 1,679,232; July 31.

Sidon, Ignatz, Astoria, N. Y. Book carrier. 1,679,183; July 31.

Siebert, Selmar R., et al. (See Goldkamp, Otto B., assignor.)

Siefken, George R., New York, N. Y. Ventilating device. 1,678,654; July 31.

Siemens-Schuckertwerke Gesellschaft mit beschränkter Haftung. (See Rohn, Wilhelm, assignor.)

Simmons, John J., San Jose, Calif. Curtain stretcher. 1,678,921; July 31.

Simplex Equipment Company. (See Creveling, John L., assignor.)

Simplex Refining Company. (See Pyzel, Daniel, assignor.)

Singer, Frederick M., Racine, Wis. Golf-bag support. 1,678,922; July 31.

Sipp, Karl, Mannheim, assignor, by mesne assignments, to H. Lanz Aktiengesellschaft, Mannheim, Baden, Germany. Production of iron castings. 1,678,655; July 31.

Sisson, Edmund B., Pasco, Wash. Low-level signal. 1,679,060; July 31.

Skene, Andrew A. (See Gilson, R. M., and Skene.)

Slack & Parr Limited. (See Bryan, William E., assignor.)

Slagel, Franklin G., assignor to Fedders Manufacturing Company Inc., Buffalo, N. Y. Cooling unit for refrigerators. 1,679,010; July 31.

Slining, Henry W., assignor to Republic Brass & Mfg. Co., Los Angeles, Calif. Plumbing fixture. 1,679,276; July 31.

Small, Joseph E. (See Macdonald, L. S., and Small.)

Smedley, Troy D., Waterloo, Iowa. Plant marker. 1,679,061; July 31.

Smith, A. O., Corporation. (See Andren, Birger T., assignor.)

Smith, A. O., Corporation. (See Blumberg, H., and Mikesh, assignors.)

Smith, A. O., Corporation. (See Smith, Charles S., assignor.)

Smith, A. O., Corporation. (See Yeomans, Lucien I., assignor.)

Smith, Charles S., assignor to A. O. Smith Corporation, Milwaukee, Wis. Production of integral side bars and spring hangers by electric welding. 1,678,928; July 31.

Smith, George, Mullen, Nebr., assignor to A. B. Payne. Dishwasher. 1,679,062; July 31.

Smith, John W., assignor to Budd Wheel Company, Philadelphia, Pa. Brake mechanism. 1,678,682; July 31.

Smith, Leander D., Los Angeles, Calif. Pipe-seat-cutting machine. 1,678,712; July 31.

Smith, Leon R., Englewood, Colo. Ventilator for closed cars. 1,678,748; July 31.

Smith, Louis E., assignor to International Milling Company, Minneapolis, Minn. Method of and apparatus for treating wheat. 1,679,099; July 31.

Smith, Thomas W., Irvington, N. J. Coiling machine. 1,678,749; July 31.

Smythe, Edwin H., Evanston, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Acoustic device. 1,678,833; July 31.

Snavely, Clarence S., Pittsburgh, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,678,683; July 31.

Snell, Harry S., Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Molding compound. 1,678,713; July 31.

Snyder, Birdie S., et al. (See Shope, David F., assignor.)

Société Industrielle des Procedes W. A. Loth. (See Loth, William A., assignor.)

Society of Chemical Industry in Basle. (See Gams, A., and Widmer, assignors.)

Society of Chemical Industry in Basle. (See Staudinger, H., Tobler, Stocker, Müller, and Bucher., assignors.)

Soderlund, Carl, Belmont, assignor to Hood Rubber Company, Watertown, Mass. Boot-tree or last. 1,679,330; July 31.

Sohn, Frank, Chicago, L. G. Marmion, Villa Park, and E. H. Gibian, Chicago, Ill., assignors to The Vitrolite Company. Soda fountain. Des. 75,934; July 31.

Sommers, Herman J. (See Armstrong, Arthur N., assignor.)

Soots, Burl. (See Van Brimer, G., Magrath, Klancher, and Soots.)

Spengler, Edwin, Pontoise, France. Machine for slotting the heads of screws and the like. 1,679,063; July 31.
Sperry, Elmer A., Brooklyn, N. Y. Preventing racing of ships' engines. 1,678,714; July 31.
Standard Oil Development Company. (See Zalkowsky, Wladimir M., assignor.)
Stanley, Allen H. (See Menefee, Elmer, assignor.)
Stansfield, William. (See McLeod, R. S., Mason, and Stansfield.)
Stant, Kyle E., Connersville, Ind. Radiator cap. Des. 75,935; July 31.
Star Chandelier Co. (See Boehringer, John A., assignor.)
Star Service Hanger Co. (See Coney, J. D., and Garlius, assignors.)
Stark, Nathan L., and J. Sauer, Philadelphia, Pa. Scouring device. 1,678,962; July 31.
Starkey, William C., assignor to L. G. S. Devices Corporation, Indianapolis, Ind. Rebound damper. 1,679,179; July 31.
Staudinger, Hermann, Zurich, R. Tobler, and R. Stocker, Basel, J. Müller, Munchenstein, near Basel, and A. Bucher, assignors to Society of Chemical Industry in Basle, Basel, Switzerland. Indigoid dyestuff. 1,679,277; July 31.
Stein, Barnet L., Glencoe, and F. Kaplan, Evanston, Ill. Scenic setting for store display. Des. 75,936; July 31.
Steiner, Ludwig, Berlin, and V. Gutmann, Nuremberg, Germany, assignors, by mesne assignments, to Westinghouse Electric & Manufacturing Company. Totally-inclosed electric machine. 1,678,883; July 31.
Stephenson, Robert J., Chicago, Ill. Roof flashing. 1,678,715; July 31.
Stephenson, Samuel E., Atlanta, Ga. Sampling apparatus. 1,679,064; July 31.
Sterk, John P., Dollar Bay, Mich. Manufacturing jewelry. 1,679,180; July 31.
Sternthal, Felix, Chicago, Ill. Silverware container. 1,679,101; July 31.
Stevenson, Henry J., assignor to Davis & Furber Machine Co., North Andover, Mass. Fillet drum and stand. 1,679,065; July 31.
Stevenson, Robert R., assignor to Electrical Development & Machine Company, Philadelphia, Pa. Disconnecting switch. 1,679,184; July 31.
Stocker, Robert. (See Staudinger, H., Tobler, Stocker, Müller, and Bucher.)
Stone, Walter R. (See Losey, J. B., and Stone.)
Strauss, Ferdinand, Corporation, The. (See Okel, Harry A., assignor.)
Strauss, Leo, Far Rockaway, N. Y. Attachment for ophthalmic mountings. 1,679,233; July 31.
Strindberg, Richard, assignor to The Timken Roller Bearing Company, Canton, Ohio. Undercutting attachment for screw machines. 1,678,924; July 31.
Stroh, Victor R. A. (See Reller, E. L., and Stroh.)
Strong, Robert J. (See Leeper, J. A., and Strong.)
Stump, Frank, and A. A. Johnston, Morgantown, W. Va. Station indicator. 1,679,066; July 31.
Sturgis, Frederick C., Newark, N. J. Rotary felting machine. 1,679,100; July 31.
Sullivan Machinery Company. (See Gartin, Elmer G., assignor.)
Sullivan Machinery Company. (See Graham, James G., assignor.)
Sullivan Machinery Company. (See Halleck, Frank A., assignor.)
Sullivan Machinery Company. (See Holdsworth, Fred D., assignor.)
Sullivan Machinery Company. (See Holmes, Morris P., assignor.)
Sullivan Machinery Company. (See Maxson, Louis A., assignor.)
Sullivan Machinery Company. (See Mercer, Henry H., assignor.)
Sullivan Machinery Company. (See Nelson, Sven T., assignor.)
Sullivan Machinery Company. (See Officer, Charles B., assignor.)
Sullivan Machinery Company. (See O'Rourke, Daniel J., assignor.)
Sullivan Machinery Company. (See Osgood, Charles F., assignor.)
Sullivan Machinery Company. (See Wineman, Wade H., assignor.)
Sullivan Machinery Company. (See Wyman, Charles W., assignor.)
Superheater Company, The. (See Griffin, Joseph F., assignor.)
Superheater Company, The. (See Magis, Auguste A. G., assignor.)
Sure-Guard Corporation. (See Schauman, K. O., Yancey, and Mifsud, assignors.)
Sussman, Maxwell H., Kew Gardens, N. Y., assignor to The Elyria Iron and Steel Company, Cleveland, Ohio. Mechanism for removing burrs from tubes. 1,678,963; July 31.
Suter, Jacob, West New York, N. J. Window construction. 1,679,278; July 31.
Svanoe, Hans, Niagara Falls, assignor to The Ammonia Corporation, New York, N. Y. Temperature control in the synthetic production of ammonia and the like. 1,678,964; July 31.
Swan, Donald, Grosse Ile, Mich. Golf club. 1,678,750; July 31.
Swanberg, Julius, assignor to Swanberg Manufacturing Company, Chicago, Ill. Pencil. 1,678,656; July 31.
Swanberg Mfg. Co. (See Johnson, Charles J., assignor.)
Swanberg Manufacturing Company. (See Swanberg, Julius, assignor.)
Swartz, Ira T., assignor, by mesne assignments, to I. T. Swartz, trustee, Indianapolis, Ind. Charge-forming device. 1,679,279; July 31.
Swartz, Ira T., trustee. (See Swartz, Ira T., assignor.)
Sweet, Andrew T., assignor of one-fourth to W. G. Rice, and one fourth to H. Gundlach, Houghton, Mich., and one-tenth to P. B. Woodworth, Chicago, Ill. Metallurgical separator. 1,678,884; July 31.
Sweet, Burton W., assignor to The Van Dorn Electric Tool Company, Cleveland, Ohio. Screw driver. 1,679,185; July 31.
Switzer, Henry W., Hamilton, Ontario, Canada, assignor to W. H. Helmbach, Snyder, N. Y. Wrench. 1,678,793; July 31.
Syntron Company. (See Fox, Harold E., assignor.)
Szücs, Josef, Vienna, Austria, assignor to Montan- und Industrialwerke vormals Joh. Dav. Starck, Prague, Czechoslovakia. Producing citric acid by means of fermentation. 1,679,186; July 31.
Tackaberry, Robert D., Lewiston, Me. Guider. 1,678,925; July 31.
Talley, Gus E., assignor of one-half to W. A. Bennett, Phoenix, Ariz. Cotton gin. 1,678,794; July 31.
Taplin, Bruce. (See Moulden, J. C., and Taplin.)
Taylor, Paul H., Wakefield, Mass. Piano. 1,679,187; July 31.
Tennhardt, Elsa, New York, N. Y., assignor to E. & J. Bass, Inc. Frame for trays or the like. Des. 75,937; July 31.
Tennhardt, Elsa, New York, N. Y., assignor to E. & J. Bass, Inc. Frame for trays or the like. Des. 75,938; July 31.
Tennhardt, Elsa, New York, N. Y., assignor to E. & J. Bass, Inc. Dish or article of analogous nature. Des. 75,939; July 31.
Tenow, Olof A. A., Chicago, Ill., assignor of one-half to J. P. Seeburg. Thread-cutting tap. 1,679,234; July 31.
Terry, Albert N. (See Pieters, Ray G., assignor.)
Tetens, Oskar, Oerlinghausen-Lippe, assignor to the firm Record Cement-Industrie G. m. b. H., Frankfort-on-the-Main, Germany. Distilling oil shale and providing raw material suitable for the manufacture of hydraulic cement. 1,678,751; July 31.
Texas Company, The. (See Hadaway, William S., jr., assignor.)
Thomas, Horace T., Lansing, Mich. Side guard for motor vehicles. 1,678,657; July 31.
Thomas, Irvin G., Mansfield, Ohio, assignor to Westinghouse Electric & Manufacturing Company. Thermostatically-controlled heating unit. 1,678,885; July 31.
Thomas, Ivor D., Palmyra, assignor to The Wellman-Seaver-Morgan Company, Cleveland, Ohio. Door-extractor-operating mechanism. 1,679,188; July 31.
Thomas, Miley W., and P. H. Hamilton, assignors to The Sands Manufacturing Company, Cleveland, Ohio. Control mechanism. 1,678,658; July 31.
Thomas, Minifred D., Chicago, Ill. Bed. 1,678,795; July 31.
Thompson, Fuller W., Arcadia, Calif. Ventilated garment. 1,679,102; July 31.
Thompson, Harry E., assignor to Universal Cooler Corporation, Detroit, Mich. Valve construction. 1,679,235; July 31.
Thompson, Herbert S., Peekskill, N. Y. Apparatus for the recovery of solvents from coated fabrics. 1,678,886; July 31.
Thomson, William S., assignor to The Tobrin Tool Company, Plantsville, Conn. Electrically-driven circular saw. 1,679,103; July 31.
Thorne, William L., New York, N. Y. Hosiery. 1,678,716; July 31.
Thrower, Marion R., assignor to D. R. Parrott, Tuckerman, Ark. Changeable sign. 1,678,684; July 31.
Tilden, Galen, Ames, Iowa. Perpetual calendar. 1,678,834; July 31.
Tillmanns, Carl W., Bridgeport, Conn., assignor to Remington Arms Company, Inc. Knife. Des. 75,940; July 31.
Timken Roller Bearing Company, The. (See Stringberg, Richard, assignor.)
Tinker, Herbert W. (See Hansen, F. D., and Tinker.)
Tobacco By-Products and Chemical Corporation. (See Cox, Edwin, assignor.)
Tobler, Richard. (See Staudinger, H., Tobler, Stocker, Müller, and Bucher.)
Tobrin Tool Company, The. (See Thomson, William S., assignor.)
Toncray, Millard H. (See Fekete, S. I., and Toncray.)
Toomey, John F., New York, N. Y., assignor to American Telephone and Telegraph Company. Telephone signal system. 1,678,685; July 31.
Towns, Eugene S., Pharr, Tex. Cotton regulator. 1,679,280; July 31.
Trautman, Frank J., Fort Wayne, Ind. Beverage pump. 1,679,104; July 31.
Trumpler, William E., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Balancing machine. 1,678,887; July 31.

Trumpler, William E., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Balancing machine. 1,678,888; July 31.
Tryco Products, Inc. (See Holmes, Frederick M., assignor.)
Tully, George L., and S. Lacasse, assignors to American Optical Company, Southbridge, Mass. Goggles. 1,679,105; July 31.
Tyler, W. S., Company, The. (See Helman, August E., assignor.)
Union Switch & Signal Company, The. (See Beall, Charles R., assignor.)
Union Switch & Signal Company, The. (See Gilson, R. M., and Skene, assignors.)
Union Switch & Signal Company, The. (See Snavely, Clarence S., assignor.)
Union Switch & Signal Company, The. (See Zierdt, Conrad H., assignor.)
Unique Lamp & Casting Company. (See Larsen, Alfred E., assignor.)
United Filters Corporation. (See Genter, Albert L., assignor.)
United Shoe Machinery Corporation. (See Fausse, Joseph, assignor.)
United Shoe Machinery Corporation. (See Furber, Frederick M., assignor.)
United Shoe Machinery Corporation. (See Glass, Perley R., assignor.)
United Shoe Machinery Corporation. (See Pym, Arthur F., assignor.)
United Shoe Machinery Corporation. (See Rumney, Fred A., assignor.)
United Shoe Machinery Corporation. (See Sabin, Ernest E., assignor.)
United Shoe Machinery Corporation. (See Shaw Wesley J., assignor.)
Universal Cooler Corporation. (See Thompson, Harry E., assignor.)
Universal Oil Products Company. (See Egloff, Gustav, assignor.)
Universal Oil Products Company. (See Huff, Lyman C., assignor.)
Universal Pictures Corporation. (See Pourfillet, G., and Giovannoni, assignors.)
Useful Products Company. (See Kingman, Russell B., assignor.)
Van Ackerson, Joseph, assignor to The Koppers Company, Pittsburgh, Pa. Coking retort oven. 1,678,803; July 31.
Van Brimer, George, H. A. Magrath, J. Klancher, and B. Soots, Pueblo, Colo. Safety reverse ratchet brake. 1,679,281; July 31.
Van Bronk, Otto, assignor to Gesellschaft für Drahtlose Telegraphie m. b. H. Berlin, Germany. Frequency multiplier. 1,678,965; July 31.
Van Dorn Electric Tool Company, The. (See Connell, Edwin L., assignor.)
Van Dorn Electric Tool Company, The. (See Schneider, F., and Connell, assignors.)
Van Dorn Electric Tool Company, The. (See Sweet, Burton W., assignor.)
Van Gelderen, Frederik M., Enschede, Netherlands. Insulating cap for the joints of electrical conductors. 1,678,752; July 31.
Vaughan, Victor G., East Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Thermostatic material. 1,678,889; July 31.
Vicars, Thomas G. (See Wilson, J. L., and Vicars.)
Victor Talking Machine Company. (See Murray, Henry H., assignor.)
Victorius, A. V., & Company. (See Pickell, Thetus D., assignor.)
Viet, Paul, Billancourt, France. Automatic starting device for internal-combustion engines. 1,678,753; July 31.
Vitrolite Company, The. (See Sohn, F., Marmion, and Gilbian, assignors.)
Vivarttas, William O., assignor to Mattison Machine Works, Rockford, Ill. Chip breaker for molding machines and the like. 1,678,835; July 31.
Voight, George F., Oakland, Calif., assignor to Economy Products Corporation. Wall construction. 1,679,282; July 31.
Voit, W. J., Rubber Co. (See Voit, William J., assignor.)
Voit, William J., assignor to W. J. Voit Rubber Co., Los Angeles, Calif. Valve construction for inflatable articles. Re17,057; July 31.
Wadell, Albert H., Newark, N. J. Micrometer attachment for adjusting tools. 1,679,189; July 31.
Walker, William, Sawtelle, Calif. Combination cigarette holder and pipe. 1,678,754; July 31.
Wall, Katherine, Omaha, Nebr. Marcelling and permanent-wave irons. 1,678,890; July 31.
Wallace, Benjamin F., Brooklyn, N. Y. Waterproof heat insulation and making same. 1,678,659; July 31.
Wallenthin, Walfrid. (See Eksergian, E., and Wallenthin.)
Walsh, Arthur E., Chicago, Ill. Hair waver. 1,678,891; July 31.
Walton, Frederick S., and J. McKenzie, Smithers, British Columbia, Canada. Cattle guard. 1,678,926; July 31.
Waterbury Tool Company, The. (See Fowler, Harry P., assignor.)
Weatherhead, Albert J. jr., Cleveland, Ohio. Drain cock or valve. 1,678,927. July 31.
Weber, Hermann, Spiez, Switzerland. Rotary compressor. 1,678,660; July 31.
Weinstein, Alfred, Hamburg, Germany. Sound-producing device. 1,679,106; July 31.
Wellman-Seaver-Morgan Company, The. (See Thomas, Ivor D., assignor.)
Wells, Louie F., and O. C. Whiting, Bryant, Okla. Valve for oil pumps. 1,679,288; July 31.
Wessborg, Eric S., Saginaw, Mich. Child's wagon. 1,678,836; July 31.
Westbrook, Robert G., Birmingham, Ala. Waste trap. 1,679,190; July 31.
Westbrook, Robert G., Birmingham, Ala. Reversible waste trap. 1,679,191; July 31.
Western Electric Company. (See Knaus, Peter J., assignor.)
Western Electric Company. (See Selvig, John N., assignor.)
Western Electric Company. (See Smythe, Edwin H., assignor.)
Western Electric Company. (See Snell, Harry S., assignor.)
Western Metal Specialty Co. (See Olsen, Julius C., assignor.)
Western Union Telegraph Company, The. (See Drake, Herbert W., assignor.)
Western Wheeled Scraper Company. (See Benbow, James D., assignor.)
Westinghouse Air Brake Company, The. (See Farmer, Clyde C., assignor.)
Westinghouse Air Brake Company, The. (See Leeper, J. A., and Strong, assignors.)
Westinghouse Air Brake Company, The. (See Widmyer, Robert G., assignor.)
Westinghouse Electric & Manufacturing Company. (See Aalborg, Christian, assignor.)
Westinghouse Electric & Manufacturing Company. See Aiken, Joseph E., assignor.)
Westinghouse Electric & Manufacturing Company. (See Allen, Robert C., assignor.)
Westinghouse Electric & Manufacturing Company. (See Arnold, Edwin E., assignor.)
Westinghouse Electric & Manufacturing Company. (See Coates, W. A., and Davies, assignor.)
Westinghouse Electric & Manufacturing Company. (See Coates, W. A., Gittins, and Davies, assignors.)
Westinghouse Electric & Manufacturing Company. (See Ehrenfeld, Ralph, assignor.)
Westinghouse Electric & Manufacturing Company. (See Forshee, Frank F., assignor.)
Westinghouse Electric & Manufacturing Company. (See Hall, A. J., and Mardis, assignors.)
Westinghouse Electric & Manufacturing Company. (See Hodgkins, Charles H., assignor.)
Westinghouse Electric & Manufacturing Company. (See Jungk, Herbert G., assignor.)
Westinghouse Electric & Manufacturing Company. (See Kalkner, Friedrich, assignor.)
Westinghouse Electric & Manufacturing Company. (See Kendig, Julian H., assignor.)
Westinghouse Electric & Manufacturing Company. (See Menzies, William E., assignor.)
Westinghouse Electric & Manufacturing Company. (See Sandin, Maurits J., assignor.)
Westinghouse Electric & Manufacturing Company. (See Selah, Howard A., assignor.)
Westinghouse Electric & Manufacturing Company. (See Steiner, L., and Gutmann, assignor.)
Westinghouse Electric & Manufacturing Company. (See Thomas, Irvin G., assignor.)
Westinghouse Electric & Manufacturing Company. (See Trumpler, William E., assignor.)
Westinghouse Electric & Manufacturing Company. (See Vaughan, Victor G., assignor.)
Westinghouse Electric & Manufacturing Company. (See Lincoln, Rollo B., assignor.)
Westinghouse Electric & Manufacturing Company. (See Monromtseff, Ilia E., assignor.)
Westly, Jens, Cristiansand, assignor to Det Norske Aktieselskab for Elektrokemisk Industri of Norway, Oslo, Norway. Production of self-baking electrodes. 1,679,284; July 31.
Wheeland, Jesse S., San Francisco, Calif. Radio wave switch. 1,679,192; July 31.
Whipple, Arden D., Oakland, Calif. Valve cap. 1,678,837; July 31.
Whisenant, John W., Los Gatos, Calif. Illuminated sign. 1,678,755; July 31.
White, William E., assignor to Kalman Steel Company, Chicago, Ill. Caging. 1,679,193; July 31.
Whitehead, Thomas C., Detroit, Mich. Electrical mercury control for refrigeration pumps. 1,678,661; July 31.
Whiting & Davis Company. (See Whiting, Charles A., assignor.)
Whiting, Charles A., Franklin, Mass., assignor to Whiting & Davis Company. Producing ornamental mesh fabric. 1,678,966; July 31.
Whitling, Oliver C. (See Wells, L. F., and Whitling.)
Widmann, Eugene A., Brooklyn, N. Y., and F. D. Lewis, West Orange, N. J., assignors, by mesne assignments, to Pathe Phonograph & Radio Corporation. Radio receiving apparatus. 1,679,194; July 31.

Widmer, Gustav. (See Gams, A., and Widmer.)
Widmyer, Robert G., Irwin, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Signal device. 1,679,011; July 31.
Wiegand, Edwin L., Dormont Borough, Pa. Heavy-duty electric heater. 1,678,838; July 31.
Wiegand, Henry J., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Resistance-control device. 1,678,892; July 31.
Wildman Mfg. Co. (See Howie, Kenneth, assignor.)
Wilkins, William, Oakland, Calif. Sanitary garbage can. 1,678,839; July 31.
Wilkinson, Thomas H., Cranford, N. J., assignor to G. H. Frommann, Concord, N. Y. Display device. 1,678,967; July 31.
Williams, Carl, San Francisco, Calif. Automobile side bumper. 1,679,195; July 31.
Williams, Henry B. (See Ladd, J. W., Williams, and Jordan,)
Williams, Henry B., assignor to John W. Ladd Co., Detroit, Mich. Bottle-washing machine. 1,678,796; July 31.
Williams Oil-O-Matic Heating Corporation. (See Williams, Walter W., assignor.)
Williams, Robert T., Los Angeles, Calif. Variable condenser. 1,678,840; July 31.
Williams, Walter W., assignor to Williams Oil-O-Matic Heating Corporation, Bloomington, Ill. Oil-burner control. 1,679,331; July 31.
Wilson, Charles E., Anderson, Ind., assignor, by mesne assignments, to Delco-Remy Corporation, Dayton, Ohio. Switch. 1,678,893; July 31.
Wilson, Edgarton R., Peterboro, Ontario, Canada, and S. S. Shears, Brooklyn, N. Y.; said Wilson assignor to said Shears. Vehicle spring. 1,678,662; July 31.
Wilson, Edward, assignor to National Pump and Compressor Company, St. Louis, Mo. Valve. 1,679,012; July 31.
Wilson, James L., and T. G. Vicars, Pineville, Ky. Pipe patch. 1,679,236; July 31.
Wilson, Leon T., East Orange, N. J., assignor to American Telephone and Telegraph Company. Insulator. 1,678,663; July 31.
Wilson Manufacturing Company. (See Penta, Patrick W., assignor.)
Wine-Dip Company, The. (See Fiorita, Anthony R., assignor.)
Wineman, Wade H., Chicago, Ill., assignor to Sullivan Machinery Company, Boston, Mass. Forging machine. 1,679,125; July 31.
Wineman, Wade H., Michigan City, Ind., assignor to Sullivan Machinery Company. Loading mechanism. 1,679,143; July 31.
Wineman, Wade H., Michigan City, Ind., assignor to Sullivan Machinery Company. Furnace. 1,679,145; July 31.
Winning, Robert K., Wauwatosa, assignor to Clum Manufacturing Company, Milwaukee, Wis. Light-dimming switch. 1,678,686; July 31.
Winthrop Chemical Company. (See Schranz, K., and Lutter, assignors.)
Winzer, Charles B., Balham, London, England. Apparatus for carbonization. 1,678,687; July 31.
Wireless Specialty Apparatus Company. (See Pickard, Greenleaf W., assignor.)
Wiseman, Albenus B., Grand Rapids, Mich. Electrical connecter. 1,679,067; July 31.
Woldt, Henry, Brillion, Wis. Hand truck. 1,679,107; July 31.
Wood, Henry A. W., assignor to Wood Newspaper Machinery Corporation, New York, N. Y. Paper-roll-changing plant. 1,678,894; July 31.
Wood, Henry A. W., assignor to Wood Newspaper Machinery Corporation, New York, N. Y. Throw-out mechanism for printing-press delivery. 1,678,895; July 31.
Wood, Henry A. W., assignor to Wood Newspaper Machinery Corporation, New York, N. Y. Knife box for cutting cylinders. 1,678,896; July 31.
Wood Newspaper Machinery Corporation. (See Wood, Henry A. W., assignor.)
Wood, William D., San Francisco, Calif. Switching device. 1,679,109; July 31.
Wood, William G., assignor to American Woodlite Corporation, San Francisco, Calif. Condensing reflector. 1,679,108; July 31.
Woods, Arthur R. T., London, England. Apparatus for launching, lowering, and raising boats. 1,678,928; July 31.
Woodworth, Philip B., et al. (See Sweet, Andrew T., assignor.)
Wright, Henry F., Huntington, Calif. Gauge and recorder. 1,679,285; July 31.
Wyman, Charles W., Claremont, N. H., assignor to Sullivan Machinery Company. Electrical apparatus. 1,679,142; July 31.
Yale & Towne Manufacturing Company, The. (See Ledin, Charles, assignor.)
Yancey, Stirling R. (See Schauman, K. O., Yancey, and Milsud.)
Yardley, Charles F., Larchmont, N. Y. Rail anchor. 1,678,664; July 31.
Yawman & Erbe Manufacturing Co. (See Duffield, David W., assignor.)
Yeomans, Lucien I., Chicago, Ill., assignor to A. O. Smith Corporation, Milwaukee, Wis. Low-conductivity mold for centrifugal casting machines. 1,678,929; July 31.
Yokel, Frank, Cleveland, Ohio, assignor to Markel Electric Products, Inc., Buffalo, N. Y. Ceiling-plate electric fixture. Des. 75,941; July 31.
Yokel, Frank, Cleveland, Ohio, assignor to Markel Electric Products, Inc., Buffalo, N. Y. Fixture for ceiling lights. Des. 75,942; July 31.
Yokel, Frank, Cleveland, Ohio, assignor to Markel Electric Products, Inc., Buffalo, N. Y. Chandelier. Des. 75,943; July 31.
Yokel, Frank, Cleveland, Ohio, assignor to Markel Electric Products, Inc., Buffalo, N. Y. Fixture for ceiling lights. Des. 75,944; July 31.
Yokel, Frank, Cleveland, Ohio, assignor to Markel Electric Products, Inc., Buffalo, N. Y. Chandelier plate. Des. 75,945; July 31.
Yokel, Frank, Cleveland, Ohio, assignor to Markel Electric Products, Inc., Buffalo, N. Y. Chandelier. Des. 75,946; July 31.
Yokel, Frank, Cleveland, Ohio, assignor to Markel Electric Products, Inc., Buffalo, N. Y. Wall-bracket electric fixture. Des. 75,947; July 31.
Young, John. (See Replogle, Harry H., assignor.)
Young, Samuel, San Francisco, Calif. Smoking stand. Des. 75,948; July 31.
Young, Samuel, San Francisco, Calif. Smoking stand. Des. 75,949; July 31.
Zaiger, Louis, Lynn, Mass. Windshield wiper. 1,678,688; July 31.
Zaikowsky, Wladimir M., Pasadena, Calif., assignor to Standard Oil Development Company. Internal-combustion engine. 1,679,286; July 31.
Zieburtz, Henry C., Cleveland Heights, Ohio. Clothespin. 1,679,196; July 31.
Zierdt, Conrad H., Penn Township, Allegheny County, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,679,013; July 31.
Zimmerman, William J., Knoxville, Tenn. Cloth pattern. 1,678,756; July 31.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 31ST DAY OF JULY, 1928.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Account-finding machine. E. L. Reller and V. R. A. Stroh. 1,679,008; July 31.
Accumulator, Adding and subtracting. N. W. Perkins and E. J. Ens. 1,679,265; July 31.
Acid by means of fermentation, Producing citric. J. Szücs. 1,679,186; July 31.
Acid from sugar solutions, Removing hydrochloric. F. Koch. 1,678,819; July 31.
Acid mixtures in steel drums, Storage and transportation of. J. H. Gravell. 1,678,775; July 31.
Acoustic device. E. H. Smythe. 1,678,833; July 31.
Advertising projecting and display apparatus, Automatic. A. S. Knott. 1,679,311; July 31.
Aeroplane with three centers of propulsion arranged in a triangle. S. F. W. Koolhoven. 1,679,038; July 31.
Agricultural implement. L. L. Keller. 1,678,910; July 31.
Aircraft and the like, Fitting for. C. W. Hall. 1,678,640; July 31.
Aircraft with rotative wings. J. de la Cierva. 1,678,935; July 31.
Air cushion. F. Bronberger. 1,678,972; July 31.
Alkali-metal hydroxides, Making. L. P. Curtin. 1,678,767; July 31.
Amusement device, Spring-shoe. E. Menefee. 1,679,046; July 31.
Anchor, Rail. C. W. Baldridge. 1,679,112; July 31.
Anchor, Rail. C. F. Yardley. 1,678,664; July 31.
Annealing furnace, Electric bright-. W. Rohn. 1,678,875; July 31.
Antenna. H. Csanyi. 1,679,240; July 31.
Antirattler. P. J. Fitzgerald. 1,679,244; July 31.
Antiskid device for automobiles. I. Rolka. 1,679,270; July 31
Antislip device. J. B. Locker. 1,679,314; July 31.
Arch for furnaces, Reflector. J. B. Kinahan. 1,678,816; July 31.
Arsenic compounds, Preparation of. A. Binz and C. Räth. 1,678,760; July 31.
Atomizer. T. A. De Vilbiss. Des. 75,899; July 31.
Atomizer. H. H. Heller. 1,679,305; July 31.
Atomizer support. T. A. De Vilbiss. Des. 75,900; July 31.
Atomizer top. T. A. De Vilbiss. Des. 75,901–2; July 31.
Automobile abstract. C. Bird. 1,678,666; July 31.
Automobiles, Body for. S. I. Fekete and M. H. Toncray. 1,679,025; July 31.
Aviator's manifolding log. C. W. Giller. 1,678,981; July 31.
Axle gauge. R. P. Bernhardt and V. D. Black, jr. 1,678,761; July 31.
Bag and hanger, Garment. M. Luery. 1,679,091; July 31.
Baking device. J. F. Connell. 1,678,690; July 31.
Baking food products, Apparatus for. G. E. Page. 1,679,052; July 31.
Balancing machine. W. E. Trumpler. 1,678,887–8; July 31.
Bandage, Facial. O. L. Arlen. 1,678,970; July 31.
Bank, Portable savings. G. Miller. 1,678,646; July 31.
Bars and spring hangers by electric welding, Production of integral side. C. S. Smith. 1,678,923; July 31.
Basket-making machine. E. Craig. 1,678,848; July 31.
Bath and shower combination. P. Mueller. 1,678,703; July 31.
Bathing pool, Artificial-surf. W. Fisch. 1,679,156; July 31.
Beads and nail spacers, Making corner. C. E. Keas. 1,679,248; July 31.
Bearing, Center. J. F. O'Connor. 1,678,871; July 31.
Bearing, Well-drill pitman. W. H. Fenneman. 1,679,077; July 31.
Beating engine. L. Schlick. 1,679,056–9; July 31.
Bed. M. D. Thomas. 1,678,795; July 31.
Bedstead corner lock. H. Richardson. 1,678,708; July 31.
Belt coupling. P. Fruhof. 1,679,303; July 31.
Belt tightener. H. C. McEwen. 1,678,645; July 31.
Blade holder. H. J. Galsman. 1,679,329; July 31.
Block: *See*—
Crown block.
Block material, Apparatus for storing and cutting. A. F. Pinkel and M. J. Brunner. 1,679,004; July 31.
Board: *See*—
Edge-protected board.
Body formed of separate fibers. H. B. Lindsay. 1,679,251; July 31.
Bobbin skewer. H. D. Colman. 1,678,806; July 31.
Boiler composition and making same. H. Karplus and W. Bachmann. 1,679,037; July 31.
Boiler furnace. C. Schillinger. 1,678,827; July 31.
Bolt: *See*—
Spring bolt. Stay bolt.
Book. J. A. Dykeman. 1,678,673; July 31.
Book carrier. I. Sidon. 1,679,183; July 31.
Boot and shoe. L. S. Macdonald and J. E. Small. 1,678,739; July 31.
Boot-tree or last. W. S. Ashton. 1,679,016; July 31.
Boot-tree or last. C. Soderlund. 1,679,330; July 31.
Bottle. H. A. Dupiech. Des. 75,903; July 31.
Bottle lock, Milk-. D. S. Halloway. 1,679,080; July 31.
Bottle-washing machine. J. W. Ladd, H. B. Williams, and C. C. Jordan. 1,678,781; July 31.
Bottle-washing machine. H. B. Williams. 1,678,796; July 31.
Bottle washing, rinsing, and sterilizing apparatus. J. W. Ladd and C. C. Jordan. 1,678,780; July 31.
Bowling pin. J. R. Carmichael. 1,679,072; July 31.
Box. W. M. Freedman. 1,679,121; July 31.
Box. F. J. Schleicher. 1,678,958; July 31.
Box for cutting cylinders, Knife. H. A. W. Wood. 1,678,896; July 31.
Box or similar article. L. W. Rice. Des. 75,930; July 31.
Box or similar article, Jewelry. J. S. McKeeby. Des. 75,926; July 31.
Bracelet clasp. A. L. Newman. 1,678,707; July 31.
Bracket for drapery pole or rod. G. Madvig. Des. 75,928–5; July 31.
Brake: *See*—
Ratchet brake.
Brake device. A. Domenico. 1,678,692; July 31.
Brake drum and liner. F. D. Hansen and H. W. Tinker. 1,678,777; July 31.
Brake mechanism. J. W. Smith. 1,678,682; July 31.
Brake mechanism. Transmission. N. A. Christensen. 1,679,154; July 31.
Brake-operating means, Hydraulic. A. Moser. 1,678,949; July 31.
Brake supporting and operating mechanism. A. S. Fishel. 1,678,696; July 31.
Brake systems, Attachment for hydraulic. M. H. Massuere. 1,678,677; July 31.
Brazing machine, Electric. A. T. Koehler. 1,679,088; July 31.
Brick Side arch. E. M. Carroll. Re17,052; July 31.
Brooder. W. C. Sanctuary and W. A. Jones. 1,679,271; July 31.
Brooder for chickens. V. R. Rostek. 1679,009; July 31.
Brush, Bottle. B. B. Jackson. 1,678,943; July 31.
Brush construction. F. Nilsson. 1,678,950; July 31.
Brush or similar article, Lather. A. Albright, jr. Des. 75,892; July 31.
Buckle, Slide. F. Hirsh. 1,679,306; July 31.
Building blocks. D. F. Shope. 1,678,882; July 31.
Building construction, Concrete. S. Lake. 1,679,040; July 31.
Bumper. F. C. Robie. 1,678,916; July 31.
Bumper, Automobile side. C. Williams. 1,679,195; July 31.
Bumper tip. R. B. Fageol. 1,678,853; July 31.
Burner: *See*—
Gas burner. Vapor burner.
Hydrocarbon burner.
Burner. C. Fischer. 1,679,300; July 31.
Burner. H. McKinnie. 1,678,996; July 31.
Burner control, Oil-. W. W. Williams. 1,679,331; July 31.
Burrs from tubes, Mechanism for removing. M. H. Sussmann. 1,678,963; July 31.
Bus-body-frame construction. E. J. Hall. 1,678,811; July 31.
Cabinet, Food-preserving. J. H. Johnson. 1,678,730; July 31.
Caging. W. E. White. 1,679,193; July 31.
Calendar, Perpetual. G. Tilden. 1,678,834; July 31.
Camera view finder. A. L. V. C. Debrie. 1,678,902; July 31.
Cameras, Exposure-indicating device for. J. H. Hammond. 1,678,729; July 31.
Can: *See*—
Garbage can.
Candlestick. A. E. Hobson. Des. 75,913; July 31.
Car coupler. E. George, jr. 1,678,774; July 31.

Car, Dump. W. L. Burner and O. E. Kantenwein. 1,678,765; July 31.
Car, Electric. J. B. Allen and E. O. Hamilton. 1,679,068; July 31.
Car ventilator, Closed-. L. R. Smith. 1,678,748; July 31.
Cars, Fluid-pressure-operated mechanism for dump. J. D. Benbow. 1,678,900; July 31.
Carbonization, Apparatus for. C. B. Winzer. 1,678,687; July 31.
Carrier: *See*—
Book carrier. Dispatch carrier.
Case: *See*—
Douche case. Key case.
Casing for footballs, basket balls, and the like. M. Scudder. 1,678,830; July 31.
Casing, Tape. N. H. Shillman. 1,679,178; July 31.
Casting pipe. H. Burchartz. 1,678,633; July 31.
Casting, process of and apparatus for centrifugal. J. Holthaus. 1,678,641; July 31.
Castings and the like, Manufacture of cylindrical. A. J. Hongland. 1,679,217; July 31.
Castings, Production of iron. K. Sipp, Mannheim. 1,678,655; July 31.
Ceiling fixture, Electric. A. E. Larsen. Des. 75920–1; July 31.
Ceiling-plate electric fixture. F. Yokel. Des. 75,941; July 31.
Chain, Cutter. M. P. Holmes. 1,679,135; July 31.
Chair: *See*—
Folding chair. Tilting chair.
Chair. B. W. McLean. Des. 75,927; July 31.
Chamber, Combination steam. S. C. Markatos. 1,679,253; July 31.
Chandelier. F. Yokel. Des. 75,943; July 31.
Chandelier, F. Yokel. Des. 75,946; July 31.
Chandelier or similar article. J. A. Boehringer. Des. 75,896; July 31.
Chandelier plate. F. Yokel. Des. 75,945; July 31.
Channeler mechanism. H. H. Mercer. 1,679,136; July 31.
Charge-forming device. I. T. Swartz. 1,679,279. July 31.
Chemical reactions between gases, or vapors, or gases and vapors, Apparatus for carrying out. H. Harter. 1,678,778; July 31.
Choke piece. Detachable. R. W. Miller. 1,679,048; July 31.
Chuck. T. J. Fegley and G. O. Leopold. 1,679,299; July 31.
Chuck. F. Schneider and E. L. Connell. 1,679,175; July 31.
Circuit-continuing device. H. A. Douglass. 1,679,335; July 31.
Circuit-control mechanism for internal-combustion engines. L. O. French. 1,679,159; July 31.
Circulating device for refrigerator cars, Air-. F. E. Greene. 1,679,124; July 31.
Circulator for furnaces, Air. R. W. Menk. 1,679,047; July 31.
Circulator for stoves, Air. W. G. Hutchison. 1,679,307; July 31.
Clamp: *See*—
Hose clamp. Rod clamp.
Piston clamp.
Clamp for breathing bags. Spring. A. B. Dräger. 1,679115; July 31.
Clasp: *See*—
Bracelet clasp.
Cleaner: *See*—
Rotary cleaner. Thread cleaner.
Cleaning apparatus, Window-. C. E. Mortlock. 1,679,323; July 31
Cleaning compound, Liquid. Y. Katayama. 1,678,815; July 31.
Cleansing means for rock drills. J. G. Graham. 1,679,131; July 31.
Clip: *See*—
Pen and pencil clip.
Clip for fastening metal laths. J. S. Raynor. 1,679,006; July 31.
Clock mounting, Motor. J. F. Mansfield. 1,678,990; July 31.
Cloth pattern. W. J. Zimmerman. 1,678,756; July 31.
Clothespin. H. C. Zieburtz. 1,679,196; July 31.
Clutch. G. W. Dunham. 1,678,638; July 31.
Coal, Method and apparatus for mining. E. C. Morgan 1,678,821; July 31.
Cock or valve, Drain. A. J. Weatherhead, jr. 1,678,927; July 31.
Coil or loop aerial, Closed tuned. G. W. Pickard. 1,679,095; July 31.
Coiling machine. T. W. Smith. 1,678,749; July 31.
Collar and hame, Combination. J. D. McMurry. 1,678,782; July 31.
Combing machine. J. W. Nasmith. 1,678,822; July 31.
Compressor, Air. J. R. Mitre. 1,679,226; July 31.
Compressor-controlling mechanism. L. A. Maxson. 1,679,133; July 31.
Compressor, Rotary. H. Weber. 1,678,660; July 31.
Computation, Method and apparatus for. W. Koenig, jr. 1,678,674; July 31.
Concentrator. W. A. Huelsdonk. 1,679,035; July 31.
Condenser, Variable. R. T. Williams; 1,678,840; July 31.
Connecter, Circuit. H. A. Douglas. 1,6779,333; July 31.
Container. W. S. Grant. 1,678,726; July 31.
Container. S. Schwartz. 1,679,273; July 31.
Container. F. A. Schwannecke. 1,678,960; July 31.
Container and tray, Combination card. D. W. Duffield. 1,678,671; July 31.
Container for leads. C. J. Johnson. 1,678,642; July 31.
Container, Key. D. Settle. 1,679,274; July 31.
Container, Silverware. F. Sternthal. 1,679,101; July 31.
Control apparatus. A. J. Hall and P. L. Mardis. 1,678,857; July 31.
Control apparatus, hydraulic resistance. L. J. Hull. 1,679,085; July 31.
Control mechanism. M. W. Thomas and P. H. Hamilton. 1,678,658; July 31.
Control system, Remote. E. F. Chandler. 1,678,634; July 31.
Controlling mechanism. O. H. Ludeman. 1,679,044; July 31.
Conveyers, Idler for belt. G. E. Mellin. 1,678,997; July 31.
Cooking of fibrous material, Method and apparatus for continuous. T. L. Dunbar. 1,679,336; July 31.
Cooling device, Milk-. H. J. Foster. 1,679,302; July 31.
Cooling system. F. D. Holdsworth. 1,679,144; July 31.
Cooling system for luternal-combustion engines. H. C. Mallory. 1,678,644; July 31.
Cooling tank. J. O. Carrey. 1,679,292; July 31.
Corner bead. E. H. Jones. 1,678,813; July 31.
Corset. J. J. Kispert. 1,678,818; July 31.
Cotton gin. G. E. Talley. 1,678,794; July 31.
Cotton regulator. E. S. Towns. 1,679,280; July 31.
Counterbalance for oven doors. F. F. Forshee. 1,678,855; July 31.
Coupler-release rigging. W. J. Regan. 1,678,786; July 31.
Coupling: *See*—
Belt coupling.
Cover for toilets. A Little. Des. 75,822; July 31.
Cover, Milk can. P. F. Rauen. 1,678,953; July 31.
Cover, Terminal. R. Ehornfeld. 1,678,852; July 31.
Cradle mounting, Flexible. H. G. Jungk. 1,678,860; July 31.
Crown block. W. S. Evans. 1,679,327; July 31.
Crystallization apparatus. W. Seidel. 1,679,055; July 31.
Cue, Billiard. J. R. Carmichael. 1,679,073; July 31.
Cup: *See*—
Grease cup.
Cupola. A. E. Bailliot. 1,678,899; July 31.
Cushion: *See*—
Air cushion.
Cut-off device for fuel-oil burners, Automatic. D. R. Martin. 1,679,163; July 31.
Cutter: *See*—
Pipe cutter.
Cutter. O. H. Caldwell. 1,679,022; July 31.
Cutter head. L. T. Medholdt. 1,678,820; July 31.
Cutting machine, Cloth. H. Maimin. 1,678,980; July 31.
Cutting machine, Pipe-seat-. L. D. Smith. 1,678,712; July 31.
Cylinder head and packing. B. P. Joyce. 1,678,946; July 31.
Cylinder support, Turbine-. R. C. Allen. 1,678,968; July 31.
Damper, Rebound. W. C. Starkey. 1,679,179; July 31.
Dental bridge. C. S. Kile. 1,678,779; July 31.
Dephlegmator, Circulating. D. Pyzel. 1,678,823; July 31.
Detector: *See*—
Metal detector.
Detector apparatus. A. A. Kent. 1,679,310; July 31.
Developer, Body-punch resistance. E. H. Richards and F. A. Richards. 1,679,174; July 31.
Differential driving arrangement. A. N. Shahpar. 1,679,098; July 31.
Digging machine, Marl-. A. J. Elkins. 1,679,118; July 31.
Disconnecting switch. R. R. Stevenson. 1,679,184; July 31.
Dish or article of analogous nature. E. Tennhardt. Des. 75,939; July 31.
Dish support, Soap-. O. G. Hitchcock. 1,679,032; July 31.
Dishwasher. G. Smith. 1,679,062; July 31.
Dispatch carrier, Pneumatic-. D. J. MacMillan. 1,679,223; July 31.
Dispensing apparatus. C. I. Anderson. 1,678,628; July 31.
Dispensing device. H. A. Birnbaum. 1,679,237; July 31.
Display apparatus, Vegetable and fruit. J. T. Henley. 1,679,031; July 31.
Display device. T. H. Wilkinson. 1,678,967; July 31.
Display device for candy boxes or the like, Picture-. W. C. Carlson. 1,678,722; July 31.
Display stand. A. L. Hansen. 1,679,082; July 31.
Distilling oil shale and providing a raw material suitable for the manufacture of hydraulic cement. O. Tetens. 1,678,751; July 31.
Distributor, Mortar. G. D. Reagan. 1,679,007; July 31.
Door. W. Pattinson. 1,678,952; July 31.
Doorcheck. R. B. Kingman. 1,678,817; July 31.
Door closer. W. F. Moore. 1,678,701; July 31.
Door-extractor-operating mechanism. I. D. Thomas. 1,679,188; July 31.
Door, Fireproof elevator. P. R. Saurer. 1,678,052; July 31.
Door-handling mechanism. J. S. Nefczesauskas. 1,679,227; July 31.

Door lock. G. N. Mason. 1,678,994; July 31.
Door-operating apparatus, Coke-oven-. H. Koppers. 1,678,864; July 31.
Douche case. G. S. Appling. 1,679,146; July 31.
Dough-kneading machine for the production of dough portions ready for baking. R. Scholz. 1,678,747; July 31.
Drier: *See*—
Film drier. Heat drier.
Drill: *See*—
Rock drill.
Drilling apparatus. F. A. Halleck. 1,679,137; July 31.
Drilling apparatus, Well-. W. Sheldon. 1,678,881; July 31.
Drilling machine. C. Gabrielson and A. Meldrum. 1,679,027; July 31.
Drilling mechanism. E. G. Gartin. 1,679,139; July 31.
Drilling mechanism. E. G. Gartin. 1,679,141; July 31.
Drilling mechanism. J. G. Graham. 1,679,140; July 31.
Drum and stand, Fillet. H. J. Stevenson. 1,679,065; July 31.
Drying coal and like fuels. H. Fleissner. 1,679,078; July 31.
Dye composition, Edible-. H. H. Replogle. 1,678,648; July 31.
Dyestuff, Indigold. H. Staudinger, R. Tobler, R. Stocker, J. Müller, and A. Bucher. 1,679,277; July 31.
Edge-protected board. J. Schumacher. 1,678,959; July 31.
Edging machine. A. E. Maynard. 1,679,224; July 31.
Electric heater, Heavy-duty. E. L. Wiegand. 1,678,838; July 31.
Electric machine, Totally-inclosed. L. Steiner and V. Gutmann. 1,678,883; July 31.
Electric motor. R. S. McLeod, G. E. Mason, and W. Stansfield. 1,678,912; July 31.
Electric switch. H. A. Douglas. 1,679,334; July 31.
Electric switch. H. E. Norviel. 1,678,951; July 31.
Electric system. J. L. Creveling. 1,678,808; July 31.
Electrical apparatus. M. Alden. 1,678,717; July 31.
Electrical apparatus. C. W. Wyman. 1,679,142; July 31.
Electrical connecter. A. B. Wiseman. 1,679,067; July 31.
Electrodes, Production of self-baking. J. Westly. 1,679,284; July 31.
Electrodes, Welding. N. B. Pilling and J. G. Schoener. 1,679,002; July 31.
Elevator. H. V. McCormick. 1,679,092; July 31.
Engine: *See*—
Heating engine.
Internal-combustion engine.

Molding compound. H. S. Snell. 1,678,713; July 31.
Molding machines and the like, Chip breaker for. W. O. Vivarttas. 1,678,835; July 31.
Motor: *See*—
Electric motor. Fluid-pressure motor.
Motor for operating doors or the like, Pressure-actuated. P. R. Forman. 1,679,212; July 31.
Motor mounting. H. H. Murray. 1,678,999; July 31.
Musical sounds, Method and apparatus for producing. R. K. Potter. 1,678,872; July 31.
Nicotine solutions. Testing. E. Cox. 1,678,636; July 31.
Nitrogen from crude calcium cyanamide, Recovering combined. G. H. Buchanan and P. W. Grimth. 1,678,721; July 31.
Oils. Treating hydrocarbon. W. S. Hadaway, jr. 1,678,728; July 31.
Oils with doctor solutions, Refining petroleum. R. L. Hallett. 1,678,984; July 31.
1-alkoxymethyl-3,7-dimethylxanthines. K. Schranz and C. Lutter. 1,679,053; July 31.
Ophthalmic mountings, Attachment for. L. Strauss. 1,679,233; July 31.
Ophthalmoscope. M. Poser. 1,678,681; July 31.
Ornamental mesh fabric, Producing. C. A. Whiting. 1,678,966; July 31.
Oven, Coking retort. J. Becker. 1,678,801–2; July 31.
Oven, Coking retort. J. Van Ackeren. 1,678,803; July 31.
Overshoe or similar article. L. G. Milkes. Des. 75,928; July 31.
Package, Scrapple. F. Briggs. 1,678,632; July 31.
Pan: *See*—
Vulcanizing pan.
Paper-making machines, Apparatus for reconditioning felts of. M. F. Flynn. 1,678,978; July 31.
Paper-roll-changing plant. H. A. W. Wood. 1,678,894; July 31.
Parachute. F. W. Denda. 1,679,242; July 31.
Patch, Pipe. J. L. Wilson and T. G. Vicars. 1,679,236; July 31.
Pattern: *See*—
Cloth pattern.
Pen and pencil clip, Fountain-. J. Shure. 1,679,232; July 31.
Pencil. J. Swanberg. 1,678,656; July 31.
Penholder and calendar, Combined. C. Horix. Des. 75,914; July 31.
Permanent waves, Method of and apparatus for forming. E. N. Hall. 1,678,983; July 31.
Petroleum oil, Cracking. G. Egloff. 1,679,208; July 31.
Phonograph, Automatic. F. J. Seabolt. 1,679,054; July 31.
Photographic light-sensitive material and making the same. S. E. Sheppard. 1,678,832; July 31.
Photo-telescopic apparatus, Electrical. P. L. Clark. 1,678,974; July 31.
Piano. P. H. Taylor. 1,679,187; July 31.
Piano, Upright. V. Bessler. 1,679,290; July 31.
Picture holder. W. J. Helmquest. 1,679,083; July 31
Pin: *See*—
Bowling pin. Safety pin.
Pin wheel. J. S. Fridolph and J. B. A. Duchesneau. Des 75,908; July 31.
Pipe: *See*—
Casting pipe.
Pipe couplings by centrifugal casting, Production of. H. Blumberg and M. A. Mikesh. 1,678,931; July 31.
Pipe cutter. R. F. McKay. 1,679,321; July 31.
Pipe cutter. J. D. Merrifield. 1,679,225; July 31.
Pipe elbows, Making. J. C. Olsen. 1,678,744; July 31.
Pipes, Joining. A. A. G. Magis. 1,678,740; July 31.
Piston. G. F. Brent. 1,679,020; July 31.
Piston. L. R. Davis. 1,678,768; July 31.

Piston clamp, Air-brake-. L. H. Dohse. 1,678,937; July 31.
Piston cooling. O. Philipp. 1,678,957; July 31.
Planter, Sugar-cane. W. Kassebeer. 1,678,643; July 31.
Planters, Attachment for check-row. W. J. Barclay. 1,678,758; July 31.
Plastic composition and production thereof. O. A. Cherry and C. F. Chosa. 1,678,635; July 31.
Plate for an electric wall bracket or similar article, Front. J. A. Boehringer. Des. 75,894; July 31.
Plating metals with aluminum. F. Jordan. 1,679,808; July 31.
Plow. M. Mares. 1,678,741; July 31.
Plumbing fixture. H. W. Slining. 1,679,276; July 31.
Poles, Method and apparatus for placing. A. Ehrler. 1,679,297; July 31.
Polymerization and purification of hydrocarbons. S. P. Miller and J. B. Hill. 1,679,093; July 31.
Poultry-scalding means. A. G. Egbert. 1,678,936; July 31.
Power transmission, Effecting. A. H. Asprooth and A. M. Leoal. 1,678,798; July 31.
Power-transmitting device. H. P. Fowler. 1,679,213; July 31.
Preburning preparation of fuels. J. M. W. Kitchen. 1,678,863; July 31.
Press: *See*—
Seal press.
Pressing machine. P. N. Braun. 1,679,019; July 31.
Pressure-relief means. M. J. Goldberg. 1,678,905; July 31.
Preventing disturbances of the state of health due to see-saw and rotary motions, Apparatus for. G. Gaertner. 1,679,245; July 31.
Printing mechanism. W. F. Muller. 1,678,705; July 31.
Printing-plate blank and making. R. C. Isaksen. 1,678,859; July 31.
Printing-press delivery, Throw-out mechanism for. H. A. W. Wood. 1,678,895; July 31.
Printing-press gauge. G. De Pamphilis. 1,678,724; July 31.
Pump. M. J. Finn. 1,678,977; July 31.
Pump and motor. M. A. Seaholm. 1,678,831; July 31.
Pump, Beverage. F. J. Trautman. 1,679,104; July 31.
Pump, Petrol and other measured-quantity delivery. W. E. Bryan. 1,679,021; July 31.
Pump, Pneumatic. C. B. Alyea. 1,679,111; July 31.
Pump, Vacuum. F. D. Holdsworth. 1,679,132; July 31.
Pumping apparatus for handling gases and liquids. I. C. Jennings. 1,678,909; July 31.
Pumps, Electrical mercury control for refrigeration. T. C. Whitehead. 1,678,661; July 31.
Punch. P. Schneider. 1,679,176; July 31.
Purifying organic liquid. C. Müller, W. Frankenburger, and F. Grassner. 1,679,256; July 31.
Rack for ice-cream cabinets, Chemical-can. T. P. Bolger. 1,678,763; July 31.
Radiator attachment. H. H. Crawford. 1,678,670; July 31.
Radiator cap. K. E. Stant. Des. 75,935; July 31.
Radiator cover, Collapsible. L. J. Schram. 1,678,791; July 31.
Radiogoniometry, System of. W. A. Loth. 1,678,737; July 31.
Radio receiving apparatus. E. A. Widmann and F. D. Lewis. 1,679,194; July 31.
Radiotable and loud-speaker casing, Combined. F. Schwartz. Des. 75,933; July 31.
Radio telephone system, Two-way. L. Espenschied, H. A. Affel, and C. N. Anderson. 1,678,672; July 31.
Radiowave switch. J. S. Wheeland. 1,679,192; July 31.
Rail joint. O. Lockard. 1,679,162; July 31.
Ratchet brake, Safety reverse. G. Van Brimer, H. A. Magrath, J. Klancher, and B. Soots. 1,679,281; July 31.
Ratchet wrench. L. M. Gibson. 1,678,903; July 31.
Razor, Safety. E. C. Bunnell. 1,678,933; July 31.
Reamer, Sectional abrasive. R. S. Rodgers. 1,679,269; July 31.
Receptacle. W. H. Fulper. 1,678,810; July 31.
Rectifier, Electric-current. S. Ruben. 1,678,824–6; July 31.
Reflector, Condensing. W. G. Wood. 1,679,108; July 31.
Refrigerating and air-circulating system. C. A. Moore. 1,678,678; July 31.
Refrigeration. F. O. Conill. 1,679,205; July 31.
Refrigerator chambers, Construction of. J. G. Meynieu. 1,678,742; July 31.
Refrigerators, Cooling unit for. F. G. Siegel. 1,679,010; July 31.
Register: *See*—

Truck, Locomotive trailing. G. B. Ashworth. 1,679,147; July 31.
Tube: *See*—
X-ray tube.
Tube for self-rescue apparatus, Breathing. A. B. Dräger. 1,679,116; July 31.
Type carriers, Method and apparatus for the aligning of. A. A. Egli. 1,678,694; July 31.
Type, Multigraph. J. C. Norwood. 1,679,261; July 31.
Typographical assembling and distributing machine. G. E. Marlatt. 1,679,318; July 31.
Typographical machine. G. E. Marlatt. 1,679,317; July 31.
Undergarment. J. H. Crossingham. 1,679,206; July 31.
Universal joint. E. R. Degener. 1,679,076; July 31.
Upper-shaping machine. A. F. Pym. 1,678,873; July 31.
Upright for an andiron. O. B. Bach. Des. 75,893; July 31.
Urease preparation. O. Lind. 1,679,250; July 31.
Vacuum-tube device. I. E. Mouromtseff. 1,678,870; July 31.
Valve. H. Haneberg. 1,679,081; July 31.
Valve. F. R. McGee. 1,678,867; July 31.
Valve. E. Wilson. 1,679,012; July 31.
Valve bonnet and the like. T. E. Murray. 1,679,324; July 31.
Valve cap. A. D. Whipple. 1,678,837; July 31.
Valve construction. H. E. Thompson. 1,679,235; July 31.
Valve construction for inflatable articles. W. J. Volt. Re17,057; July 31.
Valve, Float. E. L. Delany. 1,678,769; July 31.
Valve for oil pumps. L. F. Wells and O. C. Whitling. 1,679,283; July 31.
Valve for radiators, Air-vent. L. W. Eggleston. 1,678,851; July 31.
Valve for receiving and storing tanks, Combined vacuum and pressure-relief. A. J. McEwan. 1,678,700; July 31.
Valve, Multiorifice. L. C. Huff. 1,679,219; July 31.
Valve, Safety or automatic release. L. C. Huff. 1,679,218; July 31.
Valve, Thermostatic. C. H. Morrow. 1,679,165; July 31.
Valve, Throttle. L. L. Neebe. 1,679,257; July 31.
Vapor burner. E. Schultz. 1,678,828; July 31.
Vehicle body construction. M. W. Moesta. 1,679,094; July 31.
Vehicle spring. E. R. Wilson and S. S. Shears. 1,678,662; July 31.
Vehicle suspension. S. L. C. Coleman. 1,678,847; July 31.
Vehicle wheel. W. N. Booth. 1,679,113; July 31.
Vehicle wheel, Resilient. P. Altuna. 1,678,969; July 31.

Vehicles, Two-motor drive for. A. H. Asprooth and A. M. Leoni. 1,678,799; July 31.
Velocipede. J. F. O'Brien. 1,679,170; July 31.
Vending machine. M. H. Richardson and A. D. Antoine. 1,678,650; July 31.
Ventilating device. G. R. Siefken. 1,678,654; July 31.
Ventilator: *See*—
Car ventilator.
Ventilator. W. S. Miller. 1,678,743; July 31.
Vulcanizing pan. J. Churchward. 1,679,114; July 31.
Wagon, Child's. E. S. Wessborg. 1,678,836; July 31.
Wall-bracket electric fixture. F. Yokel. Des. 75,947; July 31.
Wall bracket or similar article, Electric. J. A. Bochringer. Des. 75,898; July 31.
Wall bracket or similar article, Electric. J. A. Bochringer. Des. 75,985; July 31.
Wall construction. G. F. Voight. 1,679,282; July 31.
Wall for glass tanks, Bridge. A. W. Dodge. 1,679,295; July 31.
Warning device, Speed-. J. Matthews. 1,679,320; July 31.
Washing cooked straw. D. C. Amerine. 1,678,718; July 31.
Washing machine. L. B. Green. 1,679,123; July 31.
Waste connection. E. G. Oakley. 1,678,783; July 31.
Waste trap. R. G. Westbrook. 1,679,190; July 31.
Waste trap, Reversible. R. G. Westbrook. 1,679,191; July 31.
Watchcase. V. Ritschard. Des. 75,931; July 31.
Water heater. O. Fox. 1,679,120; July 31.
Waver, Hair. A. E. Walsh. 1,678,891; July 31.
Wedding ring. A. J. Friedman. Des. 75,909; July 31.
Welding, Electric. J. F. Lawson. 1,678,986; July 31.
Welding machine, Electric. J. A. Leeper and R. J. Strong. 1,679,041; July 31.
Welding rod. N. B. Pilling and J. G. Schoener. 1,679,003; July 31.
Wheel: *See*—
Spring wheel. Vehicle wheel.
Steering wheel.
Wheel. D. R. Collier. 1,678,669; July 31.
Winding apparatus, Yarn-. G. B. Cocker. 1,678,975; July 31.
Window. C. A. Lewis. Re17,054; July 31.
Window construction. J. Suter. 1,679,278; July 31.
Window, Metal. M. Kohut. 1,679,089; July 31.
Window structure. N. Nicolai. 1,679,260; July 31.
Windshield for automobiles. M. A. Lockwood. 1,679,252; July 31.
Wiper, Windshield. C. Schultz. 1,679,097; July 31.
Wiper, Windshield. L. Zaiger. 1,678,688; July 31.
Wireworking machine. J. D. Coney and B. Garlius. 1,679,204; July 31.
Wrench: *See*—
Ratchet wrench.
Wrench. H. W. Switzer. 1,678,793; July 31.
Wringer rolls, Pressure-controlling means for. T. C. Davis. 1,678,849; July 31.
X-ray tube. G. Bucky. 1,679,332; July 31.

CLASSIFICATION OF PATENTS

ISSUED JULY 31, 1928.

NOTE.—First number—class, second number—subclass, third number—patent number.

1— 13. 6: 1, 678, 848
45: 1, 678, 690
2— 14: 1, 679, 105
27: 1, 678, 818
113: 1, 679, 206
122: 1, 678, 629
228: 1, 679, 102
234: 1, 679, 148
240: 1, 678, 716
4— 148: 1, 678, 703
178: 1, 679, 156
237: 1, 679, 202
5— 182: 1, 678, 795
294: 1, 678, 708
7— 1: 1, 678, 807
8— 6: 1, 678, 648
9— 22: 1, 678, 928
10— 5: 1, 679, 063
141: 1, 679, 234
12— 1: 1, 678, 773
14: 1, 678, 873
19. 2: 1, 678, 854
87: 1, 678, 792
136: 1, 678, 771
15— 25: 1, 679, 166
29: 1, 679, 323
164: 1, 678, 943
176: 1, 678, 950
209: 1, 678, 962
253: 1, 679, 097
255: 1, 678, 686
16— 49: 1, 678, 701
84: 1, 678, 817
17— 11: 1, 678, 936
25: 1, 678, 699
18— 2: 1, 679, 114
36: 1, 678, 812
46: 1, 679, 016
1, 679, 330
55: 1, 678, 866
19— 51: 1, 678, 794
72: 1, 679, 280
120: 1, 678, 822
144: 1, 679, 251
20— 33: 1, 678, 932
40. 5: 1, 679, 252
43: 1, 679, 278
48: 1, 679, 290
49: R. 17, 054
22— 24: 1, 679, 217

THE

OFFICIAL GAZETTE

OF THE

United States Patent Office.

Vol. 373—No. 1. TUESDAY, AUGUST 7, 1928. Price—$10 per year.

The OFFICIAL GAZETTE is mailed under the direction of the Superintendent of Documents, Government Printing Office, to whom all subscriptions should be made payable and all communications respecting the Gazette should be addressed. Issued weekly. Subscription, $10.00 per annum; including annual indexes, $11.50; single numbers, 25 cents each.

PRINTED COPIES OF PATENTS are furnished by the Patent Office at 10 cents each. For the latter, address the Commissioner of Patents, Washington, D. C.

CIRCULARS OF GENERAL INFORMATION concerning PATENTS or concerning TRADE-MARKS, PRINTS, and LABELS will be sent without cost on request to the Commissioner of Patents, Washington, D. C.

[Public No. 501, 70th Congress.]

[S. 2823.]

An Act amending the statutes of the United States with respect to reissue of defective patents.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 4916 of the Revised Statutes of the United States be, and the same is hereby, amended to read as follows:

"Sec. 4916. Whenever any patent is wholly or partly inoperative or invalid, by reason of a defective or insufficient specification, or by reason of the patentee claiming as his own invention or discovery more than he had a right to claim as new, if the error has arisen by inadvertence, accident, or mistake, and without any fraudulent or deceptive intention, the commissioner shall, on the surrender of such patent and the payment of the duty required by law, cause a patent for the same invention, and in accordance with the corrected specification, to be reissued to the patentee or to his assigns or legal representatives, for the unexpired part of the term of the original patent. Such surrender shall take effect upon the issue of the reissued patent, but in so far as the claims of the original and reissued patents are identical, such surrender shall not affect any action then pending nor abate any cause of action then existing, and the reissued patent to the extent that its claims are identical with the original patent shall constitute a continuation thereof and have effect continuously from the date of the original patent. The commissioner may, in his discretion, cause several patents to be issued for distinct and separate parts of the thing patented, upon demand of the applicant, and upon payment of the required fee for a reissue for each of such reissued letters patent. The specifications and claims in every such case shall be subject to revision and restriction in the same manner as original applications are. Every patent so reissued, together with the corrected specifications, shall have the same effect and operation in law, on the trial of all actions for causes thereafter arising, as if the same had been originally filed in such corrected form; but no new matter shall be introduced into the specification, nor in case of a machine patent shall the model or drawings be amended, except each by the other; but when there is neither model nor drawing, amendments may be made upon proof satisfactory to the commissioner that such new matter or amendment was a part of the original invention, and was omitted from the specification by inadvertence, accident, or mistake, as aforesaid."

Approved May 24, 1928.

Changes in Classification.

Order No. 3,057, July 20, 1928, directs:

In *class 179, Telephony* (Division 16), establish the following subclass and definition, the patents contained in this subclass having been taken for the most part from class 179, Telephony, subclasses 2, Systems, Composite, and 4, Systems, Composite, Telegraphy, Metallic circuits:

Systems,
Composite
Superaudible
2.5 Telephone type.

2.5. SYSTEMS, COMPOSITE, SUPERAUDIBLE, TELEPHONE TYPE. Systems using a superaudible carrier wave for transmission of telephone signaling waves combined with any other electrical system.

Note.—For analogous combined systems using a high-frequency carrier wave, but in which the signaling wave is not limited to telephony, see class 177, Electric Signaling, subclass 352, Systems.

In *class 178, Telegraphy*, subclasses 45, Systems, Wave transmission, Loaded circuit, and 46, Systems, Wave transmission, Loaded circuit, Loading coils, and in class 179, Telephony, subclasses 2, Systems, Composite, 3, Systems, Composite, Telegraphy, and 4, Systems, Composite, Telegraphy, Metallic circuit, transfer said subclasses from Division 51 back to Division 16. This leaves in Division 51 subclass 44, Systems, Wave transmission, of class 178, and subclasses 2.5, Systems, Composite, Superaudible Telephone type, 15, Systems, Multiplex, 170, Repeaters, and 171, Relays, of class 179.

3521

Condition of Applications Under Examination at Close of Business July 27, 1928.

(Total number of applications awaiting action, excluding Trade-Mark Division, 110,270; Trade-Mark Division, 1,974. Oldest new case, Oct. 3, 1927; oldest amended, Oct. 6, 1927. The dates given are 1927 except where † indicates 1928.)

DECISIONS IN PATENT AND TRADE-MARK CASES.

Court of Appeals of the District of Columbia.

SCOTT *v.* WEISS AND HEUSER. WEISS *v.* SCOTT AND HEUSER.

Nos. 2012–1215. Decided April 2, 1928.

1. INTERFERENCE — PRIORITY — PATENTABILITY NOT REVIEWED.

"The contention that the counts of the interference are not patentable cannot be sustained. This court is concerned with the question of priority only and that is the single issue which it is called upon to determine."

2. INTERFERENCE—PRIORITY—SUFFICIENCY OF EVIDENCE.

Evidence on behalf of H. reviewed and *Held* insufficient to establish reduction to practice of the invention in issue, which involved the use of a particular accelerator, especially in view of H.'s long delay in filing his application and his applying for a patent on another accelerator without mentioning the one in issue.

3. SAME—SAME—SAME.

The testimony of W. reviewed and *Held* insufficient to establish either a conception or reduction to practice by W. of the invention prior to the date established by S.

4. SAME—SAME—SAME—ATTEMPTS TO CONCEAL EVIDENCE.

Where a representative of the company with which W. was connected attempted to influence the testimony of a witness with respect to W.'s alleged experiments and W. himself suggested to a witness not to say or remember too much about what had occurred at a certain plant, *Held* "conduct of that kind by parties in interest necessarily discredits the case which they seek to sustain."

APPEAL from the Patent Office. Affirmed in part and reversed in part.

Mr. E. J. Prindle and *Mr. C. H. Biersterfeld* for Scott.

Mr. J. S. Wooster for Weiss.

Mr. Odin Roberts and *Mr. C. S. Grover* for Heuser.

Before MARTIN, Chief Justice, VAN ORSDEL, Justice, and SMITH, Judge U. S. Court of Customs Appeals.

SMITH, *J.:*

This is a consolidated appeal from decisions of the Commissioner of Patents awarding priority of invention to Ralph V. Heuser in three party Interference No. 47,394 and three party Interference No. 49,357.

Morris L. Weiss in his preliminary statement alleges that he conceived and disclosed his invention on or about February 1, 1919; that he made his first written description of his invention on October 15, 1920, and reduced it to practice on or about December 15, 1920. Weiss filed his application for a patent on August 8, 1921.

Ralph V. Heuser's preliminary statement alleges that he conceived and disclosed his invention on June 16, 1920, and that he reduced it to practice on the 15th of July, 1920. Heuser's application for a patent on the subject matter of Interference No. 47,394 was filed on January 27, 1921.

Scott in his preliminary statement declares that he conceived the invention on September 20, 1920, and disclosed it in October, 1920; that his invention was first described in writing and reduced to practice by him on the 15th of March, 1921. Scott filed his application for a patent on June 20, 1922.

The invention involved in both interferences is a process for vulcanizing rubber by adding to heated crude rubber, sulphur and other materials an ortho-tolylguanidine vulcanization accelerator, thereby increasing the elasticity and quality of the rubber.

In Interference No. 47,394 the issue is defined in three counts which are as follows:

1. The process of treating rubber or similar materials which comprises combining with the rubber compound an ortho-tolyl guanidine.
2. The process of treating rubber or similar materials which comprises combining with the rubber compound a vulcanizing agent and an ortho-tolyl guanidine.
3. A vulcanized compound of rubber or similar material combined with a vulcanizing agent and an ortho-tolyl guanidine.

It is established by the evidence pertinent to Interference No. 47,394 that Heuser was employed by the Atlantic Dyestuffs Company on January 1, 1920, for the purpose of determining the value of a large number of chemical compounds as accelerators for the vulcanizing of rubber. Heuser prepared the several chemical compounds for ultimate use and after giving to each of them a number, delivered them to H. B. Morse, whose duty it was to mix them with crude rubber and sulphur for vulcanization. After vulcanizing the rubber mixed with any of the chemical compounds prepared by Heuser, the rubber was tested by Morse who made a report of the result of the tests to Heuser or to Burrage, the manager of the Atlantic Dyestuffs Company. On June 16, 1920, Heuser started to work on triorthotolylguanidine (TOTG) as a vulcanization accelerator. His first preparation of that compound, marked No. 18, was completed in July, 1920, and was sent through Burrage to Morse to be tested. On August 9, 1920, Morse made a report of his tests to Burrage and in that report took occasion to say that No. 18, TOTG, was slightly weaker than the company's accelerator "Akbar," but that it had no discoloring effects or accelerating effects or accelerating power at low temperatures and that as an accelerator it appeared to have no bad qualities and had all of the good qualities sought for in an accelerator. Morse recommended that the efforts of those concerned be concentrated for the present on the accelerator, TOTG. In consequence of that recommendation, the Atlantic Dyestuffs Co., about the middle of November, 1920, installed in one of its factories apparatus for the manufacture of TOTG and in the plant so established TOTG was manufactured for commercial purposes. On January 27, 1921, and about two months after the completion of the plant, Heuser filed his application for a patent for the process of vulcanizing rubber by heating it with the accelerator TOTG.

The testimony on behalf of Scott to the effect that the samples of rubber produced by Heuser could not have been made by the use of TOTG is not sufficient to overcome the evidence submit-

ted by Heuser that the samples were so made. The tests upon which Scott relies were made many years after Heuser's samples were produced and there is nothing in the record which would justify the conclusion that the precise conditions prevailing in the production of Heuser's samples governed the making of the samples evolved by Scott's experts. Apparatus, temperature, proportion of components used and the individual equation cut some figure in making experiments and in reproducing materials. Unless reproductions are made under identically the same conditions, they may well differ in some degree from the original in quality and appearance. The differences between Heuser's samples of TOTG and those produced by Scott's experts hardly justify the conclusion that TOTG was not used by Heuser in making his samples. To say that Heuser did not use TOTG in making his samples would simply mean that he and his witnesses made false reports and gave testimony that was untrue. We can not go that far. Indeed, to do so would result in ignoring the testimony of credible witnesses and the fact that the Atlantic Dyestuffs Company actually constructed an apparatus and put it in operation for the purpose of using Heuser's TOTG as an accelerator in the production of vulcanized rubber.

The evidence clearly proves that Heuser reduced his invention of TOTG to practice and promptly filed an application for a patent therefor prior to Weiss and Scott.

[1] The contention that the counts of the interference are not patentable cannot be sustained. This court is concerned with the question of priority only, and that is the single issue which it is called upon to determine. *Hisey* v. *Peters*, 6 Appls. D. C. 68, 70; *Sobey* v. *Holsclaw*, 28 Appls. D. C. 65; *Elsom* v. *Bonner*, 46 Appls. D. C. 230, 233, 234; *Lynch* v. *Headley*, 52 Appls. D. C. 269, 270.

Priority of invention as to counts 1, 2, and 3 of Interference No. 47,394 was properly awarded to Heuser.

The subject matter of Interference No. 49,357 is presented in 16 counts of which counts 1, 3, and 5 are generic to "an aryl substituted guanidine having an alkyl group in ortho position." The following counts are typical of the subject matter of the interference and the issue to be determined:

1. The process of treating rubber or similar materials which comprises combining with the rubber compound an aryl substituted guanidine having an alkyl group in the ortho position.

2. The process of treating rubber or similar materials which comprises combining with the rubber compound di-ortho-tolyl guanidine.

11. A vulcanized rubber product obtainable by inducing a reaction between rubber, a vulcanizing agent, and a di-tolyl-guanidine.

Heuser in his original application filed January 27, 1921, did not disclose or claim di-ortho-tolyl guanidine (DOTG) as a compound for accelerating the vulcanization of rubber and consequently in Interference No. 47,394 he could not assert priority as to the subject matter of counts 2, 4, and 6 to 16 involved in Interference No. 49,357. On the 18th of August, 1924, however, Heuser filed an application in which he made claim to the process of vulcanizing rubber by employing DOTG as an agency and to the vulcanized rubber produced by that process. Counts 1, 3, and 5 of Interference No. 49,357 are broad enough to read on Heuser's original application and as his right to priority as to those counts were in effect sustained in Interference No. 47,394, our consideration of Interference No. 49,357 will be limited to counts 2, 4, and 6 to 16.

It appears from the testimony submitted on behalf of Heuser that under his contract with the Atlantic Dyestuffs Company, he prepared, during the year 1920, about 30 chemical compounds and had them tested to determine their comparative value and efficiency as accelerators for the vulcanization of rubber. Among the compounds so preparded was di-ortho-tolyl guanidine (DOTG) which was marked Number 38 and submitted to Morse for testing on the 17th of August, 1920. Morse received the DOTG sent by Heuser and used it in the vulcanization of rubber on or about the 19th of August, 1920. The chemical compound made by Heuser yielded about 2 grams of DOTG which amount was capable of accelerating only about 300 grams of rubber prepared for vulcanization. Morse made that one test and no more of DOTG. That Morse did not consider that one test at all conclusive is established by his letter to Heuser dated August 20, 1920, which reads as follows:

> In testing out sample No. 38 I found that there was only 2 grams of this substance. What little test I was able to make with that amount was very interesting and I wish you would make me up about 2 ounces ob that I may test it first.

Morse testified that the word "first" should have been "further" and the substitution of the word "further" for "first" definitely proves that Morse was not finally satisfied that No. 38 was as good an accelerator as No. 18. Morse did testify that he told Heuser that No. 38 was stronger than No. 18, but he is contradicted by Heuser's data sheet which records that the strength of No. 38 was about the same as No. 18. Heuser would not have made such a record as that on his data sheet if Morse had given him information to the contrary and especially if Morse had told Heuser, as Morse says he did, that No. 38 was a better accelerator than No. 18. Moreover, if the investigations of Heuser and the tests of Morse furnished ground for the reasonable belief that DOTG was a better and stronger accelerator than any of the other chemical compounds tested, why should the Atlantic Dyestuffs Co., for whom Heuser and Morse were working, install in November, 1920, *and after the tests were made*, apparatus for the manufacture of TOTG? That fact loses none of its significance when it is remembered that Morse in that very month made tests of various accelerators including TOTG and did not test DOTG.

It is true that on June 21, 1921, samples of DOTG were sent to Glancy of the Hood Rubber Co., at Watertown, and that those samples were tested about July 8, 1921. Glancy testified that the tests indicated to him that No. 38 was a very powerful accelerator, but that he was not satisfied that proper delivery of the material could be made. In consequence, the Hood Rubber Co. declined to accept No. 38 as an accelerator. Glancy's testimony does not prove that DOTG was a better accelerator than TOTG and falls short of establishing a reduction to practice.

Heuser admits that research work as to DOTG was temporarily abandoned until the end of September, 1921, at which time he conceived of a new and improved way of making DOTG and that he worked out the new process in March, 1922. He says that in April, 1922, a small scale plant was erected for the purpose of producing, in the improved way, commercial DOTG and that several barrels of DOTG were made in that plant in the summer of 1922. The barrels were stored in a spare room of the factory where six months later they were destroyed by fire. Whether any of the DOTG so produced was used for the vulcanization of rubber does not appear. The working out by Heuser in September, 1921, of a new process for making DOTG does not support his contention that he successfully reduced his invention to practice in 1920.

Notwithstanding the tests made by Morse in August, 1920, the tests made by Glancy in July, 1921, and the production by a new method of several barrels of DOTG in the summer of 1922, it is notable that none of Heuser's DOTG was put to practical use for the manufacture of vulcanized rubber. Failure to do so probably would not amount to much if it were not for the fact that Heuser did not mention DOTG in the application for a patent filed by him in January, 1921, and did not think it worth while to apply for a patent on DOTG until August 18, 1924, more than two years after Scott filed his application for a patent on DOTG and nearly two years after the publication by Scott of an article on the use of DOTG as an accelerator for the vulcanization of rubber. Heuser admits that he read Scott's article on the use of DOTG as an accelerator for the vulcanization of rubber, which article was published in the India-Rubber Journal of September 16, 1922, and October 7, 1922. That article furnished him information that Scott was in the field. Nevertheless he made no move to patent his invention until after he had heard in April, 1924, Scott's testimony as to the use of DOTG as an accelerator, at which time the advisability of filing an application for DOTG was discussed by himself and counsel.

[2] The inadequate tests made by Morse, the tests and rejection of DOTG as an accelerator by Glancy certainly do not establish that DOTG, as conceived by Heuser, was of practical use as an accelerator in the vulcanization of rubber. Heuser's long delay in applying for a patent and his application for a patent on TOTG without mentioning DOTG is convincing that he never reduced to practice his conception of DOTG and that whatever work was done by him in developing DOTG as an accelerator was nothing more than an abandoned experiment. *Mason* v. *Hepburn*, 13 Appls. D. C. 86, 94, 95; *Warner* v. *Smith*, 13 Appls. D. C. 111, 114, 115, 116; *Howard* v. *Hey*, 18 Appls. D. C. 142, 144, 145; *Quist* v. *Ostrom*, 23 Appls. D. C. 69, 74; *Vanore* v. *Improta*, No. 2001, decided concurrently herewith.

[3, 4] Weiss contends that the use of DOTG was conceived by him and disclosed on February 19, 1919. Weiss testified that he disclosed it on that date to Mr. W. H. Daniels of the Republic Rubber Co., and told Daniels that DOTG would probably be better than diphenyl guanadine (DPG) because toluidine was known to be somewhat better than aniline as an accelerator for vulcanization. Weiss also said to Daniels that he would like to prepare some DOTG but since toluidine was more expensive than aniline and also more difficult to get, that he would prefer to work on a process for making DPG. Weiss never called Daniels as a witness and was flatly contradicted by Kinsman, a witness for Scott, who testified that toluidine was offered by the Du Pont de Nemours Company at a price 10¢ per pound lower than aniline and that it would have been more profitable to manufacture and sell DOTG than DPG, even if the raw materials for both accelerators were available at the *same* cost. Weiss stated that he not only disclosed his idea of using DOTG as a rubber accelerator to Daniels but also to Woodward and Doty in April, 1920. Weiss's contract, dated April 13, 1920, with Doty and Woodward and his contract with the Dovan Chemical Corporation, executed in March, 1921, mention a process of making DPG and do not refer either to DOTG or to di-substituted guanidines. Weiss in his application for a patent for a process of making DPG, dated July 2, 1921, makes no mention of DOTG or of his invention thereof. Weiss stated that he made di-orthotolyl-thiourea, the intermediate of DOTG, in his home from orthotoluidine which he found in the plant taken over from the Electrosynth Chemical Company. He testified that his wife decidedly objected to the foul smell produced by his chemical work and to the use of their home as a laboratory. His wife was not called to corroborate her husband's statement as to his chemical activities in the home. Dr. Elley testified positively that the amount of hydrogen bi-sulphide which Weiss would have had to use in producing DOTG would have caused a disagreeable odor throughout the apartment house. Friedel, who occupied the apartment immediately above that of Weiss during the fall of 1920, stated that he never smelled any odor produced by such chemicals. Abrams, purchasing agent and former president of the Electrosynth Chemical Company, testified that that company had no occasion to use orthotoluidine and that there was no orthotoluidine in the plant at any time while it was occupied by the Electrosynth Chemical Company. Weiss may have made DOTG in the fall of 1920 but if he did, that fact is not corroborated by other witnesses and is not in accord with his actions and business conduct. A

representative of the Dovan Chemical Company, with which Weiss is connected, attempted to influence the testimony of Dr. Webber concerning Weiss's alleged experiments with DOTG. Weiss himself suggested to Henry Abrams not to say or remember too much about what had occurred at the Electrosynth plant. Conduct of that kind by parties in interest necessarily discredits the case which they seek to sustain.

The court must hold that Weiss's claim of conception and reduction to practice of DOTG has not been established by credible evidence.

Scott testified that he disclosed the invention of DOTG to Dr. Grafton of the Quaker Rubber Company about September 20, 1920. Dr. Grafton corroborated Scott and testified that Scott had completed the making of DOTG about the latter part of February, 1921, and on March 15 produced samples of rubber, the vulcanization of which was accelerated by DOTG, which samples were tested on March 16, 1921. That Scott made comparative sample tests of DOTG and di-phenyl guanidine as accelerators is confirmed by documentary evidence which discloses the tensile strength and percentage of elongation of the rubber compounded.

The evidence on behalf of Scott satisfies the court, first, that Scott conceived the use of DOTG as a rubber accelerator on the 20th of September, 1920; second, that he actually reduced his conception to practice by using DOTG as an accelerator on March 15, 1921, and by testing the vulcanized product on March 16, 1921, in order to determine the efficiency of DOTG as an accelerator.

In Interference No. 49,357 priority of invention of the subject matter of counts 1, 3, and 5 was properly awarded to Ralph V. Heuser. Priority of invention of the subject matter of counts 2, 4, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, and 16 should have been awarded to Winfield Scott. The decision of the Commissioner of Patents, in so far as it awards priority of invention to Ralph V. Heuser on counts 1, 2, and 3 of Interference 47,394 and counts 1, 3, and 5 of Interference 49,357 is affirmed. The decision of the Commissioner of Patents in so far as it awards priority of invention to Ralph V. Heuser as to counts 2, 4, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, and 16 of Interference 49,357 is reversed and priority as to said last-named counts is awarded to Winfield Scott.

Affirmed as to Interference No. 47,394 and modified as to interference No. 49,357.

Court of Appeals of the District of Columbia.

IN RE HOLMES.

No. 2042. Decided April 2, 1928.

PATENTABILITY.

Claims for a pressure-fluid motor involving a device comprising a compound reduction gearing *Held* unpatentable in view of the prior art.

APPEAL from the Patent Office. Affirmed.

Mr. Louis A. Maxson for Holmes.

Mr. T. A. Hostetler for the Commissioner of Patents.

Before MARTIN, Chief Justice, and ROBB and VAN ORSDEL, Associate Justices.

ROBB, *J.:*

Appeal from Patent Office decision refusing to allow claims in appellant's application for a patent involving a device comprising a compound reduction gearing having means for supplying motive fluid to the meshing teeth of each gear to form a motor.

The case was pending in the Patent Office more than eight years and was very carefully considered by the various tribunals, each writing an opinion. After an adverse decision by the Board of Examiners in Chief, appellant cancelled all the rejected claims and substituted others, which the board refused to consider. On appeal to the Commissioner, he ruled that—

> while these claims should have been presented to the Examiner in order that his opinion as to them should be before the appellate tribunals, yet in view of the history of the case, these claims will be admitted and here considered.

After full consideration, the Commissioner disallowed the substituted claims.

We have carefully examined the Commissioner's decision in the light of appellant's argument and brief, and are convinced of its correctness. We, therefore, affirm the decision without a restatement of reasons.

Affirmed.

Court of Appeals of the District of Columbia.

IN RE PARR.

No. 2,065. Decided June 4, 1928.

PATENTABILITY—ICE-CREAM CONTAINER.

A claim for an ice-cream container formed in the shape of a piece of pie, the sides of the container having longitudinal corrugations which are said to prevent the walls from breaking while the ice cream is being consumed, *Held* patentable over the prior art, since, when the delicate character of these edible containers is considered, a slight change productive of practical results may be of considerable importance.

APPEAL from Patent Office. Reversed in part.

Mr. J. E. Lind for Parr.

Mr. T. A. Hostetler for the Commissioner of Patents.

Before MARTIN, Chief Justice, and ROBB and VAN ORSDEL, Associate Justices.

ROBB, *J.:*

Appeal from a decision of the Patent Office rejecting all of the claims in appellant's application for a patent on edible ice-cream containers.

Claim 8, being representative, is here reproduced:

> An ice cream container formed of edible material comprising a pair of bowed substantially parallel side walls, end walls intersecting at one end connecting said side walls and defining an opening, said side walls having an outward flare adjacent said opening, a bead formed in said walls surrounding said opening and corrugations in certain of said walls strengthening the same and extending to said bead.

According to the specification and drawings, appellant's container simulates the shape of a piece of pie, the sides of the container having longitudinal corrugations that are said to prevent the walls from breaking while the ice cream is being consumed. The side walls of the container have an outward flare adjacent to the opening, it having been found that without the flare many containers would warp and break during shipment. In addition to these features, the extreme edge of the container is provided with a bead or lip for the purpose of still further strengthening the container.

The Board of Examiners in Chief and the Assistant Commissioner were of the view that no invention was involved in giving to the container shown in Rea's Design Patent No. 40,739, dated June 21, 1910, a shape corresponding to that shown in the Morrison patent No. 883,734, dated April 7, 1908.

In the Rea design patent it does not appear whether the corrugations in the side walls of the container stand out from the material or are merely fluted, but it does appear that the corrugations do not extend to the edge of the container. In other words, these corrugations in the Rea design are obviously for decorative purposes only. Nor is there an outward flare to the side walls adjacent to the opening in the Rea design. Moreover, in the Rea design the edge is disclosed as merely bent outwardly, while in appellant's container the walls around the opening contain a bead which strengthens the edges of the container.

The patent to Morrison is a nonedible container for holding a piece of pie. It possesses none of the characteristics which appellant sets forth in his specification as essential in a practical edible ice-cream container.

Appellant represented to the Patent Office that when he finally succeeded in placing his container upon the market, it met with immediate and widespread demand.

It is apparent that claim 8 does not read upon either the Rea or the Morrison patents. When the delicate character of these edible containers is considered, a slight change productive of practical results may be of considerable importance. Appellant has made an advance in the art, his claim is carefully limited to the particular structure shown, and under our rule a real doubt as to patentability should be resolved in his favor. Being of the view that something more than mere mechanical ability was involved in the development of his receptacle, we award him claim 8, or its substantial equivalent.

Decision reversed as to claim 8, and affirmed as to the other claims.

Reversed as to claim 8.

Affirmed as to other claims.

Patent Suits.

Adverse Decisions in Interference.

In interferences involving the indicated claims of the following patents final decisions have been rendered that the respective patentees were not the first inventors with respect to the claims listed:

Pat. 1,516,824, Leopold D. Mannes and Leopold Godowsky, jr., Color photography, decided June 27, 1928, claims 1, 2, and 3.

Pat. 1,613,775, Charles D. White, Electromagnetic sound reproducer, decided June 4, 1928, claims 1, 2, 4, and 11.

Pat. 1,623,561, Slepian and Hanna, Acoustic horn, decided June 29, 1928, claims 2, 3, 4, 6, 7, 9, 10, 14, 15, 16, 21, 22, and 23.

Pat. 1,652,928, Ernst F. W. Alexanderson, Voltage regulator, decided June 25, 1928, claims 1 and 2.

Adjudicated Patents.

(D. C. N. Y.) The Griswold patent, No. 1,274,410, for flexible shingle, *Held* valid and infringed. *Griswold* v. *Buckle Proof Shingle Co.*, 26 F. (2d) 466.

(C. C. A. Ill.) The Sanford patent, No. 1,454,565, for combined desk and seat, claim 4 *Held* invalid and not infringed. *Sanford* v. *American Seating Co.*, 26 F. (2d) 464.

(D. C. Mass.) The Hiller patent, No. 1,589,692, for improving choke-coil amplification unit on radio signal amplifying circuits, claims 7–10 *Held* valid and infringed. *Hiller Audio Corporation* v. *General Radio Co.*, 25 F. (2d) 475.

Trade-Marks Canceled.

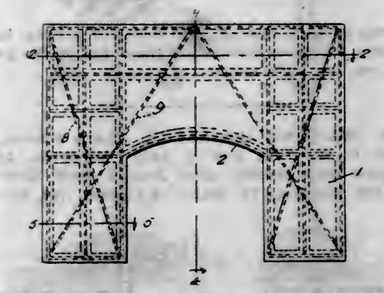
REISSUES

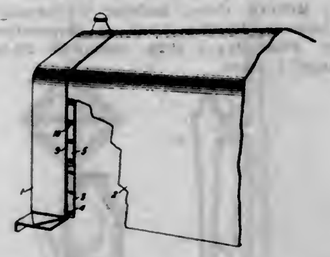
AUGUST 7, 1928.

17,058. LOCOMOTIVE STEAM PURIFIER. CHARLES GILBERT HAWLEY, Chicago, Ill., assignor to Centrifix Corporation, Cleveland, Ohio, a Corporation of Ohio. Filed May 26, 1928. Serial No. 280,863. Original No. 1,668,905, dated May 8, 1928, Serial No. 27,852, filed May 4, 1925. 10 Claims. (Cl. 122—492.)



8. A steam boiler having an opening in the top of its shell, in combination with a steam dome positioned above and closing said opening, means cooperating with a portion of the enclosing wall of said dome to form a dry steam compartment within said dome, centrifugal steam drying means also positioned in said dome and wholly in advance of and in communication with said compartment, whereby moisture is excluded from said compartment and only dry steam is supplied thereto, and a dry pipe rising through said opening into said dome and in communication with said compartment.

17,059. ADJUSTABLE PACKING FOR HYPODERMIC SYRINGES. GEORGE N. HEIN, San Francisco, Calif., assignor to Neutype Instrument Company, San Francisco, Calif., a Corporation of California. Filed Nov. 16, 1927. Serial No. 233,696. Original No. 1,561,854, dated Nov. 17, 1925, Serial No. 734,208, filed Aug. 26, 1924. 5 Claims. (Cl. 128—218.)

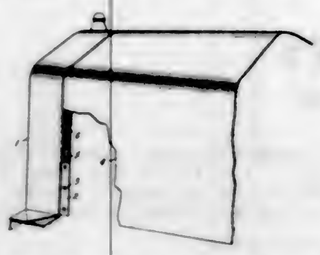


4. A hypodermic syringe comprising a barrel, a piston therein, a normally flat, relatively thin, square-edged elastic packing member on said piston, and a retaining member for said elastic packing member, said piston having a surface adjacent the packing member formed with beveled corners, whereby when the piston is moved inwardly the packing member will be deflected and present an edge contact against the barrel, minimizing thereby the friction between the packing member and barrel, and increasing the pressure of the packing member on the barrel in a radial direction.

17,060. CEMENT MANTEL. RUFUS T. WOODARD, Oakland, Calif. Filed Sept. 9, 1926. Serial No. 134,381. Original No. 1,527,723, dated Feb. 24, 1925, Serial No. 716,024, filed May 26, 1924. 5 Claims. (Cl. 72—0.5.)

1. A cement mantel of a predetermined formation provided at its lower portion and between its side edges with a fire place opening, a flange surrounding the edges of the mantel, and ribs disposed along the interior surface of the mantel of a depth shorter than the flanges whereby to permit free circulation of air at the rear surface of the mantel within the space defined by the flanges.

17,061. JOINT STRIP. HANS G. JORGENSEN, Erie, Pa., assignor, by mesne assignments, to General Electric Company, a Corporation of New York. Filed June 21, 1928. Serial No. 287,258. Original No. 1,632,903, dated June 21, 1927, Serial No. 641,374, filed May 25, 1923. 3 Claims. (Cl. 180—69.)

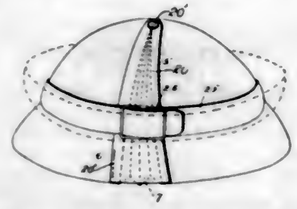


1. A joint strip of yielding material with projections formed on one face adapted to enter perforations on a joint member to secure the strip in place, the yielding material permitting a variation in the distance between the projections.

17,062. JOINT STRIP. HANS G. JORGENSEN, Erie, Pa., assignor, by mesne assignments, to General Electric Company, a Corporation of New York. Filed June 21, 1928. Serial No. 287,259. Original No. 1,653,012, dated Dec. 20, 1927, Serial No. 653,781, filed July 25, 1923. 2 Claims. (Cl. 180—69.)

1. A joint strip of yielding and stretchable material with projections formed on one face thereof adapted to

enter perforations in a joint member to secure the strip in place, said projections comprising an undercut portion adapted to yieldingly enter the perforations and hold

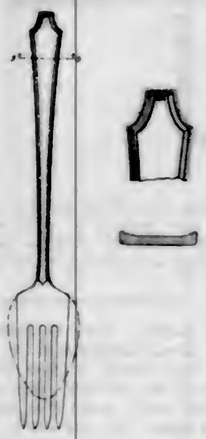


the strip in place thereon, said undercut portion having a tapered extension facilitating the entry of the projections into the perforations.

17,063. WASHING APPARATUS. JAMES DRAPER, San Juan, P. R. Filed Sept. 9, 1925. Serial No. 55,405. Original No. 1,496,660, dated June, 3, 1924, Serial No. 575,162, filed July 15, 1922. 18 Claims. (Cl. 68—18.)

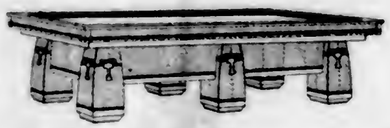
1. Apparatus for washing clothes and similar articles comprising, in a single apparatus, means for combining in one continuous operation the acts of washing, rinsing, tumbling and drying, said means comprising an outer casing having an opening in a vertical end thereof, a closure for said opening, an inner foraminous container capable of passing through said opening into said casing, means for rotating said container in operative position within said casing on a substantially horizontal axis, said casing having openings through which washing and heating fluids may be introduced therein and air withdrawn therefrom while said container is within said casing.

17,064. ADJUSTABLE HAT. PHILIP A. FISCHER, New York, N. Y., assignor to Adjusto Hat Corporation, a Corporation of New York. Filed June 11, 1928. Serial No. 284,630. Original No. 1,663,124, dated Mar. 20, 1928, Serial No. 603,175, filed Nov. 25, 1922. 11 Claims. (Cl. 2—175.)



1. An adjustable hat of generally conventional design, having a few closely grouped, pleats in one side thereof, the pleats beginning in the crown of the hat and extending downwardly and outwardly into the brim of the hat the rest of the hat having the usual smooth outer surface, the pleats gradually widening toward the lower or brim end thereof, means engageable with the hat on opposite sides of the pleats for holding the pleats in various positions for varying the head size of the hat, and a covering member for concealing the pleats.

DESIGNS



AUGUST 7, 1928.

75,950. FORK OR SIMILAR ARTICLE. ERNEST T. BECK, Meriden, Conn., assignor to International Silver Company, Meriden, Conn., a Corporation of New Jersey. Filed May 3, 1928. Serial No. 26,548. Term of patent 7 years.

The ornamental design for a fork or similar article as shown.

75,951. GAME TABLE. HANS BERG, Grand Rapids, Mich., assignor to The Brunswick-Balke-Collender Co., Chicago, Ill., a Corporation of Delaware. Filed May 25, 1928. Serial No. 26,850. Term of patent 3½ years.

The ornamental design for a game table substantially as shown.

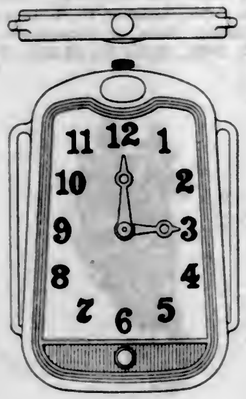
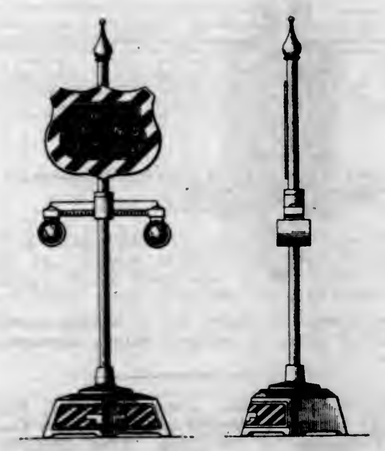
The ornamental design for a game table substantially as shown.

75,953. JAR OR SIMILAR CONTAINER. HENRI CHARPENTIER, Lynbrook, N. Y. Filed June 6, 1928. Serial No. 27,018. Term of patent 3½ years.



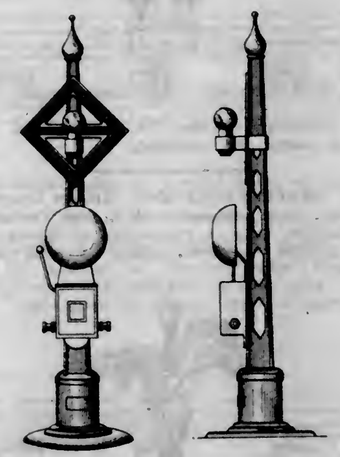
The ornamental design for a jar or similar container, as shown.

75,954. JAR OR SIMILAR CONTAINER. HENRI CHARPENTIER, Lynbrook, N. Y. Filed June 6, 1928. Serial No. 27,019. Term of patent 3½ years.



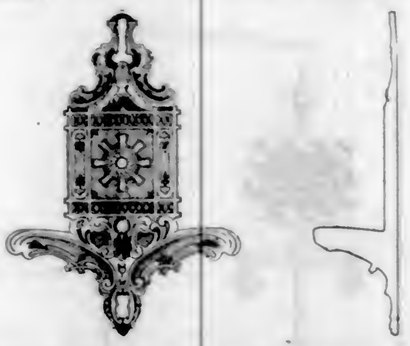
The ornamental design for a jar or similar container, as shown.

75,955. WRIST WATCH. HARRY I. CRAMER, Dayton, Ohio, assignor to The Sterling Jewelry Company, Dayton, Ohio, a Corporation of Ohio. Filed Feb. 20, 1928. Serial No. 25,494. Term of patent 7 years.



The ornamental design for a wrist watch, as shown.

75,956. HIGHWAY SIGNAL FOR TOY RAILWAYS. JAMES E. CUFF, Chicago, Ill., assignor to American Flyer Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed June 2, 1928. Serial No. 26,967. Term of patent 7 years.



The ornamental design for a highway signal for toy railways, as shown.

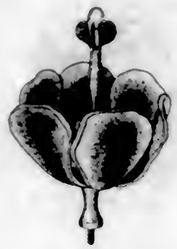
75,957. DANGER SIGNAL FOR TOY RAILWAYS. JAMES E. CUFF, Chicago, Ill., assignor to American Flyer Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed June 2, 1928. Serial No. 26,968. Term of patent 7 years.

The ornamental design for a danger signal for toy railways, as shown.

75,958. LIGHTING-FIXTURE WALL BRACKET OR ARTICLE OF ANALOGOUS NATURE. JOHN DI GAUDIO, Brooklyn, N. Y., assignor to Modern Lighting Fixture Co., Inc., a Corporation of New York. Filed June 2, 1928. Serial No. 26,978. Term of patent 3½ years.

The ornamental design for a lighting-fixture wall bracket or article of analogous nature, substantially as shown.

75,959. CHANDELIER. JOHN DI GAUDIO, Brooklyn, N. Y., assignor to Modern Lighting Fixture Co., Inc., a Corporation of New York. Filed June 2, 1928. Serial No. 26,979. Term of patent 3½ years.



The ornamental design for a chandelier substantially as shown and described.

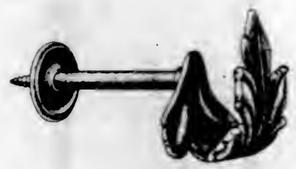
75,960. DRAPERY-POLE END. AUGUST DLOUHY, Wallingford, Conn., assignor to H. L. Judd Company, Inc., Wallingford, Conn., a Corporation of Delaware. Filed May 2, 1928. Serial No. 26,533. Term of patent 3½ years.

The ornamental design for a drapery pole end, as shown.

75,961. DRAPERY-POLE END. AUGUST DLOUHY, Wallingford, Conn., assignor to H. L. Judd Company, Inc., Wallingford, Conn., a Corporation of Delaware. Filed May 2, 1928. Serial No. 26,534. Term of patent 3½ years.

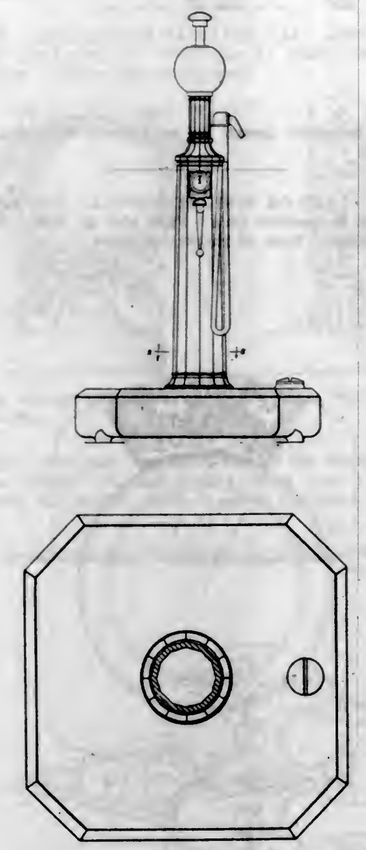
The ornamental design for a drapery pole end, as shown.

75,962. DRAPERY-POLE END. AUGUST DLOUHY, Wallingford, Conn., assignor to H. L. Judd Company, Inc., Wallingford, Conn., a Corporation of Delaware. Filed May 2, 1928. Serial No. 26,535. Term of patent 3½ years.



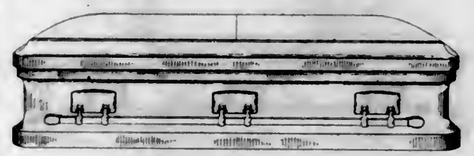
The ornamental design for a drapery pole end, as shown.

75,963. DRAPERY-POLE BRACKET. AUGUST DLOUHY, Wallingford, Conn., assignor to H. L. Judd Company, Inc., Wallingford, Conn., a Corporation of Delaware. Filed May 2, 1928. Serial No. 26,537. Term of patent 3½ years.



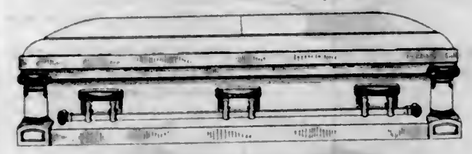
The ornamental design for a drapery pole bracket, as shown.

75,964. DRAPERY-POLE BRACKET. AUGUST DLOUHY, Wallingford, Conn., assignor to H. L. Judd Company, Inc., Wallingford, Conn., a Corporation of Delaware. Filed May 2, 1928. Serial No. 26,538. Term of patent 3½ years.



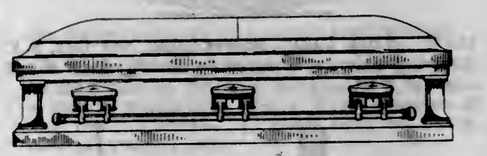
The ornamental design for a drapery pole bracket, as shown.

75,965. GASOLINE-PUMPING APPARATUS. EARL E. EICKMEYER and HOWARD L. JONES, Dayton, Ohio, assignors to The Dayton Pump Manufacturing Company, Dayton, Ohio, a Corporation of Ohio. Filed Aug. 15, 1927. Serial No. 23,090. Term of patent 7 years.



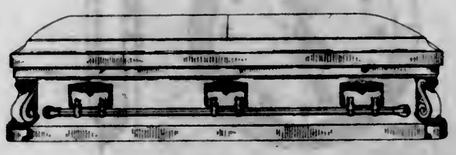
The ornamental design for a gasoline pumping apparatus, as shown.

75,966. BURIAL CASKET. JOSEPH E. FALCK, Pittsburgh, Pa., assignor to National Casket Company, Pittsburgh, Pa., a Corporation of New York. Filed June 5, 1928. Serial No. 26,998. Term of patent 3½ years.



The ornamental design for a burial casket, as shown.

75,967. BURIAL CASKET. JOSEPH E. FALCK, Pittsburgh, Pa., assignor to National Casket Company, Pittsburgh, Pa., a Corporation of New York. Filed June 5, 1928. Serial No. 26,999. Term of patent 3½ years.

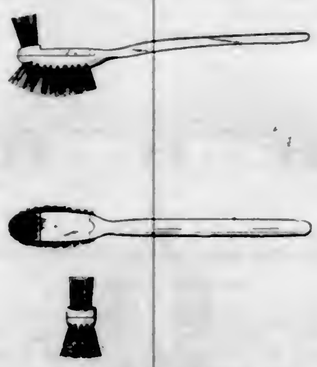


The ornamental design for a burial casket, as shown.

75,968. BURIAL CASKET. JOSEPH E. FALCK, Pittsburgh, Pa., assignor to National Casket Company, Pittsburgh, Pa., a Corporation of New York. Filed June 5, 1928. Serial No. 27,000. Term of patent 3½ years.

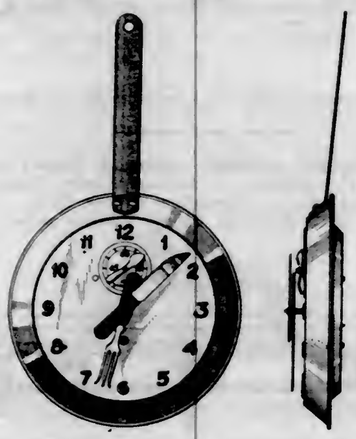
The ornamental design for a burial casket, as shown.

75,969. BURIAL CASKET. JOSEPH E. FALCK, Pittsburgh, Pa., assignor to National Casket Company, Pittsburgh, Pa., a Corporation of New York. Filed June 5, 1928. Serial No. 27,001. Term of patent 3½ years.



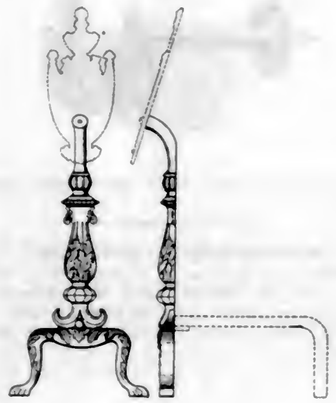
The ornamental design for a burial casket, as shown.

75,970. BURIAL CASKET. JOSEPH E. FALCK, Pittsburgh, Pa., assignor to National Casket Company, Pittsburgh, Pa., a Corporation of New York. Filed June 5, 1928. Serial No. 27,002. Term of patent 3½ years.



The ornamental design for a burial casket as shown.

75,971. DENTURE BRUSH. HARRY W. FAUBERT and EDWARD E. WHEELOCK, Woonsocket, R. I. Filed Mar. 20, 1928. Serial No. 25,932. Term of patent 14 years.

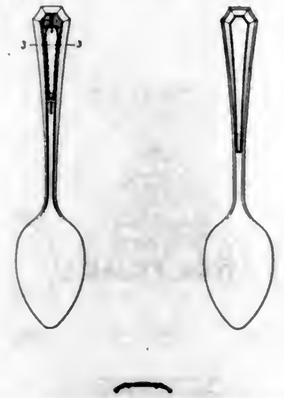


The ornamental design for a denture brush, as shown.

75,972. CLOCK CASE. EUGENE GARAY, New York, N. Y. Filed May 10, 1927. Serial No. 21,919. Term of patent 14 years.

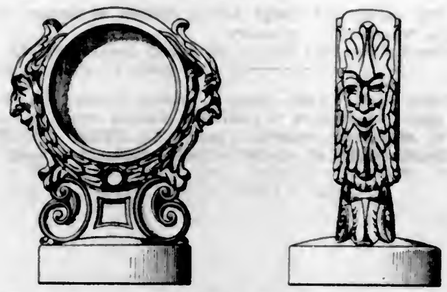
The ornamental design for a clock case, as shown.

75,973. ANDIRON. HENRY JOHN GROSS, Chicago, Ill. Filed Apr. 6, 1928. Serial No. 26,155. Term of patent 7 years.



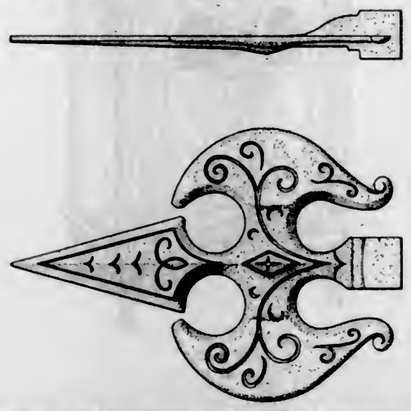
The ornamental design for an andiron as shown and described.

75,974. PLATE OR SIMILAR ARTICLE. MATTHEW A. HANSE, Barnesville, Ohio. Filed May 31, 1928. Serial No. 26,936. Term of patent 3½ years.



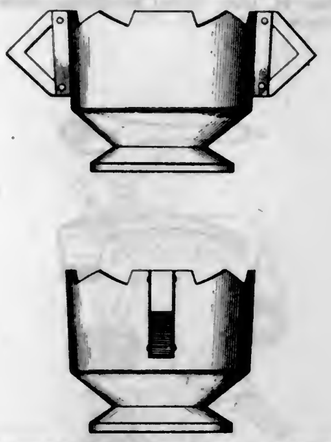
The ornamental design for a plate or similar article, as shown and described.

75,975. SPOON OR SIMILAR ARTICLE. HENRIK HILLBOM, Wallingford, Conn., assignor to R. Wallace & Sons Mfg. Co., Wallingford, Conn., a Corporation. Filed May 11, 1928. Serial No. 26,636. Term of patent 7 years.



The ornamental design for a spoon or similar article as shown.

75,976. AUTOMOBILE RADIATOR CAP. IRWIN HUEBNER, Allentown, Pa. Filed Jan. 11, 1928. Serial No. 24,809. Term of patent 14 years.



The ornamental design for an automobile radiator cap, as shown.

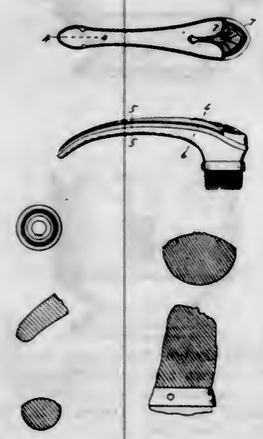
75,977. END FOR DRAPERY POLES OR RODS. GUNNAR MADVIG, Oakland, Calif. Filed Apr. 18, 1928. Serial No. 26,372. Term of patent 3½ years.

The ornamental design for an end for drapery poles or rods substantially as shown.

75,978. BOWL OR SIMILAR ARTICLE OF SILVERWARE. LOUIS MAUTNER, Brooklyn, N. Y. Filed May 21, 1928. Serial No. 26,782. Term of patent 7 years.

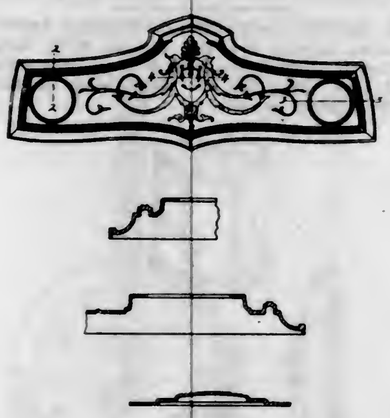
The ornamental design for a bowl or similar article of silverware, as shown and described.

75,979. CUSHION STOOL. HERBERT H. METZGAR, Los Angeles, Calif. Filed Dec. 15, 1927. Serial No. 24,492. Term of patent 14 years.



The ornamental design for a cushion stool, as shown.

75,980. BOTTLE CONTAINER OR SIMILAR ARTICLE. CHARLES LEONARD PFEIFFER, Bayside, N. Y., assignor to Richard Hudnut, New York, N. Y., a Corporation of New York. Filed Feb. 21, 1928. Serial No. 25,529. Term of patent 14 years.



The ornamental design for a bottle container or similar article.

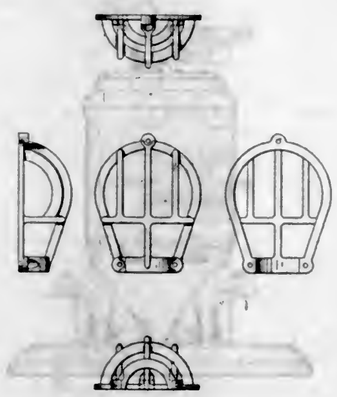
75,981. DOOR-WINDOW REGULATOR HANDLE. JOHN J. PUNKE, Detroit, Mich., assignor to Hupp Motor Car Corporation, Detroit, Mich., a Corporation of Michigan. Filed May 28, 1928. Serial No. 26,893. Term of patent 7 years.

The ornamental design for a door window regulator handle, substantially as shown.

75,982. DOOR-CONTROL GARNISH PANEL. JOHN J. PUNKE, Detroit, Mich., assignor to Hupp Motor Car Corporation, Detroit, Mich., a Corporation of Michigan. Filed May 28, 1928. Serial No. 26,894. Term of patent 7 years.

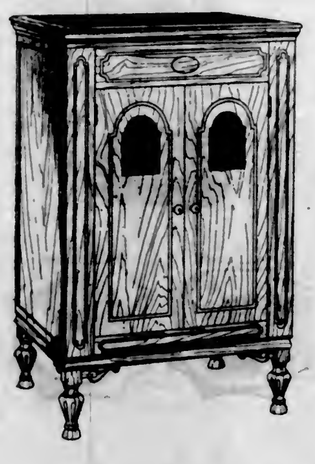
The ornamental design for a door control garnish panel, substantially as shown.

75,983. EMBLEM OR SIMILAR ARTICLE. EFFIE R. REDMAN, Chicago, Ill., assignor to Supreme Guardian Council of the Order of Job's Daughters, Omaha, Nebr. Filed Jan. 4, 1927. Serial No. 20,277. Term of patent 14 years.



The ornamental design for an emblem or similar article, substantially as shown.

75,984. GOLF TEE. OTTO F. REICH, Chicago, Ill., assignor of one-third to Charles F. Church and one-third to William T. Church, Chicago, Ill. Filed Apr. 18, 1928. Serial No. 26,367. Term of patent 14 years.

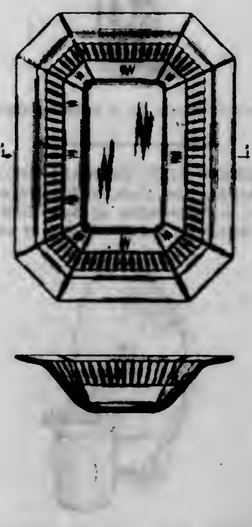


The ornamental design for a golf tee as shown.

75,985. LIGHT-BULB GUARD MEMBER. JEROME B. ROCKHILL, New York, N. Y. Filed May 18, 1928. Serial No. 26,730. Term of patent 3½ years.

The ornamental design for a light bulb guard member substantially as shown.

75,986. STOVE. ARTHUR A. ROESCH, Belleville, Ill., assignor to Roesch Enamel Range Co., Belleville, Ill., a Corporation of Illinois. Filed Apr. 30, 1928. Serial No. 26,519. Term of patent 7 years.



The ornamental design for a stove as shown.

75,987. DISPLAY SIGN. PETER JAY SCHELS, Fort Worth, Tex. Filed Sept. 23, 1927. Serial No. 25,534. Term of patent 7 years.

The ornamental design for a display sign as shown.

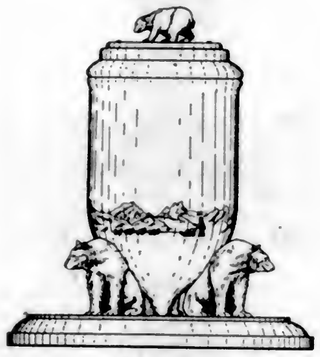
75,988. SQUARE BAKER. ELLSWORTH H. SEBRING, Sebring, Ohio, assignor to The E. H. Sebring China Company, Sebring, Ohio, a Corporation of Ohio. Filed Dec. 2, 1926. Serial No. 19,905. Term of patent 7 years.

The ornamental design for a square baker, as shown.

75,989. LAMP. ARTHUR VON FRANKENBERG, New York, N. Y., assignor to Frankart, Inc., New York, N. Y., a Corporation of New York. Filed May 4, 1928. Serial No. 26,567. Term of patent 3½ years.

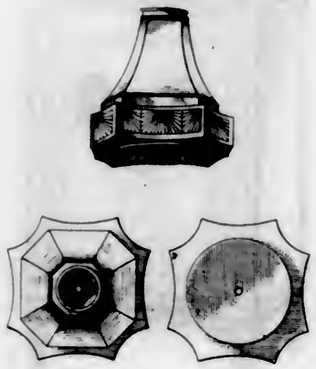
The ornamental design for a lamp as shown.

75,990. SMOKING STAND. ARTHUR VON FRANKENBERG, New York, N. Y., assignor to Frankart, Inc., New York, N. Y., a Corporation of New York. Filed May 18, 1928. Serial No. 26,737. Term of patent 3½ years.



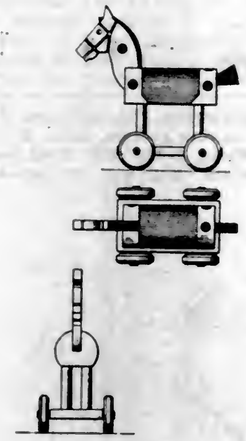
The ornamental design for a smoking stand as shown.

75,991. LIGHTING-FIXTURE WALL BRACKET. WALTER VON NESSEN, New York, N. Y., assignor to Efcolite Corporation, a Corporation of New York. Filed May 24, 1928. Serial No. 26,836. Term of patent 7 years.



The ornamental design for a lighting-fixture wall bracket substantially as shown and described.

75,992. DISPLAY CONTAINER OR SIMILAR ARTICLE. GEORGE R. WEBBER, Augusta, Me. Filed Mar. 17, 1928. Serial No. 25,899. Term of patent 14 years.



The ornamental design for a display container or similar article, as shown.

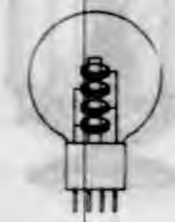
75,993. LIGHTING FIXTURE. GEORGE RICHARD WINKEL, Philadelphia, Pa., assignor to N. E. Henderson & Son, Incorporated, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Apr. 25, 1928. Serial No. 26,449. Term of patent 14 years.

The ornamental design for a lighting fixture, as shown.

75,994. FIGURE TOY. CHARLOTTE L. YALE and ELEANOR P. VANCE, Tryon, N. C. Filed May 8, 1928. Serial No. 26,610. Term of patent 7 years.

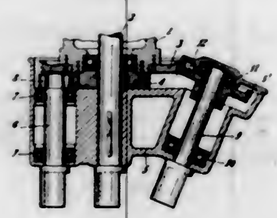
The ornamental design for a figure toy, as shown.

75,995. LIGHTING FIXTURE. JOSEPH ZWEIG, Brooklyn, N. Y., assignor to Metropolitan Lamp Co. Inc., New York, N. Y., a Corporation of New York. Filed May 19, 1928. Serial No. 26,767. Term of patent 3½ years.



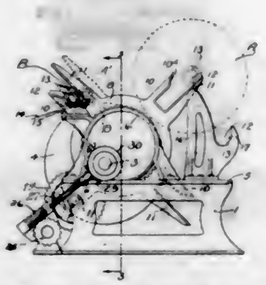
The ornamental design for a lighting fixture substantially as shown.

PATENTS



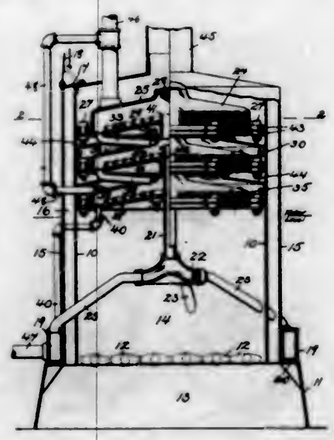
GRANTED AUGUST 7, 1928.

1,679,341. DETECTOR CONDENSER. JOHN JAMES AERYNGER, Brooklyn, N. Y. Filed Feb. 24, 1922. Serial No. 539,002. 3 Claims. (Cl. 250—27.5.)



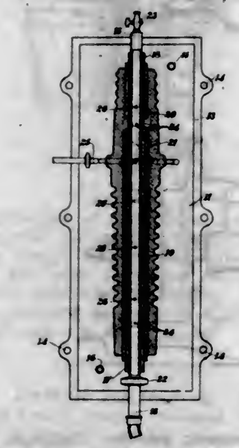
2. A vacuum tube device for detecting and amplifying wireless electric waves, comprising an evacuated vessel, a filament therein, a plurality of groups of metallic plates spaced apart from each other and in alignment parallel with and surrounding said filament, arranged in parallel concentric relation with each other, said plates being joined to form alternate and consecutive groups.

1,679,342. MACHINE FOR STIRRING AND BEATING DOUGH AND LIKE MATERIALS. FRIEDRICH AESCHBACH, Aarau, Switzerland, assignor to The Artofex Corporation, New York, N. Y. Filed Apr. 13, 1926, Serial No. 101,619, and in Switzerland Apr. 18, 1925. 2 Claims. (Cl. 74—34.)



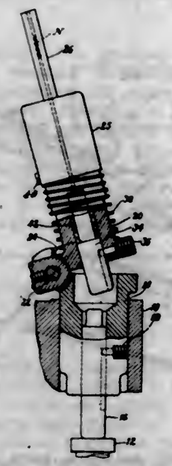
1. In a device of the kind and for the purpose described, the combination of a rotatable central shaft, a head rotatable about the central shaft, a spindle for carrying an implement rotatably mounted in said head parallel with said shaft, and a second spindle for carrying an implement rotatably mounted in said head at an angle with said shaft, which shaft extends downwards beyond said head and is adapted to carry an implement, and means for rotating said spindles each about its longitudinal axis when revolving about the central shaft, substantially as described.

1,679,343. MECHANISM FOR REELING PAPER AND THE LIKE. ALONZO ALDRICH, Beloit, Wis., assignor to Beloit Iron Works, Beloit, Wis. Filed Dec. 15, 1923. Serial No. 680,819. 9 Claims. (Cl. 242—64.)



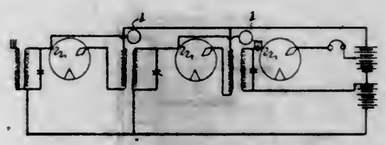
3. In a mechanism of the class described, a frame, material propelling means thereon, movable means outside of the propelling means for supporting a plurality of material receiving reels, means on the frame for supporting said last mentioned means, and means driven from the propelling means and extending inside the supporting means for operating the reel supporting means.

1,679,344. STEAM BOILER. EARL S. ALEXANDER and CARL Z. ALEXANDER, Newark, N. J., assignors, by mesne assignments, to Edwin C. Seward, Jersey City, N. J. Filed Jan. 15, 1921. Serial No. 437,415. 27 Claims. (Cl. 122—40.)



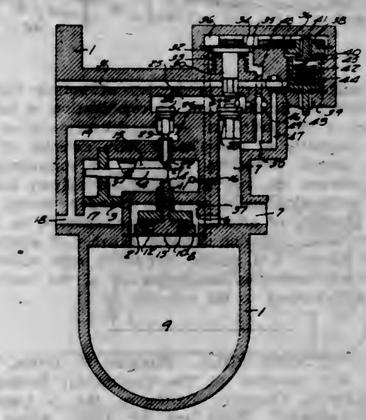
5. A steam boiler comprising a reservoir having a central open space at the base of the boiler, a geyser tube extending above the water level in said reservoir, heating means in the central open space of said reservoir, a header over said heating means into which the geyser tube delivers water, means for conducting water from the reservoir to the geyser tube and heating it more than the water in the reservoir, and means for conducting water back into the reservoir from said header.

1,679,345. METHOD AND APPARATUS FOR CASTING CERAMIC PIECES. ARTHUR O. AUSTIN, Barberton, Ohio, assignor, by mesne assignments, to The Ohio Brass Company, Mansfield, Ohio, a Corporation of New Jersey. Filed July 2, 1926. Serial No. 120,091. 15 Claims. (Cl. 25—129.)



1. The method of manufacturing ceramic articles comprising the steps of depositing plastic material from a slip about a yielding core and removing the core from the formed piece.

1,679,346. SUPPORT. WILLIAM RODERICK BARCLAY, Leicester, England, assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed June 20, 1924. Serial No. 721,192, and in Great Britain Nov. 17, 1923. 11 Claims. (Cl. 1—32.)

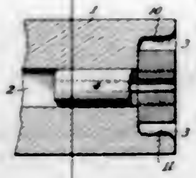


1. A work-support comprising supporting members movable independently longitudinally of the work-support under the influence of the work, and retaining means controlled in such movement for securing a member against movement.

1,679,347. RADIOCIRCUITS. ROBERT BELL, Hanover, Ontario, Canada. Filed Sept. 7, 1926. Serial No. 134,018. 1 Claim. (Cl. 179—171.)

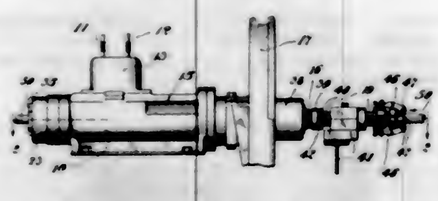
An electric circuit arrangement for a radio receiving set employing tuned radio-frequency amplification including a tuning condenser and a radio frequency transformer wound on a hollow core, comprising means for capacitatively stabilizing the circuit for short wave lengths the transformer being positioned so that as the movable plates of the tuning condenser are withdrawn from between the stationary plates of the condenser they dip into the hollow core of the transformer and more or less neutralize the stabilizing effect of the aforesaid stabilizing means.

1,679,348. DISTRIBUTOR FOR FLUID-PRESSURE BRAKES. DOBRIVOJE BOŽIC, Belgrade, Servia. Filed Feb. 23, 1927, Serial No. 170,159½, and in France Feb. 23, 1926. 5 Claims. (Cl. 303—39.)



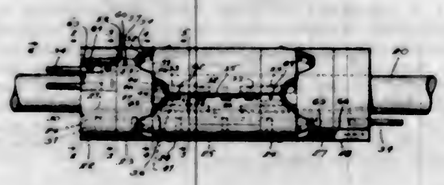
2. A compressed air brake distributor comprising an intermediate chamber between the main pipe, the auxiliary reservoir and the brake cylinder characterised by an outlet valve which allows air from the pipe to pass into the brake cylinder as soon as the admission valve is open and which is closed by the piston rod of the commutator piston located between the isolated chamber and the pipe as soon as the difference of pressures on it becomes greater than the tension of the spring.

1,679,349. METHOD OF FORMING PROJECTIONS IN RECESSES. GEORGE BROWN, Oneonta, and ABRAHAM B. APPLER, Albany, N. Y. Filed May 7, 1924. Serial No. 711,735. 2 Claims. (Cl. 29—148.)



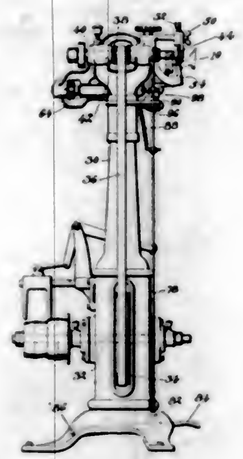
1. The herein described method of forming an irregular shaped recess in a crank pin or the like having a recess

in the end thereof, which consists in placing in said recess a die of the shape to form the irregular shaped recess and of a size not to entirely fill the recess, then filling



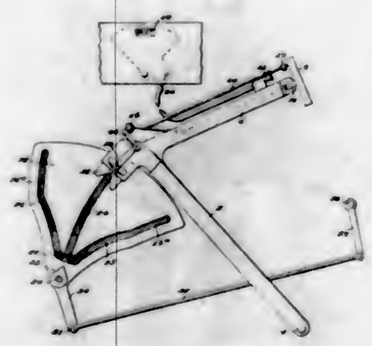
the space between the die and the wall of the recess with metal, and then securing the metal received in the space to the wall of the recess.

1,679,350. MACHINE FOR EXTRUDING TUBULAR ARTICLES. CHARLES T. DICKEY, Elizabeth, N. J., assignor to Rodic Rubber Company, Garwood, N. J., a Corporation of New Jersey. Filed Jan. 26, 1926. Serial No. 83,937. 1 Claim. (Cl. 18—14.)



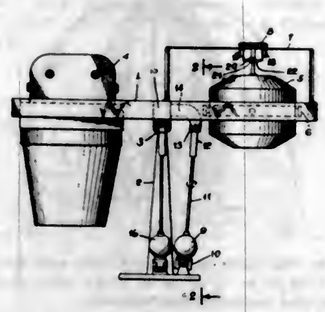
In a machine for the production of hollow tubular devices from plastic materials, in combination, a hollow feed worm, a die positioned at the delivery end of the worm, a plurality of assembled collars exterior of the die and spaced therefrom forming an uninterrupted chamber between the feed worm and the delivery end of the die, a longitudinally movable mandril within the worm, a plurality of pivoted centering members, an idler carried by each centering member capable of abutment upon the mandril and means carried by each centering member for determining the inclination of the centering member with respect to the mandril.

1,679,351. CUTTING ROLL. CHARLES W. DORM, Baltimore, Md., assignor to The Continental Roofing & Manufacturing Company, Baltimore, Md., a Corporation of Delaware. Filed Apr. 13, 1926. Serial No. 101,646. 18 Claims. (Cl. 164—28.)



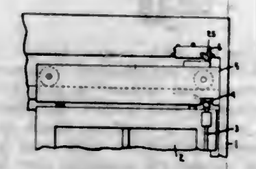
4. A roll for cutting a strip from a sheet, comprising a shaft, a plurality of cutting elements adjustably mounted on said shaft and attaching means carried by certain of said elements for the reception of additional cutting elements, whereby strips of varying widths may be formed as desired.

1,679,352. TRIMMING MACHINE. HARRY DUCKWORTH, Overland, Mo., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed June 14, 1927. Serial No. 198,714. 13 Claims. (Cl. 12—88.)



1. A toplift-trimming machine comprising a power-operated trimming cutter arranged to trim the contour of a toplift attached to a heel, an angularly adjustable tread-rest, and means arranged to shift said tread-rest back and forth from one to the other of two operative positions angularly related to each other and to maintain the tread-rest in one of said positions.

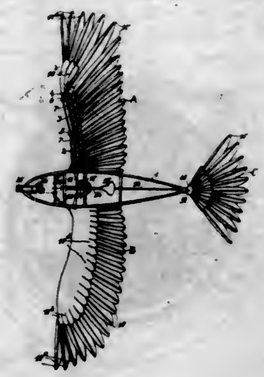
1,679,353. SELECTIVE-GEAR-SHIFTING MECHANISM. ROBERT N. DULANEY, Blountville, Tenn. Filed July 14, 1926. Serial No. 122,381. 7 Claims. (Cl. 74—58.)



1. In a gear shift control a clutch, a clutch operating lever, a pedal mounted to turn upon two intersecting axes on said lever, and independent connections from said pedal to gear selecting mechanism, one of said connections being operable when the pedal is rocked about one axis and the other connection being operable when the pedal is rocked about the other axis.

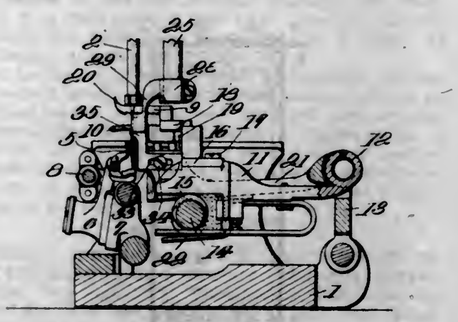
1,679,354. GYROSCOPIC CONTROL OF CAMERAS AND OTHER OPTICAL DEVICES. SHERMAN M. FAIRCHILD and EDMUND R. MORTON, New York, N. Y.; said Morton assignor to said Fairchild. Filed Mar. 1, 1923. Serial No. 622,036. 1 Claim. (Cl. 74—78.)

The combination of an aerial camera and a universal support therefor, an erected gyroscope universally mounted in the camera support, and automatic means substantially free from mechanical reaction upon the gyroscope and responsive to relative movement of the camera to maintain the latter in a predetermined orientation with respect to the gyroscope.



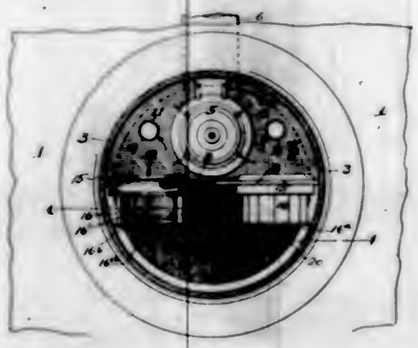
1,679,355. SWITCH MECHANISM. THOMAS E. GRIFFITH and LEE L. DODDS, Cleveland, Ohio, assignors to The W. S. Tyler Company, Cleveland, Ohio, a Corporation of Ohio. Filed Mar. 5, 1923. Serial No. 623,058. 3 Claims. (Cl. 200—54.)

1. The combination of a pivotally mounted switch member; contact members cooperating therewith; an operating link connected to said switch member; a horizontally sliding member consisting of an inclined plate adapted to engage the end of said link to rock said switch member about its pivot when said member is moved in one direction; and a pivoted trackway cooperating with said inclined trackway to hold said link and switch member in contacting relation during a part of the travel of said member in the opposite direction.



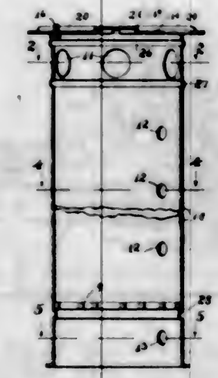
1,679,356. AEROPLANE. HEINRICH GRUNEWALD, Dissen, Germany. Filed Dec. 22, 1927. Serial No. 241,875, and in Germany May 3, 1927. 8 Claims. (Cl. 244—20.)

1. In an aeroplane, the combination with a frame thereof, an aviator's seat therein, a steering lever in front of said seat, two lateral striking wings and a tail pivotally connected to said frame, of a rotary gearing for operating said wings, a skeleton for each wing consisting of bars linked to each other at different angles, parallelogram guides for tightening said bars, adjustable wing feathers and a thumb wing on said skeleton, like the wing feathers and the thumb wing of birds, said thumb wing being turnable up and down during the wing stroke about the front edge of the wing and the outer wing feathers participating in said turning movement thereby creating a troughlike formation of the wing during its stroke, and a pulling cord to intentionally adjust said thumb wing and outer wing feathers also



from said steering lever, said tail consisting of feathers like a bird's tail and being adjustable from the aviator's seat to the right and left and in up- and downward directions while its feathers can be spread and closed.

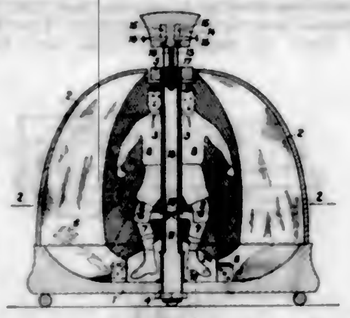
1,679,357. SEWING MACHINE. NATHAN E. HANSON, Chicago, Ill., assignor to Union Special Machine Company, Chicago, Ill., a Corporation of Illinois. Filed Oct. 8, 1923. Serial No. 667,261. 2 Claims. (Cl. 112—207.)



1. The combination of a work support, stitch-forming mechanism including a single reciprocating needle, a feeding mechanism including an upper feed dog and a lower feed dog, said feed dogs being located at one side of said needle and operating to clamp and feed the material which is being stitched, a presser foot at one side of said feed dog adjacent the needle and adapted to cooperate with the work support in the holding of the material during the idle stroke of the feed dogs, said presser foot having a depending member rigid therewith projecting beneath the plane of the work support and serving to guide the edge of the material, said lower feed dog having an upwardly projecting portion adapted to freely engage the depending portion on the presser foot for raising the presser foot, said depending member on the presser foot and said upwardly projecting portion of the feed dog being so formed and timed as to lift the presser foot from the material before the feed dog clamps the material, and while the needle is still in the material on its retracting stroke, whereby the material may be turned about the needle as a pivot to aid in turning sharp corners or curves.

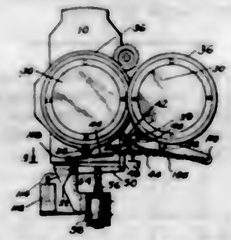
1,679,358. STEAM PURIFIER FOR LOCOMOTIVE BOILERS. CHARLES GILBERT HAWLEY, Chicago, Ill., assignor to Centrifix Corporation, Cleveland, Ohio, a Corporation of Ohio. Filed Nov. 28, 1924. Serial No. 752,725. 5 Claims. (Cl. 122—492.)

1. A locomotive boiler, its steam dome and dry pipe positioned in the latter, in combination with a partial floor in said dome, a vertical partition which, with said floor, divides the dome into wet and dry steam compartments, said dry pipe being located in the dry steam compartment, and a steam purifier opening through said vertical partition.



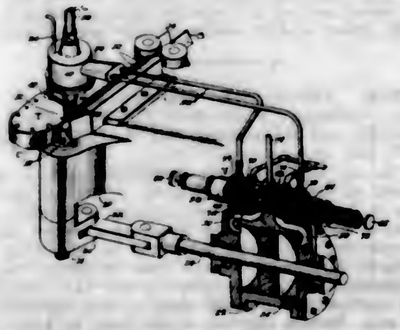
1,679,359. ORCHARD HEATER. BERNARD O. JESSEN, Los Angeles, Calif. Filed June 29, 1926. Serial No. 119,373. 3 Claims. (Cl. 126—59.5.)

2. In an orchard heater, a casing having outlet openings towards all lateral sides for the products of combustion and having inlet openings for air supply at points below the first-named openings and along one side of the casing only.



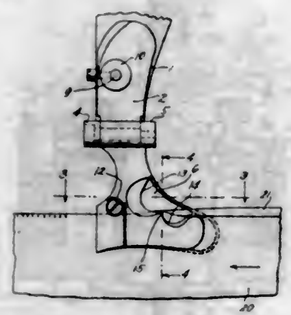
1,679,360. DIE-THROWING DEVICE. JACOB JUNG, Hamburg, Germany. Filed Dec. 3, 1927, Serial No. 237,548, and in Germany Dec. 9, 1926. 6 Claims. (Cl. 273—145.)

1. A die throwing device of the character described, comprising a base, a glass bell supported on said base, an upright tube connected to the base and projecting through said bell, radial partitions dividing the space under the bell into chambers, brackets connected to the tube in each chamber, a cranked die throwing hammer suspended pivotally from said brackets with its crank arm projecting through a slot into the tube, a rod guided within the tube for operating the hammer by engagement with its crank arm, and a knob supported by a



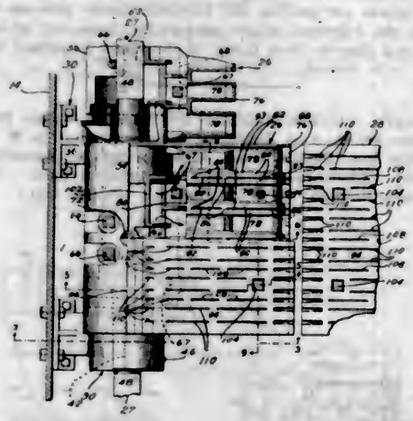
spring on the upper end of the tube and over the ends of the rods so as to allow of being used for depressing the rods and operating the hammers.

1,679,361. SPOTLIGHT. JOHN H. KLIEGL, New York, N. Y., assignor to Kliegl Bros. Universal Electric Stage Lighting Co., Inc., New York, N. Y., a Corporation of New York. Filed Dec. 14, 1926. Serial No. 154,701. 2 Claims. (Cl. 240—3.)



1. In combination with a spot light, a color screen, having operative and non-operative positions, a magnet, means connecting said magnet to said screen whereby upon energization of said magnet said screen is moved to operative position, a resilient device to return said screen to inoperative position when said magnet is de-energized, and means for assisting said magnet starting the movement of the screen from its inoperative to its operative position.

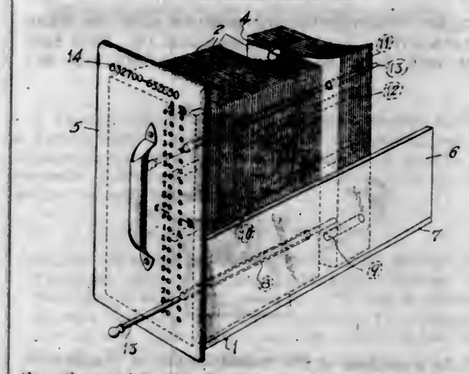
1,679,362. CONTROLLING MECHANISM. CUTLER D. KNOWLTON, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Apr. 18, 1924. Serial No. 707,523. 17 Claims. (Cl. 153—44.)



1. The combination with an operating member movable in its action upon the work, of a controlling member governed in its movement by the work in accordance with the position thereof, and means arranged to move the operating member at a rate varying progressively as the position of the controlling member varies.

1,679,363. WORK GUIDE FOR OVERSEAMING MACHINES. MAX KÖHLER, Limbach, Germany. Filed May 11, 1927. Serial No. 190,480. 2 Claims. (Cl. 112—20.)

1. A fabric guide and presser for overseaming machines, comprising a curl flattening member and a top edge fabric guide extending therethrough, said flattening member having a bevel provided with an irregular fabric encountering edge and a shoulder interrupting said bevel at an intermediate portion and presenting an edge in a plane at right angles to the plane of said irregular edge.

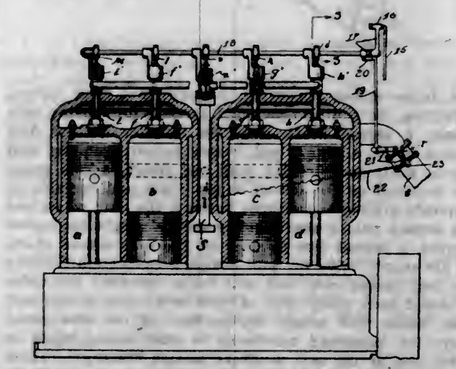


1,679,364. FURNACE. EDWIN LUNDGREN, Frederick, Md., assignor to Combustion Engineering Corporation, New York, N. Y., a Corporation of New York. Filed Oct. 16, 1923. Serial No. 668,799. 10 Claims. (Cl. 110—32.)

1. A furnace having, in combination, two brackets of hollow construction provided with bearings arranged in alinement, a rock shaft extending through said bearings in said brackets, and a dump grate of hollow construction mounted on said shaft between said brackets, said brackets and dump grate having registering openings in the adjacent sides thereof leading from the interior of said brackets and into the interior of said dump grate.

1,679,365. FILING OR INDEXING APPLIANCE. WILLARD D. MCFALL, East Orange, N. J. Filed Oct. 2, 1925. Serial No. 60,040. 5 Claims. (Cl. 129—16.1.)

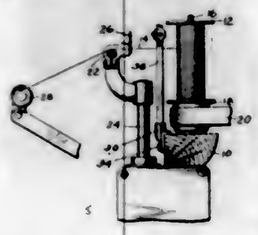
1. A plurality of series of information cards, each card of each series having a plurality of openings, all of the cards of each series having certain openings located identically with each other and with corresponding openings of the other series and another opening located differently from the corresponding openings of the other series, so that when said cards are placed in a packed relation all the openings of all the cards in one series will be in alinement with each other and at least one opening of each card of each series will be out of alinement with the corresponding openings of the cards of



the other series, whereby said openings may serve to indicate different series and as a signal should a card of one series be misfiled in another group, each card of each series having a different designating inscription composed of a plurality of characters and each of the openings representing one of said characters, the characters so represented being same for all of the cards of the same series.

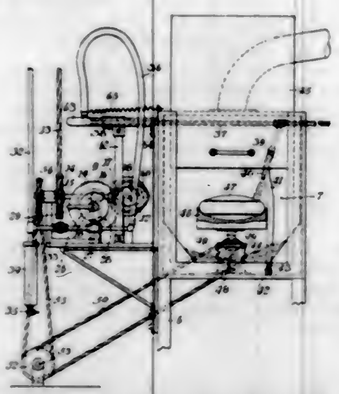
1,679,366. METHOD OF MAKING ALUMINUM SULPHATE. ROY MACKAY MEIKLEJOHN, Flushing, N. Y., assignor to General Chemical Company, New York, N. Y., a Corporation of New York. Filed Jan. 6, 1926, Serial No. 79,532, and in Canada Oct. 2, 1925. 14 Claims. (Cl. 23—123.)

4. In the art of making aluminum sulphate, the improvement which comprises causing reaction between an alumina-bearing material and sulphuric acid of such strength that substantially complete decomposition is effected and that the resulting product is basic and establishing and maintaining a temperature of approximately 178° C. throughout the reaction to preserve a liquid state in the reacting materials.



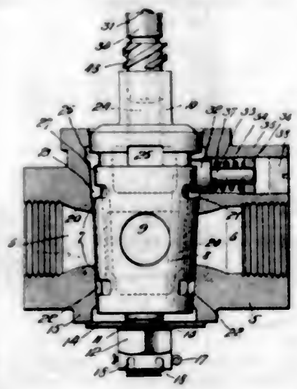
1,679,367. BRAKING DEVICE AND METHOD OF CAUSING BRAKING EFFECT. WILHELM MEYSENBURG, New York, N. Y. Filed Nov. 16, 1922, Serial No. 601,418, and in Germany Dec. 8, 1921. 13 Claims. (Cl. 123—97.)

1. The method of causing a braking effect upon a vehicle, driven by a multiple explosion motor, by turning said motor into a compressor, said method consisting in



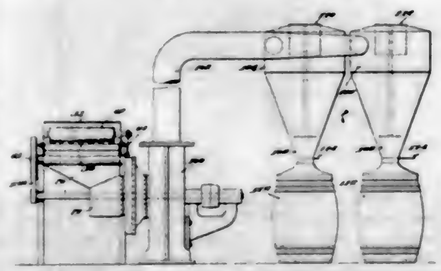
closing the exhaust pipe of the motor, putting the combustion chambers of each group of cylinders, the pistons of which move in unison, into communication with each other, and admitting air only into said combustion chambers by connecting the intake pipe for the gas supply with the atmospheric air.

1,679,368. DEVICE TO DETERMINE SIZE OF YARN PACKAGES. ASA E. MOON, Scranton, Pa. Filed Sept. 21, 1926. Serial No. 136,751. 7 Claims. (Cl. 242—39.)



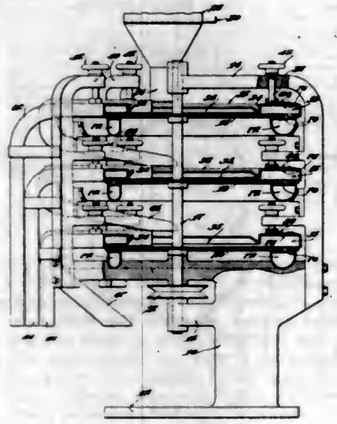
1. In a machine of the class described, in combination with means for winding yarn to form a package, means operable by the yarn before it is wound on the package for cutting said yarn when the package attains a predetermined size.

1,679,369. SAND-BLASTING APPARATUS. CHARLES F. MOTZ, Monaca, Pa., assignor to The Phoenix Glass Co., Monaca, Pa., a Corporation of West Virginia. Filed Oct. 30, 1926. Serial No. 145,137. 6 Claims. (Cl. 51—15.)



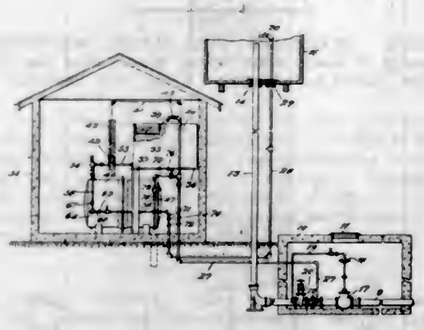
4. Glass-cutting apparatus, comprising a blast nozzle, a driving shaft, a cam mounted thereon for moving said nozzle, a second shaft, a pinion mounted on the first named shaft, a gear wheel loosely mounted on the said second shaft and meshing with the pinion, a cam member mounted on the second named shaft and operable to maintain driving engagement between the gear wheel and the second named shaft during only a single revolution thereof, a second cam member on the said named shaft, an air supply valve for said nozzle, a connection between the last named cam and said valve, whereby the valve is closed upon completion of each revolution of the said gear wheel, and means independent of the first-named shaft for imparting movement to said second shaft to cause one of the cam members carried thereby to effect driving connection between the said gear wheel and its shaft and cause the other cam to permit opening of the valve.

1,679,370. VALVE. SVEN JOHAN NORDSTROM, Oakland, Calif., assignor to Merco Nordstrom Valve Company, San Francisco, Calif., a Corporation of Delaware. Filed Apr. 30, 1927. Serial No. 187,729. 5 Claims. (Cl. 251—163.)



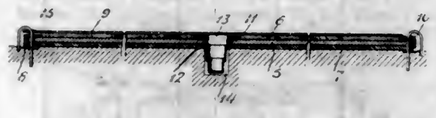
1. A valve comprising a casing having a passageway therethrough and a tapered plug seat formed transversely of the passageway, a tapered plug seated in the plug seat and having a hole adapted to register with the passageway, a cylindrical bolt slidingly mounted in the casing, means for yieldingly pressing the bolt toward the plug, a recess in the plug adapted to receive the inner end of the bolt to lock the plug in the casing, a lubricant reservoir in the plug communicating with the recess, and means for putting the lubricant under pressure to cause the lubricant to act against the inner end of the bolt and thereby force it out of the recess to permit the plug to be turned.

1,679,371. CONFECTIONERY APPARATUS. FRED FORREST PEASE, East Braintree, Mass., assignor to F. F. Pease Inc., Boston, Mass., a Corporation of Massachusetts. Filed Jan. 6, 1923. Serial No. 611,192. Renewed Nov. 30, 1927. 11 Claims. (Cl. 107—44.)



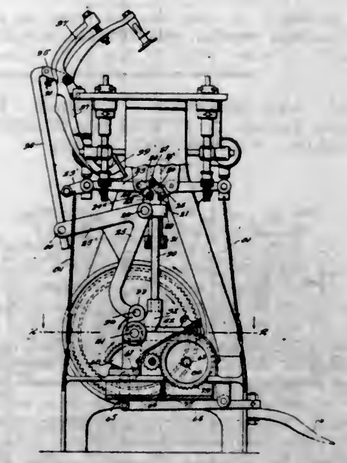
7. Apparatus for the manufacture of confectionery comprising a screen surface adapted to support a mass of starch with fondant centers embedded therein, means for inducing a current of air through the screen surface and mass of starch supported thereby to remove particles of starch and sugar surrounding the centers, a revolving screen located in the air current designed to separate particles of sugar from the starch and air, and means for finally separating the starch from the air.

1,679,372. GRADING AND SORTING APPARATUS. FRED FORREST PEASE, East Braintree, Mass., assignor to F. F. Pease Inc., Boston, Mass., a Corporation of Massachusetts. Filed Apr. 4, 1923, Serial No. 629,876. Renewed Apr. 22, 1926. 13 Claims. (Cl. 209—12.)



1. A grading and sorting apparatus comprising means for forming a peripheral grading slot of predetermined width, means for moving articles by centrifugal force against the slot and for maintaining the articles in moving contact with the slot for a substantial period, and means for collecting and discharging articles too large to pass through the slot.

1,679,373. FLUID-TREATING APPARATUS. WILLIAM A. POWNALL, Decatur, Ill. Filed Jan. 11, 1923. Serial No. 611,999. 10 Claims. (Cl. 210—40.)

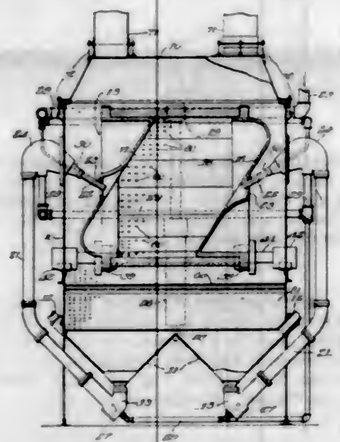


1. In fluid treating apparatus, a settling tank, a supply pipe containing a constriction thru which said settling tank is connected to a source of fluid supply, and means for introducing into said settling tank a treating solution of definite strength in quantities substantially proportioned to the amount of fluid passing from the source of supply to said settling tank, said means comprising a tank for the treating solution having a movable partition therein, a pipe connected to the supply pipe at a point in advance of the aforesaid constriction and leading to the solution tank on one side of the partition therein, and a pipe leading from the solution tank on the other side of the partition to the stream passing into the settling tank.

1,679,374. PORTABLE IN AND OUT DOOR PUTTING GREEN. RAYMOND H. REIRDEN, Sound Beach, Conn. Filed July 25, 1927. Serial No. 208,171. 4 Claims. (Cl. 273—36.)

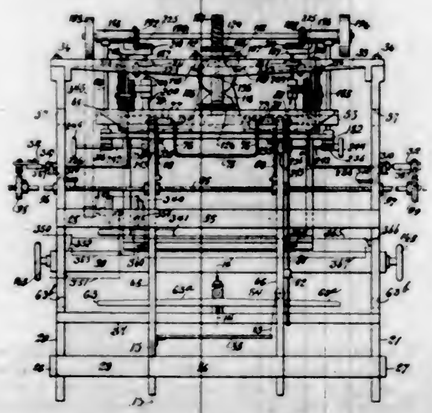
1. In a portable putting green, a flexible member having a putting surface and provided with an opening, and a collapsible cup mounted in said opening and capable of extension below said member and into a hole in the ground beneath said opening.

1,679,375. MACHINE FOR FOLDING THE EDGES OF TEXTILE AND SIMILAR ARTICLES. EDWARD B. ROBY, North Troy, N. Y., assignor to S. and R. Folding Machine Company, Inc., Green Island, N. Y., a Corporation of New York. Filed Aug. 29, 1925. Serial No. 53,246. 10 Claims. (Cl. 223—55.)



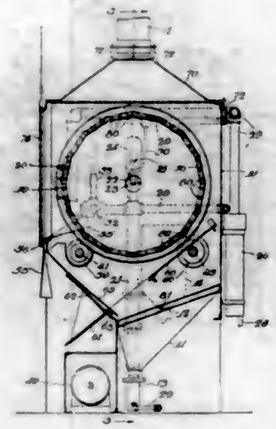
1. In a machine as characterized a driving mechanism comprising a reciprocating member; a crank arm operatively connected with said member; means for rocking said crank arm, said means embodying rotary concentric members disposed in spaced relation and power-driven continuously in relatively opposite directions; a lever arm operatively connected with said crank arm and adapted for alternately engaging said concentric members to be moved thereby.

1,679,376. APPARATUS FOR ABRADING. ROBERT ROSCOE, Clarendon Hills, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Oct. 7, 1924. Serial No. 742,114. 2 Claims. (Cl. 51—13.)



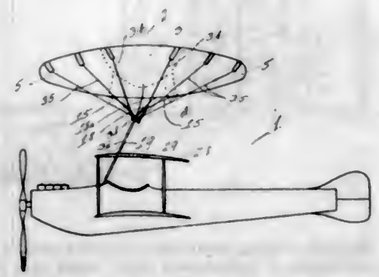
1. In an abrading apparatus, a compartment, a treating receptacle housed by the compartment containing an article to be treated, a nozzle arranged within said compartment and extending into the receptacle for directing

abrading material upon the surfaces of the article, and a second nozzle positioned within the other nozzle for directing a gaseous medium upon the surfaces of a treated



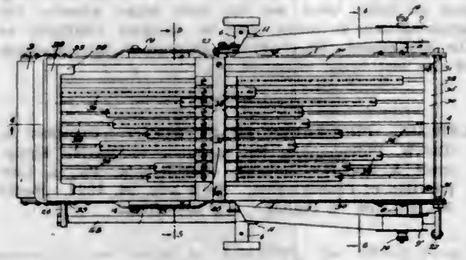
article to remove the loose material therefrom after the article has been abraded while confined within said receptacle.

1,679,377. SAW-SHARPENING MACHINE. BARNETT RUDOLFF, Bayonne, N. J. Filed July 27, 1926. Serial No. 125,199. 6 Claims. (Cl. 76—41.)



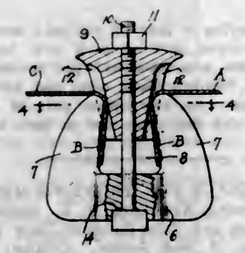
1. In a saw sharpening machine, the combination of a main frame, a slidable frame supported on one side of the main frame, a hinge plate pivoted in the machine on the side of the main frame opposite to the slidable frame, a pivot extending through the hinge plate, a beam guided on the pivot of the hinge plate, a driving shaft journaled in the machine over said hinge plate, means interposed between said shaft and beam to move the latter, other means coacting with the first means to turn said pivot, a pulley supported on the pivot, a sleeve extending from one end of the beam, an arm extending from said sleeve, a connection extending from said arm, a spindle journaled in said connection, a sharpening disc fastened to one end of the latter spindle and a pulley at its other end, a belt connecting the two pulleys and means to clamp a saw blade in the movable frame.

1,679,378. ABRADING APPARATUS. WILLIAM ROBERT SANDERS, Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Oct. 7, 1924. Serial No. 742,110. 3 Claims. (Cl. 51—13.)



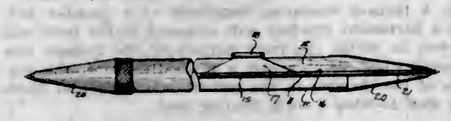
1. In an abrading apparatus, a treating chamber for housing an article to be treated, a cabinet inclosing said chamber having an opening therein through which the treated article is ejected therefrom, a hopper exterior to one side of the cabinet containing a supply of abrading material, means for conveying the material from said hopper into the treating chamber, and a receptacle communicating with said hopper and mounted within said cabinet for collecting the spent abrading material, said hopper being in continuous communication with the receptacle for maintaining the abrading material in said receptacle at a substantially constant level below the opening in said cabinet.

1,679,379. STABILIZER FOR FLYING MACHINES. ERNEST F. SANTO, Walla Walla, Wash. Filed Aug. 30, 1926. Serial No. 132,462. 1 Claim. (Cl. 244—21.)



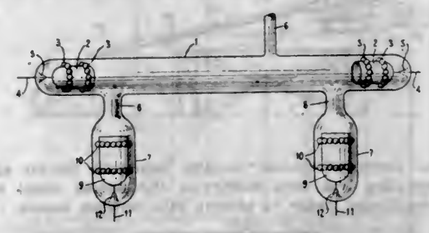
In a stabilizer, a flying machine, a collapsible gas bag comprising a plurality of compartments, said compartments consisting of upper and lower compartments, and end compartments, a gas supplying means carried by said flying machine and provided with means to inflate or deflate said compartments successively, a receptacle provided in said flying machine, a yoke supported by said bag, supporting cords attached to said bag and said flying machine and passed through said yoke, and arranged to uniformly collapse said bag and to draw said bag into said receptacle.

1,679,380. CODING AND DECODING APPARATUS. FRANK R. SEAVER, Pomona, Calif. Filed Oct. 8, 1924. Serial No. 742,333. 13 Claims. (Cl. 35—13.)



13. In a machine for printing coded and decoded messages, a plurality of parallel and longitudinally-shiftable rods each presenting the same regularly-arranged symbols of the same characters and also carrying arbitrarily arranged printing-types of said characters, said rods comprising two equal groups, and each of the symbols of each rod of one group being doubly paired with the printing-type of some different character of the corresponding rod of the other group.

1,679,381. TRACTOR WHEEL CLAMP. JOHANN CONRAD SELL, Detroit, Mich. Filed June 22, 1927. Serial No. 200,682. 2 Claims. (Cl. 301—38.)



1. A clamp of the character described comprising a female member having a substantially inverted U-shaped slot therein and an aperture communicating with the slot, an apertured wedge having grooves opposed to the walls of the slot in the female member, a bolt extending through the apertures of the female member and wedge, and a nut on the bolt.

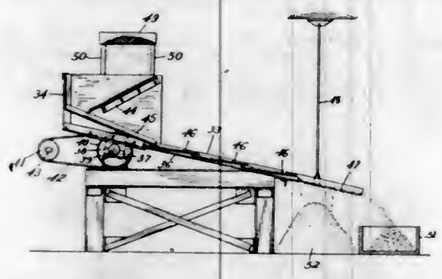
1,679,382. PENCIL. NELS P. SJOBRING, Milwaukee, Wis. Filed Sept. 11, 1924. Serial No. 737,018. 1 Claim. (Cl. 120—19.)

In a manually operated pencil, a sheet metal shell, an apertured conical end enclosing means longitudinally adjustable thereon, spaced parallel reentrant portions of the shell defining a longitudinal slot therein and a split lead-guiding tube, the said reentrant portions extending beyond the shell and through the aperture in the conical end enclosing means as a split tube having tapered upstanding supporting fins within the enclosing means, and means slidable in the tube for projecting a lead therefrom.

1,679,383. METHOD AND APPARATUS FOR EXHAUSTING VACUUM-TUBE-LAMP ENVELOPES. ROBERT C. SMALLEY, Arlington, N. J. Filed June 2, 1926. Serial No. 113,307. 11 Claims. (Cl. 176—122.)

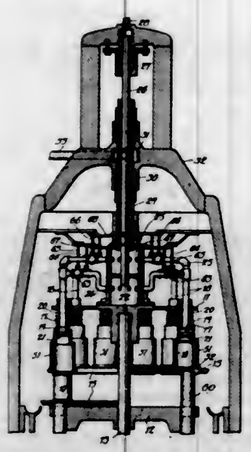
1. The method of producing a vacuum tube lamp which comprises removing gas from the interior of the lamp envelope while passing an electric current through the tube between a pair of electrodes in said gas, and removing said electrodes after passage of said current.

1,679,384. FACET TOOTH. HANS STAHL, Eisleben, Germany. Filed Mar. 12, 1926. Serial No. 94,108, and in Germany Mar. 17, 1925. 1 Claim. (Cl. 32—9.)



An artificial tooth comprising a facing having an incisal edge inclined toward its lingual face and having a dove-tailed recess opening through its incisal edge and lingual face and terminating inwardly of its gingival edge, said recess being of double-wedge formation in the directions from front to rear and from side to side of the tooth, said recess being of maximum width and minimum depth at its end opening through the incisal edge of the facing and thence decreasing in width and increasing in depth toward and being of minimum width and maximum depth at its end adjacent the gingival edge of the facing, and said recess having its inner wall inclined with relation to the labial face of the facing and having its side walls inclined to the plane of the longitudinal center of the facing and converging toward the lingual face of the facing and its inner end wall inclined in the direction of the gingival edge and labial face of the facing, and a backing plate having a dovetailed projection of a form corresponding to and adapted to fit within said recess of the facing and provided with an inclined projection lapping over upon the incisal edge of the facing.

1,679,385. APPARATUS FOR RECLAIMING METALS. THERON D. STAY and CHARLES O. TESSIER, Cleveland, Ohio, assignors, by mesne assignments, to Aluminum Company of America, Pittsburgh, Pa., a Corporation of Pennsylvania. Original application filed Oct. 28, 1921, Serial No. 511,021. Divided and this application filed Nov. 20, 1925. Serial No. 70,322. 11 Claims. (Cl. 88—92.)

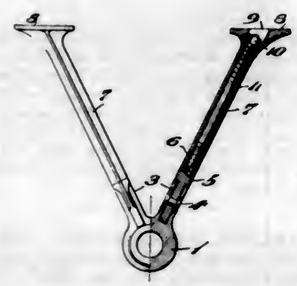


1. Apparatus, for use in the recovery of readily oxidisable metal from metal-containing dross, comprising in

combination, means for reducing highly heated dross to a finely divided condition thereby liberating molten

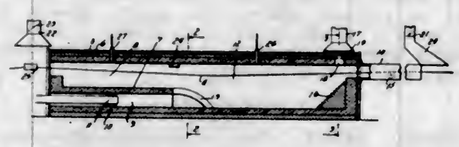
metal entrapped therein, movable means for quickly agglomerating and then solidifying the molten metal so liberated, and means to actuate said movable means.

1,679,386. PRESERVATION OF FOOD PRODUCTS. DWIGHT TENNEY, Brooklyn, N. Y., assignor, by mesne assignments, to Rector-Tenney Company, New York, N. Y. Filed Dec. 20, 1920. Serial No. 431,891. 5 Claims. (Cl. 226—20.)



1. A machine of the character disclosed comprising a rotatable turret adapted to carry a container, separate gas supply and suction chamber in the turret, a sliding bell adapted to form a closed space around said container, gas supply and suction lines leading from the chambers to said closed space, a valve in each of the lines, and cam means adapted to actuate the valves.

1,679,387. LAST-MEASURING STICK. LAURENCE E. TOPHAM, Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Nov. 28, 1922. Serial No. 603,831. 5 Claims. (Cl. 33—3.)

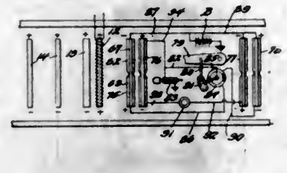


1. A last measuring stick comprising a body graduated in shoe size units, an abutment attached to said body, a second abutment sliding on said body, said abutments being arranged to caliper a last placed between them, and an index reading on the graduated body adjustably connected to said second abutment, said adjustable connection comprising a short scale granted positively and negatively in shoe size units but only several sizes long, and an index mark for the short scale, whereby the second-named abutment may be adjusted relatively to the first-named index by the amount of the extension of the last being measured.

1,679,388. PROPELLER SHAFT STRUT. CLEMENT A. TROTH, Philadelphia, Pa., assignor to Marine Equipment & Supply Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Aug. 24, 1926. Serial No. 131,176. 2 Claims. (Cl. 308—31.)

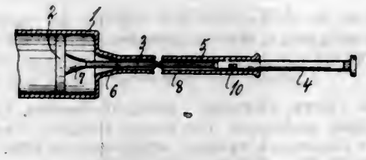
1. A strut having a pair of two-part arms arranged V-fashion the upper part of each arm being tubular and provided with a counter-sunk pad to receive a nut, a bolt passing through each arm and having screw-threaded relation with the upper part of each lower arm and a nut for the upper end of each bolt.

1,679,389. FURNACE FOR TREATING METAL. WILLIAM E. WATKINS, New York, N. Y., assignor to Copper Plate Sheet and Tube Company, New York, N. Y., a Corporation of New Jersey. Original application filed Jan. 6, 1927, Serial No. 159,337. Divided and this application filed June 25, 1927. Serial No. 201,317. 3 Claims. (Cl. 266—3.)



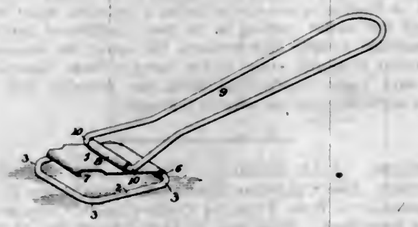
1. A furnace consisting essentially of a chamber having a horizontal dividing wall arranged in the front end thereof to divide the front portion of the furnace into a combustion chamber and a preheating zone, the portion of the chamber in the rear of said horizontal dividing wall forming a main heating zone.

1,679,390. AUTOMATIC TRAIN-CONTROL SYSTEM. BENJAMIN FRANKLIN WOODING, Montclair, N. J. Filed Oct. 1, 1925. Serial No. 59,869. 12 Claims. (Cl. 246—63.)



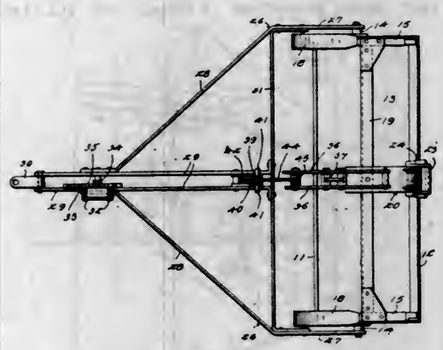
1. In an automatic train control system, a vehicle having two devices mounted thereon at longitudinally

spaced points, permanent magnets on the track operating said devices successively as the vehicle passes thereover, the forward of said devices having a retarded



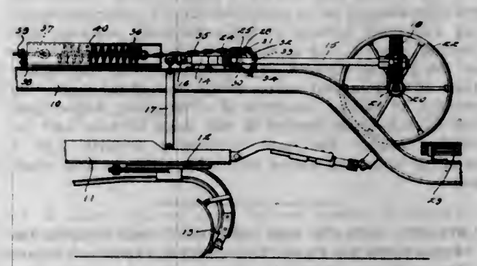
movement, and means for controlling the vehicle when the rear device is operated in advance of the return of the forward device to normal position.

1,679,391. INSTRUMENT FOR ADMINISTERING MEDICINES TO ANIMALS. NILS AAS, Skarnes, Norway. Filed Sept. 3, 1927, Serial No. 217,471, and in Germany Feb. 16, 1927. 8 Claims. (Cl. 128—264.)



1. An instrument for administering solid as well as liquid medicine and food to horses and other animals, comprising a tubular metal medicine container provided with a conical seat on one end thereof, a tubular metal guide extending from said container and communicating therewith, a piston slidably arranged in said container, said piston having a conical projection on one face thereof adapted to fit into said conical seat when said piston is at one end of said container, a rod on said piston freely slidable in said guide, and an operating handle on the outer end of said piston rod.

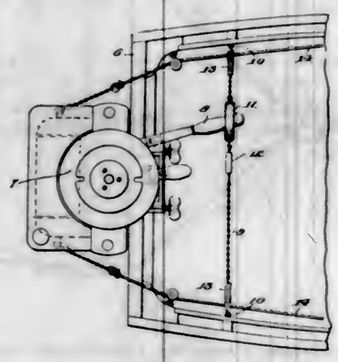
1,679,392. SCOURING DEVICE. SAMUEL APPLIN, Philadelphia, Pa. Filed May 4, 1925. Serial No. 27,669. 7 Claims. (Cl. 15—209.)



1. In a device of the character stated, a frame formed of wire in rectangular form, combined with a clamping plate having one end hinged to the frame and its other end shaped to form a snap lock upon the frame at its end opposite to the hinged connection of the plate, said plate being of widths less than said frame whereby it cooperates with the said portions of the frame to form a clamping means for a scouring pad to be used, said plate having on its outer side a looped portion to provide elasticity to the snap lock.

1,679,393. SCRAPER. FRANKLIN E. ARNDT, Galion, Ohio, assignor to The Galion Iron Works & Mfg. Co., Galion, Ohio, a Corporation of Ohio. Filed Oct. 25, 1927. Serial No. 228,671. 9 Claims. (Cl. 37—140.)

1. In a scraper, a draw bar, a transversely extending scraper bucket rotatably engaged therewith and adapted to assume loading, dumping and transporting positions, a latch element supported from the draw bar and a co-acting latch element carried by the bucket and having stops successively engaged by the first named latch element to check rotation of the bucket in each of said positions and means operable at the forward end of the draw bar for disengaging the first named latch element, a lever pivoted to the draw bar adjacent the forward end thereof to swing longitudinally of the draw bar, means for holding the lever in adjusted positions, the first named latch element comprising a link pivoted at its forward end to the lever and having at its rear end a nose for engagement with said stops.



1,679,394. BOTTOM LIFTING AND EQUALIZING MECHANISM FOR ROAD GRADERS. FRANKLIN E. ARNDT, Galion, Ohio, assignor to The Galion Iron Works & Mfg. Co., Galion, Ohio, a Corporation of Ohio. Filed Oct. 25, 1927. Serial No. 228,673. 3 Claims. (Cl. 37—156.)

1. In a road grader, a supporting framework, a bottom, equalizing mechanism for raising said bottom and permitting the same to lower, said mechanism comprising

longitudinally extending lift shafts supported by the framework and operatively connected to the bottom, independently movable transverse shafts mounted on the framework and having beveled gear connections with the first named shafts, springs extending longitudinally of the framework, and connections between the second named shafts and said springs adapted to equalize the lifting force exerted by said springs in all positions of the bottom.

1,679,395. STEERING CONTROL FOR BOATS. GEORGE GORDON BAILEY, Washington, D. C. Filed May 28, 1927. Serial No. 195,000. 4 Claims. (Cl. 114—146.)

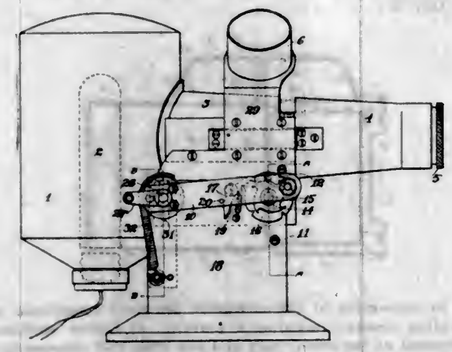
1. A device for holding a tiller for speed boats, comprising an elastic cable connected at its ends to the sides of the boat and extending across the boat adjacent the tiller and having means to engage the tiller.

1,679,396. MEASURING SYSTEM. HENRY M. BASCOM, Brooklyn, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Aug. 10, 1927. Serial No. 212,099. 2 Claims. (Cl. 179—9.)

1. In a telephone system, a central office, subscribers' stations adapted to be connected thereto, polarized metering apparatus located at the subscribers' stations, connecting circuits and a source of direct current energy at the central office, a switch for reversing the connections of said current source to one end of the connecting circuits at regular intervals at a frequency below audibility, choke coils located in the leads between said reversing switch and said connecting circuits, and a capacity connected across said leads adjacent said choke coils.

1,679,397. DEVICE FOR LOCATING DEFECTIVE INSULATORS IN ELECTRIC POWER LINES. THOMAS DUDLY BERRY, Markdale, Ontario, Canada. Filed June 24, 1926. Serial No. 118,297. 9 Claims. (Cl. 175—183.)

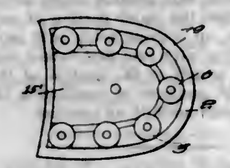
1. In apparatus for locating defective insulators in electric power lines, the combination of a body member; spaced terminals carried by said body member and forming between them a spark gap; a member adapted to be contacted with an insulator in electric connection with one of said terminals; a rod of conducting material in electrical connection with the other terminal, and adapted to cross the electrostatic field adjacent the insulator being tested; and a variable condenser in parallel with said spark gap.



1,679,398. DISK FEEDER. LOUIS C. BONNOT, Louisville, Ohio, assignor to The Bonnot Company, Canton, Ohio, a Corporation of Ohio. Filed June 19, 1925. Serial No. 38,230. 2 Claims. (Cl. 83—44.)

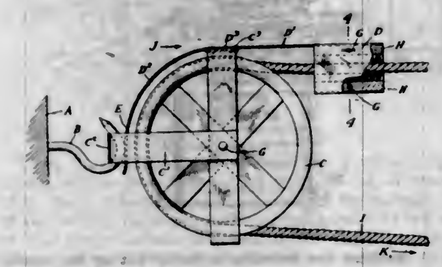
1. A feeding apparatus including a cylindric spout having a side outlet opening in its lower peripheral portion, a movable feeding disk beneath the spout for receiving material from the same, and a scraper blade tangential to said spout co-operating with the movable disk to feed material over the edge of the same.

1,679,399. FILM-FEEDING DEVICE FOR PROJECTORS. PERCY DOUGLAS BREWSTER, East Orange, N. J., assignor to Wyko Projector Corporation, a Corporation of New York. Filed Mar. 2, 1925. Serial No. 12,512. 2 Claims. (Cl. 88—28.)



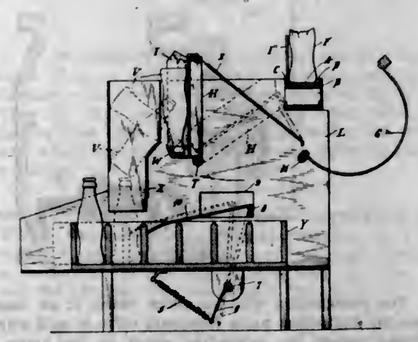
1. In a projector adapted to show a strip of film frame by frame, a feed mechanism comprising a suitable film gate, a sprocket adapted to engage the perforations in the said film, a shaft through the said sprocket, a feed ratchet carrying teeth mounted on said shaft, a feed lever pivoted on a fixed part of the machine carrying a pawl adapted to engage the said teeth and feed the film, a

locking ratchet mounted on the said shaft carrying the same number of slots as the said feed ratchet has teeth, a pawl mounted to engage in the said slots and lock the



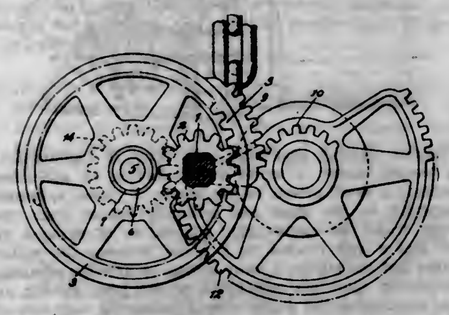
sprocket, and a pin mounted on the said feed lever adapted to disengage the locking pawl at the beginning of the feed stroke of the lever.

1,679,400. SHOE. WALTER JOHN BRIGG, Epping, Sydney, New South Wales, Australia. Filed June 15, 1925. Serial No. 43,863. 4 Claims. (Cl. 36—36.)



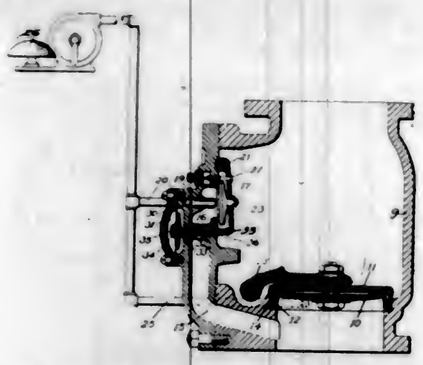
1. In combination, a shoe, a wear element therefor, each of said parts having a plurality of pins projecting therefrom, said pins in one of said parts being adapted to detachably interlock with those in said other part.

1,679,401. CLOTHESLINE-CLEANING DEVICE. ARTHUR F. BRODERICK, Jersey City, N. J. Filed June 12, 1926. Serial No. 115,559. 4 Claims. (Cl. 15—246.)



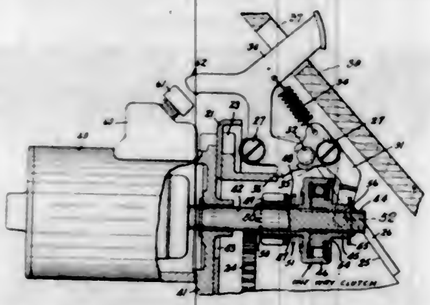
1. A line cleaning device of the class described comprising a housing having detachable brush heads positioned so that their bristles extend toward each other in spaced relation and a flexible strap connected to and supporting said housing forwardly of a pulley whereby a line passing about the pulley is adapted to be passed through said housing.

1,679,402. BOTTLE MIXING, INSPECTING, AND CRATING APPARATUS. ANTHONY W. BROWN, Gainesville, Fla. Filed May 6, 1927. Serial No. 189,277. 13 Claims. (Cl. 226—14.)



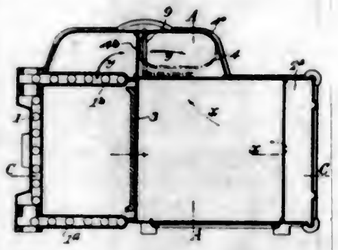
1. In combination, a conveyor belt for bottling machinery, means operating in timed relationship to the speed of said belt for upsetting a plurality of bottles from said belt to mix the contents of the bottles and inspect the same, means for further moving the bottles into their upstanding positions and crating the same, and means for automatically moving the crate to expose different cells therein.

1,679,403. QUICK TAKE-UP AND RELEASE HAND BRAKE FOR RAILROAD CARS. LLOYD J. BROWN, Evanston, Ill., assignor to E. Payson Smith, Chicago, Ill. Filed July 21, 1925. Serial No. 45,049. 5 Claims. (Cl. 74—110.)



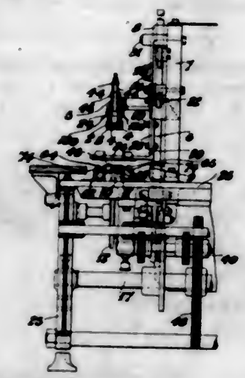
1. A quick take up gear for car brakes including a comparatively large interrupted gear wheel, a segmental gear on the shaft of said wheel but in a different plane from said wheel, an internally toothed gear, a segmental gear on the periphery of said internal toothed gear adapted to mesh with the first named segmental gear, a driving pinion meshing with the internal gear, a spur gear on the shaft of the internal gear and meshing with the interrupted gear wheel.

1,679,404. CONSTANT-ALARM DEVICE FOR ALARM VALVES. HJALMAR G. CARLSON, Worcester, Mass., assignor to Rockwood Sprinkler Company of Massachusetts, Worcester, Mass., a Corporation of Massachusetts. Filed Feb. 4, 1926. Serial No. 86,072. 6 Claims. (Cl. 169—23.)



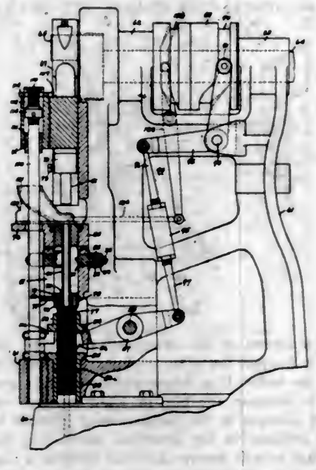
1. The combination with an alarm valve, of an alarm, means for conducting water from said valve to said alarm, a second means for conducting water to the alarm, a second valve for closing the connection of said second means to the alarm, and means for retarding the closing of the second valve.

1,679,405. ENGINE-STARTING APPARATUS. WILLIAM A. CHRIST, Dayton, Ohio, assignor, by mesne assignments, to Delco-Remy Corporation, Dayton, Ohio, a Corporation of Delaware. Filed May 13, 1925. Serial No. 29,939. 1 Claim. (Cl. 74—7.)



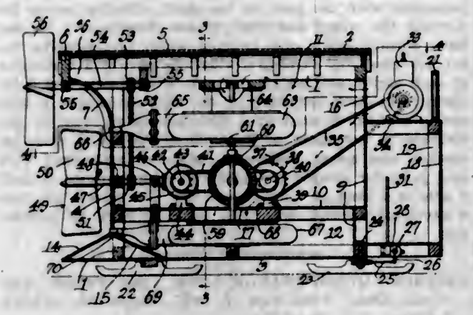
Engine starting apparatus comprising, in combination, an electric motor, a motor switch having an operating member, a shaft driven by the motor, a pinion splinedly connected to the shaft and normally spaced from the motor frame, an engine gear adapted to be engaged by the pinion and located in a plane between the motor frame and the pinion, a lever having an arm for engaging the switch operating member, a second lever having an arm for moving the pinion means connecting said arm of the second lever with the pinion for moving the pinion in either direction when the second lever is moved, means pivotally supporting the levers on the same side of the shaft, said levers having arms extending toward one another from their pivots and said last mentioned arms having interconnecting provisions whereby rotation of the first lever toward the switch will cause the second lever to move the pinion into mesh with the gear, and a single helical coil spring connected at its ends with both levers in such manner as to yieldingly maintain the pinion demeshed from the gear and the first lever out of engagement with the switch operating member.

1,679,406. COMBINED BOILER AND HEATING DEVICE. LOUIS COURTOT, Paris, France, assignor to American Radiator Company, New York, N. Y., a Corporation of New Jersey. Filed Feb. 21, 1925, Serial No. 10,799, and in France Feb. 22, 1924. 1 Claim. (Cl. 126—5.)



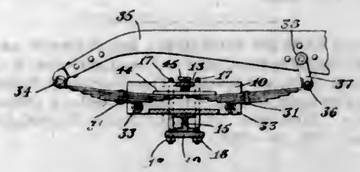
An apparatus of the character described comprising a heating element including a plurality of hollow sections disposed at the front, rear and one side, and communicatively connected to form a fuel receptacle, an oven disposed at the remaining side of said heating element having a wall portion in common therewith forming the remaining side wall of said fuel receptacle capable of directly imparting the heat developed in said fuel receptacle to said oven, a top plate disposed upon and common to said heating element and said oven, a passage extending from the upper portion of said fuel receptacle around the top, side and bottom of said oven, a member overlapping the adjacent wall portions of said heating element and said oven at one side thereof and forming therewith a vertical collecting flue, a partition in said flue, an outlet from said passage below said oven to said flue, an outlet from the upper portion of said fuel receptacle to said flue, an opening below said partition, and a damper cooperating with said first-named outlet and with said opening to permit of the control of the passage of the hot gases and products of combustion through either thereof at will, substantially as specified.

1,679,407. MEANS FOR LINING CARDBOARD BOXES. WILLIAM ARTHUR COTTE, London, England, assignor to J. Lyons and Company, Limited, London, England. Filed Apr. 8, 1926, Serial No. 100,760, and in Great Britain May 14, 1925. 11 Claims. (Cl. 93—36.)



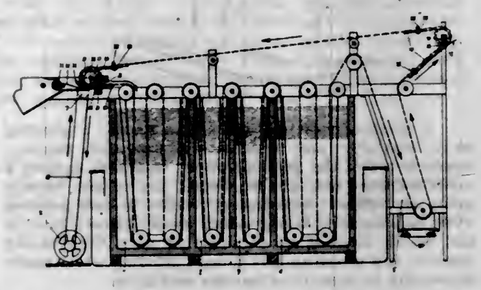
3. A machine for inserting a lining having flap extensions on all four sides into a box, comprising means for inserting the lining in the box and then bending three of the lining flaps over the back and side edges of the box and separate means for bending the other flap over the front edge of the box.

1,679,408. BRIQUETTING APPARATUS. JAMES H. DAVIS and ALBERT H. VALENTINE, Dayton, Ohio, assignors to Moraine Products Company, Dayton, Ohio, a Corporation of Ohio. Filed Aug. 2, 1926. Serial No. 126,369. 6 Claims. (Cl. 18—16.)



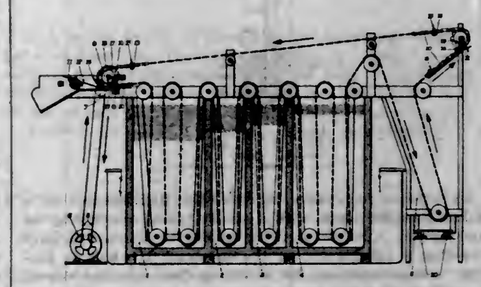
1. Molding apparatus comprising, in combination, a die having molding space provided by bores of different diameters, tubular rams of different external diameters received by the respective bores, a mandrel received by central bores of the rams, and means for producing relative movement between the die and rams to compress material within the molding space, and for producing relative movement between the smaller ram and the die in order to eject the briquette from the die.

1,679,409. SNOWPLOW. ANDREW B. DELANEY, Ashland, Wis. Filed Nov. 4, 1927. Serial No. 231,070. 5 Claims. (Cl. 37—43.)



1. In a device of the class described, a vehicle, upper rotary cutters journaled on the forward end of the vehicle, lower rotary cutters journaled on the forward end of the vehicle, the lower cutters being located to the rear of the upper cutters and behind the upper cutters, a blower having a blast nozzle discharging adjacent to the lower portions of the upper cutters and adjacent to the upper portions of the lower cutters, a blower discharging adjacent to the lower portions of the lower cutters, means for operating the cutters, and means for operating the blowers.

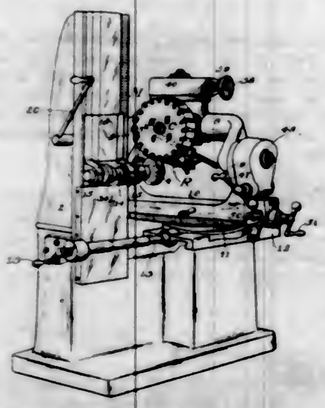
1,679,410. SPRING. MICHAEL P. DELORY, Concord, Mass. Filed Oct. 26, 1927. Serial No. 228,811. 3 Claims. (Cl. 267—22.)



1. In an improved spring, the combination of a channel shaped chair, a pair of springs pivotally mounted in said chair, and having the associated ends of the springs within the chair separated from each other, means for engaging such ends, and means for adjusting the tension between said last named means and the separated ends of the springs.

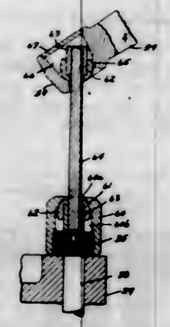
1,679,411. LOADING DEVICE FOR CONVEYING SYSTEMS. EDWARD F. DE POTTER, Brooklyn, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Sept. 18, 1926. Serial No. 136,265. 14 Claims. (Cl. 271—2.1.)

1. In a conveying system, a plurality of sprocket wheels, a plurality of endless chains meshing with and being moved by said sprocket wheels at substantially the same speed, means for feeding flexible material unrolled from a reel to said endless chains so that it may be conveyed thereby, means for piercing and gripping the flexible material to the endless chains at definite intervals, and means for thereafter releasing the flexible material from the endless chains.



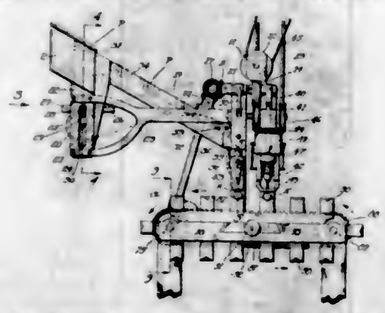
1,679,412. UNLOADING DEVICE FOR CONVEYING SYSTEMS. EDWARD F. DE POTTER, Brooklyn, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Sept. 18, 1926. Serial No. 136,266. 8 Claims. (Cl. 271—2.1.)

1. The method of separating a flexible strip of material from a corresponding chain conveyor having a plurality of devices penetrating and gripping said strip, which



consists in successively and transiently releasing the penetrating and gripping devices as the conveyor passes a certain place, and moving this strip of material divergently at that place.

1,679,413. CUTTER GRINDER. SOL EINSTEIN and LESTER F. NENNINGER, Cincinnati, and HERMAN R. ISLER, Norwood, Ohio, assignors to The Cincinnati Milling Machine Company, Oakley, Cincinnati, Ohio, a Corporation of Ohio. Filed Mar. 14, 1924. Serial No. 699,230. 11 Claims. (Cl. 51—225.)



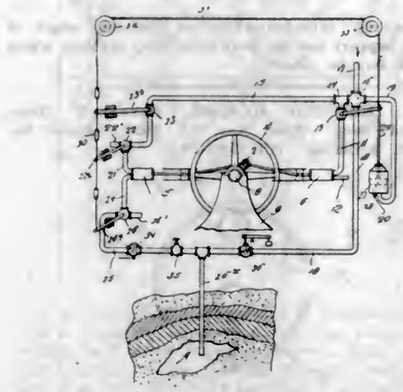
1. A grinding machine combining a frame; a grinding wheel rotatably and translatably journaled thereon; means to rotate the grinding wheel; means to support a cutter adjacent said grinding wheel and to give to said cutter six different adjustments relative to said grinding wheel to present to said grinding wheel adjacent faces of said cutter disposed at an angle of more than ninety degrees; and means to give to said grinding wheel bodily movements to cause it to traverse said faces.

1,679,414. MEANS FOR CONNECTING THE OPERATING MEMBERS OF VEHICLE REBOUND CHECKS WITH VEHICLE PARTS. GEORGE W. ELSEY, Anderson, Ind., assignor, by mesne assignments, to Delco-Remy Corporation, Dayton, Ohio, a Corporation of Delaware. Filed May 28, 1926. Serial No. 112,265. 3 Claims. (Cl. 24—123.)

1. A device for connecting the operating member of a vehicle rebound check with a vehicle part, comprising, in combination, a cable carrying a sleeve member, a part providing a tubular recess, the end wall of which is provided with an aperture for receiving the cable and sleeve, the material of the part surrounding the aperture being shaped to provide internally, a spherical recess, a ball member having a spherical surface adapted to be received by the spherical recess and having a notch extending from its periphery to its central portion for receiving the cable and having a recess for receiving the sleeve on the end of the cable.

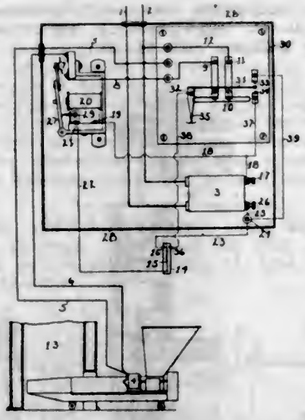
1,679,415. MACHINE FOR DRILLING AND PINNING KNIFE HANDLES AND THE LIKE. MARSHALL FARNSWORTH, Southbridge, Mass. Filed Aug. 31, 1926. Serial No. 132,780. 10 Claims. (Cl. 29—26.)

1. In a machine of the character described, the combination of a hopper for pins, a chute extending from said hopper at an inclination down which the pins are adapted to slide, a plunger located in said hopper, means for raising the plunger in the hopper, said plunger having an upper end inclined in the direction parallel to that of the chute so that it will receive and lift therein a row of pins when forced up through a mass of pins in the hopper, whereby said pins will be free to slide down the chute lengthwise, a trough at the bottom of the chute having means therein for receiving the pins and allowing them to retain a vertical position, a chute extending from the end of the trough, and a plunger movable through the trough to dislodge one pin at a time therefrom into the last named chute.



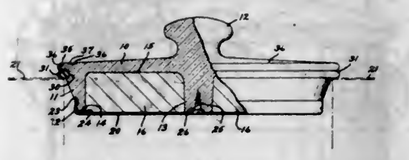
5. In a machine of the character described, the combination with an endless carrier having rests thereon equally spaced apart for receiving the work, a pair of shafts on which said carrier is located, one of said shafts having a ratchet wheel fixed with respect thereto, a gear freely rotatable on said shaft, a gear for operating the first named gear having teeth arranged part way around it and adapted to be operated constantly, whereby the second gear will rotate intermittently, a grooved wheel connected with the gear on the shaft, yielding means for turning the wheel and gear in one direction, a ratchet pawl movable with said grooved wheel for engaging the ratchet wheel and turning it a definite part of a revolution at each oscillation, whereby the rests will move a definite distance at each operation of the endless carrier, a drill and a plunger located at a distance apart equal to the distance of movement of the endless carrier at each operation, and means positively connected and timed with said gears for moving the drill and plunger down to drill a hole in a piece of work on one rest and drive a pin into a previously drilled hole in a piece of work on another rest.

1,679,416. QUICK-CHANGE LINK. ROB FELGER, Ashtabula, Ohio. Filed Sept. 7, 1927. Serial No. 218,053. 1 Claim. (Cl. 24—230.5.)



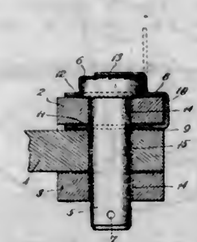
A quick-change link for cross chains bifurcated at one end to form a pair of normally closed hooks adapted to engage a link of a longitudinal chain, the other end of the link being formed with a relatively narrow neck extending at an angle to the body of the link and laterally extended at its end to form two laterally projecting arms curved toward the body of the link and adapted to engage the bight end of a cross chain.

1,679,417. GAS-PUMPING SYSTEM. EDWARD J. GARNIER, Gary, Ind. Filed May 17, 1926. Serial No. 109,666. 5 Claims. (Cl. 230—8.)



1. In a gas pumping system for natural or artificial gas the combination of a chamber for receiving the gas, a compressor, a gas engine for the operation of the pump, a natural gas supply pipe for the pump, and a natural gas supply pipe for the engine, a compressed gas delivery pipe leading from the pump to the gas receiving chamber and automatic means for lowering the supply of gas to the engine when the natural gas supply pressure falls below a predetermined amount.

1,679,418. AUTOMATIC STOKER CONTROL. LLOYD GARRISON, Salt Lake City, Utah. Filed Sept. 12, 1927. Serial No. 219,109. 7 Claims. (Cl. 236—1.)

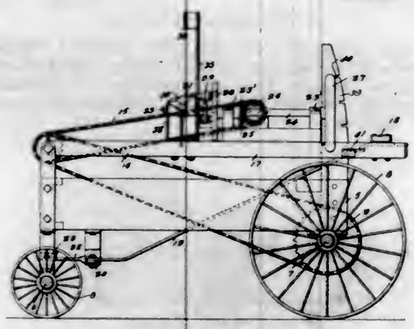


1. The combination of a mechanical fuel feed, a furnace operated in connection therewith, a device to control the operation of the fuel feed according to the amount of heat required to be delivered by the furnace, and a device actuated by the operation and nonoperation of an electrically heated unit to cause intermittent operation of the fuel feed at such times as the operation of the fuel feed would otherwise be stopped by action of the first named control device.

1,679,419. HEAT-INSULATING LID. HARVEY D. GEYER, Dayton, Ohio, assignor to The Inland Manufacturing Company, Dayton, Ohio, a Corporation of Delaware. Filed Feb. 19, 1927. Serial No. 169,668. 5 Claims. (Cl. 220—24.)

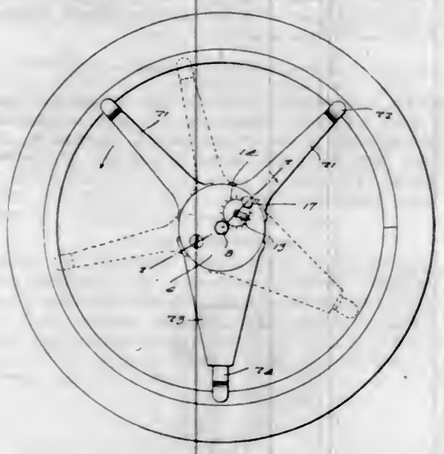
1. A removable heat insulating lid for a container comprising: a one piece molded composition top member having a hand knob and an annular downwardly extending flange molded integral therewith, ad an integral centrally located depending projection, a sheet metal bottom member secured to said flange and projection, and heat insulating material in the chamber formed between said top and bottom members.

1,679,420. SAFETY DEVICE FOR RAILROAD-CAR-BRAKE BEAMS. VICTOR H. HARBERT, Springfield, Ill., assignor to E. Payson Smith, Springfield, Ill. Filed Mar. 17, 1925. Serial No. 16,199. 9 Claims. (Cl. 85—5.)



2. A safety device of the character described, comprising a substantially U-shaped body having a port through each of the parallel members of said body in alignment with each other, and a guard at one end of the wall of one of said ports and adapted to be bent over its port to prevent the passage of a bolt or pin therethrough.

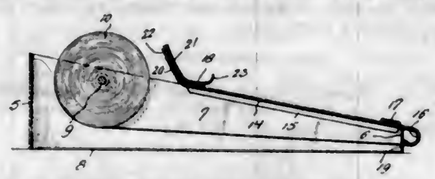
1,679,421. HEDGE TRIMMER. JOSEPH G. HIMLER, Latrobe, Pa. Filed Oct. 14, 1924. Serial No. 743,567. 3 Claims. (Cl. 56—237.)



1. A hedge trimming machine embodying a wheel-supported frame having upwardly extended arms at the rear thereof, said arms being provided with notches, a frame mounted on the wheel-supported frame and having its forward end pivotally connected to the first mentioned frame adjacent to the forward end of the wheel-

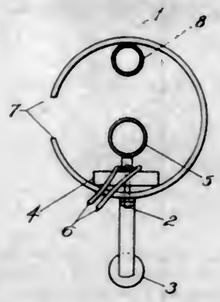
supported frame, actuating mechanism mounted on the second mentioned frame, a cutter bar operated by the cutter bar actuating mechanism, and a movable bar car-

ried by the second mentioned frame and adapted to be moved into the notches of the upstanding arm to adjust the second mentioned frame vertically.



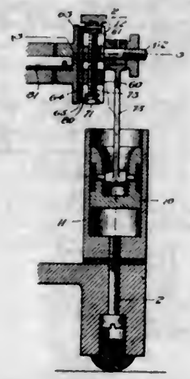
1,679,422. SPARE-TIRE CARRIER. ARTHUR L. HOOKER, Wellington, Kans. Filed Feb. 14, 1927. Serial No. 168,214. 1 Claim. (Cl. 224—29.)

In a tire carrier of the class described, a supporting arm, a disk rigidly mounted on said arm, peripheral segments formed on said disk, a hollow casing structure, means pivotally connecting said casing to said disk for rotation about the disk, lugs carried by said casing and in slidable contact with said segments, a pair of rigid spoke members carried by said casing and radiating therefrom and provided with rim engaging means, an additional spoke member having eccentric pivotal connection with said disk, and a tubular housing rigidly mounted on said casing and enclosing said additional spoke member, the latter being also provided with rim engaging means at its outer end.



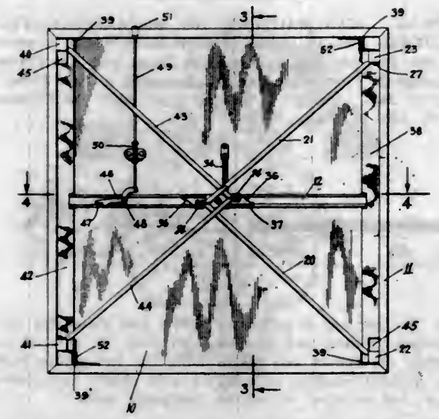
1,679,423. DESK PAD. CLAYTON R. HOME, Enid, Okla. Filed July 1, 1927. Serial No. 202,903. 2 Claims. (Cl. 281—6.)

1. In a desk pad, an open base frame, means to removably journal a roll of paper upon a transverse horizontal axis within the rear part of the frame, said frame having a front wall provided with a horizontal elongated slot, a flat rigid paper support secured in and closing the forward part of the top of the frame, transverse guide loops for the paper provided on and above the forward and rear portions of said paper support, and upwardly



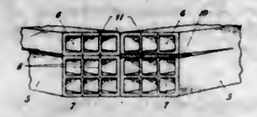
and rearwardly extended plates on the rear edges of the paper support and the rear guide loop between which the paper may be passed.

1,679,424. ELECTRIC HEATER. ERNEST O. HOPP, Portland, Oreg. Filed Nov. 12, 1927. Serial No. 232,780. 3 Claims. (Cl. 219—19.)



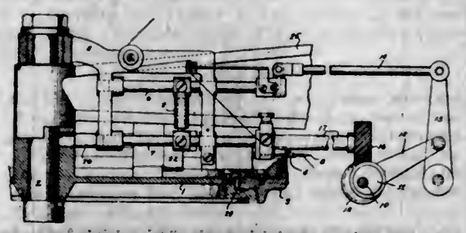
2. In an electric heater, the combination of a cylindrical shell open at both ends, and a handle in parallel relation to the axis of the shell, with a fire-proof, insulating base parallel to the axis of the handle, base and handle being connected with each other, the base on the inside of the shell and the handle on the outside of the shell, a heating element mounted on the base, electrical wires from the heating element emerging at the open end of the shell, and a slot in the side of the shell continued throughout the full length thereof and removed ninety degrees from the handle.

1,679,425. ECCENTER. WILLIAM F. HOUSTON, Washington, D. C. Filed Nov. 21, 1924. Serial No. 751,307. 2 Claims. (Cl. 74—38.)



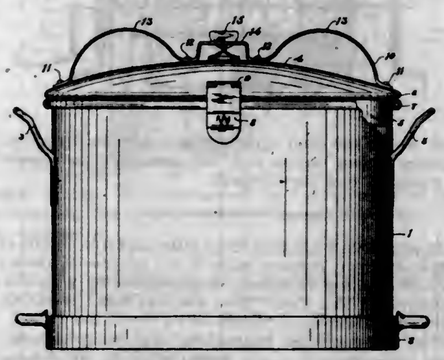
1. An eccenter embracing a disk having a slot therein, a shaft pin having a head movably mounted in said slot, a counterbalance for said head, and a screw upon which said head and counterbalance are carried.

1,679,426. FOLDING TABLE. HAROLD HOWE, Orange, N. J., assignor to Howe Folding Furniture, Inc., New York, N. Y., a Corporation of New York. Filed June 11, 1925. Serial No. 36,325. 14 Claims. (Cl. 45—11.)



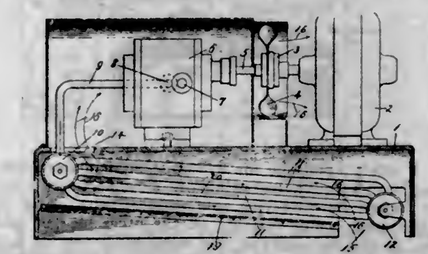
1. A folding table comprising in combination, a table top, a frame for said table top, legs adapted to fold within said frame, guiding means, racks guided by said guiding means, braces pivotally connected with said legs and with said racks, and a pinion engaging said racks so that the movement of all of the braces will be substantially of the same magnitude.

1,679,427. UNDERGROUND CONDUIT. HOWARD W. JEWELL, Los Angeles, Calif., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Apr. 1, 1926. Serial No. 99,120. 2 Claims. (Cl. 247—32.)



1. A junction in a run of multiple duct conduit comprising a multiple duct section having a plurality of layers of ducts, and a partition wall between contiguous layers thickened at the junction end, and two separate conduit sections having ducts corresponding respectively to the layers of ducts in the multiple duct section and laid with external walls at the junction end in contact and in continuation with the thickened partition wall of the multiple duct section, the said thickened partition wall being substantially of the same thickness as the combined thickness of the said external walls.

1,679,428. CIRCULAR LOOPER. MAX KÖHLER, Limbach, Germany. Filed May 15, 1925, Serial No. 30,405, and in Germany May 18, 1924. 4 Claims. (Cl. 112—25.)

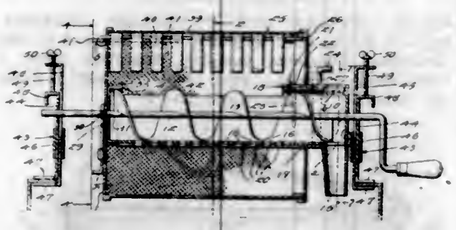


1. In a looping machine, the combination of a rotatable dial having a plurality of radially disposed impaling pins, actuating means therefor, a reciprocating thread needle, and a support for said thread needle pivotally mounted concentrically with said dial.

1,679,429. HANDLE FOR WATERLESS COOKERS. RICHARD F. KRAUSE, Massillon, Ohio, assignor to The Enterprise Aluminum Company, Massillon, Ohio, a Corporation of Ohio. Filed Sept. 23, 1927. Serial No. 221,466. 1 Claim. (Cl. 53—1.)

In combination with a cover for a cooking utensil and the like, a handle comprising a strip of metal and having in sequence intermediate its ends, an end connection portion, a curved end portion, a central connection portion, an inverted U-shaped central portion, a second central connection portion, a second curved end portion, and a second end connection portion, and means connecting the end connection portions and the central connection portions to the cover, the curved end portions being curved away from the cover forming hand grips, and the U-shaped central portion forming a valve mounting.

1,679,430. CONDENSER FOR ICE MACHINES. GEORGE I. LEONARD, Chicago, Ill. Filed Jan. 8, 1927. Serial No. 159,881. 4 Claims. (Cl. 257—39.)

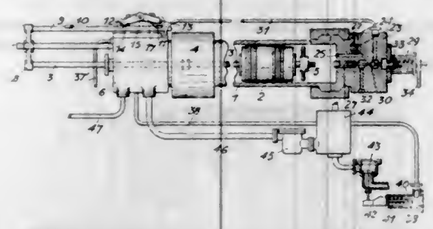


1. The combination with an air conduit having admission and discharge ports; of means for effecting the passage of air into the admission port, through the conduit and through the discharge port; a gas receiving chamber; a condensate receiving chamber; piping within said conduit extending substantially along the path of and following through said conduit and connecting said chambers; said chambers and the piping connecting them being arranged to direct the flow of gas and condensate to the condensate receiving chamber oppositely to the direction of flow of air along the piping; and a pump connected with the gas receiving chamber to force gas thereunto and into the piping connecting the chambers.

1,679,431. CORN POPPER. HUGH A. LONGINO, Ringling, Okla. Filed Sept. 10, 1927. Serial No. 218,799. 10 Claims. (Cl. 53—4.)

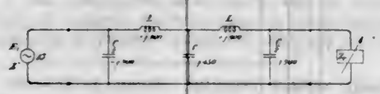
1. In a corn popper, a stationary inner drum having an opening in its top, a rotatable outer drum surrounding that portion of the inner drum in which the opening is

formed, a worm within the inner drum, an outlet spout at one end of the inner drum and a shaft for rotating said worm and outer drum, the bottom wall of the inner



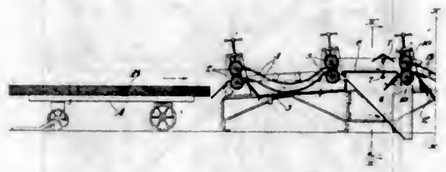
drum within the outer drum having longitudinally spaced openings formed therein of a size permitting the passage of unpopped corn therethrough.

1,679,432. HEAT-PRODUCING COMPOSITION. CHARLES EDWARD LYON, Niagara Falls, N. Y., assignor to Hooker Electrochemical Company, Niagara Falls, N. Y., a Corporation of New York. Filed Dec. 21, 1925. Serial No. 76,892. 9 Claims. (Cl. 44—3.)



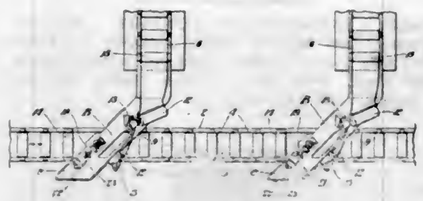
1. A heat-producing composition comprising an alkali metal hydroxide and a salt decomposable by alkali metal hydroxides with the evolution of heat.

1,679,433. SAFETY APPLIANCE FOR HYDRAULIC ACCUMULATORS. MARTIN MACK, Cannstatt-Stuttgart, Germany, assignor to Cannstatter Misch- und Knetmaschinen-Fabrik, Cannstatter Dampf-Backofen-Fabrik, Werner & Pfleiderer, Cannstatt-Stuttgart, Germany. Filed Oct. 27, 1925, Serial No. 65,170, and in Germany Aug. 4, 1925. 6 Claims. (Cl. 103—222.)



1. A safety appliance for hydraulic accumulators comprising a cylinder, a piston axially movable in said cylinder, means for supplying said cylinder with water on one and with compressed air on the other side of said piston, means for emptying the water-filled part of said cylinder and means on the air-filled side of said cylinder adapted to be influenced by said piston for operating said emptying means.

1,679,434. ELECTRIC WAVE FILTER FOR VARIABLE-LOAD CIRCUITS. RALPH G. MCCURDY, Englewood, N. J., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Apr. 21, 1926. Serial No. 103,615. 5 Claims. (Cl. 178—44.)

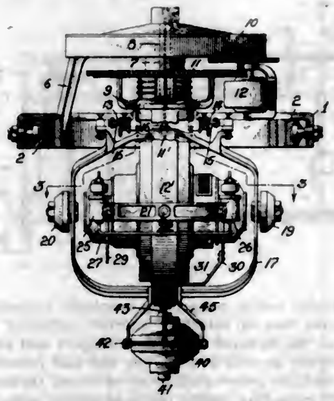


1. A wave filter to pass current of a certain frequency and to stop harmonics thereof, with substantially zero impedance change for current of said frequency through the filter notwithstanding changes of the output impedance, said filter being of low-pass ladder type, and consisting of two mid-shunt sections and having its cut off frequency at $\sqrt{2}$ times said certain frequency.

1,679,435. MANUFACTURE OF METALLIC-COATED SHEETS AND PLATES. JOSEPH MCFETRIDGE, Vandergrift, Pa., assignor to American Sheet and Tin Plates Company, Pittsburgh, Pa., a Corporation of New Jersey. Filed Jan. 17, 1927. Serial No. 161,634. 15 Claims. (Cl. 148—4.)

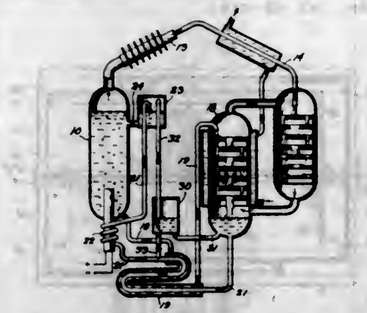
1. The method of preparing sheets and plates for galvanizing, tinning and the like, including the step of removing the sheets and plates from the hot pickle bath and without washing submerging said sheets and plates in a cold solution of soluble inorganic salts.

1,679,436. STRIP-TRANSFER APPARATUS. HOWARD G. MCILVRIED, McCandless Township, Allegheny County, Pa., assignor to American Sheet and Tin Plate Company, Pittsburgh, Pa., a Corporation of New Jersey. Filed July 14, 1927. Serial No. 205,669. 6 Claims. (Cl. 80—44.)



1. The combination with a rolling mill for rolling flexible strips of metal and having a run-out table for conveying said strips away from said mill, of a plurality of other tables arranged at an angle to said first named table, and means at the junction points of said tables adapted to intercept the strips being conveyed along said run-out table and turn and twist said strips through a spiral path and direct said strips onto said second named tables, said means being selective so that said strips may be directed onto any selected one of said second named tables.

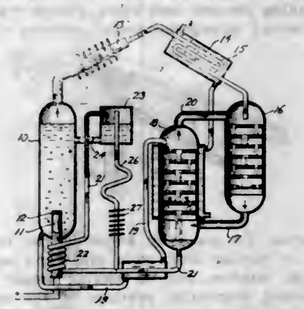
1,679,437. CRACKLED WARE AND SEMIFINISHED BLANK THEREFOR. DAVID L. MIDDENDORF, Columbus, Ohio, assignor to The Federal Glass Company, Columbus, Ohio, a Corporation of Ohio. Filed Aug. 20, 1926. Serial No. 130,464. 4 Claims. (Cl. 49—92.)



1. An article of finished glassware having crackles therein in the form of round-bottom furrows.

1,679,438. STABILIZED GYROSCOPIC COMPASS. CHESTER B. MILLS, Brooklyn, N. Y., assignor to The Sperry Gyroscope Company, Brooklyn, N. Y., a Corporation of New York. Filed Dec. 30, 1922. Serial No. 609,809. 3 Claims. (Cl. 33—204.)

1. In a gyro-compass, the combination with the gyroscope, of a supporting frame for mounting the same for oscillation about a horizontal axis, compensating weights thereon on opposite sides of the gyroscope in the N-S direction, and two pairs of connected liquid containers for imparting directive power to the compass, symmetrically placed, the individual containers of each pair lying on opposite sides of the aforesaid axis, and the two pairs being respectively on opposite sides of the spinning axis of the gyroscope.

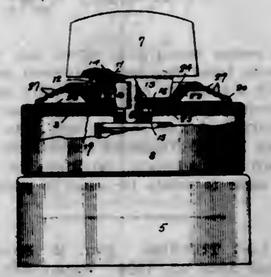


1,679,439. REFRIGERATION. CARL GEORG MUNTERS, Stockholm, Sweden, assignor to Electrolux Servel Corporation, New York, N. Y., a Corporation of Delaware. Filed May 7, 1926, Serial No. 107,376, and in Germany Mar. 9, 1926. 14 Claims. (Cl. 62—178.)

10. That step in refrigerating through the agency of a generator-condenser-evaporator cycle which consists in moving absorption liquid laden with a cooling agent in circuit between the generator and absorber by vaporization of an auxiliary fluid capable of volatilization in the presence of the absorption liquid at a different temperature than the cooling agent.

1,679,440. REFRIGERATION. CARL GEORG MUNTERS, Stockholm, Sweden, assignor to Electrolux Servel Corporation, New York, N. Y., a Corporation of Delaware. Original application filed May 7, 1926, Serial No. 107,376, and in Germany Mar. 9, 1926. Divided and this application filed May 9, 1928. Serial No. 276,296. 7 Claims. (Cl. 62—178.)

7. That step in refrigerating through the agency of an absorption system including a generator and an absorber which consists in moving absorption liquid laden with a cooling agent in circuit between the generator and absorber by vaporization and liquefaction of an auxiliary

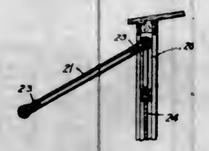


fluid capable of volatilization in the presence of the absorption liquid at a different temperature than the cooling agent.

1,679,441. PROCESS OF MANUFACTURING PULP FOR PAPER PRODUCTION. DINSHAW RATTONJI NANJI, Birchfields, Birmingham, England. Filed Nov. 5, 1926, Serial No. 146,575, and in Great Britain Aug. 17, 1926. 3 Claims. (Cl. 92—13.)

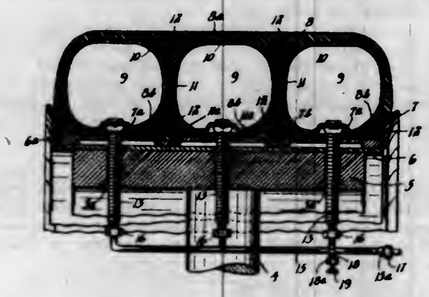
1. A process of manufacturing pulp by treatment of suitable cellulosic materials with an alkali solution of concentration up to 4% and the mixture heated to a temperature corresponding to a vapour pressure of from 7 to 10 atmospheres and preferably as near 10 atmospheres as possible for a period of from one half to one hour.

1,679,442. ELECTRIC SWITCH. ARVID H. NERO, New Britain, Conn., assignor to The Arrow Electric Company, Hartford, Conn., a Corporation of Connecticut. Filed Jan. 10, 1923. Serial No. 611,765. 1 Claim. (Cl. 200—167.)



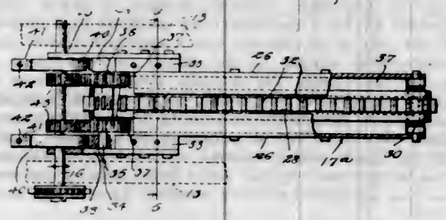
A rotary snap switch comprising an insulating base, a rotary switch spindle rising therefrom and having a laterally projecting actuating member, a switch cover element having a legend-carrying marginal area inclined to the axis of the spindle, and a depressed central area substantially normal to the spindle and apertured to permit the spindle and laterally projecting member to pass therethrough and rotate, together with a handle mounted on the spindle and having an operative engagement with said laterally projecting member, said handle having a hub portion bearing on the central depressed area of the cover element, and a finger grip portion overhanging the legend-carrying marginal area of the cover element.

1,679,443. AUTOMOBILE AWNING. AXEL OLSON and WILLIAM R. MCDERMOTT, Denver, Colo. Filed Oct. 16, 1926. Serial No. 142,064. 3 Claims. (Cl. 156—15.)



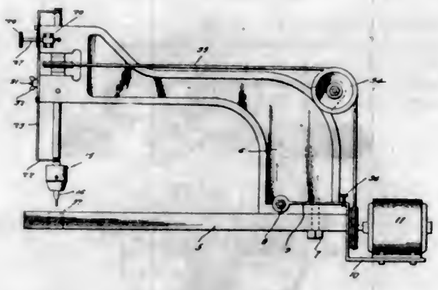
1. An automobile awning including separate, oppositely disposed end frames, each frame having a vertical portion, a screw-threaded horizontal portion extending in-

ward from the vertical portion, a downwardly and outwardly extending awning supporting portion, and a horizontal portion on the end thereof, said horizontal portions extending towards each other, sleeves engaging the first and second named horizontal portions of the end



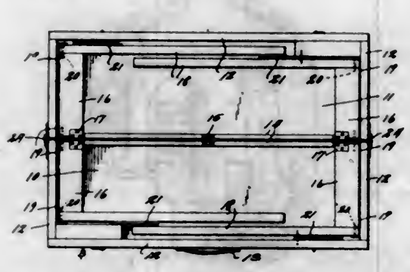
frames, means for manually adjusting the end frames nearer to or further from each other and against the jambs of the window, and an awning proper supported by the awning supporting portions of the end frames and adjustable as to width.

1,679,444. MULTIPLE-TUBE TIRE. BENJAMIN F. PAGENHART, Minneapolis, Minn., assignor of one-fourth to J. A. Bocinny, Minneapolis, Minn. Filed Dec. 3, 1925. Serial No. 72,955. 2 Claims. (Cl. 152—22.)



1. A tire casing comprising curved side walls and a relatively wide tread portion, said tread portion being provided with a plurality of substantially unyielding inwardly projecting partitions to form inner tube chambers, said partitions and one of said side walls being provided with lateral extensions respectively overlapping one side wall and adjacent partitions to engage and support the same to retain the same in position.

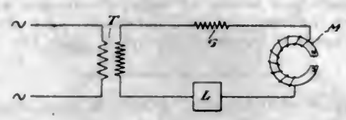
1,679,445. LOG TURNER. ROIL M. PEAVER, Glendo, Wyo. Filed June 22, 1926. Serial No. 117,805. 6 Claims. (Cl. 143—102.)



1. In a log turning device for saw mills, a shaft, an arm pivoted to the shaft, a chain travelling along the arm and driven from the shaft and having dogs and a continuously operative connection between the arm and shaft whereby the arm moves with the shaft during rotation of the shaft until the arm encounters an obstruction.

1,679,446. ADJUSTABLE PORTABLE ROUTER. OTIS A. POPHAM, Hayti, Mo., assignor of one-fourth to Melvin G. McElwrath, Hayti, Mo. Filed June 6, 1927. Serial No. 196,842. 1 Claim. (Cl. 90—14.)

A portable router comprising a spindle support having an elevated end, a rotatably carried vertically disposed spindle at the elevated end of said support and adapted to have a chuck secured at its lower end and formed with a pair of annular grooves adjacent each end thereof, and a vertically extending groove intermediate its ends, a pulley arranged on said spindle having a retaining screw inserted therethrough with its inner end slidably carried in the vertical groove and securing the pulley and spindle for rotating movement, a drive belt for the pulley, a U-shaped retaining plate adjustably secured on the elevated end of the support, with its ends disposed horizontally and arranged in the grooves at the opposite ends of said spindle, a rack formed on one edge of the plate, a gear mounted on the support engageable with the rack whereby to vertically adjust the plate, and means connecting the plate with the support for securing the former in vertically adjusted position.



1,679,447. FOLDING TABLE. HENRY PUFF, Los Angeles, Calif. Filed July 17, 1926. Serial No. 123,149. 1 Claim. (Cl. 45—116.)

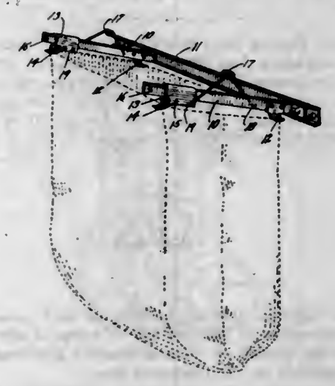
A table comprising a top formed in two sections, each section having a depending rail around three sides, each section on its fourth side having a longitudinally extending rail, hinge means connecting said last named rails whereby the two sections may be turned into confronting relation to thereby form a carrying receptacle, the last named rails terminating short of the ends of the sections, cross bars disposed adjacent the ends of the sections and outward of the ends of the last named rails, each cross bar at its inner end terminating on the line between the section, each cross bar having a length less than the width of the section with which it is associated, legs, one for each cross bar, extending across the end of the corresponding cross bar and rigidly engaged therewith, the cross bars at each end of the table being hingedly engaged with each other at the joint between the sections, angle iron brackets attached to the end rail

of each section at the extremities of the corresponding cross bar, with which brackets the cross bar is pivotally engaged, and sectional foldable braces operatively engaged with the table top sections and with said legs and acting to hold the legs at right angles to the sections when the legs are unfolded.

1,679,448. ELECTRICAL-CURRENT MODIFICATION. CHARLES G. SMITH, Medford, Mass., assignor to Raythereon Inc., Cambridge, Mass., a Corporation of Massachusetts. Filed May 22, 1923. Serial No. 640,689. 20 Claims. (Cl. 175—363.)

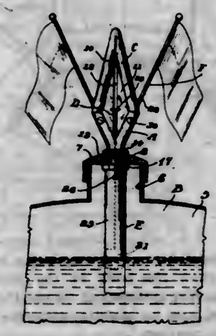
1. An electrical system for modifying current comprising a circuit including an impedance element which is variable in response to temperature changes, and means for applying both half waves of a cyclically varying source of energy to said element for varying the temperature thereof and for automatically causing the temperature of said element to be different in alternate half cycles of the said waves, thereby to vary the current in the circuit in a corresponding manner.

11. An electrical system for modifying current comprising a circuit including an impedance element of germanium, and means for automatically varying the temperature of said element in a predetermined manner, thereby to vary the current in the circuit in a corresponding manner.



1,679,449. GASEOUS-CONDUCTION APPARATUS. CHARLES G. SMITH, Medford, Mass., assignor to Raytheon Inc., Cambridge, Mass., a Corporation of Massachusetts. Filed June 13, 1927. Serial No. 198,398. 2 Claims. (Cl. 250—27.5.)

1. In a gaseous discharge apparatus of the type described containing helium, an anode, a cathode operatively associated therewith, said anode comprising tantalum.

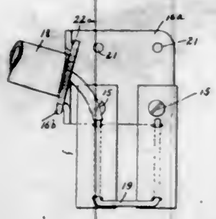


1,679,450. BAG HOLDER. JAMES THOMPSON, Greeley, Colo. Filed Oct. 17, 1927. Serial No. 226,638. 4 Claims. (Cl. 83—26.)

1. A bag holder comprising two stationary arms; stationary hooks projecting downwardly from said arms; movable hooks adapted to extend below said arms and be movable along their length; and resilient means arranged to force said movable hooks away from said stationary hooks, said resilient means comprising a spring

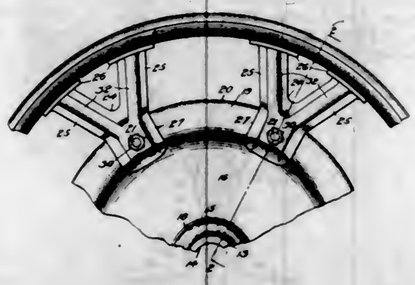
having a coil substantially at its midlength, one arm of said spring being fixed, the other arm being operatively connected with said movable hook.

1,679,451. LIQUID-LEVEL INDICATOR. LYLE J. VAN DUZER, Los Angeles, Calif. Filed Aug. 12, 1921, Serial No. 491,793. Renewed Sept. 22, 1924. 3 Claims. (Cl. 73—82.)



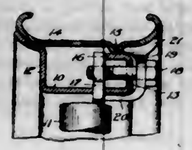
1. A water gauge for automobile radiators comprising a head including a relatively thick marginal rim, and a thin plate extending inwardly therefrom, the plate having an open guide slot former therein, a depending stem formed on said head and having a bore therein arranged in direct alignment with the guide slot, a float rod slidably mounted in said bore and having its upper end movable in said slot, said rod having a pointer thereon comprising a body portion secured to said float rod and indicating portions each projecting through one side of said slot, said indicating portions each coacting with a portion of one side of said head to prevent lateral play of the upper end of said rod, and a float adapted to coact with said rod.

1,679,452. ELECTRIC GROUNDING CONNECTION. WHEELER H. VIBBER, New London, Conn., assignor of one-half to The Gillette-Vibber Co., New London, Conn., a Corporation of Connecticut. Filed Feb. 6, 1925. Serial No. 7,374. 4 Claims. (Cl. 247—1.)



1. An electric connection comprising a clasp-band adapted to encircle a conductor pipe, a bracket having a

portion in which is secured one end of a grounding conduit and another portion adapted to be secured to the clasp-band, and means for securing the bracket to the clasp-band, the bracket having a weakened area between

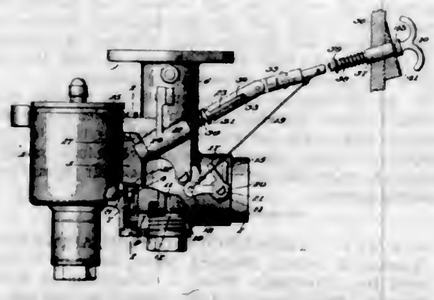


said two portions thereof constructed and arranged to permit distortion of the bracket to adapt it for attachment to the conduit in various angular positions of the latter relatively to the conductor pipe.

1,679,453. AUTOMOBILE WHEEL. JAMES H. WAGENHORST, Jackson, Mich. Filed July 6, 1925. Serial No. 41,835. 2 Claims. (Cl. 301—6.)

1. A wheel comprising a hub having a rear portion of larger diameter than the body of the hub and a brake drum having a central cylindrical flange the forward edge of which engages and is rigidly connected to the rear edge of said rear portion.

1,679,454. VEHICLE WHEEL. JAMES H. WAGENHORST, Jackson, Mich. Original application filed Aug. 9, 1920, Serial No. 402,105. Divided and this application filed Dec. 3, 1925. Serial No. 72,916. 5 Claims. (Cl. 301—20.)

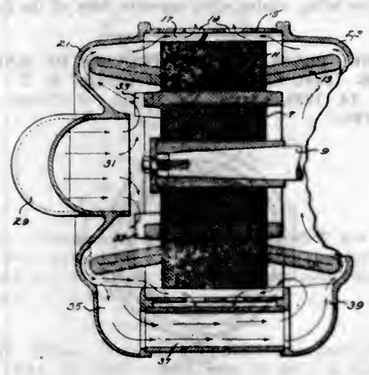


1. The combination with a sheet metal felly, of a demountable tire carrying rim, a bolt, a clamp on said bolt, engaging the rim, and a fulcrum member for said clamp carried within said felly and projecting through the inner face thereof.

1,679,455. AUTOMOBILE WHEEL. JAMES H. WAGENHORST, Jackson, Mich. Original application filed Aug. 9, 1920, Serial No. 402,105. Divided and this application filed Dec. 3, 1925. Serial No. 72,918. 4 Claims. (Cl. 301—30.)

2. A tire carrying rim divided at one point only, one end having an integral extension which is bent inwardly, the opposite end having an integral extension which is bent first inwardly and then outwardly, said extensions being adapted to interlock with each other.

1,679,456. CARBURETOR. ALBERT WAGNER, Cincinnati, Ohio, assignor to Wagner Research Society, Cincinnati, Ohio, a Copartnership comprising Albert Wagner, Henry A. Meyer, Felix Eisbach, and Jacob Block. Filed Aug. 30, 1922. Serial No. 585,161. 2 Claims. (Cl. 137—144.)

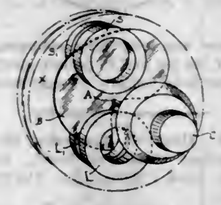


1. In a carburetor, the combination of a fuel-controlling needle valve having a recess in its side, a rock shaft arranged exteriorly to said valve, a cam on said shaft, and an angle lever mounted above the cam and between the same and the valve, one arm of the angle lever engaging the cam and the other arm thereof engaging the recess in the side of the valve.

2. In a carburetor, the combination of a reciprocatory fuel-controlling needle valve, a butterfly air-choke valve, an operating shaft comprising a member mounted for rocking movement, and a member telescopically fitted thereto whereby it may have independent relative sliding movement, a tappet having a lost-motion operative connection with the air-choke valve, a link connection between said tappet and the slidable member of the operating shaft, a cam on the first-mentioned member of the operating shaft, and an angle lever mounted between said cam and the fuel-controlling valve with one arm in engagement with the cam and the other arm in engagement with the said valve.

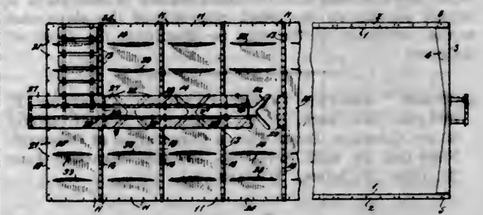
1,679,457. DYNAMO-ELECTRIC MACHINE. JOHN B. WIARD, Lynn, Mass., assignor to H. C. Dodge, Incorporated, South Boston, Mass., a Corporation of Massachusetts. Filed Aug. 3, 1927. Serial No. 210,291. 7 Claims. (Cl. 172—120.)

5. A dynamo electric machine having a rotor and a stator, the latter comprising a stator core and a stator housing, including end housings forming air chambers at opposite ends of the stator, the machine having air discharge passages circumferentially distributed about the stator between the end air chambers but communicating therewith, the machine being supported by the housing at one end, a by-pass arranged externally the stator and connecting the end air chambers, the said supporting housing being otherwise closed to the admission of external air, an air admission opening in the opposite housing, an air circulation device comprising fan blades driven by the end of the rotor adjacent said housing, and an air deflector for directing the air admitted through said opening



to within the path of the fan blades, whereby cooling air is caused to enter at one end of the stator housing and pass in part directly therethrough to said discharge passages and in part to the opposite end of the stator housing through said by-pass and thence to said discharge passages.

1,679,458. SLOT MACHINE. FREDERICK L. WILLIAMS and GUSTAVE F. KRAFT, Kansas City, Mo. Filed Aug. 9, 1926. Serial No. 128,133. 3 Claims. (Cl. 194—75.)

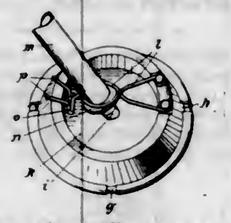


1. In a dispensing device having an open sided shelf for supporting a pile of packages; a pair of bent rods slidably mounted in said device one extremity of each of said rods adapted to partially surround the lower-most package upon said shelf the other extremities of said rods being parallel; a coin block supported between the parallel portions of said rods and adjustably secured thereto, said coin block being U shaped in plan and provided with co-acting grooves in the interior face of the opposite sides of said U to receive the edges of said coin; a lever operable from the exterior of said device and arranged so that its free extremity projects between the sides of said U, so as to contact with the coin in said grooves; a coin chute terminating above said grooves when said slidable rods are in one position and a bar secured to said lever so as to travel therewith and prevent the exit of coins from said coin chute when said grooves are moved away therefrom.

1,679,459. TUNING DEVICE FOR RADIO RECEIVING SETS. PETER WILLIAM WILLANS, Towcester, and ARTHUR STANLEY, Bloomfield, near Chelmsford, England, assignors to Radio Corporation of America, a Corporation of Delaware. Filed Jan. 14, 1925, Serial No. 2,366, and in Great Britain Jan. 16, 1924. 13 Claims. (Cl. 171—242.)

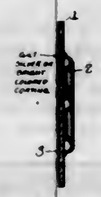
1. A variometer comprising two pairs of inductance coils, the two coils of each pair being similar to one another and mounted coaxially, and an irregular shaped shield mounted upon an axis parallel to the axes of the coils in such a way that it can be rotated so as to lie between the coils of either pair, whereby the inductance of the variometer may be varied in accordance with a predetermined law.

1,679,460. CAR ROOF. THERON H. WILLIAMS, Chicago, Ill., assignor, by mesne assignments, to Chicago-Cleveland Car Roofing Company, Chicago, Ill., a Corporation of Delaware. Filed Oct. 11, 1923. Serial No. 667,955. 9 Claims. (Cl. 108—5.4.)



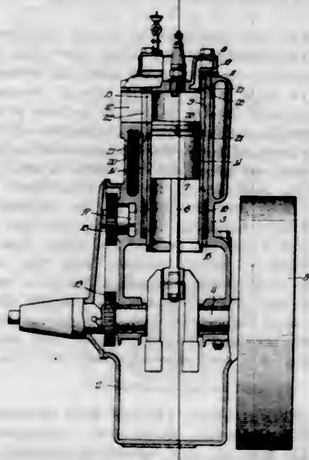
1. In a car roof, in combination: a roof frame comprising side plates, carlines arched from side plate to side plate and channeled on their under sides and formed only at their eaves ends with lateral bottom flanges, and formed between said lateral flanges to provide a flat web and two depending vertical sides, the portions of the flat web of the carlines adjacent the side plates being inclined downwardly and merging into the said lateral bottom flanges thereof, roof sheets formed with seam flanges enclosing the tops and the sides of the carlines; only one of said flanges enclosing all of one side and the top of a carline and a portion only of the other side of the carline in metal to metal contact with the enclosed adjacent parts, said sheets depending down on the outer sides of said side plates; means for rigidly fastening together the seam flanges of said roof sheets with each other and with the tops of said carlines; and means for rigidly securing said roof sheets to said side plates.

1,679,461. ANTISLIPPING DEVICE FOR STANDS AND THE LIKE. RICHARD WÖRSCHING, Starnberg, Germany. Filed May 17, 1927, Serial No. 191,972, and in Germany Apr. 25, 1927. 2 Claims. (Cl. 45—137.)



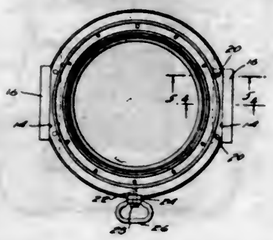
2. An anti-slipping attachment for the feet of tripod legs and the like comprising a member having an opening to receive the point of the end of the leg, and a pair of

spring clamps each secured at one end to said member and having a manipulating handle at its opposite end, the intermediate portions of the clamps being offset in



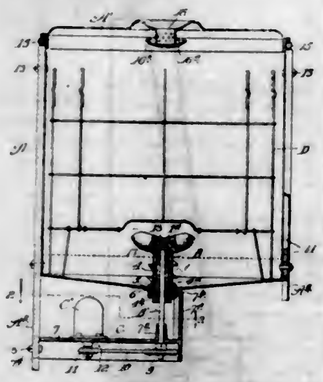
opposite directions and providing clamping portions to engage the end of the leg and to permit yielding movement thereof in all directions radially of said member.

1,679,462. SIGN. HARRY F. ANDERSON, Marion, Ind., assignor of one-half to James Boyce, Laketon, Mich. Filed May 22, 1926. Serial No. 110,873. 1 Claim. (Cl. 40—141.)



A sign comprising, in combination, a frame, a clear glass plate having a rough rear surface and a smooth front surface mounted in said frame, a character of translucent glass cemented to the front surface of said plate, a colored coating on the rough rear side of the plate, and means exteriorly of the sign to illuminate the front of the plate.

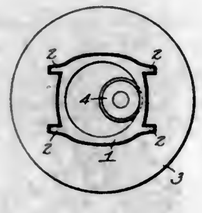
1,679,463. ENGINE CONSTRUCTION. CLARENCE E. BONNER, New York, N. Y., assignor to Bonner-Charter Motor Company, Dover, Del., a Corporation of Delaware. Filed Oct. 28, 1922, Serial No. 597,468. Renewed June 23, 1928. 3 Claims. (Cl. 123—80.)



1. In a cylinder construction adapted for use with fluid under pressure, a fixed cylinder member having ports therein and having an inner cylindrical surface, a second cylinder removable from the fixed cylinder and having an exterior cylindrical surface and ports therein, a sleeve valve adapted to be rotated between said cylinders to control said ports, circumferential steps on the outside and inside of said valve member, cooperating steps on said other members to entirely seal said members from leakage, said steps being located upon opposite sides of the port.

1,679,464. PRESS POT AND PROCESS OF MAKING SAME. FRED S. CARVER, East Orange, N. J. Filed Mar. 14, 1925. Serial No. 15,642. 4 Claims. (Cl. 29—148.)

1. The process of making a press pot, which includes the steps of forging same as a ring of uniform circular section, machining same as a ring of uniform circular section, thereafter flattening the ring on opposite sides, and attaching guide lugs to the flattened parts.

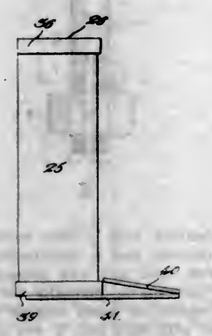


1,679,465. DISHWASHING MACHINE. GEORGE W. CONOVER, Chicago, Ill., assignor to The Conover Company, Chicago, Ill., a Corporation of Illinois. Filed Jan. 24, 1920. Serial No. 353,841. 9 Claims. (Cl. 141—9.)

1. In a dish-washing machine, the combination of a vessel, a central vertical shaft extending through the bottom thereof and provided with a suitable bearing, means connected with the lower end of and serving to rotate said shaft, and a water-elevating and spreading device carried by the upper end of said shaft and comprising a screw for elevating the water centrally and a deflector constituting a continuation of said screw and adapted to further elevate and spread the water.

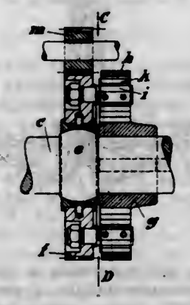
1,679,466. METHOD OF FORMING WATCHCASES. HARRY COOK, Sag Harbor, N. Y., assignor to Joseph Fahys & Company, New York, N. Y., a Corporation of New York. Filed Nov. 9, 1925. Serial No. 67,881. 3 Claims. (Cl. 29—179.)

1. The method of making a watch-case center in one piece with integrally-formed lugs, which method consists in forming a blank provided with projecting lugs and substantially similar in contour to the finished one-piece watch-case center, in placing said blank in a die having



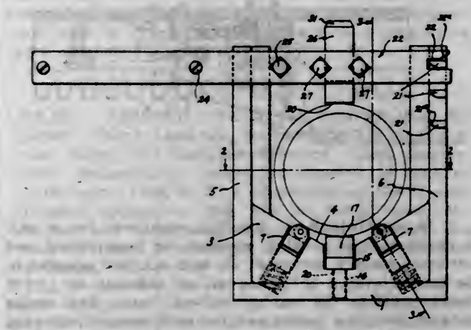
a contour corresponding to that of the finished one-piece watch-case center, and finally in applying pressure to said blank to expand said blank into exact conformity to the contour of said die.

1,679,467. SEAL. JOHN L. DINSMOOR, New York, N. Y. Filed May 28, 1925. Serial No. 33,382. 3 Claims. (Cl. 292—314.)



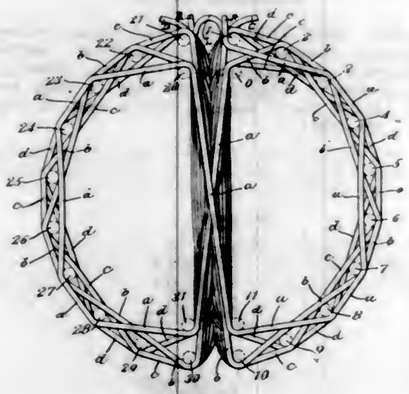
1. A seal formed of a strip of flexible material including in combination two tubular studs formed from said strip, each of said studs having an inturned outer flange, an orifice near one end of said strip adapted to be entered by one of said studs, the other of said studs adapted to telescope over said first mentioned stud, said studs and orificed strip-end being adapted for interlocking by compression.

1,679,468. DISPLAY CASE. ARTHUR L. GARNISS, Springfield, Mass., assignor to Dennison Manufacturing Company, Framingham, Mass., a Corporation of Massachusetts. Filed Oct. 24, 1927. Serial No. 228,122. 5 Claims. (Cl. 206—44.)



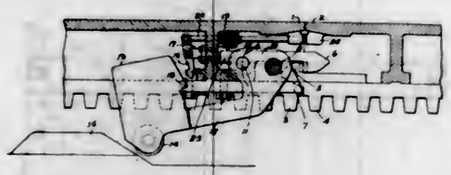
1. A container comprising a formed body portion consisting of a case having back, side, bottom and top walls, a base secured to said bottom wall, and a top piece hinged to said top wall and having side and front flanges, and a front wall hinged to the base of said body portion, and made up of two hingedly joined sections, the inner section being secured to said base and the outer section being free, whereby said front wall in one position closes said container and in the other position opens said container disclosing the contents thereof, said front wall being held closed by the flange of said top piece and when in the open position the outer section of said wall forms a surface on which said body portion is supported vertically and inner section forms a surface in front of said base upon which any desired insignia may be displayed.

1,679,469. RAIL VEHICLE. JOSEF GEIGER, Augsburg, Germany, assignor to Maschinenfabrik Augsburg-Nuernberg Aktiengesellschaft, Augsburg, Germany, a Corporation of Germany. Filed May 21, 1926, Serial No. 110,637, and in Germany June 2, 1925. 5 Claims. (Cl. 105—131.)



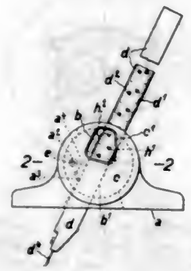
1. In combination with a rail vehicle operated by a combustion motor, a driving axle carrying a ball journal, a gear-wheel mounted loosely upon said ball journal, resilient means for coupling said gear-wheel to said driving axle, said resilient means comprising a disk, which is rigidly mounted upon said driving axle, driving pins mounted on said gear-wheel, said driving pins projecting into recesses in said disk, and springs interposed between said pins and the walls of said recesses of said disk.

1,679,470. PIPE CUTTER. LOUIS H. GOELTZ, Milwaukee, Wis. Filed Mar. 4, 1927. Serial No. 172,581. 12 Claims. (Cl. 81—187.)



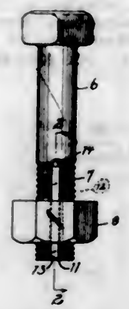
1. A pipe cutter comprising cooperable chisels and means for centering the pipe between the chisels, including a pair of spring projected rollers.

1,679,471. ELECTRIC COIL. DWIGHT B. HILL, Winchester, Mass., assignor of one-half to Herbert F. French, Randolph, Mass. Filed Apr. 30, 1925. Serial No. 26,997. 3 Claims. (Cl. 175—359.)



1. An electric coil comprising a continuous winding which extends circumferentially of the coil throughout approximately 180°, thence substantially diametrically from side to side, thence approximately 180° in the opposite direction, thence substantially diametrically in the opposite direction, and so on throughout succeeding turns, the circumferential portions having an inner and outer periphery, the winding crossing back and forth between the inner and outer peripheries throughout the circumferential portions, the diametrical portions of some of the turns spanning the inner periphery and the diametrical portions of others of the turns spanning the outer periphery.

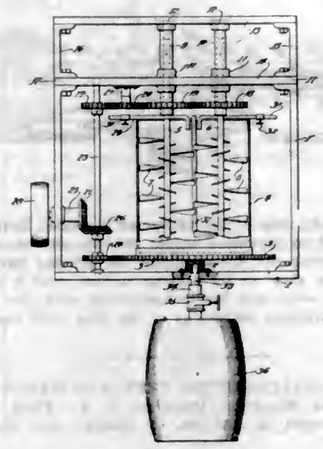
1,679,472. CAR-COUPLING APPARATUS. HALBERT K. HITCHCOCK, Pittsburgh, Pa., assignor to Pittsburgh Plate Glass Company, a Corporation of Pennsylvania. Filed June 9, 1926. Serial No. 114,644. 6 Claims. (Cl. 51—240.)



1. In combination in coupling apparatus for a car, a coupling hook member mounted for longitudinal and vertical swinging movement on said car, and adapted to be hooked over a projection on an adjacent car, pivot means fixed in the end of the car, toggle link means between the pivot means and the hook member, arranged to move the hook member so as to draw it inward towards the projection on the adjacent car to thereby draw the cars together as the link means swings in one direction, means for yieldingly forcing the link means in such direction, a latch for holding the link means in its reverse position, and means for releasing the latch.

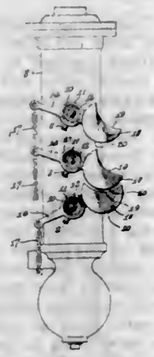
1,679,473. DEPTH GAUGE. WALTER KABISIUS, Jena, Germany, assignor to the Firm of Carl Zeiss, Jena, Germany. Filed May 26, 1923, Serial No. 641,647, and in Germany Dec. 14, 1920. 2 Claims. (Cl. 33—169.)

1. In a depth gauge, a body having a side constituting a stop surface, a cylindrical guide carried by said body rotatable on an axis parallel to the plane of said side and perpendicular to the longitudinal axis thereof, there being a slot in said guide perpendicular to the pivotal axis thereof, a measure slidably fitting said slot, there being a plurality of scales on said measure, and cooperating indices on said guide, each scale corresponding to a certain definite angular position of said guide and scale relative to said stop surface, whereby the perpendicular distance from the end of said measure to the stop surface may be read off.



1,679,474. NUT LOCK. GUSSIE V. KENTON, Overland, Mo. Filed Aug. 24, 1927. Serial No. 215,112. 2 Claims. (Cl. 151—8.)

1. In combination with a bolt having a longitudinal slot formed therein, and a longitudinal recess in communication with said slot and beneath the threads of said bolt, a leaf spring pivotally secured in said slot so as to be capable of being rotated into the recess in communication with said slot, a nut having a longitudinal slot formed therein.



1,679,475. PROCESS OF MAKING EMULSIONS AND PRODUCT THEREOF. LESTER KIRSCHBRAUN, Leonia, N. J. Original application filed Aug. 21, 1922, Serial No. 583,407. Divided and this application filed Mar. 24, 1926. Serial No. 96,965. 3 Claims. (Cl. 134—1.)

1. A process of making an emulsion, consisting in mixing a colloidal emulsifying agent with such proportion of the end product of a previously prepared emulsion of the same general characteristics as to produce a paste, in subsequently adding thereto bituminous mate-

rial in heated liquid condition, agitating, producing dispersion of the added bituminous material and thereby producing fresh emulsion.

1,679,476. STEAM GAUGE. WILFRED H. KUHN, Detroit, Mich., assignor to Wright-Austin Company, Detroit, Mich., a Corporation of Michigan. Filed Apr. 26, 1926. Serial No. 104,605. 5 Claims. (Cl. 251—147.)

3. The combination of a series of gauge cocks arranged in a vertical row and near together, each cock comprising stem for operating said valve projecting from said body, a detachable and reversible valve seat for said valve, a stem for operating said valve projecting from said body, and an operating lever on the outer end of said stem, said operating lever having a hub portion mounted on said stem and a weight member at one side of said hub and an arm at the opposite side of the hub, and means for frictionally securing said hub against rotation relative to said stem to provide for adjustment of said levers on the several cocks, relative to each other when the seating of a valve upon its seat is changed by the renewal or reversal of its valve seat.

1,679,477. RESERVE DYEING ON VEGETABLE FIBERS. HANS LEEMANN, Bottmingermuhle-Binningen, near Basel, and GIOVANNI TAGLIANI, Basel, Switzerland, assignors, by mesne assignments, to Munitex Corporation, Lodi, N. J., a Corporation of New Jersey. Original application filed Apr. 27, 1925, Serial No. 26,289, and in Germany May 7, 1924. Divided and this application filed May 20, 1926. Serial No. 110,536. 10 Claims. (Cl. 8—5.)

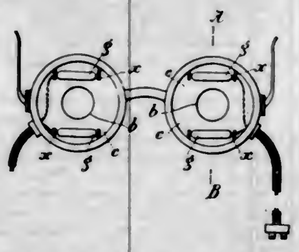
1. A process for reverse dyeing on vegetable fibers, which consists in treating topically the vegetable fibers by a local printing with an alkalizing agent, thereupon applying an esterifying aromatic acid chloride to produce a topical alteration of the locally printed fiber, thus constituting reserve effects, then washing subsequently to the esterification, thereupon dyeing the reserved parts thus obtained and finally effecting a subsequent dyeing of the unaltered vegetable fibers.

1,679,478. RESERVE DYEING ON VEGETABLE FIBERS. HANS LEEMANN, Bottmingermuhle-Binningen, near Basel, and GIOVANNI TAGLIANI, Basel, Switzerland, assignors, by mesne assignments, to Munitex Corporation, Lodi, N. J., a Corporation of New Jersey. Original application filed Apr. 27, 1925, Serial No. 26,289, and in Germany May 7, 1924. Divided and this application filed May 20, 1926. Serial No. 110,538. 4 Claims. (Cl. 8—5.)

1. A process for reserve dyeing on vegetable fibers, which consists in treating topically the vegetable fibers by a local printing with an alkalizing agent, thereupon applying an esterifying aromatic acid chloride to produce a topical alteration of the locally printed fiber, thus constituting reserve effects, then washing after the esterification, and thereupon dyeing the thus topically altered fibers first with an acid dyestuff and then with a substantive dyestuff.

1,679,479. RESERVE DYEING ON VEGETABLE FIBERS. HANS LEEMANN, Bottmingermuhle-Binningen, near Basel, and GIOVANNI TAGLIANI, Basel, Switzerland, assignors, by mesne assignments, to Munitex Corporation, Lodi, N. J., a Corporation of New Jersey. Original application filed Apr. 27, 1925, Serial No. 26,289, and in Germany May 7, 1924. Divided and this application filed May 20, 1926. Serial No. 110,539. 4 Claims. (Cl. 8—5.)

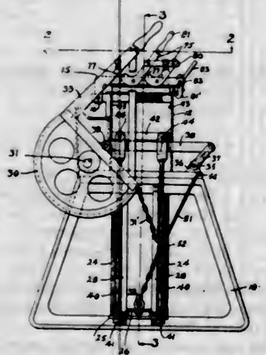
1. A process for reserve dyeing on vegetable fabrics, which consists in treating topically the vegetable fibers by a local printing with an alkalizing agent, thereupon applying an esterifying aromatic acid chloride to produce a topical alteration of the locally printed fiber, thus constituting reserve effects, then washing after the esterification, and thereupon dyeing the thus topically altered fibers in one single bath with both a substantive and a convenient acid dyestuff.



1,679,480. RESERVE DYEING ON VEGETABLE FIBERS. HANS LEEMANN, Bottmingermuhle-Binningen, near Basel, and GIOVANNI TAGLIANI, Basel, Switzerland, assignors, by mesne assignments, to Munitex Corporation, Lodi, N. J., a Corporation of New Jersey. Original application filed Apr. 27, 1925, Serial No. 26,289, and in Germany May 7, 1924. Divided and this application filed May 20, 1926. Serial No. 110,540. 4 Claims. (Cl. 8—5.)

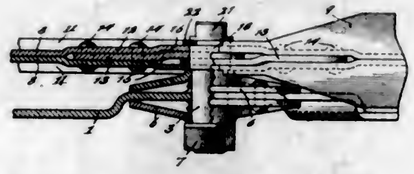
1. A process for reserve dyeing on vegetable fabrics, which consists in treating topically the vegetable fibers by a local printing with an alkalizing agent, thereupon applying an esterfying aromatic acid chloride to produce a topical alteration of the locally printed fiber, thus constituting reserve effects; then washing after the esterification, and thereupon treating the thus topically altered fibers first with a salt of a diazotable base and then after diazotizing with developing means.

1,679,481. RESERVE DYEING ON VEGETABLE FIBERS. HANS LEHMANN, Bottmingermuhle-Binningen, near Basel, and GIOVANNI TAGLIANI, Basel, Switzerland, assignors, by mesne assignments, to Munitex Corporation, Lodi, N. J., a Corporation of New Jersey. Original application filed Apr. 27, 1925, Serial No. 26,289, and in Germany May 7, 1924. Divided and this application filed May 20, 1926. Serial No. 110,541. 4 Claims. (Cl. 8—5.)



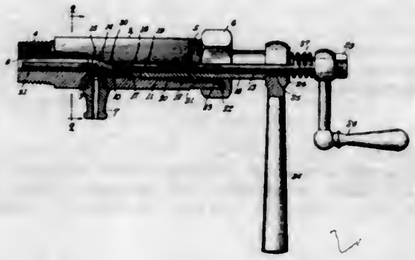
1. A process for reserve dyeing on vegetable fibers, which consists in treating topically the vegetable fibers by a local printing with an alkalizing agent, thereupon applying an esterifying aromatic acid chloride to produce a topical alteration of the locally printed fiber, thus constituting reserve effects, then washing after the esterification, thereupon treating the thus topically altered fibers with covering substances and afterwards dyeing same first with a basic and then with a substantive dyestuff, in order to obtain batik effects.

1,679,482. SPECTACLES WITH LIGHTING DEVICE. BERNHARD LERDEN, Vienna, Austria. Filed June 1, 1925, Serial No. 34,190, and in Austria June 6, 1924. 2 Claims. (Cl. 128—23.)



1. A device of the character described, comprising a pair of bridge-connected annular members of channel shape in cross section, a plurality of pairs of lamp holders secured in each of said annular members, and a tubular incandescent lamp removably supported in each pair of holders.

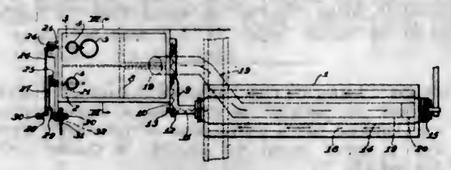
1,679,483. BLOCK-MOLDING MACHINE. ANSON F. LEWIS, deceased, Santa Barbara, Calif., by Elizabeth Lewis, administratrix, Santa Barbara, Calif., assignor to Mortarless Tire Machine Company, Santa Barbara, Calif., a Corporation of California. Filed Dec. 28, 1925. Serial No. 77,953. 16 Claims. (Cl. 25—83.)



1. In a concrete block machine, a mold, cores in said mold, an upwardly moving compression member movable between the cores and the mold, a plurality of rods connected to said compression member and means to move said rods vertically, said means comprising a pair of levers, and means to move said levers horizontally and upwardly.

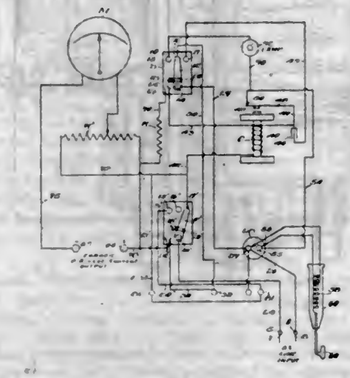
1,679,484. BRAKE SHOE AND MOUNTING THEREFOR. MALCOLM LOUGHEAD, Detroit, Mich., assignor to Hydraulic Brake Company, Los Angeles, Calif., a Corporation of California. Filed Mar. 17, 1927. Serial No. 175,957. 6 Claims. (Cl. 188—250.)

3. A brake shoe of the character described having one end formed to provide a thrust bearing surface, a brake shoe mounting pin for engaging the bearing surface to support the shoe on its bearing surface, and a member carried by said shoe for encompassing said pin to preclude longitudinal movement of the shoe with respect to the pin.



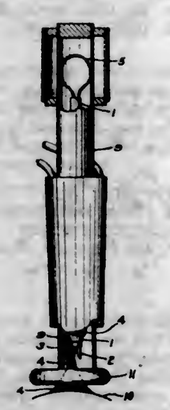
1,679,485. SALINOMETER, TEST, AND GAUGE COCK. JAMES D. MAXWELL, Brooklyn, N. Y. Filed Dec. 7, 1926. Serial No. 153,168. 5 Claims. (Cl. 251—37.)

3. A gauge cock comprising a valve body having a steam passage at the inner end of the same, an enlargement providing a steam chamber at the outer end of said passage and a conical valve seat between said passage and chamber, a valve stem having a scraper operating in the steam passage and a valve head operating in the steam chamber, said valve head having oppositely facing conical valve faces at the ends of the same, the inner one adapted to engage the valve seat in the valve body, a sleeve having a screw engagement in the valve body, said sleeve surrounding the outer portion of the valve stem and having a conical face at the inner end of the same adapted to engage the outer conical face of the valve head and an angularly projecting lever handle on the outer end of said sleeve by which said sleeve may be forcibly turned to effect close fitting firm engagement of the valve faces at opposite ends of the valve head with the valve seats in the body and at the end of the sleeve respectively, the outer end of the valve stem having means to enable the turning of the same to re-surface the conical valve faces aforesaid and a cap screw engaged on the end of the body, said cap screw having a hub surrounding the screw sleeve and the screw sleeve having a stop shoulder for engagement with said hub.



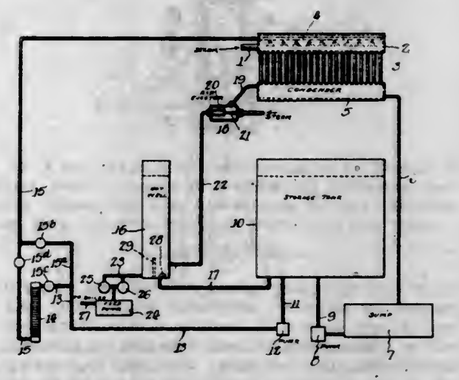
1,679,486. SODA-ASH FURNACE. DWIGHT R. MEANS, Medina County, Ohio, assignor to Pittsburgh Plate Glass Company, a Corporation of Pennsylvania. Filed Oct. 14, 1926. Serial No. 141,597. 7 Claims. (Cl. 23—279.)

1. Apparatus for calcining soda, comprising a covered calcining pan arranged to discharge the calcined material at one end and provided with agitators, means for operating the agitators, a rotary furnace in position to receive the discharge from said pan, a combustion furnace



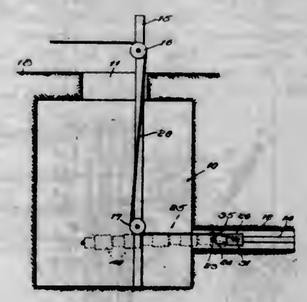
beneath the pan, and means for conducting the heated gases from the combustion furnace along the shell of the rotary furnace.

1,679,487. ELECTRIC-CURRENT SYSTEM. WILLIAM MEYER, Chicago, Ill. Filed July 31, 1925. Serial No. 47,182. 11 Claims. (Cl. 174—177.)



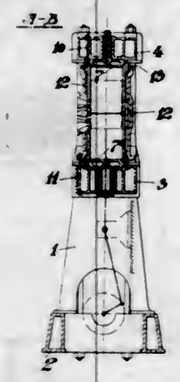
1. In an electric current system, the combination of a high frequency circuit, an induction circuit and a common single winding coil for both said circuits, said coil operating as a charging coil in the high frequency circuit and furnishing faradic current in a separate circuit by self-induction.

1,679,488. HAIR-WAVING CURLER. CHARLES NESSLER, New York, N. Y. Filed Jan. 8, 1926. Serial No. 79,959. 7 Claims. (Cl. 132—36.)



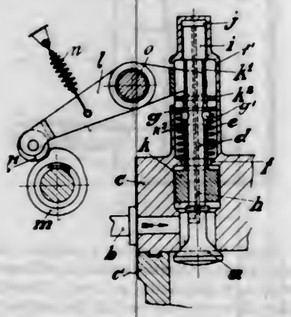
1. A curler for permanent hair waving, comprising a rod around which a tress of hair may be wound for insertion in a heater, the said rod having mounted thereon a laterally compressible yielding member insertable with said rod and adapted to engage frictionally the interior of the heater and placed under tension thereby.

1,679,489. WATER SYSTEM. CHARLES B. PAGE and WARREN DEAN BURTON, Evanston, Ill., assignors to George W. Dulany, jr., Chicago Ill. Filed Sept. 28, 1925. Serial No. 58,996. 4 Claims. (Cl. 257—38.)



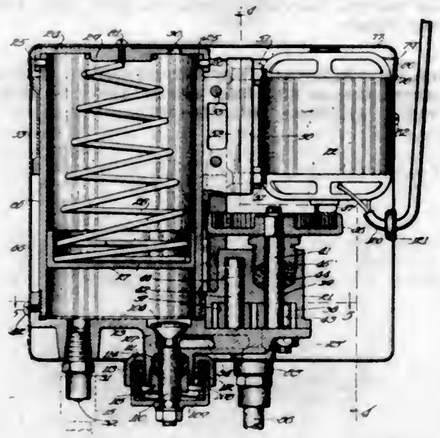
1. A water system comprising, in combination, a radiator for condensing steam, a sump to receive water from said radiator, a cool-water storage tank, a pump for forcing water from the sump to the storage tank, a relatively small hot well, an equalizing pipe connecting the lower portions of said storage tank and hot well, an air ejector for withdrawing air from the radiator, said ejector comprising a steam nozzle, the mixture of air and steam being delivered to said hot well, a pump for delivering hot boiler feed water from the hot well, a second radiator, a spray pipe operatively related to the first radiator, and a pump for forcing cool water from said storage tank through the second radiator and thence to said spray pipe.

1,679,490. CABLE-PULLING DEVICE. HENRY L. PARKER, Chicago, Ill. Filed Dec. 18, 1926. Serial No. 155,567. 8 Claims. (Cl. 175—376.)



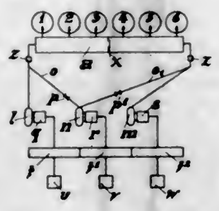
4. In an apparatus for pulling a flexible cable through a conduit, an integral tubular sleeve insertable in one end of the conduit and embracing an end of the cable, means for connecting the external end of the sleeve to said end of the cable, said means comprising a transverse pin extending through the end of the cable and resting against the end of the sleeve, and flexible pulling means connected to a portion of the sleeve inside of the conduit.

1,679,491. VERTICAL INTERNAL-COMBUSTION ENGINE. GUSTAV PIELSTICK, Augsburg, Germany, assignor to the Firm Maschinenfabrik Augsburg-Nuernberg Aktiengesellschaft, Augsburg, Germany, a Corporation of Germany. Filed Apr. 11, 1925, Serial No. 22,294, and in Germany May 15, 1924. 10 Claims. (Cl. 123—61.)



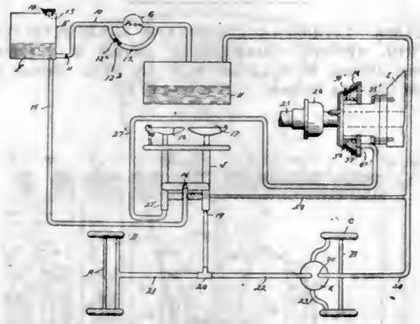
4. In a double-acting internal combustion engine of the character described, a cylinder, a cylinder head for each end of the cylinder, a supporting framework for said cylinder comprising a supporting member seating against each cylinder head, and stays for holding said supporting members in spaced relation, said cylinder comprising a cooling jacket, a cylinder liner therein divided transversely of said cylinder into two parts, means clamping one part of said liner to the adjacent supporting member to hold said part of the liner in gas-tight relation against the adjacent cylinder head, means clamping the cooling jacket to the other supporting member, said cooling jacket and the other part of the liner having cooperating engaging surfaces whereby the other part of said liner is clamped in gas-tight relation against the other cylinder head, and tie means connecting the supporting members together to clamp the whole in assembled relation, whereby each part of the liner is permitted to freely expand toward or contract away from the other part.

1,679,492. STARTING DEVICE FOR STARTING COMBUSTION ENGINES. GUSTAV PIELSTICK, Augsburg, Germany, assignor to Maschinenfabrik-Augsburg-Nuernburg Aktiengesellschaft, Augsburg, Germany, a Corporation of Germany. Filed Sept. 14, 1925, Serial No. 56,260, and in Germany Sept. 20, 1924. 10 Claims. (Cl. 60—16.)



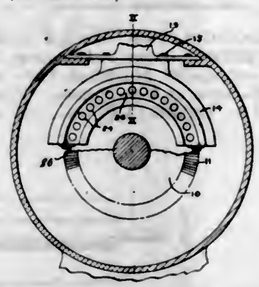
1. A starting device for starting internal combustion engines by pressure air, comprising a starting valve, actuating mechanism, means urging said actuating mechanism toward inoperative positioning, and a controlling piston responsive to starting air pressure for moving said actuating mechanism into operative positioning and concomitantly urging said starting valve toward closed position during starting of said engine.

1,679,493. LUBRICATING SYSTEM. EARL F. PIERCE, Chicago, Ill., assignor to The Bassick Manufacturing Co., Chicago, Ill., a Corporation of Delaware. Filed Feb. 2, 1921. Serial No. 441,738. 4 Claims. (Cl. 221—47.4.)



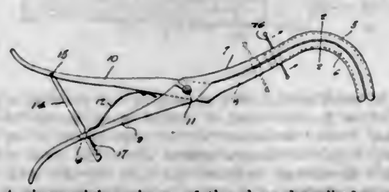
1. A manually portable high pressure lubricating device for successively lubricating a plurality of bearings, comprising a continuously operable, power driven compressor, a discharge conduit therefor having means for forming a lubricant-tight connection with a bearing to be lubricated, means for relieving the pressure in said discharge conduit when a predetermined maximum pressure is reached, and manually adjustable means for determining said predetermined pressure.

1,679,494. POWER PLANT. MAXIMILIAN PLOCHMANN, Augsburg, Germany, assignor to Maschinenfabrik Augsburg-Nuernberg A.-G., Augsburg, Germany, a Corporation. Filed Mar. 13, 1926, Serial No. 94,525, and in Germany Mar. 23, 1925. 10 Claims. (Cl. 123—59.)



2. In apparatus of the character described, an arrangement of blowers acting as scavenging pumps for a two stroke internal combustion engine operating with scavenging air, comprising three blowers, each of which is capable of giving a normal delivery equal to half the scavenging air requirement of the said engine, two of said blowers being used for normal working of said engine and one being held in reserve, and independent motors for driving each of said blowers.

1,679,495. BRAKE CONSTRUCTION. THOMAS F. RAINSFORD, Detroit, Mich., assignor of one-fourth to Thomas C. Whitehead, Detroit, Mich. Original application filed Apr. 6, 1925, Serial No. 21,137. Divided and this application filed Dec. 17, 1925. Serial No. 76,072. 16 Claims. (Cl. 188—194.)

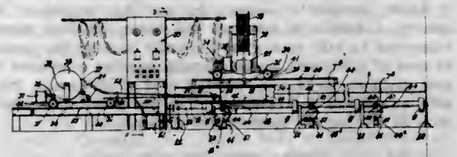


4. The combination with a pair of steering wheels of a fluid pressure operated brake unit for each of said wheels, a source of fluid under pressure, a supply pipe for conducting said fluid from said source to said brake units, a steering wheel control device for controlling the flow of fluid through said supply pipe, said device including a member movable upon a steering movement of said steering wheels for automatically releasing the fluid pressure applied to the steering wheel brake unit upon a predetermined steering position of the steering wheels.

1,679,496. TURBINE-NOZZLE MANIFOLD. JAMES L. RAY, Essington, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Mar. 28, 1924. Serial No. 702,492. 4 Claims. (Cl. 253—78.)

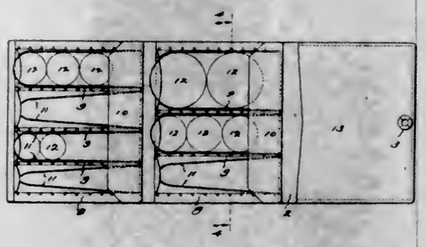
1. A high-pressure turbine nozzle manifold formed from one piece of forged steel, and having therein a circumscribed curved distributing passage and a plurality of ports communicating therewith, said ports being so spaced as to leave sufficient metal around said passage to withstand the high pressure therein.

1,679,497. CIRCUMCISION CLAMP. ERNEST E. REEVES, Ridgeway, S. C. Filed Sept. 14, 1927. Serial No. 219,452. 4 Claims. (Cl. 128—305.)



1. A circumcision clamp of the class described comprising a pair of curved concentric jaws provided on opposite sides with channels having slots registering with each other, blocks slidable in the channels and a knife connecting the blocks extending through the slots.

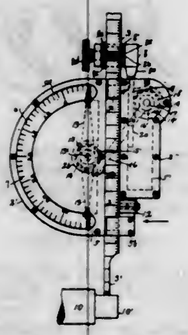
1,679,498. FLOOR MAT FOR VEHICLES. EDWARD E. RICHARDSON, Maumee, Ohio. Filed Jan. 9, 1926. Serial No. 80,170. 16 Claims. (Cl. 74—81.)



15. A mat having slots therethrough for the passage of levers, resilient flanges of progressively increasing flexibility closing said slots, and sections between two adjacent slots formed to constitute halves of a scarf joint.

1,679,499. METHOD OF AND APPARATUS FOR MAKING STOVEPIPE CASINGS. WILLIAM E. RUPLEY, Los Angeles, Calif., assignor to Western Pipe & Steel Company of California, San Francisco, Calif., a Corporation of California. Filed Sept. 26, 1925. Serial No. 58,951. 9 Claims. (Cl. 219—6.)

1. The method of forming stove pipe casing which comprises welding the abutted ends of a plurality of tubular sections together and to a substantially concentric abutted casing within said sections.

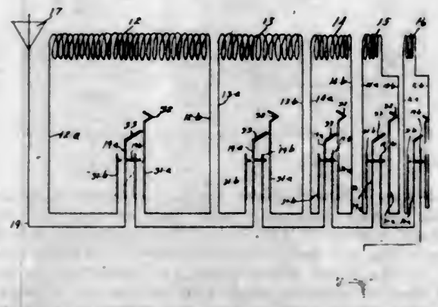


1,679,500. POCKETBOOK. WILLIAM H. SANFORD, Hartford, Conn. Filed Oct. 12, 1926. Serial No. 141,084. 2 Claims. (Cl. 150—35.)

1. A folding pocketbook comprising a flexible outside strip and a flexible inside strip permanently joined at one end and adapted when unfolded to receive bills between them, stubs having their edges extending across and fastened between the strips at the closed end thereof for receiving and separating the ends of the bills which are drawn lengthwise from said stubs and from between the strips when unfolded, coin troughs of different widths with transparent faces extending longitudinally of the strips and having both ends open, attached to

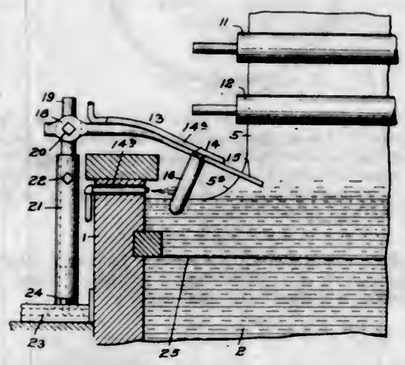
the outer face of said inside strip, a flexible flap attached to said inside strip so as to fold over the inner ends of said troughs, and spring fingers restricting the openings from the outer ends of said troughs.

1,679,501. INDICATOR GAUGE. LINO SCUSA, Phoenix, N. Y. Filed Sept. 29, 1927. Serial No. 222,807. 14 Claims. (Cl. 33—172.)



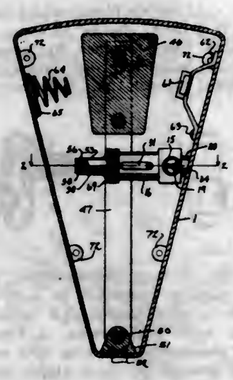
1. An indicator gauge comprising a scale, a gravitative scale bar adapted to indicate measurements of a piece of work, means to mount the bar for movement by gravity, a needle to traverse said scale, resilient means connected to said needle for normally holding the needle at zero of said scale, an oscillatable member connected to said resilient means for moving said needle away from zero, and means depressible by the final gravitative movement of the bar for operating said member.

1,679,502. BOTTLE-MAKING MACHINE. SYDNEY L. SEARS, North Arlington, N. J., assignor, by mesne assignments, to Hartford-Empire Company, Hartford, Conn., a Corporation of Delaware. Original application filed Aug. 14, 1914, Serial No. 857,464. Renewed Sept. 21, 1921, Serial No. 502,181. Divided and this application filed Feb. 1, 1924. Serial No. 689,995. 40 Claims. (Cl. 49—5.)



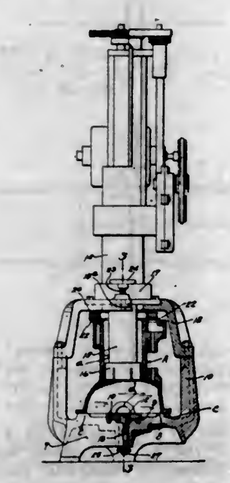
1. In a machine for making molded articles, a frame having a track composed of a main portion in the form of a convex arc of a circle, and another portion, in the form of a concave arc of a circle, connecting the ends of said main portion, a carriage having means to engage said track and to travel along the same, mold portions connected with said carriage and adapted to pass substantially in registry with the center of said concave arc, and means for moving the carriage and for completing the formation of a molded article during the travel of the carriage.

1,679,503. INDUCTANCE COIL AND SELECTIVE CONTROL SWITCH THEREFOR. GEORGE R. SIEGRIST, Port Huron, Mich. Filed Sept. 14, 1922. Serial No. 588,126. 14 Claims. (Cl. 171—242.)



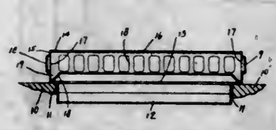
3. In an electric circuit, the combination with an inductance coil sub-divided into a plurality of coil winding sections having independent terminals, of a selective multiple switch adapted to cooperate with said terminals to connect desired coil winding sections individually or in combination in said circuit in a direct progression based upon a given predetermined unit into which the coil is not naturally sub-divided and simultaneously disestablish the connection with the circuit of the unused windings.

1,679,504. EDGE-HOLDING DEVICE FOR SHEET-GLASS MACHINES. HARRY G. SLINGLUFF, Mount Vernon, Ohio, assignor to Pittsburgh Plate Glass Company, a Corporation of Pennsylvania. Filed Mar. 26, 1923. Serial No. 627,675. 4 Claims. (Cl. 49—17.)



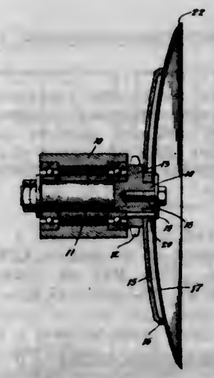
1. In combination with apparatus for drawing a glass sheet from an open pool of molten glass, means for preventing inward movement of the edge of the sheet comprising a pair of fingers spaced apart and fixed against relative movement adjacent the base of the sheet just above the surface of the bath so that they straddle said edge and thin it as the edge moves upward therethrough.

1,679,505. TIRE PUMP. WILLIAM M. STEWART, Albany, N. Y.; Annie E. Stewart administratrix of said William M. Stewart, deceased. Filed Dec. 1, 1924. Serial No. 753,395. 4 Claims. (Cl. 152—11.)



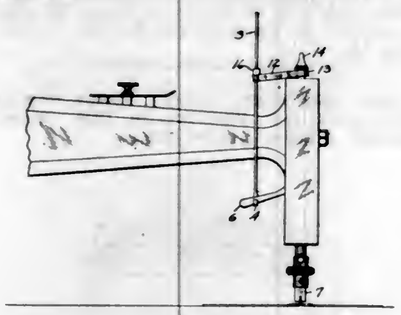
1. A tire pump mechanism mounted on an automotive vehicle wheel and including, in combination, a pump and means including an oscillating weight carrying member associated with said pump and actuated by gravity during the motion of said vehicle wheel to operate said pump to pump air into the tire of the wheel.

1,679,506. CYLINDER-RENEWING MACHINE. ADOLPH STORM, Minneapolis, Minn., assignor to Storm Manufacturing Company, Incorporated, Minneapolis, Minn., a Corporation. Filed Oct. 17, 1925. Serial No. 62,991. 10 Claims. (Cl. 29—26.)



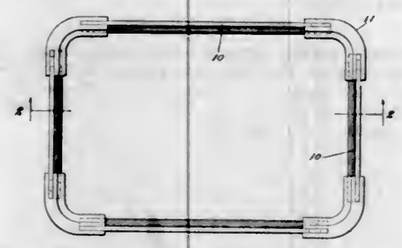
1. A machine of the kind described comprising a bed, an aligning slide mounted on said bed and having aligning devices engageable with a cylinder block to connect the same thereto for common movement therewith to locate the cylinders of the cylinder block with their axes spaced longitudinally of the line of movement of said slide and perpendicular to said slide, a rotary renewing tool capable of axial movements and having its axis in a plane common to the axes of said cylinders and parallel to the said cylinder axes, and an aligning device operative to secure said aligning slide in positions to hold said cylinder block with the axis of the one or the other of the cylinders in alignment with the axis of said renewing tool.

1,679,507. REGISTER FILTER. MORRIS SHALANSKY, Indianapolis, Ind. Filed Dec. 10, 1926. Serial No. 153,994. 1 Claim. (Cl. 98—105.)



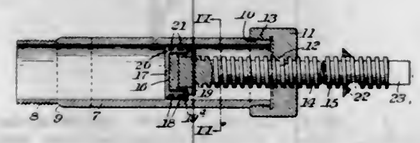
In combination with a register controlled channel and a supporting surface, of a register filter supported by said surface including a wall peripherally enclosing the register and substantially inclosing the supporting surface and forming a continuation of the register controlled channel, said wall having a plurality of openings near the top to discharge laterally of the channel, a filtering screen supported by said wall and substantially transverse to said channel and at the top of said wall and an inwardly directed deflecting wall peripherally associated with the bottom of said wall and substantially coextensive therewith for directing heated air from the register controlled channel inwardly to the central portion of said filtering screen.

1,679,508. KNIFE FOR SLICING MACHINES. HENDRIK STUKART, La Porte, Ind., assignor to U. S. Slicing Machine Company, La Porte, Ind., a Corporation of Indiana. Filed Jan. 16, 1924. Serial No. 686,496. 3 Claims. (Cl. 146—102.)



1. In a slicing machine, a knife spindle having a supporting member mounted thereon provided with a circular laterally facing bearing ring, a relatively thin flat disc knife having its lateral face engaging said bearing ring and having a central opening therein, a central boss connected with said spindle for engaging said opening, and a threaded member for forcing the central portion of said knife laterally to press the face of said knife against said bearing ring and to dish said knife to provide a concave cutting face.

1,679,509. DARNING ATTACHMENT FOR SEWING MACHINES. BELLE D. TAFT, Oakland, Calif. Filed Aug. 31, 1925. Serial No. 53,479. 2 Claims. (Cl. 112—237.)



1. An attachment of the character described comprising a rod having presser-foot engaging means thereon, a clamp slidably mounted thereon and arranged for engagement with a relatively fixed portion of the machine, and a stop member adjustably positioned on the rod and arranged for cooperation with said clamp.

1,679,510. BOX FOR USE AT HIGH TEMPERATURES. EDWARD P. VAN STONE, Reading, Mass., assignor to General Alloys Company, Boston, Mass., a Corporation of Massachusetts. Filed Apr. 7, 1927. Serial No. 181,719. 6 Claims. (Cl. 263—48.)

1. In a box for use at high temperatures, an open ended wall structure comprising a plurality of sheet metal side plates, and cast members connecting said plates, said members being independent of each other and freely movable with the expansion and contraction of said plates.

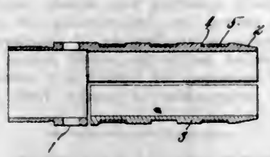
1,679,511. GREASE GUN. WILLIAM J. WARD, Hazelwood, Pa., assignor of one-half to Clifford F. Pugh, Pittsburgh, Pa. Filed May 27, 1927. Serial No. 194,554. 3 Claims. (Cl. 221—47.4.)

1. In a grease gun primarily for filling cups of main and side rods of locomotives, a hollow grease-container body of substantially uniform diameter throughout its length, means for securely attaching one end of said body to the cups, a cap on said body, a grease-expressing piston having a stem passing through said cap into the body, said stem being relatively stout, said cap and stem having interengaging screw threads whereby said stem may be screwed down to express grease, and thereby avoid tilting strains on the gun and consequent rupture of said cups when the gun is operated.

1,679,512. LUBRICATING APPARATUS. OSCAR ZERK, now, by judicial change of name, Oscar Ulysses Zerk, Cleveland, Ohio, assignor, by mesne assignments, to The Bassick Manufacturing Company. Filed Mar. 14, 1921. Serial No. 452,126. 3 Claims. (Cl. 285—9.)

1. In a device of the class described, a flexible tubing, a socket member connected to each end thereof, a plug swivelled in each socket and having an opening communicating with said tubing, a threaded opening in one of said plugs communicating with said first named opening, a cup member having a nipple threaded in said opening, a second member having a cup member seated in said first cup member, a washer between said cup members and slidable in said cup members, means for holding said washer on the bottom of one of said cup members, and means carried by the other socket for effecting a quick detachable connection with a lubricant receiving member.

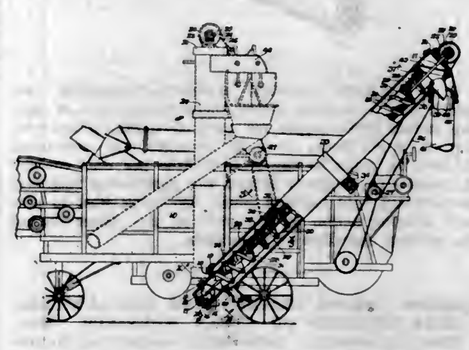
1,679,513. COLLAPSIBLE POLE. NEWTON N. BROWN, Racine, Wis., assignor to Gold Medal Camp Furniture Manufacturing Company, Racine, Wis., a Corporation of Wisconsin. Filed Jan. 30, 1924. Serial No. 689,468. 1 Claim. (Cl. 287—99.)



A collapsible pole of the type having a plurality of parts abutting in end to end relation when the pole is extended and disposed in substantial parallelism when the pole is collapsed and provided with T-shaped members comprising elongated flat shanks fitted upon and fixed to opposite sides of said parts at the adjacent ends thereof and head portions at the outer ends of said shank extending transversely thereof for the full width of the shanks and having lateral extensions projecting beyond the opposite sides of the shanks and of the parts of the pole, certain of said lateral extensions overlapping in all positions of the parts, means for pivotally connecting said overlapping extensions in such manner that the head portions overlap for their entire extent when the pole is extended, and a releasable locking means for holding the parts of the pole extended.

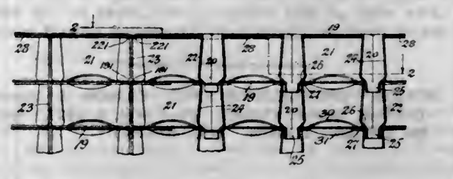
1,679,514. FOLDING FURNITURE. NEWTON N. BROWN, Racine, Wis., assignor to Gold Medal Camp Furniture Manufacturing Company, Racine, Wis., a Corporation of Wisconsin. Filed July 28, 1924. Serial No. 728,545. 8 Claims. (Cl. 4—177.)

1. The combination with a table having legs and side rails, the latter having sockets formed therein, of a collapsible basin, supporting members secured to the sides of said basin and loosely engaging said sockets at their opposite ends, and means for fastening the ends of said basin to said rails.



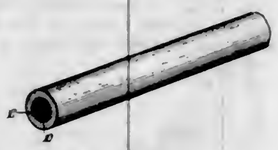
1,679,515. STOCK PUSHER. FRANK L. CONE, Windsor, Vt. Filed July 14, 1923. Serial No. 651,527. 4 Claims. (Cl. 29—62.)

2. A stock pusher comprising a sleeve cut away at one end to form a segmental stock-clamping jaw, a segmental jaw fitting said cut away portion, and one or more spring rings embracing said jaws, said jaws having peripheral grooves to receive said spring rings, whereby said rings act both to hold said jaws assembled and to press them against stock passing through said sleeve.



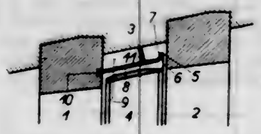
1,679,516. COMBINED GRAIN CLEANER AND ELEVATOR. DANIEL W. DETWILER, Rosebud, Alberta, Canada, assignor to Western Steel Products Limited, Winnipeg, Canada, a Corporation. Filed July 23, 1925. Serial No. 45,508. 6 Claims. (Cl. 209—247.)

3. In an apparatus of the class described, a combination with a boot having an aperture therein through which the grain is received and having a main cylindrical portion in the bottom of which is a bearing, of a cylindrical casing secured at its lower end to the upper end of the cylindrical portion of the boot, a cap for the top of the casing, a screw conveyor shaft journaled in the bearing in the bottom of the boot and in the cap, means for rotating the shaft, a conveyor



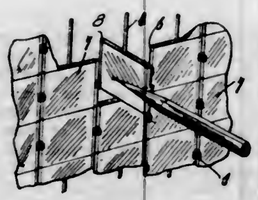
helix secured to the shaft and having its lower end cooperating with the boot, a cylindrical screen surrounding and secured to the helix above the boot, a plate extending transversely of the casing toward the upper end thereof and through which plate the upper end of the conveyor helix extends, and a spout connected with an opening in the side of the casing above the plate.

1,679,517. CORE FOR RADIATORS. JOHN M. FEDDERS, Buffalo, N. Y., assignor to Fedders Manufacturing Company, Inc., a Corporation of New York. Filed Sept. 23, 1925. Serial No. 58,074. 1 Claim. (Cl. 257—130.)



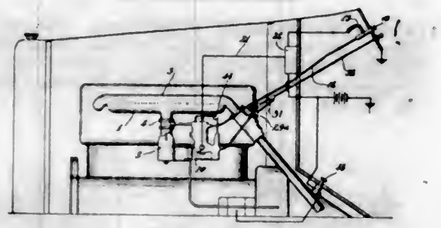
A radiator core having a plurality of water tubes and a plurality of air passages intercalated with said water tubes, said core comprising a plurality of units arranged adjacent to each other and each unit being constructed of a sheet of metal which is bent to form a plurality of pleats and a plurality of webs, the walls of each pleat being spaced apart but connected with each other at one pair of corresponding longitudinal outer edges while their transverse edges at the ends thereof abut against one another to form a tube section, and each of said webs connecting the opposite longitudinal inner edge of one wall of a tube section with the corresponding longitudinal inner edge of the wall of an adjacent tube section, the outer ends of the tube sections of one unit engaging the inner ends of the tube sections of an adjacent unit and provided with a plurality of nipples which open in the tube sections of the adjacent unit to form said water tubes, and the webs of adjacent units being spaced apart to form said air passages.

1,679,518. COMPOSITE-METAL PRODUCT. FRANK F. FOWLE, Chicago, Ill. Filed Aug. 28, 1924. Serial No. 734,554. 2 Claims. (Cl. 173—13.)



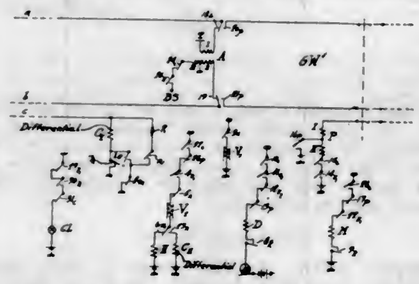
1. A composite electrical conductor comprising two metals and a bonding metal therebetween, one of said two metals being copper for good electrical conductivity and the other being steel for strength and containing at least as much as thirty-hundredths per cent content of chemically combined carbon for minimizing magnetic permeability, said bonding metal also being steel to prevent alloying action of hot steel on the copper during the pouring operation of the metals.

1,679,519. MEANS FOR DRAINING THE LOW-PRESSURE BLADING OF STEAM TURBINES. KARL FREY, Ennetbaden, Switzerland, assignor to Aktiengesellschaft Brown, Boveri & Cie., Baden, Switzerland. Filed Jan. 19, 1928, Serial No. 247,968, and in Switzerland Jan. 11, 1927. 5 Claims. (Cl. 253—76.)



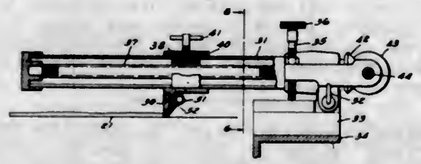
1. Means for draining the low-pressure blading of steam turbines, comprising a casing, an annular partition member arranged outside the moving blades and secured at one edge to the side wall of a guide blade by a tight joint, an outwardly turned flange or lip on the other edge of said partition, said flange or lip being spaced from an adjacent guiding portion of said casing.

1,679,520. CHANGEABLE SIGN. CHARLES A. GIROUX, Montreal, Quebec, Canada. Filed Sept. 6, 1927. Serial No. 217,733. 1 Claim. (Cl. 40—28.)



A changeable exhibitor comprising a marginal frame, a plurality of parallel rods fixed in the frame, a plurality of movable panels pivoted on the rods having their opposed faces formed in contrasting shades to form the outlines of figures and letters by selective adjustment of the panels, and angular resilient clips fixed to the side edges of the panels adapted to resiliently engage and lock the panels in coextensive exhibiting positions.

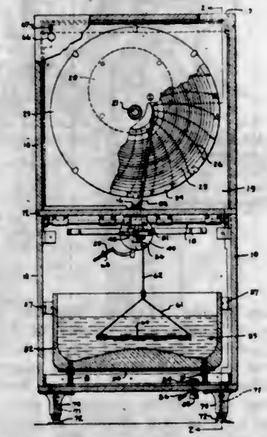
1,679,521. ENGINE-HEATING APPARATUS. JOHN GOOD, Garden City, N. Y., assignor to Good Inventions Co., New York, N. Y., a Corporation of New York. Filed May 21, 1923. Serial No. 640,619. 24 Claims. (Cl. 123—122.)



1. The combination of an internal combustion engine having a cranking means, a liquid fuel burner organized to supply heat to the engine and means transmitting pressure created in the engine cylinder by said cranking means to said burner.

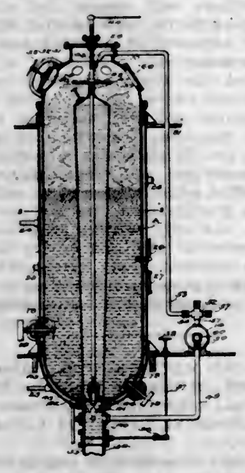
1,679,522. AUTOMATIC TELEPHONE SYSTEM. GEORG GRABE, Nikolassee, near Berlin, Germany, assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill., a Corporation of Delaware. Filed Oct. 8, 1921, Serial No. 506,424, and in Germany Oct. 11, 1920. 17 Claims. (Cl. 179—18.)

1. In a telephone system, a switch, wipers for said switch, means for transmitting a set of impulses to said switch for directly operating said wipers, means for automatically operating said wipers, means controllable from a calling line for releasing the switch, and means responsive to another set of impulses transmitted to said switch before the second named means has completed its operation for locking said switch in operated position independent of control from the calling line.



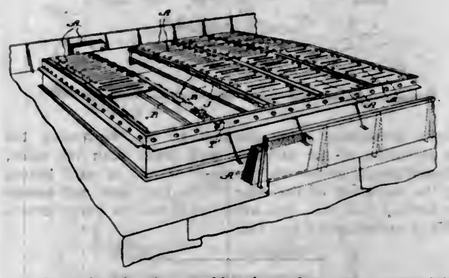
1,679,523. PAPER-MAKING MACHINERY. RALPH E. HEISEL, Chillicothe, Ohio, assignor, by mesne assignments, to Paper Machinery Corporation, Dayton, Ohio, a Corporation of Ohio. Filed May 25, 1925. Serial No. 32,688. 29 Claims. (Cl. 92—44.)

1. In the making of paper in paper-making apparatus having a forming wire and means for flowing pulp upon said wire, the method of confining the pulp to a predetermined area upon the wire by controlling the lateral spread thereof, which method consists in impinging a fluid on said wire at the edge of said area.



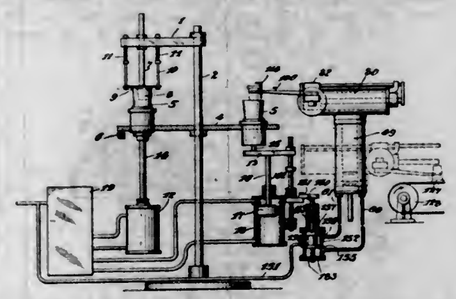
4. In paper making apparatus, a wire, means for flowing pulp upon said wire, and deckle means associated with the wire for limiting lateral spread of the pulp upon the wire, said deckle means comprising a stationary deckle member spaced from said wire.

1,679,524. MEASURING INSTRUMENT. CARL GORHAM HERSHEY, El Paso, Tex., assignor to American Smelting and Refining Company, New York, N. Y., a Corporation of New Jersey. Original application filed Mar. 4, 1924, Serial No. 696,823. Divided and this application filed Apr. 4, 1925. Serial No. 20,626. 12 Claims. (Cl. 171—95.)



1. In a measuring instrument, the combination of a stationary electrode and a movable electrode, means for conducting to said electrodes opposite charges of electricity respectively, and means separating said electrodes comprising a solid and a liquid insulating material.

1,679,525. MEANS FOR TREATING HOLLY AND LIKE PLANTS AND PRODUCTS DERIVED THEREFROM. STEPHEN M. HOYE, Brooklyn, N. Y. Filed Dec. 15, 1922. Serial No. 607,153. 2 Claims. (Cl. 99—2.)

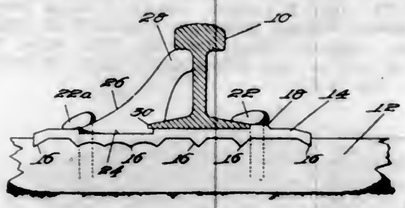


1. In an apparatus of the class described, a vessel adapted to receive the material to be treated, and having a discharge outlet at the bottom, a tubular strainer axially disposed in said vessel, a rod axially positioned in said strainer, and means to tighten the rod for holding the strainer in position.

1,679,526. HATCH COVER. JOSEPH WILLIAM ISHERWOOD and WILLIAM ISHERWOOD, Raggles Wood, Chislehurst, England. Filed June 15, 1925, Serial No. 37,247, and in Great Britain May 4, 1925. 13 Claims. (Cl. 114—201.)

1. In a hatch, the combination of a cover comprising small sections, and wedging means including a sliding bar for simultaneously locking a plurality of sections together.

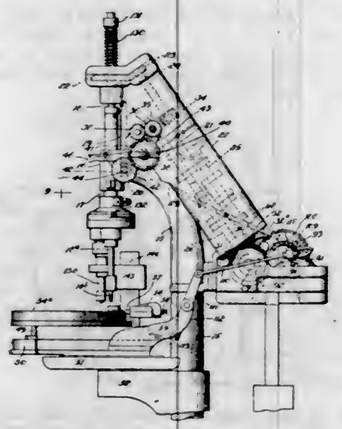
1,679,527. VESSEL-HANDLING DEVICE. MAX JAEGER, Long Island City, N. Y., assignor to Anchor Cap and Closure Corporation, Long Island City, N. Y., a Corporation of New York. Filed Oct. 18, 1924. Serial No. 744,307. 43 Claims. (Cl. 49—14.)



1. In a vessel handling device, the combination of a support for a vessel, a conveyor adjacent said support but at a substantially different level, means for engaging a vessel on said support, mechanism for raising said vessel and delivering it to said conveyor in inverted position, devices for moving said mechanism in a vertical direction during the raising and moving operation, and means for disengaging said engaging means when said vessel reaches said conveyor.

40. In a vessel handling device, the combination of a support for a vessel, a second support adjacent said first support but at a substantially different level, means for gripping a vessel on said first support, mechanism for raising said vessel and delivering it to said second support in inverted position, devices for lowering said mechanism to compensate for the difference in level of said supports, and means for opening said gripping means when said vessel reaches said second support.

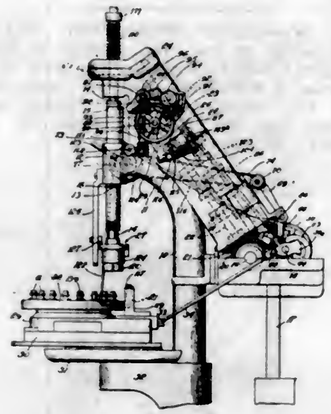
1,679,528. RAIL BRACE WITH TIE-PLATE. EMIL JOHANSON, Chicago, Ill. Filed June 10, 1926. Serial No. 115,126. 1 Claim. (Cl. 238—292.)



A rail brace, comprising in combination, a pair of brace elements, and a tie plate, each of said brace elements adapted to be positioned alongside the rail and

contacting with the web thereof, said tie plate being provided with a depression for the reception of the rail base, one of said elements including an integrally horizontally extending base of a width greater than one-half the width of the base of the rail, said base adapted to be positioned in a depression in the tie plate, said last-

named depression being parallel to the depression for the reception of the rail base and lower than the same, a longitudinal groove in the base of one of said braces for the reception of the edge of the rail base, and means for locking the rail, the brace and the tie plate into a unitary structure on the tie.

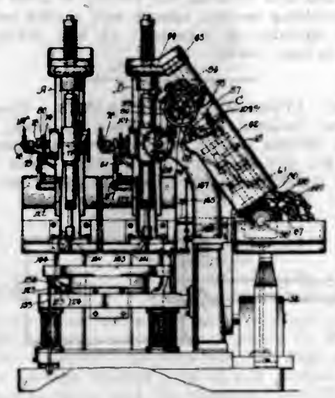


1,679,529. AUTOMATIC MACHINE TOOL. ALBERT M. JOHNSON, Rockford, Ill., assignor to Barnes Drill Co., Rockford, Ill., a Corporation of Illinois. Filed Mar. 8, 1923. Serial No. 623,631. 38 Claims. (Cl. 10—136.)

13. The combination of a longitudinally movable spindle, feed mechanism for the spindle including a cross shaft having a gearing connection therewith, a constantly rotating driving element, means arranged to be driven by said driving element for controlling the movements of said spindle and including a second element operatively associated with the spindle, and means for connecting and disconnecting said second element to and from the first element including a reciprocatory member, a nut on said cross shaft connected with said member, and a pair of stops adjustably mounted on said shaft for engagement by said nut as the shaft rotates in opposite directions.

22. The combination in a machine tool, of a reciprocable spindle, a drive shaft, means for rotating the spindle alternately in opposite directions and at different speeds from said drive shaft including a clutch, a constantly rotating member, means for actuating said clutch including an element having a pair of cams thereon operable respectively to effect the rotation of the spindle in one direction or the other, and means controlled by the movements of the spindle for positively connecting said element with said driven member for intermittent rotation thereby whereby to actuate said cams successively.

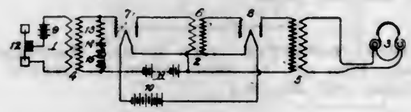
1,679,530. AUTOMATIC DRILLING OR TAPPING MACHINE. ALBERT M. JOHNSON, Rockford, Ill., assignor to Barnes Drill Co., Rockford, Ill., a Corporation of Illinois. Filed Mar. 8, 1923. Serial No. 623,632. 45 Claims. (Cl. 10—105.)



6. A machine of the character described comprising, in combination, a spindle, feed mechanism for the spindle including a rotary element in driving relation thereto, power driven means for effecting the rotation of said element including a constantly rotating driver, a cam member arranged for positive connection with the driver, means actuated by said cam member to rotate said feed element, and a device operable to effect such connection of the driven member with the driver and adapted to automatically interrupt such connection upon the completion of a predetermined range of movement of the driven member by the driver, said device being operatively associated with the spindle so as to be actuated thereby as the spindle approaches a predetermined point in its travel.

32. The combination of a spindle mounted for longitudinal movement, means including a cam operatively connected with the spindle to move it, a constantly driven element, means including a driving dog for effecting a connection between said element and said cam, and means controlled by the movements of the spindle for effecting the movement of said dog into and out of operative association with said element.

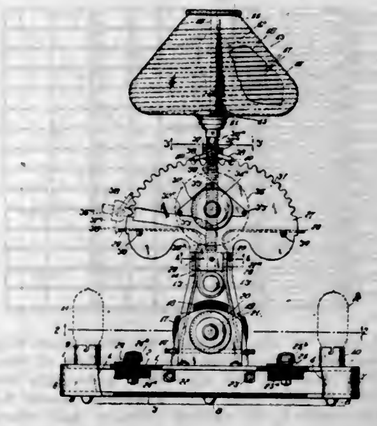
42. In a machine tool, the combination of a part mounted for reciprocation, feed mechanism for said part, means for driving said feed mechanism and having a disengageable connection therewith, spring means normally holding the driving means in inoperative relation to the feed mechanism, and means under the control of said part to effect a connection between said feed mechanism and its driving means, the last-mentioned means comprising a constantly rotating drive element, a cam operatively associated with said driving means to move it against the operation of said spring means, and means operating upon a predetermined movement of said part to disconnect said cam from its drive element.



1,679,531. GANG MACHINE TOOL. ALBERT M. JOHNSON, Rockford, Ill., assignor to Barnes Drill Company, Rockford, Ill., a Corporation of Illinois. Filed Dec. 12, 1925. Serial No. 74,971. 18 Claims. (Cl. 10—128.)

1. A gang tool comprising, in combination, a rotary work support having a plurality of stations arranged in equidistantly spaced relation in the arc of a circle, a plurality of units having spindles also arranged in equidistantly spaced relation corresponding to the relation of said stations on the work support, each of said units having a feed mechanism and a control mechanism including a control element for the feed mechanism, an indexing mechanism for said work support including a locking means, and means operatively connecting the several control elements to said locking means and adapted in the operation of locking means and adapted in the operation of locking the table to control the feed mechanisms of the several units.

10. A gang tool comprising a plurality of units each having a spindle with feed and control mechanisms therefor, and a common drive means for the several controlling mechanisms, each of said control mechanisms including a constantly operating drive member, an intermittently driven member, and means controlled by the spindle for effecting a connection between said members, said means automatically operating after a predetermined rotation of the driven member to interrupt its connection with the driving member, said driven member having a cam operatively associated therewith for controlling the operation of the feed mechanism.

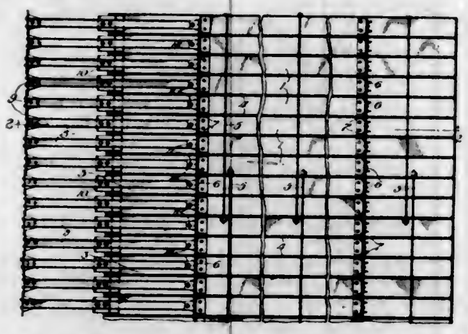


1,679,532. APPARATUS FOR AIDING HEARING. FREDERICK WILLIAM KRANZ, Geneva, Ill. Filed Oct. 10, 1921. Serial No. 506,640. 15 Claims. (Cl. 179—107.)

1. In a method for aiding hearing, comprising accentuating the frequencies to which the person hard of hearing is less sensitive.

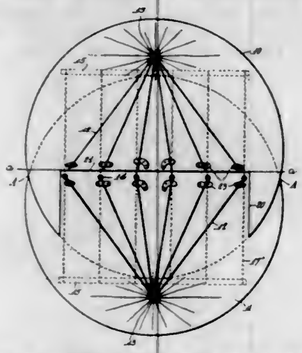
1,679,533. RADIO RECEIVING APPARATUS. ALEXANDER B. KUPSCHE, Chicago, Ill. Filed Aug. 15, 1924. Serial No. 732,152. 1 Claim. (Cl. 250—33.)

An apparatus of the kind described embodying therein a base, a plurality of legs rising from said base, a block to which the top ends of said legs are fixed, two spaced plates fixed to and rising from opposite sides of the said block, a flexible standard rising from said block and adapted to be flexed in the plane of said plates into different angular positions, latches carried by said standard



to engage fixed parts of the plate to lock it in different angular positions and a loop aerial carried by said standard above the latches.

1,679,534. CORRECTIVE DEVICE FOR SECONDARY CLOCK MECHANISM. ALBERT E. LONG, Chicago, Ill., assignor to Stromberg Electric Company, Chicago, Ill., a Corporation of Maine. Filed Aug. 29, 1925. Serial No. 53,282. 5 Claims. (Cl. 58—25.)



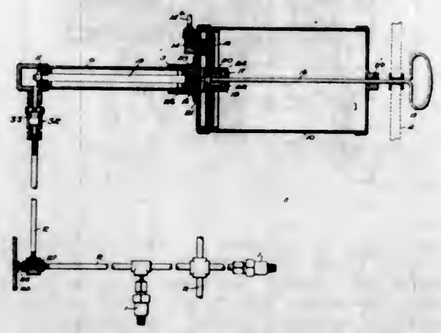
1. The combination with a secondary electromagnetic impulse mechanism of a master clock for controlling said impulse mechanism having a periodic low frequency switch for normally controlling the impulses and a periodic high frequency switch for occasionally controlling the impulses, electromagnetic impulse mechanism for winding the master clock, controlled by the same impulses as said secondary mechanism, and means controlled by the winding magnet for causing disconnection of the low frequency switch and connection of the high frequency switch upon failure of the winding magnet to respond to the low frequency impulses.

1,679,535. MEANS FOR CONSTRUCTING CONCRETE SURFACES. HENRY G. LYKKEN, Minneapolis, Minn. Filed Mar. 5, 1923. Serial No. 622,718. 8 Claims. (Cl. 94—45.)

1. A structure of the character described comprising a composite surface former having a plurality of elongated narrow elements, flat upon their under side and having their forward ends bent upwardly, means for holding the elements in contact laterally and means pivotally adjustable upon the upwardly bent portions for spreading plastice material in front of the elongated members.

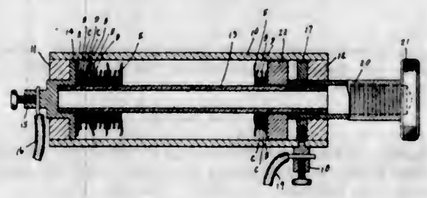
1,679,536. EDUCATIONAL APPLIANCE. HERMANN J. MULLER, Austin, Tex. Filed Sept. 1, 1927. Serial No. 216,818. 13 Claims. (Cl. 35—16.)

1. A device for illustrating mechanically the processes of cell division, comprising a pair of cell members each having chromosome elements movably associated therewith and connecting means between the cell elements, operatively connected to the chromosome element to cause the latter to move relative to each other when the cell members are moved toward or away from each other.



1,679,537. LUBRICATING APPARATUS. HOWARD J. MURPHY, Reading, Mass., assignor, by mesne assignments, to The Bassick Manufacturing Company, Chicago, Ill., a Corporation of Delaware. Filed Mar. 14, 1922. Serial No. 543,653. 1 Claim. (284—18.)

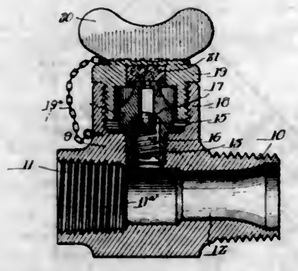
Lubricant apparatus including a lubricant supply means presenting a nozzle having a part adapted to receive the end of a lubricant receiving member, sealing means carried by said nozzle, an annulus contained in said receiving part of the nozzle and having an aperture therein through which the end of said lubricant receiving member may pass, means projecting from the inner face of said annulus for engaging with projections on said lubricant receiving member, said annulus connected to said nozzle by inclined means whereby, when said nozzle is turned to engage the projections on said lubricant receiving member with the annulus, the annulus being held from rotation relative to the lubricant receiving member rides up such inclined means of the



nozzle to advance the nozzle relative to the receiving member and said annulus, and thereby to press the end of the receiving member against said sealing part, and a valve openable by movement of said sealing part relative to said nozzle.

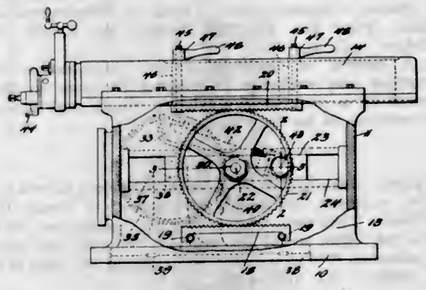
1,679,538. LUBRICATING APPARATUS. HOWARD J. MURPHY, Reading, Mass., assignor, by mesne assignments, to The Bassick Manufacturing Company, Chicago, Ill., a Corporation of Delaware. Filed Jan. 9, 1926. Serial No. 80,248. 8 Claims. (Cl. 184—7.)

1. A central lubricating system including a plurality of lubricant cups for supplying lubricant to parts to be lubricated, a lubricant pump for forcing lubricant to said cups, a pipe system for conveying the lubricant from said pump to said cups, and a conduit connecting the pipe system with a source of lubricant supply, said pump comprising a lubricant cylinder, a combined inlet and outlet passage connecting said cylinder with the pipe system to permit passage of lubricant into and out of said cylinder, a piston reciprocable in said cylinder to draw lubricant into said cylinder from the source of supply and to force the lubricant from said cylinder through said pipe system to said cups and other piston means operable in a second cylinder to reciprocate said first mentioned piston.



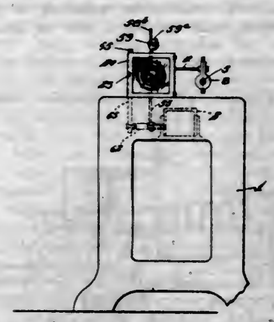
1,679,539. RHEOSTAT. LEON P. NEAL, Indianapolis, Ind. Filed Oct. 18, 1926. Serial No. 142,512. 8 Claims. (Cl. 201—51.)

1. A rheostat comprising a plurality of contact members varying in diameter supported adjacent each other whereby an electric current may be passed between each



of said contacting discs, and means for applying pressure thereto for causing some of said members to be short circuited by others for varying the number of electrical contacts in said rheostat.

1,679,540. PNEUMATIC TOOL. JOSEPH E. OTIS, Jr., Winnetka, Ill., assignor to The Bassick Manufacturing Company, Chicago, Ill., a Corporation of Delaware. Filed June 21, 1926. Serial No. 117,579. 10 Claims. (Cl. 184—105.)



1. The combination with a pneumatic tool and a conduit for supplying air thereto, of means for introducing lubricant under high pressure into said tool, comprising a body member inserted between said conduit and said tool and having a bore therethrough for conducting air from said conduit to said tool, said body member having an annular flange at one side thereof forming a recess and an opening between said recess and said bore, a high pressure lubricant receiving device having its inner end secured in said opening and its outer end housed in said recess, said device comprising an inwardly opening check valve, and a cap for said recess, said cap carrying a gasket for sealing the lubricant receiving opening in said device.

1,679,541. SHAPER. FRANK WESLEY PARKER, Boise, Idaho. Filed Apr. 7, 1927. Serial No. 181,791. 6 Claims. (Cl. 74—14.)

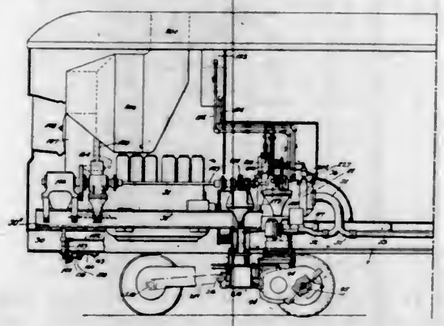
1. In a machine of the type described, in combination, a frame comprising a base, a vertical standard and ways, a reciprocable part guided in said ways, a slot in said standard parallel to said ways, a cross-head guided in said slot for reciprocation parallel to said part, a rack on the lower side of said part, a rack near the bottom of said frame, a rocker wheel coacting with said racks, said wheel being pivoted to said cross-head on one side of said standard, a revolvable shaft on the opposite side of said standard, a pin eccentrically driven by said shaft and facing said standard and a connecting rod joining said pin and cross-head for the purpose described.

1,679,542. AUTOMATIC REGISTER. GIACOMO PUCCI, Westerly, R. I. Filed Apr. 11, 1923. Serial No. 631,436. 10 Claims. (Cl. 118—5.)

1. In fly-frames, the combination of a revolvable register to measure the length of the material acted upon, means to actuate the same in roller contact with said material, a stop motion mechanism for the machine, means adjustably set at predetermined points on said register to actuate the stop motion mechanism at predetermined material length settings, and means attached to said stop motion mechanism for locking the builder rod at the desired setting thereof to prevent readjustment thereof during the filling of the bobbins.

1,679,543. PRESERVED-FOOD PRODUCT AND PROCESS. THOMAS M. RECTOR, New York, N. Y., assignor to Rector-Tenney Company Inc., New York, N. Y. Filed Oct. 10, 1922. Serial No. 593,638. 6 Claims. (Cl. 99—8.)

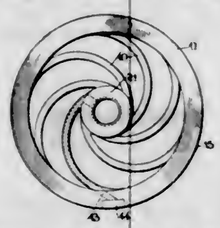
3. A container having therein perishable materials, and an uncoated surface of iron in suitable quantity exposed to the atmosphere within the container, substantially as and for the purpose set forth.



6. The method of preventing corrosion of the inner surface of sealed containers formed of tin plate which consists in providing an exposed surface of iron within the container of suitable extent for the purpose set forth.

1,679,544. POWER PLANT, ESPECIALLY FOR SELF-PROPELLED VEHICLES. JOHN ROBSON, Waterbury, Conn., assignor to Universal Engineering Corporation, Montreal, Quebec, Canada, a Corporation of Canada. Filed Nov. 12, 1923. Serial No. 674,246. 6 Claims. (Cl. 60—53.)

4. In a self-propelled vehicle, wheeled trucks, a fluid-operated motor on one of said trucks, to drive the same, a main frame supported on said trucks movably, a power-operated pump supported on said main frame, conduits for conveying the fluid from the pump to the motor, and back from motor to the pump, said conduits including movable joints, a reservoir for collecting leakage escaping at such joints, a flexible casing enclosing said joints and reservoir, and a pump for withdrawing fluid from said reservoir and restoring such fluid to the main circulation path.

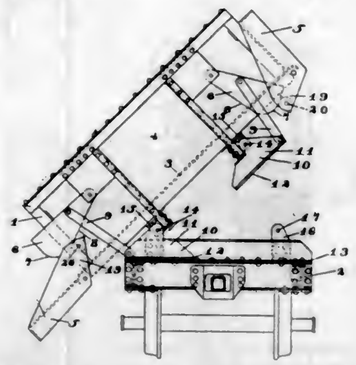


6. In a power plant, a pump of the variable output type, a motor adapted to be operated by the fluid propelled by said pump, connections for conveying fluid from the pump to the motor, and back from the motor to the pump, a handwheel or equivalent device having

movement in two directions adapted to be operated by the engineer, mechanism, actuated through the medium of said handwheel, for effecting a change in the output of the pump, said mechanism including a connecting rod and a casing, each having a pair of spaced abut-

ments, and a single spring, mounted on said rod between said abutments, which, upon the release of the handwheel, will bring the latter after movement in either direction automatically to a position adjusting the pump to a condition in which its output is nil.

1,679,545. TUBE MILL. CHARLES H. ROTH, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio, a Corporation of Ohio. Filed May 23, 1925. Serial No. 32,435. 5 Claims. (Cl. 18—13.)



5. A tube machine comprising a die, means for forcing plastic material through said die, an apertured mandrel, and means for holding said mandrel within said die, said mandrel holding means comprising a spider having a hub portion constituting a support for the mandrel and a web portion extending circuitously from said hub portion to a position radially remote therefrom, said web portion being formed with a circuitous conduit extending from said position to said hub portion and communicating with the aperture in said mandrel.

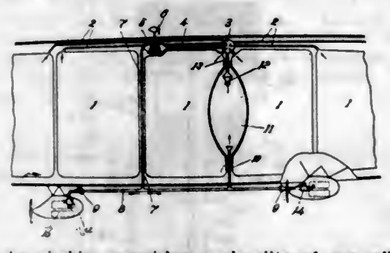
1,679,546. GOLF GAME. ELMER SAS, New York, N. Y. Filed Dec. 19, 1923. Serial No. 681,516. 59 Claims. (Cl. 265—22.)

1. In a golf game device, a golf ball arranged to be hit by means of a club in a plurality of directions, a second golf ball, and means for moving said second golf ball in response to and in accordance with the strength of the blow delivered to the first mentioned golf ball in any direction and retaining it in its advanced position.

1,679,547. DUMP CAR. ALFRED C. SCHMOHL, Beaver Falls, and WILLIAM L. BURNER, Koppel, Pa., assignors to Koppel Industral Car and Equipment Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed June 29, 1926. Serial No. 119,282. 14 Claims. (Cl. 105—276.)

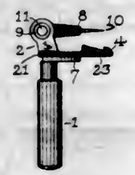
1. In a dump car, an underframe, a body tiltably mounted on said underframe, a door for said body adapted to move downwardly and outwardly to its discharging position when said body is tilted, means for controlling the opening movement of said door when said body is being tilted and for causing said door to be moved to its closed position as the car is being righted, said means comprising a member pivotally connected with said body adapted to loosely engage said underframe, a member pivotally connected with said body adapted to cooperate with said door, and a connection between said members for maintaining the second mentioned member in its operative position.

1,679,548. ART OF VULCANIZING RUBBER. LORIN B. SEBRELL, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio, a Corporation of Ohio. Filed Feb. 12, 1926. Serial No. 87,950. 9 Claims. (Cl. 18—53.)



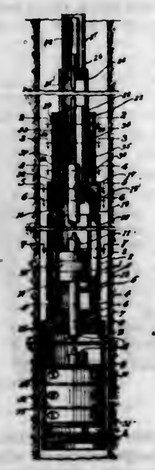
1. A method of accelerating the vulcanization of caoutchouc that comprises vulcanizing the same in the presence of a mercapto-aryl-thiazole whose aryl structure contains an amido group.

1,679,549. ASH GATE. LESLIE E. STRIEGEL, Cleveland, Ohio, assignor, by mesne assignments, to Frank H. Dunbar, Cleveland, Ohio. Original application filed May 15, 1923, Serial No. 639,118. Divided and this application filed Nov. 15, 1923. Serial No. 674,793. 2 Claims. (Cl. 110—171.)



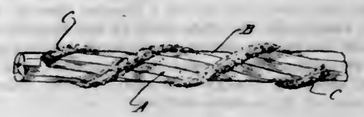
1. The combination with a hopper provided with a bottom discharge opening, of a frame surrounding said opening and provided with outturned flanges, a door having suspending means to reciprocate on said flanges, said door having troughs along its sides and one end, and means for applying fluid under pressure to remove material from said troughs.

1,679,550. GAS-SUPPORTED AIRSHIP. KARL SILLER, Friedrichshafen, Germany, assignor to Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung, Friedrichshafen, Germany. Filed June 26, 1926, Serial No. 118,648, and in Germany July 6, 1925. 11 Claims. (Cl. 244—3.)



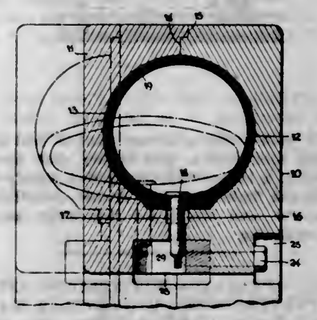
1. An airship comprising a plurality of gas cells; a gas pump; a tube connecting one of said cells with said pump; a motor; a tube connecting said pump with said motor; a gas bag; and a third tube connecting said second tube with said gas bag.

1,679,551. UNIVERSAL SAFETY RAZOR. ERIK G. TORNKVIST, New York, N. Y. Filed May 11, 1926. Serial No. 108,309. 10 Claims. (Cl. 30—12.)



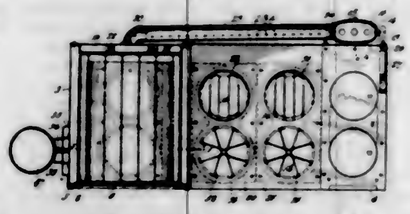
1. A razor comprising a frame, a hingedly disposed blade grip in the same, a blade in said grip, a handle adapted to be attached to said frame and a second attachment seat for said handle upon said grip.

1,679,552. PUMP FOR OIL WELLS. DAVID R. TRIPPLEHORN, Fort Worth, Tex. Filed July 25, 1927. Serial No. 208,233. 2 Claims. (Cl. 103—156.)



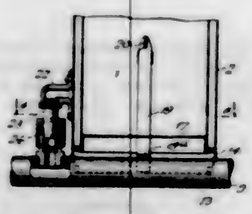
1. A double acting pump comprising outer and inner barrels forming an annular chamber therebetween, a piston working in the inner barrel, an upper ring in threaded engagement with the upper ends of said inner and outer barrels, a lower ring in threaded engagement with the lower end of said outer barrel, an intermediate ring in threaded engagement with said outer barrel and the lower end of said inner barrel, said upper ring and intermediate ring forming closures for said annular chamber, an outlet pipe having communication with said outer barrel, said upper ring having valve-controlled openings providing communication between said annular chamber and said outlet pipe and between said inner barrel and said outlet pipe, said upper ring also having a valve-controlled inlet port effecting communication between said inner barrel and the exterior of said outer barrel, said intermediate ring having a valve-controlled opening providing communication between said inner barrel and said annular chamber, said lower ring having a valve-controlled inlet port effecting communication between said inner barrel and the exterior of said outer barrel, said piston having a piston stem passing through said upper ring and projecting into said outlet pipe, said piston stem having a portion thereof of larger diameter to act as a pump piston to assist the upward movement of the water in said outlet pipe.

1,679,553. RUG AND STRAND THEREFOR. PHILIP C. WAITE, Oshkosh, Wis., assignor to Waite Carpet Company, Oshkosh, Wis., a Corporation of Wisconsin. Filed Mar. 23, 1927. Serial No. 177,519. 6 Claims. (Cl. 28—1.)



1. A rug strand having a core of relatively bulky hard-surfaced fiber-like material, and a relatively lighter open spiral winding of fluffy wool-like material outstanding from and bearing upon the hard-surfaced fiber-like core, the turns of the winding being spaced apart to clearly disclose the hard-surfaced core, substantially as described.

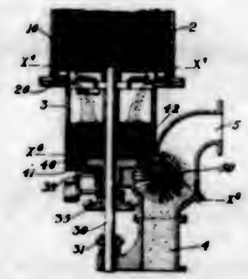
1,679,554. MOLD. LEON S. WASHBURN, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio, a Corporation of Ohio. Filed Dec. 4, 1925. Serial No. 73,229. 4 Claims. (Cl. 18—35.)



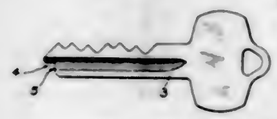
1. A mold adapted to receive an inflatable container comprising complemental sections provided with recessed portions adapted to provide a passage for a conduit leading from the container to the exterior of the mold, and means adjacent the recessed portions adapted to surround and protect the conduit and to position the complemental sections in predetermined relation.

1,679,555. RANGE. LEWIS T. WILCOX, Peekskill, N. Y., assignor to Wilcox Patents Corporation, Peekskill, N. Y., a Corporation of New York. Filed Jan. 19, 1926. Serial No. 82,193. 3 Claims. (Cl. 126—36.)

1. A combined fluid and solid fuel stove comprising a base, an upright structure mounted on said base at one end and having an oven in its upper part and a fluid fuel burner beneath the oven part, a solid fuel burner unit mounted upon said base at the other end, a burner top connecting said unit and upright structure, a fluid fuel burner disposed below said top to supply heat therethrough, means for supplying fuel to said fluid fuel burners, said unit having a smoke conduit extending upwardly from its rear wall and having a damper therein, and a conduit connecting the oven part of the upright structure with the smoke conduit, said second conduit having apertures arranged along the length thereof, the total area of which is substantially equal to the cross sectional area of the second conduit.



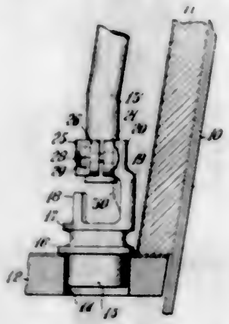
1,679,556. STOVE. LEWIS T. WILCOX, Peekskill, N. Y. Filed Oct. 1, 1927. Serial No. 223,285. 17 Claims. (Cl. 126—45.)



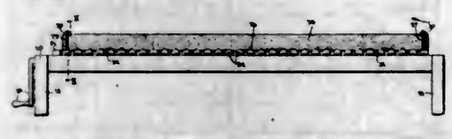
1. In a cook stove, a burner shell, a fuel supply pipe detachably connected to said burner shell for delivering fuel thereto, a burner supporting ring rigidly secured to said pipe and underlying said burner constituting a support therefor, and means for detachably securing said shell to said ring.

1,679,557. APPARATUS FOR FEEDING AND METERING PULVERULENT OR GRANULAR MATERIALS. ERVIN G. BAILEY, Cleveland Heights, Ohio, assignor, by mesne assignments, to Fuller Lehigh Company, a Corporation of Delaware. Filed Aug. 31, 1921. Serial No. 497,442. Renewed May 13, 1927. 9 Claims. (Cl. 83—44.)

1. An apparatus for feeding finely divided material comprising a primary feeder capable of continuously delivering the material from a source of supply at varying rates; an accumulator adapted to receive material from said primary feeder; means for discharging material from the accumulator; and a controller responsive to the material in the accumulator adapted to regulate the rate of delivery of the primary feeder to maintain the volume and density of the material in the accumulator approximately constant.



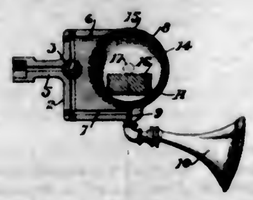
1,679,558. KEY. FRANK ELLISON BEST, Seattle, Wash., assignor to Frank E. Best, Inc., Seattle, Wash., a Corporation of Washington. Filed May 23, 1923. Serial No. 640,946. Renewed Jan. 9, 1928. 1 Claim. (Cl. 70—9.)



The combination with a pin tumbler lock having a separable key stop at its inner end, of a key having its rear edge notched at the forward end forming a shoulder arranged to engage with said stop for positioning said key in said lock.

1,679,559. DRAIN-PIPE GUIDE. CHARLES H. BILTY, Milwaukee, and ALBERT E. TELLEFSEN, West Allis, Wis. Filed May 13, 1927. Serial No. 191,107. 10 Claims. (Cl. 137—111.)

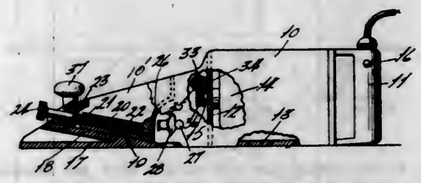
2. A device of the character described, comprising a conduit portion, the perimeter at one side being provided with an upstanding arm terminating at top in a pipe engaging portion, one side of said portion being bifurcated while the other side has an opening, and a pipe clamping member, one end whereof has oppositely disposed portions adapted to interlock with the bifurcations of the arm, while the other end has an opening adapted to register with the opening in the arm and to receive a fastening bolt.



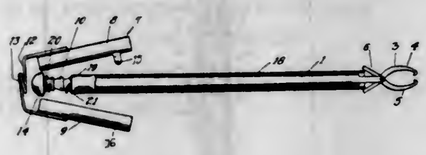
1,679,560. METHOD OF AND APPARATUS FOR TREATING SOLID-TIRE MATERIAL. RICHARD S. BURDETTE, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio, a Corporation of Ohio. Filed Sept. 17, 1927. Serial No. 220,262. 14 Claims. (Cl. 18—2.)

8. An apparatus for manipulating solid tire stock comprising a supporting frame having a screw-threaded shaft rotatably mounted thereon, a helical spring encircling the shaft and secured at one end to the frame, a plurality of slidably mounted blocks having grooves therein adapted to engage the convolutions of the spring, a block having screw-threaded connection with the shaft and bearing against the free end of the spring and means for rotating the shaft to vary the tension of the spring.

14. The method of varying the length of freshly extruded solid tire treads that comprises securing the tread on a plurality of relatively movable supports and causing simultaneous movement of the supports to produce equal increments of strain to the sections between adjacent supports.



1,679,561. PLUMBING FIXTURE. FRANK J. CANTRELL, San Francisco, Calif. Filed Apr. 26, 1924. Serial No. 709,310. 3 Claims. (Cl. 299—84.)



1. In a fixture of the character described, having a cylindrical chamber formed therein, a head member forming a permanent closure for one end of the cylindrical chamber, a removable head member forming a closure for the opposite end of said cylindrical chamber, a cylindrical shaped soap receptacle, insertible in said cylindrical chamber, a head member on one end of the soap receptacle, a pin thereon extending into the fixed head of the cylindrical chamber and forming a journal or support therefor, an annular flange on the opposite end of the soap receptacle, and an annular flange on the removable head member forming a support and journal for the soap receptacle flange, impeller members formed on the exterior surface of the soap receptacle and water inlet and outlet connections formed on the casing in communication with the interior casing and the soap receptacle, said inlet connection having an inlet passage communicating with the soap receptacle, said inlet passage being disposed on a tangent with relation to the impeller members so as to rotate the receptacle when water is passing through the casing.

1,679,562. PORTABLE ELECTRIC JOINTER. ALEX A. CLARKE, Chicago, Ill. Filed July 19, 1923. Serial No. 652,527. 6 Claims. (Cl. 144—117.)

1. In a jointer of the class described, the combination with a housing having a base and a transverse opening in advance of the base, of a cutter rotatably mounted in advance of said housing and exposed to the work through said opening, a motor arranged in said housing, driving connections between the motor and said cutter, a guard wall extending transversely of the housing in advance of the cutter, the front end of said housing having an inclined wall provided with a longitudinal slot, a shoe associated with the housing and having an inclined upper face co-acting with the inclined wall of the housing and slidably related thereto, said shoe having an upwardly-extending lug disposed in the longitudinal slot of the inclined wall of the housing, and an adjusting screw sustained at one of its ends by the housing and having its other end mounted in the guard wall, said adjusting screw passing longitudinally through the lug of said shoe for effecting adjustment of the latter relatively to the housing, whereby to vary the depth of cut of the cutter.

1,679,563. HAIR-WAVING APPARATUS. FELIX COUNE, Chicago, Ill. Original application filed Jan. 18, 1924, Serial No. 686,976. Divided and this application filed Aug. 27, 1924, Serial No. 734,538. Renewed Apr. 11, 1927. 20 Claims. (Cl. 132—34.)

1. A hair curler or bobbin comprising a rod, a tubular member provided with a hair receiving portion surrounding said rod, means for permitting longitudinal movement and restraining relative rotation between said rod and said tubular member, said means comprising a spring attached to sad rod and serrations on said tubular member adapted to be engaged by one end of said spring.

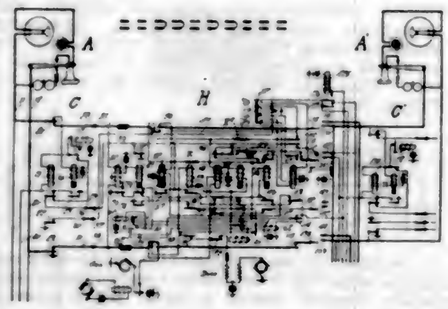
1,679,564. GAS CONTAINER FOR AIRSHIPS. WILHELM E. DOERR, New York, N. Y., and ERNST A. LEHMANN, Akron, Ohio, assignors to Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung, Friedrichshafen, Bodensee, Germany. Filed Apr. 23, 1924, Serial No. 708,327, and in Germany May 16, 1923. 3 Claims. (Cl. 244—3.)

1. An airship comprising an outer container inflated with one kind of lifting gas; an inner container inflated with another kind of lifting gas; and means for later-

ally moving said inner container within said outer container and for bringing into contact the wall of said inner container with the wall of said outer container.

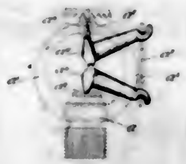
1,679,565. DIRIGIBLE AIRSHIP. AUGUST FABER, New York, N. Y. Filed June 24, 1927. Serial No. 201,166. 7 Claims. (Cl. 244—6.)

1. In an airship, the combination of a gas container and a body depending and vertically spaced therefrom, said body consisting of a longitudinally elongated shell, composed of two relatively shallow and wide convex sections having sloping ends, placed edge to edge, forming a body offering a relatively small resistance to the air in a lateral rather than in a vertical sense.



1,679,566. WRITING IMPLEMENT. FRANK FUREDY, Montclair, and CHARLES SCHROTH and WILLIAM FAVINI, Bloomfield, N. J., assignors, by mesne assignments, to Bushwick National Bank. Filed July 28, 1925, Serial No. 46,585. Renewed June 16, 1928. 20 Claims. (Cl. 120—14.)

5. A multi-lead pencil comprising a case, a central guide, a plurality of lead carriers located parallel and close together and close to the longitudinal axis of the pencil and in directive engagement with the guide, said carriers also being arranged for projection of their respective leads selectively at the same end of the case, and a helical impeller mounted for rotation about the guide and in engagement with the carriers.

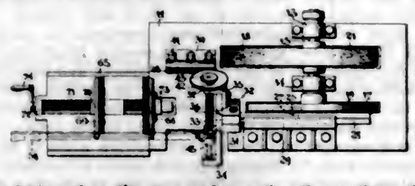


1,679,567. AUTOMATIC TELEPHONE SYSTEM. JOHN E. GARDNER, Chicago, Ill., assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill., a Corporation of Delaware. Filed Feb. 5, 1921. Serial No. 442,743. 10 Claims. (Cl. 179—18.)

1. In a telephone system, a calling subscriber's line, an automatic switch associated therewith, called lines accessible thereto, a calling device under the control of said calling subscriber for operating said switch into engagement with one of said called lines without making the

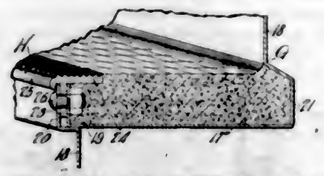
same busy, and means individual to said automatic switch and responsive to the reoperation of said calling device for preventing another connection being established with the connected line.

1,679,568. STRUT FOR AUTOMATIC SPRINKLERS. WILLIAM GRIMSHAW, Glen Ellyn, Ill. Filed Aug. 25, 1923. Serial No. 659,294. 2 Claims. (Cl. 29—148.)



1. The process of making struts for automatic sprinklers, which consist in punching blanks substantially of the shape shown in Figs. 4 and 5 from suitable sheet metal, subjecting the portion 1 of said blank to a swaging operation in the directions indicated by the arrows, Fig. 4, bringing it substantially to the form shown in Figs. 6 and 7, subjecting the entire blank to a swaging operation in the directions indicated by the arrows, Fig. 6, bringing it substantially to the form shown in Figs. 8 and 9, subjecting the entire blank to a swaging operation in the directions indicated by the arrows, Fig. 9, bringing it substantially to the form shown in Figs. 10 and 11, and in then subjecting the entire blank to a swaging operation in the directions indicated by the arrows, Fig. 10, bringing it substantially to its final form shown in Figs. 2 and 3, each swaging operation being substantially at right angles to the last preceding operation whereby fins or ribs formed on the blank in earlier swaging operations will be obliterated by later swaging operations and said struts wrought to final form without a separate finishing operation.

1,679,569. SKIVING MACHINE. JORGEN I. HAASE, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio, a Corporation of Ohio. Filed Sept. 29, 1925. Serial No. 59,278. 7 Claims. (Cl. 164—47.)

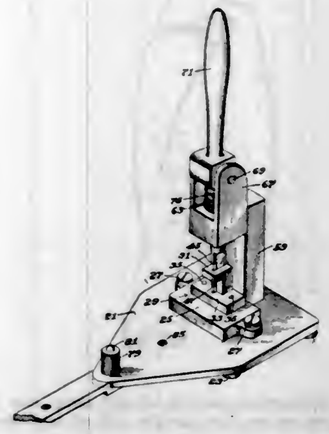


1. A skiving machine comprising a frame having a slide mounted thereon for reciprocatory motion, a bracket supporting a threaded rotatable rod adjustably secured to the slide, a knife supporting member mounted for movement

on the rod, a knife secured to the supporting member, a gear loosely mounted on the rod, a rack mounted on the frame engaging the gear, a ratchet keyed to the rod and a

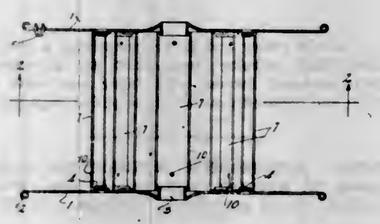
pawl pivoted on the gear and engaging the ratchet, whereby the rod will be rotated during only part of the motion of the slide.

1,679,570. STAIR STRUCTURE. AKOS J. HALL, Cleveland, Ohio. Filed Dec. 22, 1924, Serial No. 757,366. Renewed Jan. 27, 1928. 6 Claims. (Cl. 189—43.)



1. In combination, a pair of stringers, one piece step sections between said stringers, each of said sections comprising a riser portion and a tread portion, each of said riser portions having an upwardly extending offset flange at the upper end thereof, each of said tread portions having an upwardly extending flange to confine a floor material, the front end of said tread portions resting on the horizontal portion of the offset flanges of the adjacent riser sections, the upwardly extending flanges of adjacent step sections spaced apart, a removable wear plate resting on the ends of said flanges and having a leg disposed in the space between said flanges, and a bolt passing through said flanges and through said leg and having the nut thereof embedded in the floor material.

1,679,571. COMPRESSOR ROLL. LINDSAY S. HALL, New Bedford, Mass., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio, a Corporation of Ohio. Filed July 19, 1926. Serial No. 123,362. 9 Claims. (Cl. 28—38.)

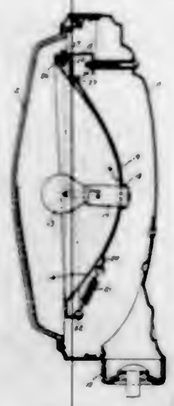


1. A compressor roll for loom beams comprising a cylindrical member provided with end portions of lesser diameter than the body of the cylindrical member.

1,679,572. PUNCH FOR CUTTING NOTCHES IN FILM REELS. ARTHUR C. HAYDEN, Brockton, Mass. Filed June 21, 1927. Serial No. 207,333. 9 Claims. (Cl. 164—91.)

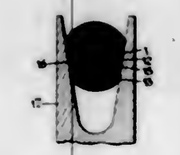
1. A punch for cutting peripheral notches in plates of a film reel, comprising a support, a pair of anvils on the support having slots therein and adapted to have peripheral portions of the plates rest thereon, a bar slidable in said slot having a pair of dies, and means for moving the bar to cause the dies to cooperate with the anvils and punch peripheral notches in the plates.

1,679,573. KNOCKDOWN REEL. WILLIAM M. HIND, Buffalo, N. Y. Filed Feb. 18, 1924. Serial No. 693,477. 8 Claims. (Cl. 242—115.)



1. In a knock-down reel, disk-like end members, and cross brace members interlocked with and outwardly detachable from the end members and arranged to receive the material to be wound on the reel, the centers of the disk being deformed to provide elongated hubs for the mounting of the reel on axial supports.

1,679,574. LAMP-FOCUSING MECHANISM. SAMUEL W. HYATT, Connersville, Ind., assignor to Indiana Lamp Corporation, Connersville, Ind., a Corporation. Filed Feb. 7, 1927. Serial No. 166,424. 2 Claims. (Cl. 240—44.)

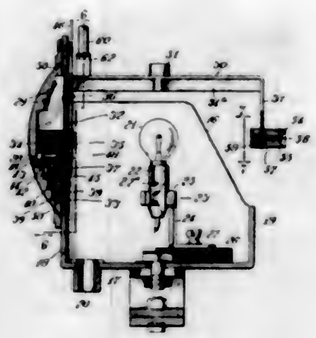


1. In a lamp the combination of a casing, a reflector therein having an elongated centrally positioned aperture, a light bulb support positioned therein, a strap positioned adjacent said reflector and having a rigid connection with

said light bulb support for supporting the same in adjusted position in said aperture, a member simultaneously securing said reflector to the casing and adjustably

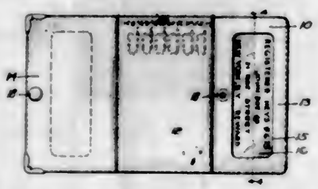
but rigidly supporting one end of said strap, and yielding means connecting the opposite end of said strap to said reflector.

1,679,575. CORD BELT. NORRIS E. KIMBALL, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio, a Corporation of Ohio. Original application filed Sept. 19, 1924, Serial No. 738,603. Divided and this application filed Dec. 4, 1925. Serial No. 73,221. 2 Claims. (Cl. 74—62.)



2. A belt of rubber and fabric comprising a core having a substantially circular cross-section and an envelope of resilient material formed with inner and outer convex surfaces and opposed tapered plane pulley engaging faces.

1,679,576. AUTOMOBILE WINDSHIELD CLEANER. GEORGE W. KNUTSON, Arlington, S. Dak. Filed Oct. 10, 1927. Serial No. 225,153. 1 Claim. (Cl. 15—256.)



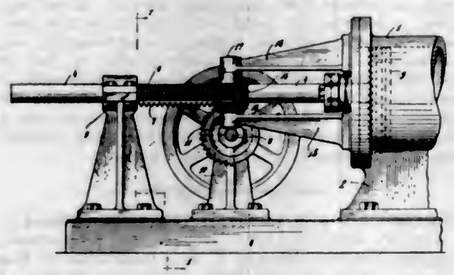
In a windshield cleaner comprising, an U-shaped member adapted to be pivotally supported by the windshield frame, so that its leg portions will depend at opposite sides of the windshield, a pair of elongated blocks, said block being substantially triangular in cross section, the upper end of each block being connected to the lower end of the respective arms, a pair of elongated scraper blades longitudinally secured to the inner side of each block, said blades being disposed outwardly in oblique relation to the inner side of the block and adapted to have their outer longitudinal edges engaging the windshield, the resilient squeegee strip arranged longitudinally on the inner side of the respective blocks and between said scraper blades, said squeegee being of a width greater than the distance between the inner side of the respective blocks and the plane of the outer edges of the blades, so that said squeegee will be in flexed position while in wiping contact with the windshield, and means for adjusting said U-shaped member at its bight portion for varying the pressure of the scraper blades and squeegees against the windshield.

1,679,577. FOCUSING DEVICE. BENJAMIN F. LOLLIS, Berwyn, Ill., assignor of one-half to Otto S. Fiath, Chicago, Ill. Filed June 21, 1923. Serial No. 646,741. 9 Claims. (Cl. 88—14.)

1. In combination with the housing of a signal lamp provided with a concavo-convex lens, a focusing device comprising a frame of length substantially equal to the depth of the housing from front to rear, the ends of the frame being bent downwardly and parallel with each other, an eye-piece carried by the rear end of the frame, clamping means carried by the forward end of the frame and adapted to form gripping relation with the lens, said eye-piece and clamping means having aligned axes, and means whereby said clamping means may be controlled.

1,679,578. INCLOSED TRANSPARENT WINDOW. CHARLES LORBER, Louisville, Ky. Filed Nov. 23, 1926. Serial No. 150,265. 2 Claims. (Cl. 150—40.)

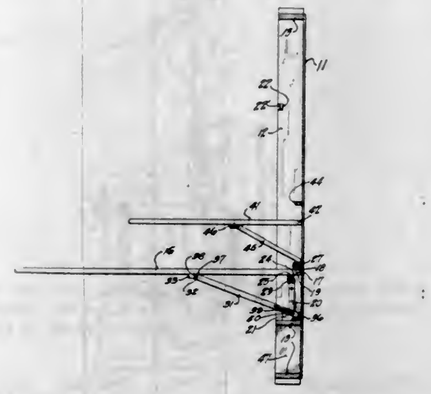
1. A device of the class described including a body sheet and a lining of the same size as the body sheet and secured permanently throughout its peripheral portion to the peripheral portion of the body sheet, said body sheet and lining being foldable to provide a central portion, a wing foldable onto the central portion and a second wing foldable onto the first wing upon the latter being folded onto the central portion, said first wing having a window



opening in the body sheet normally covered by the second wing, a transparent closure for said opening secured between the body sheet and lining, and a card held between the closure and lining.

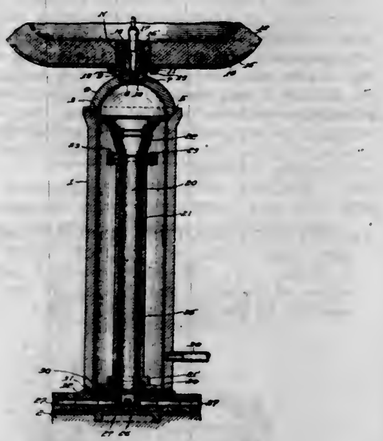
1,679,579. GOLF-BALL TEE. ROBERT R. LUNDY, South Bend, Ind. Filed Dec. 27, 1927. Serial No. 242,814. 5 Claims. (Cl. 273—33.)

2. A golf ball support comprising a pin tapered at one end, and a resilient body member mounted on said pin, said body member carrying a flexible fin.



1,679,580. ENGINE-TRANSMISSION MECHANISM. SIMON MASEL, New York, N. Y. Filed June 21, 1927. Serial No. 200,435. 7 Claims. (Cl. 74—14.)

1. In transmission mechanisms for engines, a reciprocating piston rod and a rotatable power shaft, combined with two mutilated gears fixed on said shaft, said rod having two racks one cooperating directly with one of said mutilated gears, a pinion meshing with the other rack, and a gear connection between said pinion and the other of said mutilated gears.

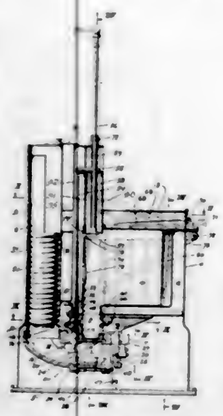


1,679,581. IRONING CABINET. DAY CHANNING MCCRAY, Oshkosh, Wis., assignor to Nathan Paine, Miami Beach, Fla. Filed Oct. 31, 1924. Serial No. 747,023. 3 Claims. (Cl. 68—10.)

1. In an ironing cabinet, the combination of a frame including spaced uprights, a pair of transverse members extending horizontally between said uprights and spaced to form a board-receiving entrance passage between them, one of said transverse members being disposed above the other and having a pocket in its lower face defined at its forward edge by a depending abutment spaced rearwardly from the upper edge of said lower transverse member, and an ironing board having its inner end movable between said uprights and provided with a projection adapted to seat in said pocket behind said abutment, the inner end of said ironing board being slidably engageable with the upper edge of said lower transverse member during insertion into said passage and being adapted to fulcrum on the upper edge of said lower transverse member after such insertion for effecting a horizontal disposition of the board and for seating said projection in said pocket in engagement with said depending abutment to prevent the forward displacement of the board, and said board being alternatively retained in upright position

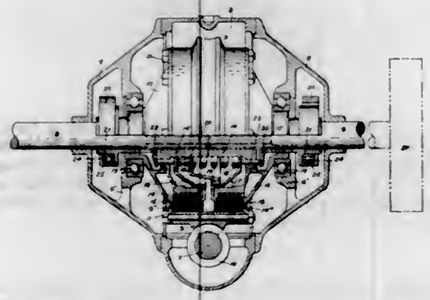
within the frame in front of the lower transverse member and with the inner end of said board below said transverse members.

1,679,582. METHOD OF AND APPARATUS FOR CASTING METAL. JAMES M. NELSON, Youngstown, Ohio. Filed Nov. 19, 1926. Serial No. 149,289. 13 Claims. (Cl. 22—209.)



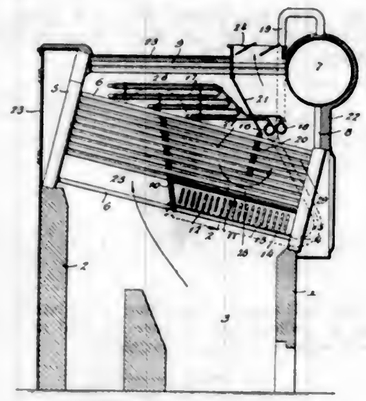
1. In an apparatus for casting metal, a hood, a fusible element closing the base of the hood, an aperture in the wall of the hood above the element adapted for the reception of the nozzle plate of a casting ladle, and means for exhausting the air within the hood when said aperture is closed by said nozzle plate.

1,679,583. FOOD CUTTER AND SERVER. ALBERT NINNIS, Reno, Nev. Filed Apr. 14, 1926. Serial No. 101,909. 12 Claims. (Cl. 31—6.)



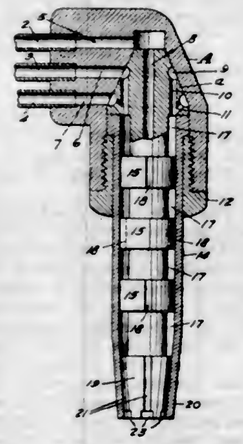
1. In a machine of the character described, the combination with a magazine for holding a column of sliceable food, of a movable member at the lower end of the magazine, a cutting wire on said movable member for cutting a slice from the column, an extension on the magazine and in communication therewith for holding a plu-

rality of surplus columns, and means for transferring the surplus columns, one by one into the magazine as required.



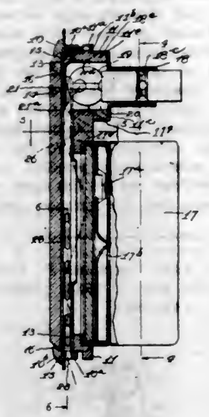
8. In a machine of the character described the combination with a magazine adapted to receive a column of sliceable food, of a sliding plate below the magazine normally forming a bottom therefor to support the column of food, said plate having a discharge opening formed therein, a cutting wire carried by the plate forward of the discharge opening, means for imparting a reciprocal movement to the plate to cut a slice off of the column and to bring the discharge opening into alignment with the column, a pair of bell-cranks pivotally mounted one on each side of the magazine, a gripping member on one end of each bell-crank adapted to be moved into and out of engagement with the food column during movement of the bell-cranks about their pivots, a spring connecting the bell-cranks and normally holding the gripping members in engagement with the food column, and a lug on the sliding plate engageable with the opposite ends of the bell-cranks to swing the same about their pivots to release the gripping members.

1,679,584. CONTROL UNIT. EMIL F. NORELIUS, Davenport, Iowa. Filed Oct. 12, 1925. Serial No. 62,205. 9 Claims. (Cl. 180—17.) (Granted under the provisions of the act of Mar. 3, 1883, 22 Stat. L., 625, as amended by the act of Apr. 30, 1928.)



9. A pair of selectively rotatable members mounted for sliding movement on a common axis, a tension element for normally holding each of said members in outermost position, and pressure transmitting means held positively to but one of said members for preventing winding and unwinding motion being transmitted to the tension element due to relative movement between said members.

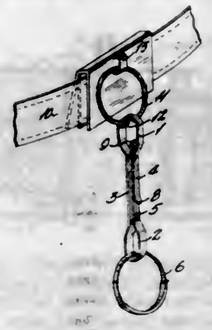
1,679,585. SUPERHEATER FOR BOILERS. RUDOLF M. OSTERMANN, Evanston, Ill., assignor to The Superheater Company, New York, N. Y., a Corporation of Delaware. Filed June 28, 1924. Serial No. 722,890. 4 Claims. (Cl. 122—478.)



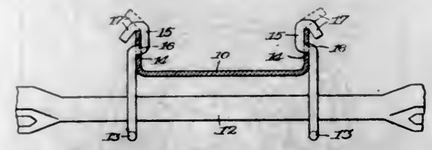
1. In combination with a boiler furnace and a boiler having inclined tubes set above said furnace at different levels, an upright baffle extending upwardly across said tubes, a longitudinal baffle extending from the first-mentioned baffle above the bottom thereof forwardly and downwardly at an inclination corresponding to that of said tubes and forming with said longitudinal baffle a closed pocket out of the path of the furnace gases but exposed to the radiant heat from said furnace, and a superheater located in the pocket below said inclined baffle and in advance of said upright baffle.

1,679,586. TIP FOR CUTTING TORCHES. GEORGE C. QUELCH, Oakmont, Pa., assignor to International Oxygen Company, Newark, N. J., a Corporation of New Jersey. Filed Dec. 21, 1926. Serial No. 156,210. 2 Claims. (Cl. 158—27.4.)

2. A cutting tip of the class described having a central oxygen conduit adapted to communicate with a central supply port, a tapering head having ports adapted to communicate with low pressure oxygen and gas supply conduits respectively, and having an annular reduced neck portion beyond the tapering head, a plurality of annular abutments and reduced neck portions alternately located beyond said annular chamber, each of said abutments having a pair of oppositely located longitudinal ports arranged alternatingly between similar ports of an adjacent abutment, with a final terminal tapered abutment having an annular series of final delivery channels leading from the endmost annular chamber to the end of the cutting tip, said delivery channels being outwardly enlarged towards their middle portion without subsequent diminution and having further enlarged outlet terminals ending on the plane of the end of the tip.



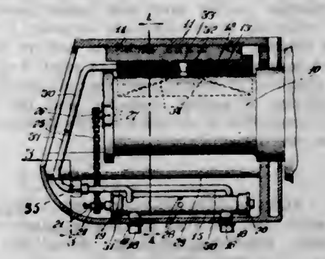
1,679,587. ILLUMINATED INSTRUMENT PANEL. WILLIAM H. SCHULZE, Chicago, Ill., assignor to Stewart-Warner Speedometer Corporation, Chicago, Ill., a Corporation of Virginia. Filed Mar. 20, 1926. Serial No. 17,010. 4 Claims. (Cl. 240—8.16.)



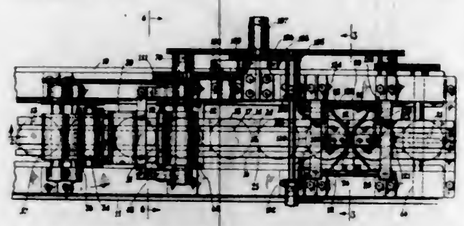
1. An instrument mount for motor vehicles and the like, comprising an encompassing front frame and a back frame member adapted to be secured together, the back member having apertures for insertion and securement of the several instruments to be served; a face plate-in-common occupying the entire area of the front frame opening, said face plate having openings registering with the faces of the several instruments for reading the same, and a glass-in-common over all the instruments secured in the front frame occupying substantially the entire opening thereof in the front of said face plate-in-common; the back frame member having near one lateral edge an aperture for mounting a lamp, and a reflecting hood overhanging the lamp and open toward the opposite lateral edge and toward the ends of the frame for diffusing the light under the back of the glass-in-common, the hood being formed and positioned, as to the opening through which the light is directed over the face plate, for causing a substantial portion of the rays of the lamp to impinge on the back or inner side of the glass at an angle for being reflected therefrom onto the exposed faces of the instrument.

1,679,588. KEY-RING HOLDER. EDWIN SPRAUL, Chicago, Ill. Filed Feb. 6, 1928. Serial No. 252,108. 1 Claim. (Cl. 24—3.)

A key ring holder formed integrally of a thin, flat strip of material and comprising an upper loop, a lower loop, an intermediate connecting strip for the loops, an outer ring receiving tongue strip and a medial upwardly projected ring guard strip having its upper extremity extended into the said upper loop, the said strips being all formed concavo-convex on a cross section, and assembled in nested relation.

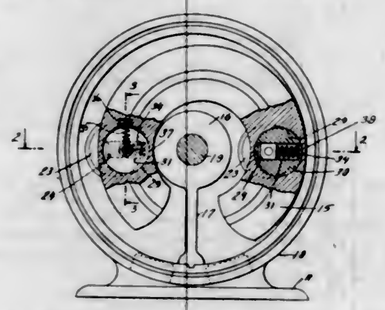


1,679,589. SAFETY DEVICE FOR BRAKE-LEVER SPREADERS. SVEN J. STRID, Chicago, Ill., assignor to Fred Mathews, Chicago, Ill. Filed Sept. 30, 1926. Serial No. 138,785. 3 Claims. (Cl. 188—205.)



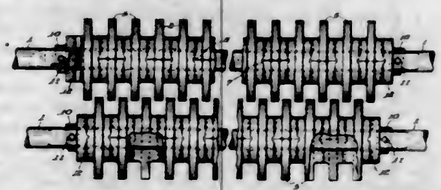
1. The combination with an apertured spring plank, of a brake lever spreader safety device consisting of a hanger through which the spreader extends, said hanger having an attaching portion thereof passed through the aperture of said spring plank and bent into interlocking position with relation thereto.

1,679,590. JOURNAL-LUBRICATING SYSTEM. CARL JOSEPH STRUVE, Elgin, Ill. Filed Aug. 23, 1924. Serial No. 733,679. 4 Claims. (Cl. 308—85.)



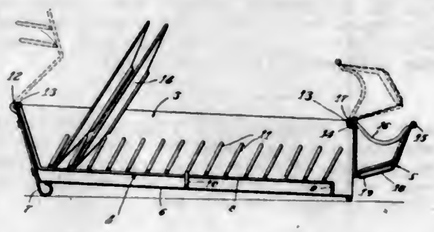
1. A system of the character described, comprising in combination with a journal-box, a cylinder located in the bottom of the journal-box and provided with clean-out nipples adapted to extend through the bottom of the journal-box, closures for said nipples, a spiral screw disposed lengthwise in the cylinder, inlet ports in the side wall of the cylinder for receiving the oil from the journal-box, conduits communicating with both ends of the cylinder and arranged to discharge the oil above the journal, and means intermediate of the journal and the spiral screw whereby the latter is rotated as the journal revolves and the oil caused to flow toward one end of the cylinder and through the respective conduit.

1,679,591. SEALING METHOD AND MECHANISM FOR CONTAINERS. JOHN VAN BUREN, Brooklyn, N. Y. Filed Nov. 5, 1926. Serial No. 146,427. 35 Claims. (Cl. 113—1.)



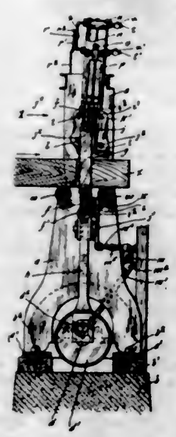
1. In combination, means for supporting and feeding a plurality of containers, means for applying lubricant to one end of each container, means for feeding an elongated strip of material across said ends and into engagement therewith, and means movable toward the longitudinal center of the sheet from the longitudinal edges thereof for severing said sheet at each side of each container.

1,679,592. PUMP, ENGINE, AND THE LIKE. ALFRED L. WILLIAMS, Philadelphia, Pa. Filed Feb. 20, 1926. Serial No. 89,596. 8 Claims. (Cl. 103—131.)



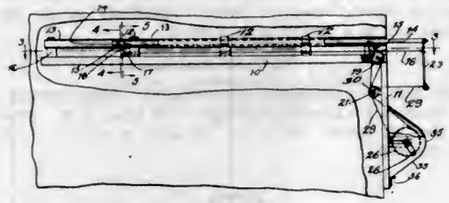
1. An engine or pump of the kind described, comprising a displacer element entirely enclosed and adapted to be displaced within a chamber in such manner as to maintain a traveling zone of contact with the walls thereof, the chamber having inlet and outlet ports, crank members connected to the displacer element, a yielding connection between the crank members and the displacer, these crank members being adapted to rotate and also to guide the displacer in such manner that all points thereof move in circles of similar diameter, and the yielding connection permitting a variation in the diameter of the circles last mentioned.

1,679,593. ROTARY GRIZZLY SCREEN. HERBERT C. WILLIAMSON and BUFORD M. STUBBLEFIELD, Youngstown, Ohio. Filed Apr. 29, 1927. Serial No. 187,460. 9 Claims. (Cl. 209—104.)



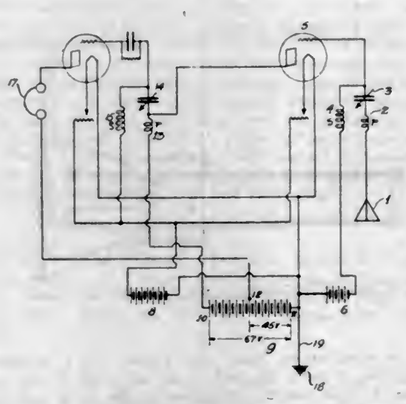
1. In a grizzly screen or the like, a shaft and a series of disks disposed on said shaft, each of said disks being formed in two similar complementary sections and embodying means on each of its end faces inter-engaging complementary means on the adjacent disks to hold the sections of the disk together on the shaft.

1,679,594. DISH DRIER. ARTHUR G. ANDREWS, Rockford, Ill., assignor to The Washburn Company, Worcester, Mass., a Corporation of Massachusetts. Filed Aug. 15, 1925. Serial No. 50,367. 4 Claims. (Cl. 141—11.)



1. In a dish drier or drainer, a sheet metal drain pan having one end open for drainage of water therefrom into an adjacent sink or other drain receptacle, and a dish tray in said pan composed of longitudinal supporting wires resting on the bottom of the pan and cross-wires projecting upwardly therefrom, the longitudinal wires being bent upwardly at the closed end of the pan and pivotally attached to the upper edge of the pan on the said closed end thereof, and the cross-wires being disposed in substantially parallel relation to one another and all inclined toward the open end of the pan substantially as and for the purpose described.

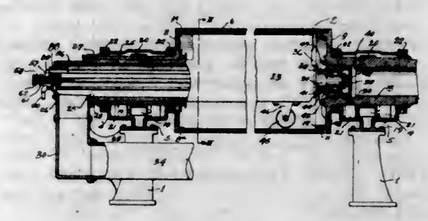
1,679,595. GANG SAW. EDWARD P. ARMSTRONG, Portland, Oreg. Filed May 6, 1926. Serial No. 107,138. 5 Claims. (Cl. 143—80.)



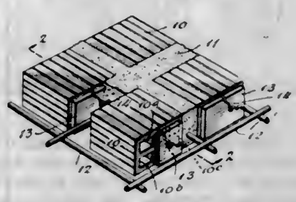
1. In a gang-saw having a reciprocating saw-sash, an adjustable guideway at each side of said saw-sash, a guide-head operating in each guideway to which guide-heads one of said saw-sash is connected, each guideway having a frame extension, a compression-cylinder mounted on each of said frame extensions and a piston in each compression-cylinder, the piston being connected to and axially-alined with the path of motion of its related guide-head, each compression-cylinder being provided with a valve controlled fluid-inlet at both ends, a fluid passage connecting said ends, and a valve in said passage, means for operating the latter valves in unison.

1,679,596. WASH HANGER. KONSTANTYN BABECKI, Woodside, N. Y. Filed May 6, 1927. Serial No. 189,327. 2 Claims. (Cl. 211—94.)

1. In a wash hanger of the class described, an angular bracket, provided with a plurality of depressions for the reception of the hanger operating elements, a pipe held on the larger horizontal branch of said bracket in the direction of its longitudinal axis, a rod slidably arranged within said pipe, adapted to be extended therefrom, a T-bar depending from the outer end of said rod, a rope secured at one end to said rod and at its opposite end to said T-bar, means for guiding said rope intermediate its ends, and a drum for winding said rope and unwinding the same therefrom for moving said rope and rod, and a plurality of clothes hanging lines participating in the outward and inward movements of said rod.



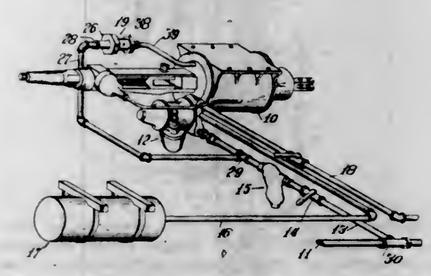
1,679,597. RADIO RECEIVING CIRCUIT. THOMAS H. BERKLAND, Chicago, Ill. Filed July 13, 1925. Serial No. 43,115. 2 Claims. (Cl. 250—20.)



1. In a radio receiving system, a thermionic tube, the primary of a radio frequency transformer, the secondary of said radio frequency transformer, said secondary conductively connected at one end to the grid of said tube and at the other end to a grid-potential control battery, and the primary of said transformer conductively connected to the antenna at one end and capacitively connected to the grid of said tube through a variable condenser at the other end.

1,679,598. SUCTION ROLL. EARL E. BERRY, Beloit, Wis., assignor to Beloit Iron Works, Beloit, Wis., a Corporation of Wisconsin. Filed Oct. 5, 1925. Serial No. 60,409. 22 Claims. (Cl. 92—53.)

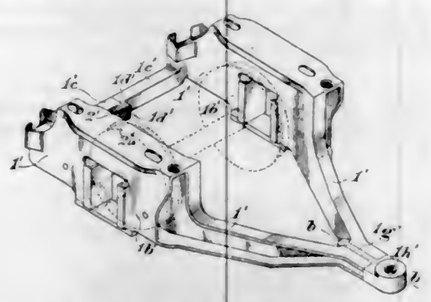
1. The combination with a suction roll having a perforated shell, of a suction chamber mounted within said shell, a floating packing head for said chamber adapted to contact the interior surface of said shell to confine an area thereof, self adjusting sealing means movably positioned between said floating head and said chamber and a plurality of longitudinally spaced resilient means adapted to balance the weight of said head.



1,679,599. BUILDING CONSTRUCTION. PHILIP H. BEVIER, Brooklyn, N. Y. Filed Nov. 9, 1925. Serial No. 67,721. 11 Claims. (Cl. 72—66.)

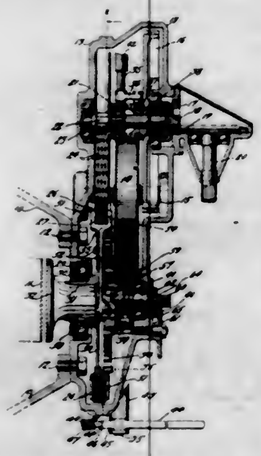
6. In a reinforced concrete floor, the combination with a plurality of hollow tiles arranged in spaced relationship with reinforced concrete joists extending across said floor between said tiles, of a plurality of slabs for closing the open ends of said tiles to prevent ingress of concrete to the cells of said tiles, the width and length of said slabs being less respectively than the height and width of said tiles, and carriers upon which said slabs are supported, said carriers being supported by said tiles and extending across the space between the open ends of adjacent tiles.

8. A reinforced concrete floor as set forth in claim 6 in which means are provided to hold said slabs securely against the ends of said tiles.



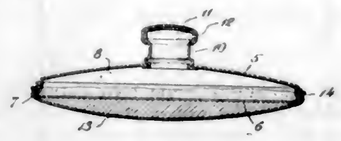
1,679,600. BRAKE-CYLINDER RELEASE VALVE. THOMAS H. BIRCH, Milwaukee, Wis. Filed Oct. 21, 1926. Serial No. 143,088. 5 Claims. (Cl. 303—69.)

1. A device of the character described comprising a casing adapted to be connected at opposite ends with the brake pipe and with the brake cylinder of a railroad air brake system and provided with an exhaust port, a diaphragm carrying member in said casing whereby



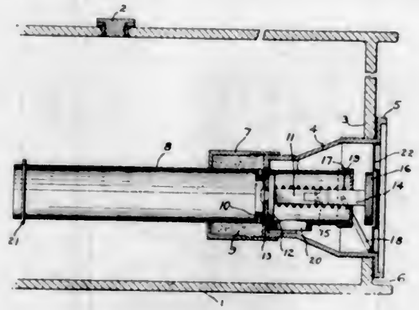
communication between the casing and brake pipe is closed, a spring for placing said member and diaphragm under pressure, means adjustable in the casing for regulating the pressure of said spring, and means in the connection between said casing and the brake cylinder for controlling communication between the casing and the cylinder, said last means being actuated by said diaphragm carrying member when the pressure on the brake pipe side of the diaphragm reaches a predetermined degree, whereby communication between the brake cylinder and said casing is established.

1,679,601. TRUCK FOR RAILROAD VEHICLES. ALFRED W. BRUCE, New York, N. Y. Filed May 18, 1927. Serial No. 192,203. 5 Claims. (Cl. 105—174.)



1. In a fabricated truck frame for railroad vehicles, the combination of two counterpart side members, each comprising, in an integral structure, a top rail, pedestal jaws, depending therefrom, and one or more laterally projecting cross tie sections, each of which abuts against a counterpart section on the other side member; means by which the abutting sections are rigidly secured, one to the other; and means for pivotally connecting the assembled members to the main frame of a railroad vehicle.

1,679,602. STARTER MECHANISM. ROLAND CHILTON, Keyport, N. J., assignor, by mesne assignments, to Aeromarine Starter Company, Inc., a Corporation of New York. Filed Mar. 19, 1926. Serial No. 95,952. 23 Claims. (Cl. 123—179.)

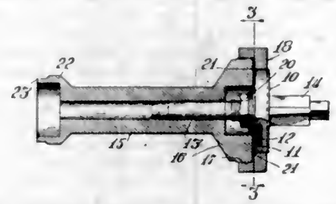


1. In apparatus of the class described, the combination of a driving member, a chain connected to the driving member at a point closely adjacent the axis of said member, and adapted to wrap around said axis on a path extending spirally from the point of chain anchorage, a driven drum engaged by the chain, a flywheel adapted to be accelerated to high speed from a source of power, a reduction gear train between the flywheel and the driving member, and means to connect the driving member and the drum respectively to the flywheel and to a means to be started.

1,679,603. COMBINED RECEPTACLE AND BUFFER. FRANCIS JONATHAN CLEMENGER, New York, N. Y. Filed Mar. 9, 1926. Serial No. 93,483. 8 Claims. (Cl. 132—78.)

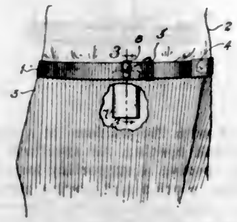
1. A combined receptacle and buffer adapted to facilitate the application of polish to finger-nails comprising a body forming the receptacle and carrying the buffing material, the body portion having perforations above the buffing material through which the polish can be sifted and a cover for the perforations.

1,679,604. COMBINATION BUNG AND FAUCET. GEORGE W. COOKE, Forest Hills, N. Y., assignor, by mesne assignments, to Standard Faucet Works, Inc., New York, N. Y., a Corporation of New York. Filed Oct. 13, 1926. Serial No. 141,387. 8 Claims. (Cl. 221—27.)



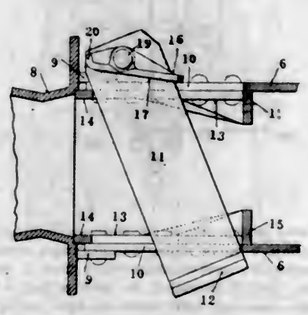
1. A combination bung and faucet for a container comprising a bung adapted to be attached to the container, a tube slidably mounted in the bung and provided with a discharge orifice and a transverse valve seat, a valve slidably mounted in the tube, means for holding the valve against the seat and means whereby the valve may be withdrawn from the seat to permit the contents of the container to flow from the orifice.

1,679,605. VALVE-RESEATING TOOL AND GAUGE. RUEL H. EAVES, Needles, Calif. Filed Nov. 8, 1926. Serial No. 146,972. 2 Claims. (Cl. 51—197.)



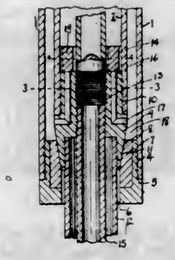
1. A tool of the character described comprising a body portion provided with an elongated valve-stem receiving passage and terminating in an enlarged externally threaded end provided with a flat annular valve seating face, and a flanged cap provided with a valve-receiving opening, to hold the valve concentrically in place, the flange of said cap being internally threaded to screw

onto said enlarged end of the body portion and having slots arranged parallel with said valve seating face adapted to come substantially flush with said face, said



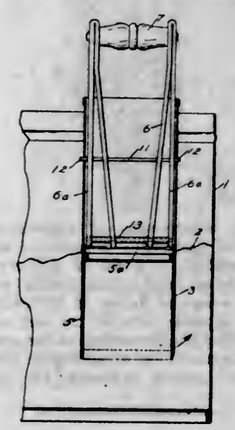
slots being adapted to receive strips of abrasive material immovably held in place when said cap is screwed into place.

1,679,606. SAFETY POCKETBOOK. WILLIAM JORDAN GRAVES, Fort Worth, Tex. Filed Mar. 21, 1927. Serial No. 176,970. 1 Claim. (Cl. 224—26.)



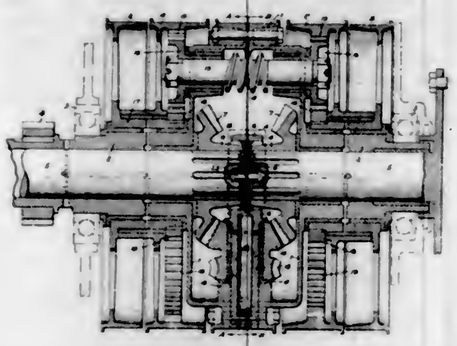
The combination with a safety container such as a purse, bill-fold or the like, adapted to be removably attached directly to the belt of the user, so as to permit ready access to the contents of the container, and remotely secured to the belt to prevent loss of the container, of a clip permanently secured direct to the container and having a lip fitting over the outside of the belt to hold the container in place but permit immediate removal thereof, a sliding clasp secured permanently to the belt as long as the belt is buckled, and a flexible connection between said clip and said clasp.

1,679,607. DRAFT GEAR. LOUIS A. HOEAR, St. Louis, Mo., assignor to Western Railway Equipment Company, St. Louis, Mo., a Corporation of Missouri. Filed Feb. 10, 1927. Serial No. 167,106. 2 Claims. (Cl. 213—61.)



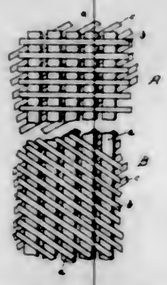
1. In a device of the class described, the combination with draft sills provided with key slots, of a key projecting through said slots, and a U-shaped retaining member embracing and pivoted to one end of said key, said retaining member having its greater width at its pivotal point and tapering from said joint toward both ends.

1,679,608. ATTACHMENT FOR PUMPS. GRANVILLE A. HUMASON and WILLIAM L. CHILDS, Houston, Tex.; said Childs assignor to Reed Roller Bit Company, Houston, Tex., and said Humason assignor to J. A. Logan, Harris County, Tex. Original application filed May 14, 1926, Serial No. 109,137. Divided and this application filed Dec. 27, 1926, Serial No. 157,316. Renewed May 18, 1928. 3 Claims. (Cl. 103—204.)



1. In a pump, a tubing, a standing valve head closing the lower end thereof, a standing valve barrel projecting upwardly from said head, a valve in said standing valve barrel, said head having openings therein connecting the outside thereof with the interior of said tubing, and a casing outside said tubing through which fluid may be discharged through said openings and upwardly in said tubing outside said standing valve barrel.

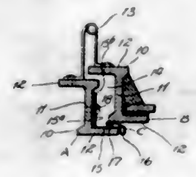
1,679,609. ICE-CREAM-CONTAINER FILLER. CECIL G. JOHNSTON, Meadville, Pa., assignor of one-half to Edna B. Johnston, Meadville, Pa. Filed July 20, 1927. Serial No. 207,116. 3 Claims. (Cl. 226—19.)



1. In an ice cream container filler, the combination of a container holder having walls surrounding the container; a stop forming a guard lip at the bottom of the holder; a movable backing arranged in the holder engaging the bottom of the container; and a locking device for the backing comprising a longitudinal slot in the container holder having a lateral extension and a plurality of projections on the backing for varying the position of the backing to different sizes of containers.

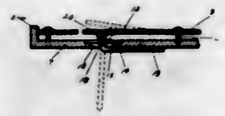
1,679,610. DOUBLE-RADIUS CONTROLLED DIFFERENTIAL. HARRY A. KNOX, Davenport, Iowa. Filed Nov. 8, 1924. Serial No. 748,892. 8 Claims. (Cl. 180—17.) (Granted under the provisions of the act of Mar. 3, 1883, 22 Stat. L., 625.)

5. In a differential steering gear for motor vehicles, the combination with planet pinions, of worm wheels fast on said pinions, worms meshing with said worm wheels for locking the same to maintain the vehicle on a straight course, and positive means for rotating the worms at different rates of speed to change the course of the vehicle.



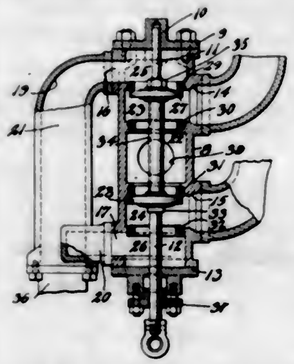
1,679,611. WALL CONSTRUCTION. HANS KUPELWIESER, St. Polten, Austria. Filed June 30, 1925, Serial No. 40,555, and in Austria Sept. 2, 1924. 5 Claims. (Cl. 72—33.)

1. In a wall construction of concrete and wood, a wooden structure comprising a series of spaced vertical lath shaped members, a series of lattice-work members applied to the broad faces of the vertical members at an angle thereto, a second series of lattice-work members applied to the opposite faces of the vertical members in such a manner that the interstices of the opposing lattice-works are substantially out of alignment with each other, and a concrete casing enclosing the entire wooden structure.



1,679,612. METAL WEATHER STRIP. ALFRED M. LANE, St. Louis, Mo., assignor to Monarch Metal Products Company, St. Louis, Mo., a Corporation of Missouri. Filed Jan. 14, 1926. Serial No. 81,151. 2 Claims. (Cl. 20—69.)

1. The combination of a metal window frame having a sash opening provided with an angular recess extending along the edges thereof, and a metal sash hinged in said opening with its marginal portions disposed in said recess of a metal weatherstrip of angular section fitting in said angular recess with one flange only secured directly thereto, the other flange of said strip being left free with its outer margin overlapping the edge of said recess and

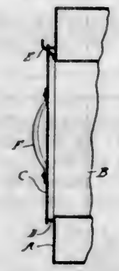


doubled back toward the corner thereof alongside the free flange of said strip to form a sealing flange adapted to yieldably engage the adjacent face of said sash.

1,679,613. PLATFORM SUPPORT FOR CAMERAS. LEW W. LESSLER, Johnson City, N. Y., assignor, by mesne assignments, to Agfa Ansco Corporation, Binghamton, N. Y., a Corporation of New York. Filed Aug. 1, 1927. Serial No. 209,979. 1 Claim. (Cl. 95—86.)

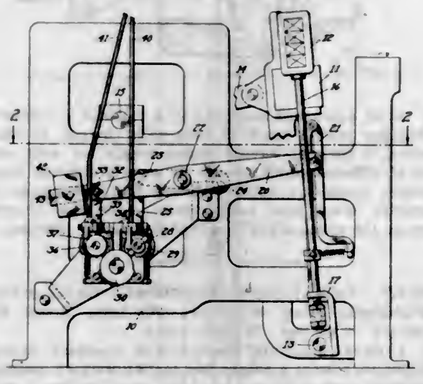
In combination with the platform of a camera provided with a countersunk opening, an apertured bearing plate mounted in said opening, a supporting leg provided at one end with an offset portion and pintles pivotally mounted in said bearing, said leg extending downwardly through said opening and aperture, a fixed rail plate on said platform provided with a resilient tongue struck therefrom overlying said opening and engageable with said offset portion whereby said leg is held in adjusted position.

1,679,614. MULTIPLE-TANK WATER-SUPPLY MECHANISM. ERICH H. LICHTENBERG, Milwaukee, Wis., assignor to Koehring Company, Milwaukee, Wis. Filed July 27, 1925, Serial No. 46,313. Renewed Oct. 14, 1927. 6 Claims. (Cl. 277—14.)



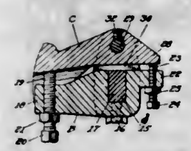
1. In water supply means for concrete mixing machines, in combination, a valve casing comprising a central water supply chamber to receive some water from a main water supply line, valves arranged in said casing at opposite ends of said chamber, valve seats in said casing arranged in pairs at opposite ends of said chamber, the seats of each pair being located upon opposite sides of one of the valves, water inflow ports communicating with the casing between the valve seats of said pairs of seats,

water outflow chambers, one located at the outer side of the outermost of one pair of valve seats and the other located at the outer side of the outer one of the other pair of valve seats, outflow passage means connected with the outflow chambers, and means for operating the valves.



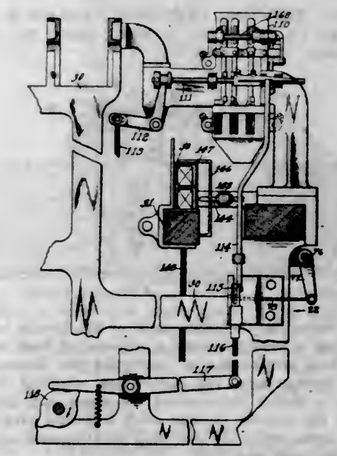
5. Valve means of the class described comprising a casing having a water supply port at its central portion, valve seats at opposite sides of said port and within the casing, a valve seat adjacent to each of the valve seats aforesaid, spaced therefrom, a valve between each of the last mentioned valve seats and its particular adjacent valve seat, water inflow pipes communicating with the casing at points between each set of valve seats on opposite sides of the water supply port, an outflow passage means leading from the casing and having controlled communication with the inflow pipes by means of said valves.

1,679,615. DETACHABLE COVER FOR ICE TRAY COMPARTMENTS IN REFRIGERATING APPARATUS. HUBERT R. LORANGER, Highland Park, Mich. Filed Feb. 16, 1925. Seral No. 9,635. 8 Claims. (Cl. 62—95.)



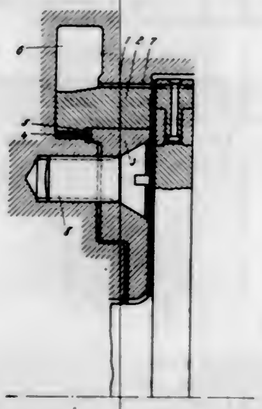
1. The combination with a casing having a freezing chamber therein opening out through a substantially vertical wall of the tank, of a closure for said chamber comprising a cover having an inwardly extending annular flange surrounding the opening into said chamber and forming a limited contact with the walls of the casing, and means for supporting said closure and holding said flange in contact.

1,679,616. BOX MOTION FOR LOOMS. WILLIAM E. LUNDGREN, Worcester, Mass., assignor to Crompton & Knowles Loom Works, Worcester, Mass., a Corporation of Massachusetts. Filed Nov. 15, 1926. Serial No. 148,427. 2 Claims. (Cl. 139—181.)



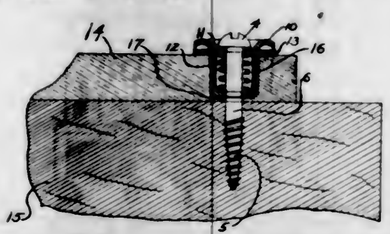
1. In a drop box loom, a plurality of drop boxes, a lifting lever therefor, a floating pivot for said lever, an arm on which said pivot is mounted, said arm swinging upon a pivot fixed in position substantially forward of said floating pivot and said arm also extending substantially rearward of said floating pivot, actuating means engaging the rear end of said arm to move said floating pivot, additional actuating means positioned rearward of said first actuating means and engaging said lifting lever and effective to swing said lever on its floating pivot, and a counterweight for said drop boxes mounted directly on said lifting lever at a point rearward of the connection of said second actuating means thereto.

1,679,617. PICKING MOTION FOR LOOMS. CLARENCE L. MAY, Worcester, Mass., assignor to Crompton & Knowles Loom Works, Worcester, Mass., a Corporation of Massachusetts. Filed Oct. 12, 1927. Serial No. 225,798. 6 Claims. (Cl. 139—147.)



1. In a picking motion for a loom having a bottom shaft with a picking arm and a picker shaft, a picker shoe including a body portion secured to the picker shaft, said picker shoe having a cam portion pivotally mounted on the body portion to move in a vertical plane to raise the cam portion as a whole with respect to the picker shaft.

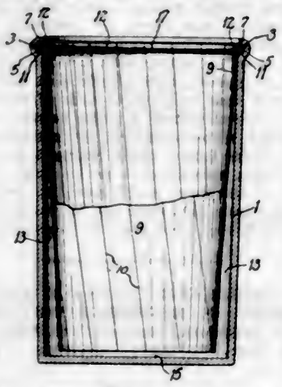
1,679,618. WEFT-REPLENISHING LOOM. BENJAMIN F. MCGUINESS, Saundersville, Mass., assignor to Crompton & Knowles Loom Works, Worcester, Mass., a Corporation of Massachusetts. Filed Dec. 4, 1925. Serial No. 73,245. 26 Claims. (Cl. 139—232.)



1. A weft replenishing drop box loom having, in combination, shifting shuttle boxes, a magazine, weft replenishing mechanism associated therewith, a single weft detector, means to move said weft detector into position to enter any selected shuttle about to become active, and means to thereafter positively connect said detector with the shuttle box of the selected shuttle and to positively maintain operative relation between the weft detector and said shuttle during the vertical shifting of the boxes.

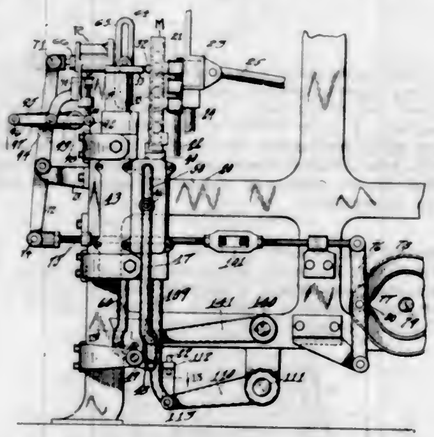
1,679,619. NOZZLE CONSTRUCTION FOR STEAM TURBINES. GUSTAV MENZ, Berlin-Charlottenburg, Germany, assignor to Siemens-Schuckertwerke Gesellschaft mit beschränkter Hertfung, Berlin-Siemensstadt, Germany, a Corporation of Germany. Filed Feb. 12, 1927, Serial No. 167,742, and in Germany Feb. 17, 1926. 3 Claims. (Cl. 253—78.)

1. In a steam turbine the combination of a casing, a nozzle carrier having nozzle grooves in its outer periphery and forming a complete solid ring located in the turbine casing, and having its outer periphery shrunk against the inner periphery of the turbine casing, which forms one of the nozzle sides, and means for tightening the ring at its inner surface against the casing so that the steam admitted to the nozzles can flow only substantially in the axial direction of the turbine.



1,679,620. YIELDING FASTENER. THOMAS M. MOORE, Chicago, Ill. Filed Oct. 4, 1926. Serial No. 139,321. 5 Claims. (Cl. 85—50.)

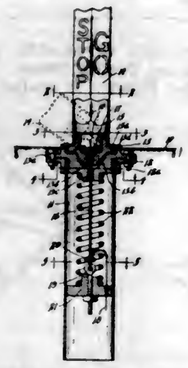
1. A device for fastening glass or the like to a support comprising a headed screw; a cap-shaped shell having a bottom hole and having an outturned rim flange; a ring loosely fitting upon the screw and abutting the head thereof; a spring surrounding the screw and imprisoned between the bottom of said shell and said ring; and a washer surrounding the shell and abutting said rim flange, substantially as described.



1,679,621. CONTAINER. WILLIAM C. MYERS, East St. Louis, Ill. Filed Jan. 6, 1927. Serial No. 159,376. 3 Claims. (Cl. 220—65.)

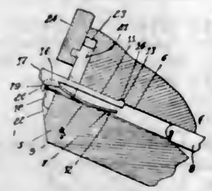
1. A container comprising an outer non-resilient and substantially indestrictible cup having an internal lip near its upper edge and an internal contiguous recess below said lip, an inner resilient and destrictible cup having an outwardly formed hollow shoulder near its upper edge, means permitting springing of said shoulder into said recess and a resilient disc adapted to be sprung into said recess containing said shoulder to hold the

shoulder therein between said disc and the outer cup, the edge of the inner cup being then located above the periphery of said disc.



1,679,622. WEFT-REPLENISHING MECHANISM FOR LOOMS. SAMUEL A. NELSON, Worcester, Mass., assignor to Crompton & Knowles Loom Works, Worcester, Mass., a Corporation of Massachusetts. Filed May 29, 1926. Serial No. 112,642. 25 Claims. (Cl. 139—232.)

1. In an automatic loom having a lay and a plurality of shifting shuttle boxes at both ends thereof, in combination, a magaine having compartments for weft carriers of different kinds, means to move a selected compartment opposite a selected shuttle box, and means to thereafter move said compartment with said shuttle boxes as the selected box is moved to running position.

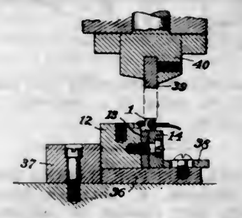


1,679,623. SIGNAL-POST STRUCTURE. HENRY OLSEN, Minneapolis, Minn. Filed Oct. 25, 1926. Serial No. 143,916. 7 Claims. (Cl. 40—145.)

1. A signal structure comprising a standard having adjacent its bottom a supporting portion with an annular supporting surface convex in radial cross section, a supporting member having a horizontal surface on which said convex surface rests and having an upstanding flange surrounding said supporting portion and preventing bodily lateral movement thereof, centering means within said flange of angular shape in horizontal cross section for said standard and flexible resilient means

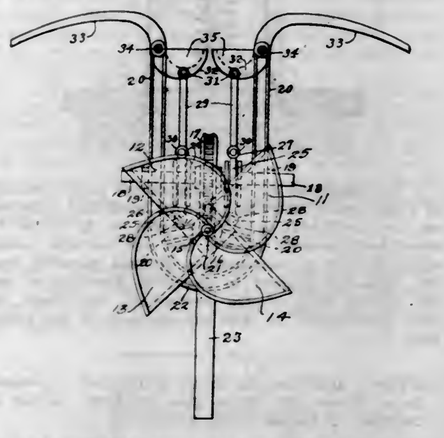
holding said standard in vertical position but permitting downward swinging movement thereof and for returning the same to normal position.

1,679,624. SPRING-BEARD-NEEDLE MECHANISM. WILLIAM S. PARKER, Rockford, Ill., assignor to Burson Knitting Company, Rockford, Ill., a Corporation of Illinois. Filed Apr. 27, 1925. Serial No. 26,015. 16 Claims. (Cl. 66—101.)



1. A single part for a knitting machine equipped with spring beard needles, comprising a needle-pressing spring portion for seating a needle in its bed and a beard closer portion.

1,679,625. PUMP FOR WELLS. JOHN PENROD and ROBERT D. THOMPSON, Okmulgee, Okla. Filed Mar. 23, 1926. Serial No. 96,807. 19 Claims. (Cl. 103—220.)

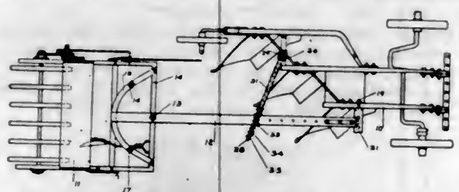


1. In a pump, the combination of a working barrel, a shell receiving the working barrel and being spaced therefrom to define a sand receiving pocket, means movably supporting the barrel, and a valve for said pocket movable supported by said means.

1,679,626. METHOD OF MANIPULATING MULTIPLE FASTENERS. JOSEPH E. PERRAULT, Watertown, Mass., assignor to Hood Rubber Company, Watertown, Mass., a Corporation of Massachusetts. Filed Sept. 15, 1926. Serial No. 135,634. 6 Claims. (Cl. 29—148.)

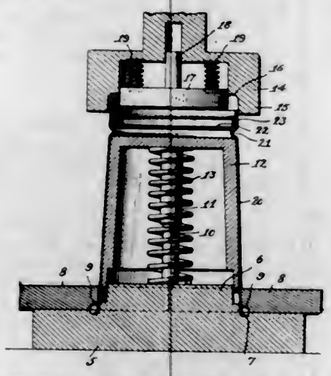
1. The herein described method of manipulating multiple fastener elements of the type described which consists in cutting through the bases of the elements to form slots, widening the slots by a spreading action, inserting a carrier tape, and thereafter compressing the walls of the slots upon said tape.

1,679,627. MECHANICAL DEVICE. HENRY RABINOWITZ, Brooklyn, N. Y., assignor to Bertha Rabinowitz, Brooklyn, N. Y. Filed Aug. 31, 1927. Serial No. 216,569. 4 Claims. (Cl. 46—14.)



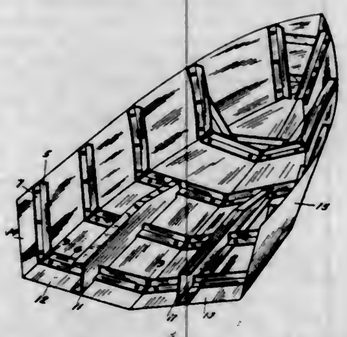
1. In a mechanical device the combination of a bracket, a pair of evenly counter-balanced wings, pivotally mounted thereon, a means for imparting a visible flapping motion to said wings, a wind motor revolvably mounted on said bracket, to actuate said imparting means, and a means for reducing the velocity of said imparting means from said motor, thereby rendering the flapping of said wings visible.

1,679,628. ATTACHMENT MECHANISM. LUTHER E ROBY, Peoria, Ill. Filed Mar. 19, 1926, Serial No. 95,908. Renewed Mar. 3, 1927. 3 Claims. (Cl. 97—6.)



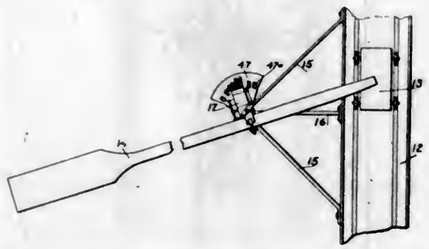
1. The combination with a plow and a drill member, of attachment means therebetween adapted to insure travel of the drill in alignment with the plow, as well as permitting short turning radius, including a tongue attached to the plow and having a pivotal connection, at a point near its opposite end, with the drill, framing members disposed rearwardly of the pivotal connection with the drill, said framing members controlling the

movement of the tongue with respect to the drill member, stop members on the framing members to limit the turning movement of the drill with relation to the



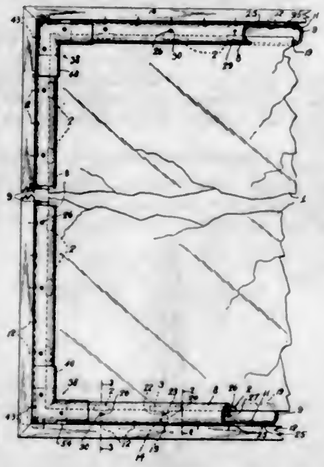
tongue, and mechanism connecting the plow with the tongue to hold the latter in a semi-rigid manner with respect to the plow.

1,679,629. APPARATUS FOR MAKING SHEET-METAL VESSELS. MICHAEL A. ROLLMAN, Mount Joy, Pa. Filed Nov. 25, 1922. Serial No. 603,202. 2 Claims. (Cl. 113—16.)



1. An apparatus for the purpose set forth consisting of a base and cooperating plates for producing a rim-bead on the bucket-body, a form adapted to fit within the bucket-body mounted on said base and normally pressed upwardly, and a reciprocating die-head mounted above the form and adapted to cooperate therewith to bead the bottom edge of the bucket-body and force said form downwardly to form the rim-bead of the bucket-body.

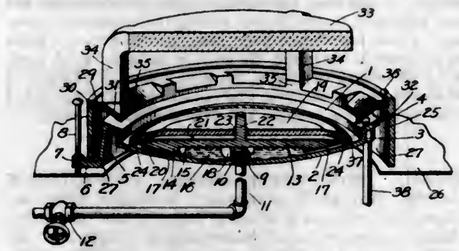
1,679,630. METHOD OF BOAT BUILDING. LAWRENCE ROYS, Moline, Ill. Filed Jan. 16, 1928. Serial No. 246,929. 2 Claims. (Cl. 9—6.)



1. That part of the method of building metal boats which consists in first shaping sheet metal into the shape of shell desired, then shaping angles into rigid frame members to conform to the interior sections of the shell, and autogenously uniting the sections of the individual frame members while the same are held in place in the shell.

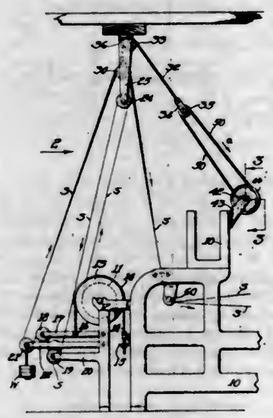
1,679,631. RECORDING APPARATUS FOR OARSMEN. HAL E. SEAGRAVES, Tacoma, Wash. Filed Sept. 30, 1925. Serial No. 59,602. 12 Claims. (Cl. 265—2.)

1. The combination with an oar-propelled boat of a spring-pressed reciprocating head and a pivoted support therefor connected with one side of the boat, said head adapted to serve as a fulcrum for an oar, means connected with said head for making a record of the power exerted by an oarsman on such oar, and other means for regulating the number of strokes of which a power record is made.



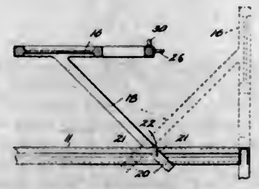
1,679,632. STORE WINDOW. ROBERT A. SCHLEGEL, Williamsport, Pa., assignor to Williamsport Mirror & Glass Company, Williamsport, Pa. Filed Sept. 1, 1926. Serial No. 133,016. 9 Claims. (Cl. 189—75.)

1. A store window comprising a frame and a glass sheet, spaced substantially rigid channel-shaped metal protectors arranged around the edges of the sheet, soft yielding material lining said protectors, and means connected to the frame for clamping the edge portions of the sheet to the frame.



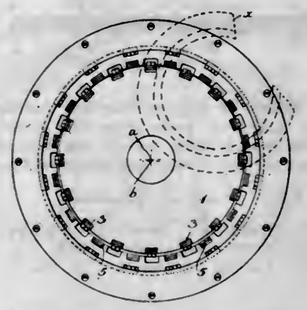
1,679,633. OIL BURNER. WILLIAM L. SIX, Kansas City, Mo. Filed Jan. 21, 1926. Serial No. 82,699. 1 Claim. (Cl. 158—67.)

An oil burner comprising a bowl adapted for containing oil in fluid state, means for delivering oil to the bowl, a plate covering the bowl and spaced therefrom at its periphery to provide a restricted outlet, a heat insulating plate above the covering plate for retarding



vaporization of contents of the bowl, a wick adjacent the outlet, and means for directing air over the wick to support combustion.

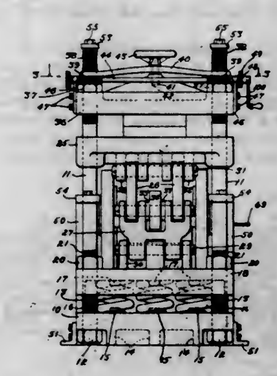
1,679,634. LET-OFF AND TENSION MECHANISM FOR NARROW-WARE LOOMS. CLARENCE A. STEERE, Wickford, R. I., assignor to Crompton & Knowles Loom Works, Worcester, Mass., a Corporation of Massachusetts. Filed May 15, 1925. Serial No. 30,569. 4 Claims. (Cl. 139—97.)



1. A narrow ware loom, having in combination a warp beam containing warp for several warp sections for separate fabrics, let-off mechanism for said warp beam, and manually operable rotative means effective to positively change the path of travel of any selected warp section, and to definitely determine the length of said path between the warp beam and the fell of the fabric for any selected warp section.

1,679,635. INVALID BED. SAMUEL H. STEINBERG and JOHN E. SNYDER, Los Angeles, Calif. Filed July 28, 1926. Serial No. 125,426. 2 Claims. (Cl. 5—332.)

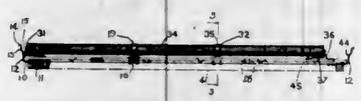
1. In a bed, a bed end, means for normally maintaining the bed end in its normal upright position, a pair of arms fixedly attached to said bed end, one at each side thereof, a pair of channel shaped bed rails, means on said arms disposed to travel in said bed rails whereby said bed end may be converted into a table top by an arcuate movement of the bed end from its vertical to a horizontal position, and means comprising integral inturned ends upon the aforesaid arms cooperating with the rails for maintaining the said bed end in horizontal position.



1,679,636. METHOD AND MECHANISM FOR PRODUCING GEARS. HAROLD E. STONEBRAKER, Rochester, N. Y., assignor to Gleason Works, Rochester, N. Y., a Corporation of New York. Filed May 8, 1925. Serial No. 28,849. 10 Claims. (Cl. 90—4.)

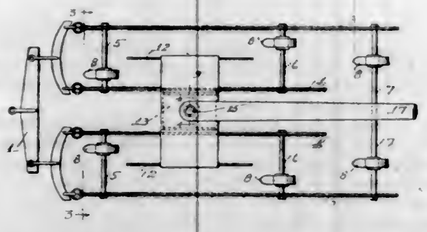
1. The method of producing curved tooth cylindrical and tapered gears consisting in simultaneously forming two adjacent faces by rotating independent cutters about different centers so as to move their tools in conformity to two eccentrically related circles.

5. A gear cutter mechanism for producing cylindrical and tapered gears comprising a plurality of independently supported tools which are so related as to be movable simultaneously in curved paths across the face of a gear blank through a single tooth space and in cutting relation with the adjacent bounding faces of such tooth space, and means for imparting simultaneous movement to said tools.



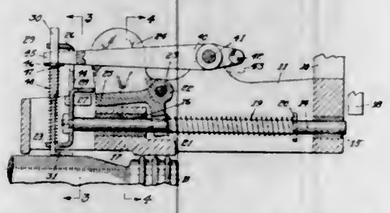
1,679,637. MECHANICAL PRESS. EDWIN A. TERKELSEN, Boston, Mass., assignor to Andrew Terkelsen, Newton, Mass. Filed Feb. 7, 1927. Serial No. 166,335. 16 Claims. (Cl. 25—97.)

1. In a press, in combination, relatively movable press elements, a resiliently supported abutment, mechanism supported upon and reacting against said abutment for raising one of said elements to compress material therebetween with a desired pressure, adjustable means for controlling the uppermost position of the abutment, and



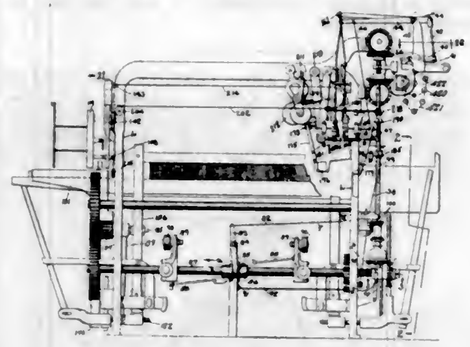
means for operating said mechanism, said abutment being adjusted upon its resilient support to move out of contact with said adjustable controlling means when said mechanism is operated, whereby said abutment may rise in response to volumetric changes in said material to maintain a substantially constant pressure thereon.

1,679,638. LOOM. ARTHUR T. THOMPSON, Hightstown, N. J., assignor to Hightstown Rug Company, Hightstown, N. J., a Corporation of New Jersey. Filed Apr. 29, 1927. Serial No. 187,452. 4 Claims. (Cl. 139—10.)



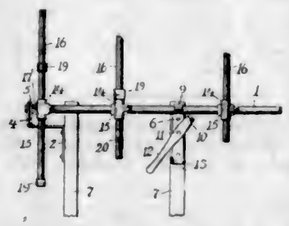
1. The method of weaving relatively narrow rugs and carpets on Axminster looms comprising setting two end loom spools from a single pattern and a shorter central spool from a pattern of relatively narrow width.

1,679,639. HARROW. HENRY B. THOMPSON, Bowne Township, Kent County, Mich. Filed Aug. 30, 1926. Serial No. 132,446. 2 Claims. (Cl. 55—3.)



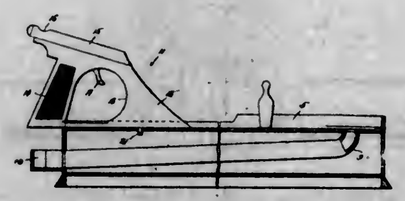
1. In a harrow: a body adapted to be drawn longitudinally, having harrow teeth, and comprising spaced runners supported on the ground and extending in the body's longitudinal direction; a guiding runner between the first-mentioned runners and extending in the body's longitudinal direction, and adapted to engage in the ground in the body's drawn movement, the guiding runner being turnable relatively to the body about a vertical axis.

1,679,640. WEFT DETECTOR IN LOOM TRANSFERRERS. KENNETH J. UNWIN, Worcester, Mass., assignor to Crompton & Knowles Loom Works, Worcester, Mass., a Corporation of Massachusetts. Filed Nov. 10, 1927. Serial No. 232,425. 5 Claims. (Cl. 139—271.)



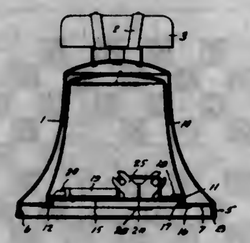
1. In weft detecting mechanism for a loom having a regularly moving transferrer arm provided with an indicating plunger normally in non-indicating position, a detector carrier slidably mounted relatively to the transferrer arm and operatively connected thereto said carrier being movable in a direction substantially parallel to the surface being detected, a detecting element movably mounted in the carrier and held yieldingly in raised position, a depressor element to lower the detecting element relatively to the carrier during the downward movement of the transferrer arm, and means operative after the detector has engaged the surface to be detected tending to move said carrier in the direction of the length of the surface being detected, and movement being prevented when the detector engages a sufficient supply of weft.

1,679,641. WEFT-REPLENISHING PICK-AND-PICK LOOM. WALTER H. WAKEFIELD, Worcester, Mass., assignor to Crompton & Knowles Loom Works, Worcester, Mass., a Corporation of Massachusetts. Filed Mar. 28, 1925. Serial No. 19,130. 27 Claims. (Cl. 139—232.)



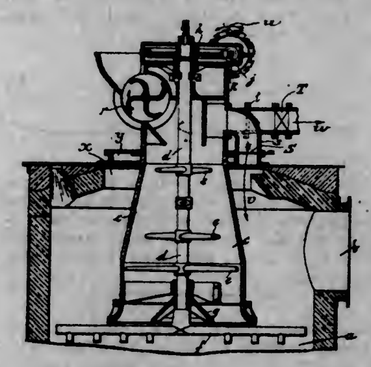
1. A weft replenishing pick and pick loom having, in combination, a lay, a plurality of shuttles, a set of shifting shuttle boxes at each end of the lay, means to pick a shuttle from either end of the lay on any pick, a multicolor magazine at one end of the lay, means to select a weft carrier corresponding in color to the running shuttle, and means to transfer said weft carrier to the running shuttle, said selecting means being operatively associated with the active shuttle in whatever box said shuttle may be positioned and being controlled directly from the same pattern surface which determines the drop box changes.

1,679,642. CANOPY FOR TRUCKS. STANLEY F. WALDEN, Newton, Mass. Filed Dec. 14, 1923. Serial No. 680,617. 4 Claims. (Cl. 296—105.)



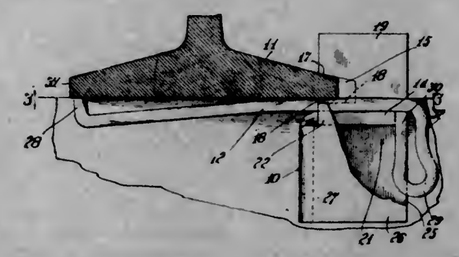
1. A canopy frame for trucks comprising side bars supported by the truck body, socket members each having two sockets at right angles to each other but not in the same plane, one socket of each member being slidable upon a side bar, uprights slidable in the vertical sockets of the said members, and a spring-pressed pin carried by each vertical socket, each vertical socket having integral therewith a U-shaped portion forming a shelf pierced by said pin, each pin having a head larger than and exterior to the associated shelf and carrying a helical spring mounted thereon between the shelf and socket so as to press against another pin carried on said spring-pressed pin, and the uprights having holes for receiving the ends of the spring-pressed pin.

1,679,643. PARLOR BOWLING DEVICE. ALOIS L. BAUMANN, Kellogg, Idaho. Filed Apr. 2, 1927. Serial No. 180,586. 1 Claim. (Cl. 273—38.)



In a bowling game of the character described, an elongated alley way upon which pins are to be arranged at the far end thereof, a ball projecting device for disposition upon the alley at its opposite end and means between the device and said alley way whereby the device may be freely turned so that the balls may be projected in a predetermined direction, said device consisting of a base having an inclined forward surface, a ball receiving barrel supported in inclined position upon the upper edge of the base, and a trigger mechanism operable for releasing a single ball within the barrel when actuated, said trigger being further operable to prevent the release of other balls during the projection of the first mentioned ball.

1,679,644. MONEY BANK. ORLAND F. BAUGHMAN and JOSEPH HABART, Lakewood, Ohio, assignors to The Bankers Savings & Credit System Company, Cleveland, Ohio, a Corporation of Ohio. Filed May 11, 1925. Serial No. 29,394. 3 Claims. (Cl. 232—6.)



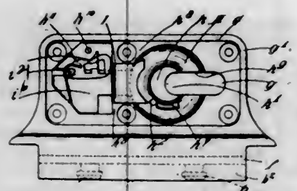
1. In combination, a casing having a wall provided with a comparatively large opening, a money receptacle that is adapted to be inserted into the casing through said opening, said receptacle also having an opening a closure removably secured within the opening of the receptacle and having a peripheral portion overlying said wall of the casing about the opening thereof, said wall and said closure having on the one hand, sockets, and on the other parts designed to enter said sockets when the receptacle is rotated with respect to the casing.

1,679,645. GAS PRODUCER. GEORGE HERBERT BENTLEY and EDMUND GARDNER APPLEBY, Westminster, London, England; Geoffrey Edmund Appleby and William Wallace Hargrove, executors of said Edmund Gardner Appleby, deceased, assignors to said Bentley. Filed May 20, 1925, Serial No. 31,616, and in Great Britain May 22, 1924. 1 Claim. (Cl. 48—86.)

A gas producer comprising in combination, a stationary gas generating chamber having an opening in its top, a stationary separate coal distillation chamber situated partly inside and partly outside the gas generating chamber and having an increasing cross-section for a part of the inner portion, the largest diameter of the distillation chamber being slightly smaller than the said opening, the said distillation chamber carrying an agitator shaft, a mechanism for feeding fuel to the distillation chamber, means interconnecting the fuel feeding mechanism with the agitator shaft so that the speed of the agitation inside the distillation chamber always corresponds to the amount of fuel fed into the distillation chamber, two gas outlet pipes, one leading from the distillation chamber back into the gas generating chamber, and means adapted to close the said opening of the gas generating chamber to the outside and enable at the said time a communication to be established between one of the outlet pipes and the gas generating chamber, as set forth.

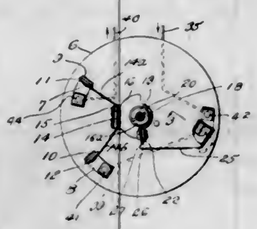
1,679,646. RAIL ANCHOR. ROLANDIS A. BLAIR, Fort Wayne, Ind., assignor to The P & M Company, Chicago, Ill., a Corporation of Illinois. Filed Sept. 1, 1927. Serial No. 216,840. 17 Claims. (Cl. 238—329.)

1. A rail anchor comprising a rail gripping member for engagement with one flange of a rail base, and a retaining bar formed to bear against the bottom surface of the rail



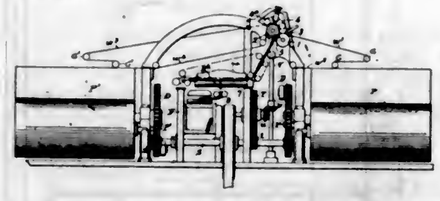
base for a substantial distance transversely of the rail and engaging said gripping member and the opposite edge of the rail base and adapted to yield transversely of the rail to permit said engagement of said bar with the rail base.

1,679,647. LOOM SHUTTLE. JOHN C. BROOKS, Paterson, N. J., assignor to Crompton & Knowles Loom Works, Worcester, Mass., a Corporation of Massachusetts. Filed June 29, 1925. Serial No. 40,362. 2 Claims. (Cl. 139—197.)



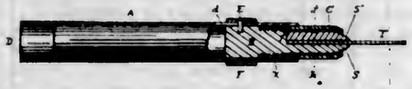
1. A shuttle comprising a body, a shuttle tip at each end, each tip having a stem extending axially into the body and provided with an axial chamber which is open at the end, the end of the tip being tapered and provided with a transverse slot which communicates with the axial chamber.

1,679,648. DETACHABLE LOCK. CHARLES AUGUSTUS CARPENTER, London, England. Filed Aug. 11, 1924, Serial No. 731,391, and in Great Britain Aug. 24, 1923. 6 Claims. (Cl. 70—17.)



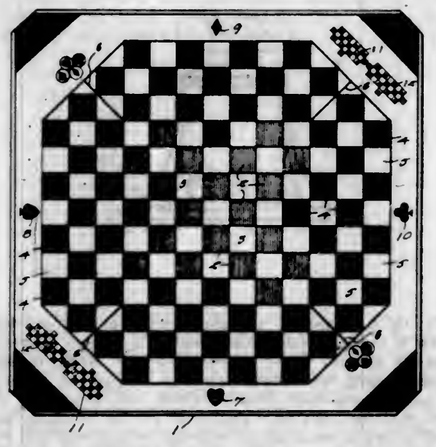
1. A detachable lock comprising a casing having a curved slot formed in one wall, a rotatable ring within the casing, a pin projecting from the ring through the curved slot in the casing and adapted to rotate the ring, and means for covering the curved slot when the parts are in locked position.

1,679,649. THERMOSTATIC CONTROL FOR ELECTRIC SWITCHES. JOEL R. COOK, Cleveland, Ohio, assignor, by mesne assignments, to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed July 3, 1924. Serial No. 723,889. 6 Claims. (Cl. 200—116.)



2. In an electric switch the combination of stationary contact members, swingable contact members adapted to bridge the stationary members to close a line, a swingable contact supporting means therefor including an abutment, a spring tending to maintain the supporting means with the contact members in a line opening position and a bimetallic current carrying thermostatic member comprising a permanent part of the line and mounted to form a cantilever strut with the free end acting as a detent against the abutment substantially at right angles with relation to the abutting surface thereof to oppose the swinging movement of the supporting means.

1,679,650. PRINTING PRESS AND FOLDER. JOSEPH L. COX and PAUL F. COX, Battle Creek, Mich. Filed June 6, 1927. Serial No. 196,780. 16 Claims. (Cl. 270—22.)

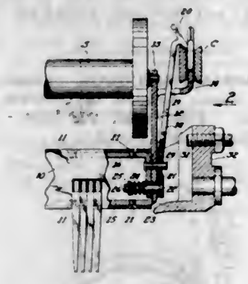


1. In combination, a pair of flat-bed printing presses; a pair of cutting cylinders, one of which is provided with a disappearing web severing device, and means coacting with the cylinders whereby they assemble, sever and deliver the products of said presses.

1,679,651. TOOTHPICK. JOHN H. CROWELL, Tisbury, Mass. Filed Feb. 19, 1925. Serial No. 10,427. 3 Claims. (Cl. 132—90.)

1. In a tooth pick, the combination, with a case, of a longitudinally movable pick holder located therein, and composed of one integral jaw, and one detached movable jaw, and threaded clamping sleeve for closing said jaws, whereby the pick is securely held, against accidental detachment and can be projected for use and housed for preservation, substantially as set forth.

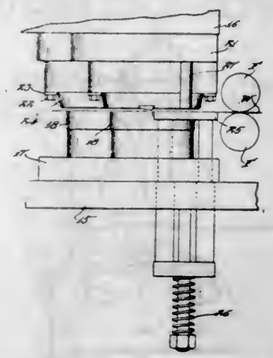
1,679,652. CHECKER-GAME BOARD. JAMES M. DALRYMPLE, Tulsa, Okla. Filed Jan. 8, 1927. Serial No. 159,866. 2 Claims. (Cl. 273—131.)



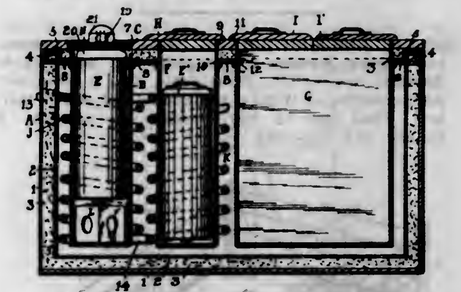
1. A game board having a substantially square sub-playing field consisting of forty-five alternately arranged areas of different colors, and substantially oblong home playing fields bordering the sub-playing field and each consisting of twenty-four alternately arranged areas of different colors, one area of each home playing field being arranged in the adjacent border of the sub-playing field and centrally between the ends of the border.

1,679,653. HAIR-WAVING DEVICE. MONNIE L. EBERHART, New Lisbon, Wis. Filed Aug. 18, 1927. Serial No. 213,791. 6 Claims. (Cl. 132—38.)

1. In a device of the class defined, the combination with a pair of combs, of a coupler in the form of an arch extending transversely over the combs and attached thereto.



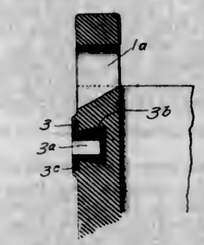
1,679,654. TUBE-FRAME BRACKET. GEORGE P. FINDLAY, Worcester, Mass., assignor to Crompton & Knowles Loom Works, Worcester, Mass., a Corporation of Massachusetts. Filed Dec. 18, 1926. Serial No. 155,760. 4 Claims. (Cl. 139—10.)



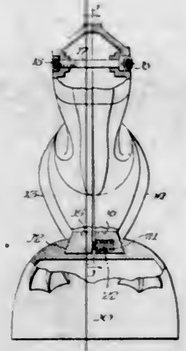
1. In a tube frame, a bracket and a chain-engaging hook mounted on said bracket, said hook having a pivot stud with its axis disposed perpendicular to the line of movement of the chain and extending through the end wall of the bracket, and a coil spring encircling said stud within said bracket and held under compression on said stud.

1,679,655. WEB-CUTTING MECHANISM. BERNARD M. FINE, Philadelphia, Pa., assignor to Sanitary Products Corporation of America, Philadelphia, Pa., a Corporation of Virginia. Filed Jan. 19, 1927. Serial No. 162,084. 4 Claims. (Cl. 113—42.)

1. In a machine of the character described, in combination, intermittently operating means for feeding a web of sheet material, a pair of relatively movable cooperating members for punching blanks from said web, means for operating said members while said web is held stationary by said feeding means, and means for cutting said web transversely at points where the latter is not pierced by the holes from which said blanks are punched to connect said holes and the edges of said web, said cutting means operating before said web has been displaced substantially from the plane in which it normally travels.

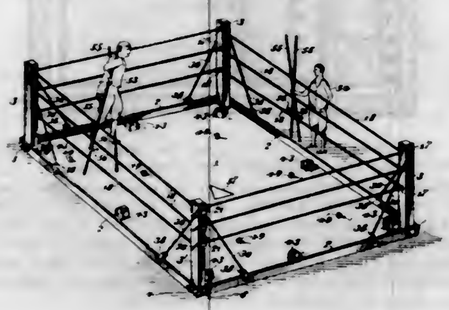


1,679,656. COMBINATION FREEZER AND REFRIGERATOR CABINET. RALPH W. GEARHART, Clearfield, Pa., assignor to Gearhart Sales Cabinet Co. Inc., Clearfield, Pa., a Corporation of Delaware. Filed May 22, 1925. Serial No. 32,066. 3 Claims. (Cl. 62—101.)



1. In mechanism for freezing ice cream and similar substances, the combination of a tank adapted to contain a bath of brine, a removable top closure for said tank, a closed bottom container carried by said top closure and depending within said bath, a pipe coil in said tank, through which a refrigerating agent is caused to travel, said coil being disposed in cylindrical form about said container, and a freezer including a freezer-can rotatably and removably mounted in said container.

1,679,657. BATTERY BOX. WARREN E. GLANCY, Waltham, Mass. Filed Mar. 15, 1927. Serial No. 175,590. 3 Claims. (Cl. 220—91.)



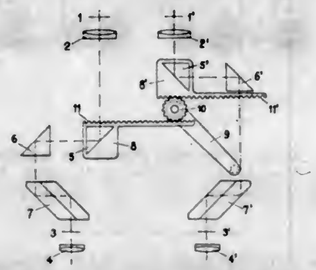
1. A battery box of molded asphaltic composition having embedded in each end wall thereof a bail receiving grommet composed of hard rubber and fiber.

1,679,658. TOY BANK. DOUGLAS HALL, Chicago, Ill. Filed Apr. 14, 1927. Serial No. 183,661. 2 Claims. (Cl. 46—36.)

1. In a device of the class described, a base providing a coin receptacle and providing a recess in its upper face, a body composed of two parts the lower portions of which are adapted to enter said recess, a tie loosely securing the upper portions of said parts together, and a spring serving to force the lower portions of said parts from each other so as to cause them to bind in said recess.

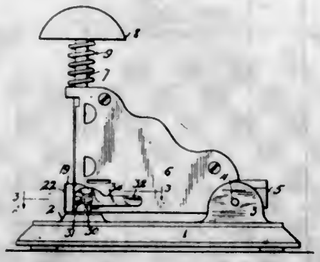
1,679,659. LAWN POOL GAME. WILLIAM S. HASSKARL and MORRIS MARDER, Philadelphia, Pa., assignors to Hasskarl Novelty Co., Philadelphia, Pa., a Copartnership consisting of William S. Hasskarl and Morris Marder. Filed May 12, 1927. Serial No. 190,673. 2 Claims. (Cl. 273—85.)

1. A game apparatus comprising a plane surface bounded by a flexible fence, said surface bearing a central storage field for a set of play-balls, each ball bearing distinguishing indicia, a series of ball-receiving pockets disposed around the plane surface within the confines of the fence, and means whereby players are mounted to play previously announced balls, said means comprising stilts adapted for hitting and propelling said balls by single shots into either of the pockets aforesaid.



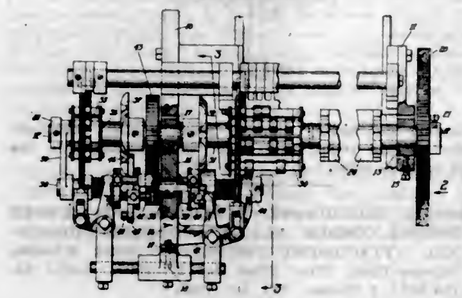
1,679,660. PROCESS FOR MAKING TUBULAR FARINACEOUS ROLLS. CHARLES RAY HASKELL, Youngstown, N. Y., assignor to Haskell Corporation, Niagara Falls, N. Y., a Corporation of New York. Filed June 21, 1926. Serial No. 117,408. 2 Claims. (Cl. 107—54.)

2. A process for making tubular bread rolls, consisting in first forming through rolling pressure between two surfaces one of which is that of a core roller and the other that of a support a lump of dough about said core roller into tubular form and uniting the longitudinal joint thereof to hold the roll in form, second raising the dough



while suspended from said core roller, third baking the roll while suspended from said core roller, and fourth removing the roll from said core roller.

1,679,661. STEREOSCOPIC MEASURING INSTRUMENT. REINHARD HUGERSHOFF, Dresden, Germany. Filed June 1, 1927, Serial No. 195,822, and in Germany Oct. 11, 1926. 3 Claims. (Cl. 88—29.)

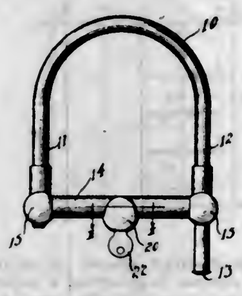


1. A double microscope for stereoscopic measuring instruments, comprising in combination two reflecting systems arranged in the paths of rays of the two halves of the double microscope, each of said reflecting systems being adapted to coact with either of the two halves of the double microscope and means for changing over the said reflecting systems from the one path of rays into the other path of rays and vice versa, as and for the purpose set forth.

1,679,662. STAPLING MACHINE. BERTHOLD JAHN, New Britain, Conn., assignor to Gertrude H. Heyn, Westport, Conn. Filed Sept. 22, 1926. Serial No. 136,928. 2 Claims. (Cl. 1—2.3.)

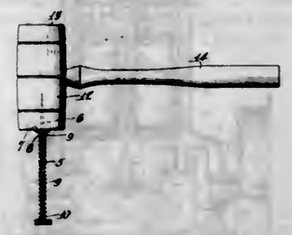
1. In a stapling machine in which a preformed strip of staples is fed forwardly, the combination with a frame, a cutter bar for guiding the strip of staples to the cutting position, said frame and cutter bar being fixed in relation to each other, a plunger for severing and driving the end staple of the strip and movable at right angles to the cutter bar, a raceway for guiding the severed staple formed partly by said frame, and a front member, and means for holding said front member on said frame, including pins on the frame adapted to be received in slots in said front member, and a lever pivoted to said front member and adapted to be hooked over one of said pins for locking said front member upon said casing.

1,679,663. DOBBY MULTIPLIER. VICTOR H. JENNINGS and HERBERT H. WATSON, Worcester, Mass., assignors to Crompton & Knowles Loom Works, Worcester, Mass., a Corporation of Massachusetts. Filed June 21, 1926. Serial No. 117,249. 4 Claims. (Cl. 139—326.)



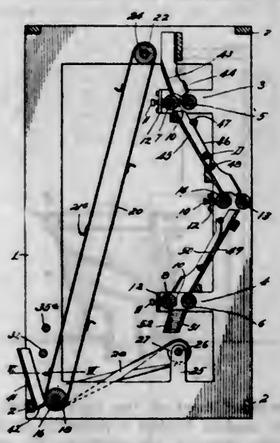
1. In a dobby multiplier, a frame, a cylinder shaft, a bearing for one end of said shaft adjustably mounted in said frame, a pinion shaft disposed parallel to said cylinder shaft, and a bearing member provided with a second bearing for said cylinder shaft and with a bearing for said pinion shaft, said bearings being fixed in definite spaced relation and said bearing member being adjustable as a unit in said frame.

1,679,664. ALKYL CUMARANES AND PROCESS OF MAKING SAME. HANS JORDAN, Berlin-Steglitz, Germany, assignor to the Firm: Chemische Fabrik auf Actien vorm. E. Schering, Berlin, Germany. Filed June 20, 1927, Serial No. 200,291, and in Germany June 29, 1926. 4 Claims. (Cl. 260—54.)



1. The process of producing alkyl cumaranes comprising heating products of condensation of alkyl phenols and a ketone to about 300–310° C. to effect decomposition, subjecting the products of decomposition to fractional distillation, and collecting the alkyl cumaranes.

1,679,665. SPARE-TIRE LOCK. JOHN JUNKUNC, Chicago, Ill. Filed Jan. 27, 1927. Serial No. 163,880. 4 Claims. (Cl. 70—90.)

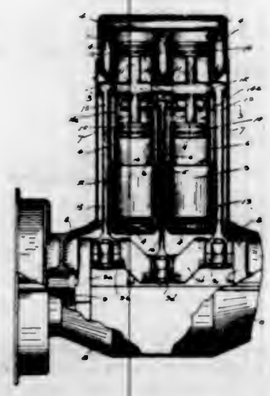


1. A tire lock comprising a hasp portion adapted to encircle the tire cross section and having parallel legs with a series of notches in the inner surfaces thereof, a cross bar having apertures to admit the legs of said hasp, locking means carried by said cross bar comprising members adapted to enter the notches in said legs, a lock, means actuated by said lock adapted to hold said members in extended position in said notches, and yielding means positioned between the first mentioned members and the means holding them in extended position adapted to urge said members into said notches when said lock is released.

1,679,666. ICE PICK AND GUARD. SAMUEL M. KASS, Philadelphia, Pa. Filed Apr. 5, 1926. Serial No. 99,811. 2 Claims. (Cl. 83—62.)

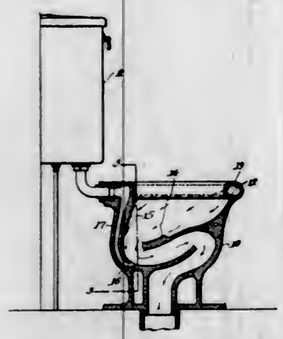
1. A single prong ice pick, a head upon which the pick is mounted, a handle for the head extending transversely to the length of the pick and a spiral spring guard about the pick normally extending beyond the point of the pick and compressible longitudinally of the pick to expose the point of the pick with a blow upon the guard and to apply the pick to the ice.

1,679,667. UNIFORM-LOAF-MAKING MACHINE. WILLIAM H. KENNAN, Chicago, Ill. Filed Jan. 11, 1926. Serial No. 80,461. 1 Claim. (Cl. 107—9.)



In a dough working machine, a framework, a plurality of driven pressure rollers arranged in horizontally staggered vertical columns, every other pair of rollers being in vertical alinement, chutes connecting each adjacent pair of compression rollers, retards in each of said chutes, means to deliver dough to the first pair of compression rollers, and loaf molding means for receiving the dough from the last pair of compression rollers.

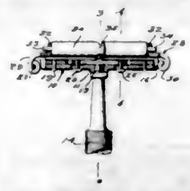
1,679,668. DOUBLE-ACTING ENGINE. CHARLES ELWOOD KEAS, Los Angeles, Calif. Filed Feb. 21, 1923. Serial No. 620,478. 11 Claims. (Cl. 123—54.)



7. In an engine of the character described, two cylinders side by side with their both ends closed and having slots through their sides, sleeves in said cylinders

to cover said slots, pistons in said sleeves in said cylinders, a crank outside of said cylinders, a connecting rod from said crank and connected through the slots in said cylinders to said pistons, a connecting rod from said

crank to said sleeves for moving them with said pistons, and means whereby the sleeves are moved in the same direction a less distance and at a slower speed than said pistons, substantially as described.

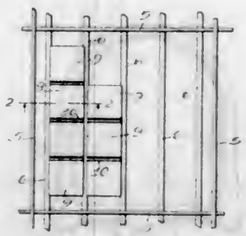


1,679,669. SANITARY WATER-CLOSET. ALBERT H. KENNEDY, Rockport, Ind. Filed Jan. 4, 1926. Serial No. 79,213. 5 Claims. (Cl. 5—69.)

1. A water-closet bowl of the syphon trap type comprising a rim conduit having a plurality of downwardly and rearwardly directed jet openings all arranged to discharge with substantially full force along the rear wall of the bowl at the throat and baffle means on the bottom of the bowl to prevent the streams discharged from the front of the rim from flowing across the throat, said baffle means being arranged to deflect the jets to the sides of the throat and against the rear wall thereof.

1,679,670. SAFETY RAZOR. JOHN LAURENCE KING, New York, N. Y., assignor to Recalaxion Razor Company, Incorporated, a Corporation of New York. Filed Sept. 29, 1925. Serial No. 59,401. 6 Claims. (Cl. 30—12.)

1. A safety razor comprising a guard having a slot therein, an actuating member slidably mounted in said slot and provided with an upstanding finger, a blade mounted on said guard and provided with an opening through which said finger extends, a clamp arranged above said guard, a roller rotatably supported by said clamp and provided intermediate its ends with a sur-

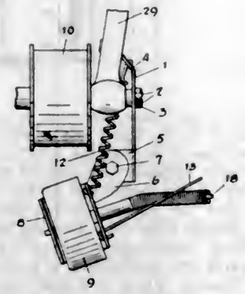


rounding slot having different portions offset longitudinally of said roller, said finger being arranged in the slot in said roller.

1,679,671. ILLUMINATED CITY NAME AND LICENSE DOUBLE-NUMBER PLATE AND DIRECTION-SIGNAL ATTACHMENT THEREFOR. JOHN KLAMER, Stevens Point, Wis. Filed May 27, 1927. Serial No. 194,655. 4 Claims. (Cl. 40—132.)

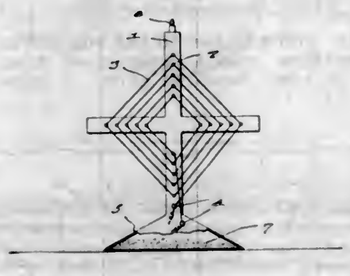
1. In combination with a vehicle tail light housing, a plate mounted on the bottom of said housing comprising front and rear downwardly depending extensions, a license plate having stenciled numerals therein mounted on said front extension, straps pivotally attached to the rear extension of said plate, an extensible reflector attached to said straps, an electric light bulb mounted on said rear extension adapted to emit light on said reflector, and adjustable means attached to the bottom of said reflector at one end and to the bottom of said license plate at the other end adapted to retain said reflector at a desired inclination to said license plate for directing rays of light from said electric light bulb through the stenciled numerals of said license plate.

1,679,672. BUILDING CONSTRUCTION. SAMUEL KLEIN, Chicago, Ill. Filed Feb. 4, 1927. Serial No. 165,917. 2 Claims. (Cl. 25—131.5.)



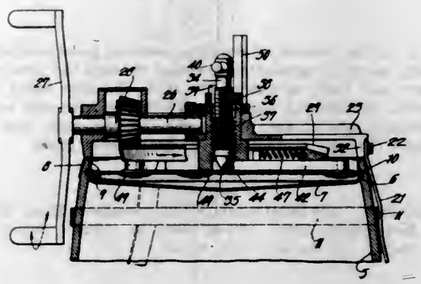
1. The herein described process of making concrete flooring, which consists in providing a series of parallel rows of soffits, placing on said soffits rows of pans spaced equally apart from others in the row and from similar pans in adjacent rows, in closing the ends of the pans in any row by U-shaped soffits, in placing a layer of concrete over the pans and in the spaces therebetween, and subsequently removing the pans and soffits, whereby a floor having beams running at right angles to each other is formed.

1,679,673. MAKING FORMALDEHYDE FROM METHYLENE CHLORIDE. ERICH KRAUSE and KOLOMAN RÓKA, Constance, Germany, assignors to the Firm of Holzverkohlungs-Industrie Aktien-Gesellschaft, Constance, Baden, Germany, a Corporation of Germany. Filed Oct. 23, 1924, Serial No. 745,493, and in Austria Sept. 17, 1921. 4 Claims. (Cl. 260—138.)



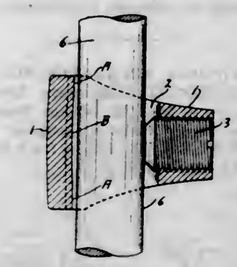
1. A method for making formaldehyde from methylene chloride which consists in heating methylene chloride in the presence of water in a closed vessel to temperatures of about 120 to 170° C. and adding acid-binding materials, which are capable of reacting with formaldehyde, gradually in such quantities, that alkaline reaction of the reaction mixture is avoided.

1,679,674. WINDSHIELD-WIPER-OPERATING MECHANISM. GEORGE H. LOBER, Toledo, Ohio, assignor to The Beck-Frost Corporation, Detroit, Mich., a Corporation of Michigan. Filed June 15, 1925. Serial No. 37,382. 3 Claims. (Cl. 74—21.)



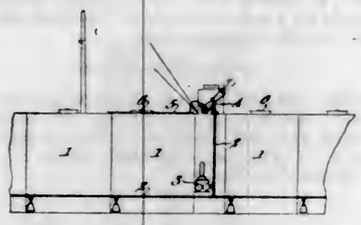
3. In a mechanism for operating the windshield wiper, a bracket connected to the fan supporting arm of an automobile, and extending to a point below the fan belt pulley, an arm pivotally supported on the bracket, a spool rotatably supported on the pivoted arm and located well below the fan belt pulley, a spring extending from the bracket to the pivoted arm and interconnecting the bracket and the pivoted arm for elastically pressing the spool against the fan belt at a point below the fan belt pulley, a wire connected to the pivoted arm for moving the arm on its pivot, and means for securing the wire and the arm in a position to which they may be moved.

1,679,675. ANTENNA SUPPORT. MANUEL L. LUJAN, Los Angeles, Calif. Filed Dec. 4, 1924. Serial No. 753,905. 1 Claim. (Cl. 250—33.)



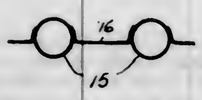
An antenna support, comprising a hollow flexible member formed to provide a hollow supporting base and a hollow supporting frame mounted thereon, the hollow supporting frame and base communicating, an inflating valve for the hollow flexible member, a filler removably inserted through said valved opening to provide a center of gravity in said base portion for said antenna support, the member being adapted to have the remaining portion filled with a suitable substance to retain the member in substantially rigid extended relation, and means on the supporting frame for receiving and mounting an antenna winding therein.

1,679,676. BARREL-HEAD-SEATING MACHINE. JAMES MIELE, Brooklyn, N. Y., assignor of one-fourth to Michael Miele and one-fourth to Thomas Miele, Brooklyn, N. Y. Filed Aug. 23, 1926. Serial No. 131,005. 11 Claims. (Cl. 153—1.)



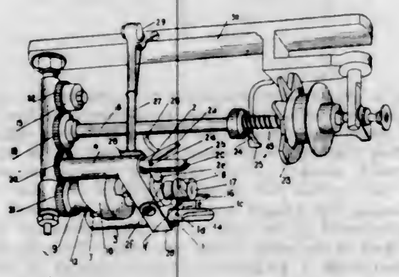
1. A barrel head seating machine comprising a plurality of revolvable radially movable arms adapted to form a ridge in a barrel head whereby the same is securely seated in the end of a barrel, and means for adjustably locking the machine to the end of the barrel.

1,679,677. GROUND-WIRE CONNECTER. WINFORD GLADSTONE MILNE, Hamilton, Ontario, Canada, assignor to The N. Slater Company, Limited, Hamilton, Canada. Filed Nov. 21, 1925. Serial No. 70,598. 1 Claim. (Cl. 173—273.)



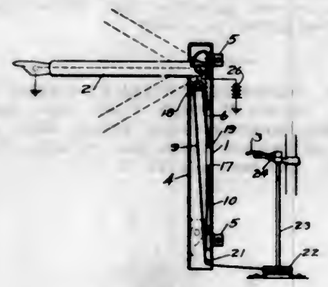
In a ground wire connecter, the combination with a ground rod and a ground wire to be connected therewith, of a clamp comprising a body portion having an orifice extending thereinto, into which the ground rod is adapted to loosely extend, a screw extending through one side of the body portion and adapted to project into said orifice to engage the ground rod, the axis of said screw being perpendicular to the axis of the aforementioned orifice, the wall of the orifice at the side remote from the screen formed with a longitudinal recess adapted to receive the ground wire, the depth of said recess being less than the diameter of the ground wire, said recess being straight longitudinally adjacent to each end thereof and concave longitudinally over the central portion of its length.

1,679,678. VENTILATING DEVICE FOR TANK VESSELS. JAKOB MULDER and DIRK CHRISTIAAN ENDERT, Jr., Rotterdam, Netherlands. Filed Sept. 24, 1924, Serial No. 739,747, and in the Netherlands Sept. 28, 1923. 4 Claims. (Cl. 98—43.)



1. In the process of removing residual gases and liquids from tanks by exhausting the same through the permanent duct and pump system of the tank, the step which comprises establishing the suction in series with and at the exhaust side of the pump, whereby the pump and the ducts external thereof may be freed from gases.

1,679,679. SWIMMING GLOVE. STRANGE EARL NEILL, Bakersfield, Calif. Filed Mar. 17, 1926. Serial No. 95,242. 1 Claim. (Cl. 9—21.)

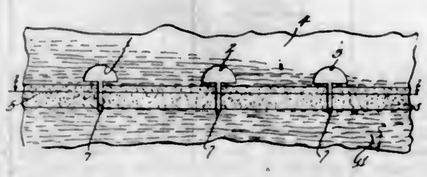


A swimming device comprising a glove formed of flexible rubber, and sheets of flexible rubber spanning adjacent finger stalls of the glove, said sheets being of substantially triangular contour so that when the stalls are spread apart the sheets provide intervening webs, the sheets having strip portions along the lengths of their edges confronting adjacent stalls, forming continuations of and projecting laterally to one side only of the sheets, the said portions providing attaching surfaces by means of which the sheets are secured to the stalls.

1,679,680. STRIPPING APPARATUS FOR CIRCULAR HOSIERY MACHINES. FORTUNATO NEVEUX, Rivoli, Italy, assignor to O. M. I. M. Officina Meccanica Industria Maglieria, Turin, Italy, a Company. Filed Mar. 9, 1923, Serial No. 624,005, and in Italy Mar. 17, 1922. 5 Claims. (Cl. 66—140.)

1. In a circular knitting machine a circular needle row, a yarn-changing device comprising two pairs of shears, one of which brings the inoperative yarn to the needles and retires while the other cuts the operative yarn and retains it, the respective functions of the shears being reversed on the next change of yarn, and means for rotating said pairs of shears about in axis transverse to said needle row whereby each pair of shears is disposed first above and then below said row.

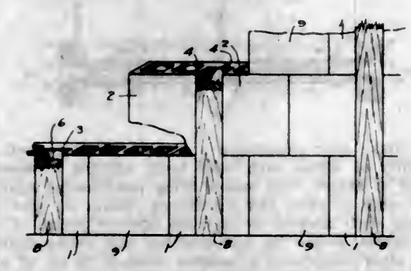
1,679,681. AUTO SIGNAL. ACEL PARKE and JOE R. PARKE, Seattle, Wash. Filed Jan. 20, 1927. Serial No. 162,401. 1 Claim. (Cl. 116—54.)



In a signal of the class described, a casing, an arm pivotally mounted in the upper end of the casing, a gear segment on the inner end of the arm, a rack meshing with the said gear segment and slidably mounted in the casing, a pulley in the upper end of the said casing, a cord passing over the pulley and attached to the rack, the said cord passing from the pulley and out of the lower end of the casing, other pulleys in the lower end of the casing over which the cord passes, a pulley located at a remote point around which the said cord also passes, the said cord passing from the said pulley back to the said casing, into the lower end thereof and attached to the lower end of the rack, and suitable means for rotating the pulley which is located at a remote point to move the cords to move the rack and operate the arm.

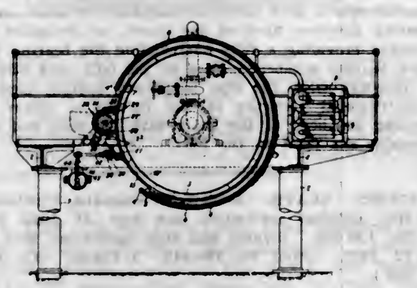
1,679,682. METHOD OF PULPING WOOD. FRANCIS G. RAWLING, Knoxville, Tenn. Filed July 21, 1926. Serial No. 124,104. 6 Claims. (Cl. 92—9.)

1. The proces of treating wood fibrous material to convert it into pulp which process includes treating wood chips with an aqueous solution of sodium sulphite and the sodium salt of a weakly ionized polybasic acid at a temperature not lower than 100° C. and not above 150° C., removing the unabsorbed chemical liquor from the wood thus treated, and subsequently treating the wood residue with sulphur dioxide and at a temperature not below 100° C. and not above 160° C.



1,679,683. PROCESS AND MEANS FOR EXTRACTING PETROLEUM. JOHN L. RICH, Ottawa, Kans. Filed Jan. 25, 1926. Serial No. 83,731. 7 Claims. (Cl. 262—1.)

1. The herein described process of extracting petroleum which consists in running tunnels through the stratum adjacent to the petroleum-bearing stratum, extending



channels from the tunnels into the petroleum-bearing stratum, blockading the ends of certain of the tunnels and their associated channels, forcing fluid under pressure into the blockaded tunnels, whereby the petroleum will be forced into the unblocked channels, removing the petroleum from the last named channels, and pumping the pressure fluid directly into the blocked tunnels.

1,679,684. BUILDING TILE AND WALL CONSTRUCTION. TONY ROTA, Seattle, Wash. Filed Sept. 30, 1926. Serial No. 138,632. 1 Claim. (Cl. 72—41.)

In wall construction, hollow building blocks, vertical struts in combination with the blocks, said blocks having vertical grooves in the sides and edges thereof, the grooves in some of the blocks being of sufficient size to accommodate a stud with the long side of the stud parallel to the longitudinal plane of the block and the short side of the stud therefor extending into the block, and the grooves in other of the blocks being of a sufficient size to accommodate one-half of a stud, the rear walls of the grooves in the blocks being provided with openings through which the blocks may be held to the studs, and said studs being adaptable to fit into the grooves of the blocks with each consecutive row of blocks staggered in relation to the preceding row.

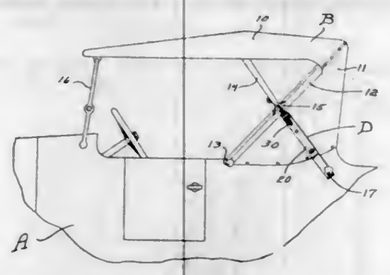
1,679,685. DEVICE FOR THE COOLING OF FATTY EMULSIONS OR THE LIKE. WILHELM GOTTHILF SCHRÖDER, Arfrade, near Lubeck, Germany. Filed Oct. 20, 1926, Serial No. 143,005, and in Germany Oct. 20, 1925. 14 Claims. (Cl. 257—96.)

2. A device for the cooling of fatty emulsions or the like comprising a jacketed, revolving, externally and internally cooled drum, a receiver to apply the material to be cooled to the drum, means for the removal of the solidified material from the drum, means for blowing a cooling medium in the form of air into the space between the cooling drum and the jacket against the direction of rotation of the drum, a pump which forces in the emulsion at one end of the charge receiver, a return pipe connecting the other end of the receiver with the suction side of the pump, and stirring mechanism in the receiver, which maintains the emulsion in constant circulation between the cold-drum surface and the heated receiver walls.

1,679,686. PULL-ROD CONNECTION. PETER E. SECKLER, Tulsa, Okla. Filed Apr. 2, 1927. Serial No. 180,593. 7 Claims. (Cl. 74—5.)

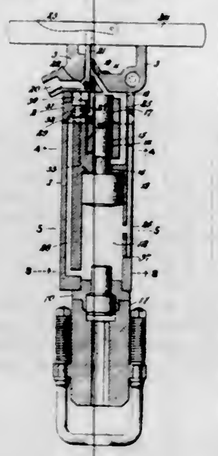
1. A device of the character described comprising a bed plate adapted to be arranged adjacent and parallel to a pull rod, a stationary cross-head carried by said bed plate, means carried by said stationary cross-head and adapted to releasably engage the pull rod, a reciprocating cross-head carried by said bed plate, and means carried by said reciprocating cross-head and adapted to releasably engage the pull rod.

1,679,687. MEANS FOR ATTACHING SHOE BUCKLES. WILLIS S. SHAFT, Faribault, Minn., assignor to Shaft-Pierce Shoe Company, Faribault, Minn. Filed Jan. 25, 1927. Serial No. 163,494. 3 Claims. (Cl. 36—11.)



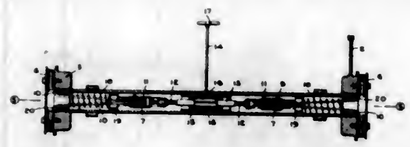
1. The combination with a shoe including an upper and a buckle therefor having middle and end bars, of means for retaining the buckle on the upper including a strap having a transverse slot therein at one end folded about one of said bars with the end remote from the slot threaded through the slot, said end constituting a single attaching tab and means connecting the tab with the upper.

1,679,688. VEHICLE TOP BRACE. CHESTER L. SHOBE, Peru, Kans. Filed June 11, 1926. Serial No. 115,320. 3 Claims. (Cl. 296—120.)



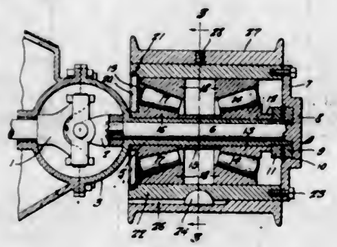
1. In combination with a vehicle embodying a body, and a top construction embodying a rear bow having its arms pivotally connected to the body and a stay bow

for pivotal connection with the intermediate portion of the arm of said rear bow, of a brace for the top construction pivotally connected at one end to the body rear-



wardly of the pivotal connection of the rear bow arms and having a right angular pivot arm at its opposite end serving to pivotally connect the rear and stay bow.

1,679,689. PNEUMATIC HAMMER. GEORGE WALTER SMITH, Ottumwa, Iowa, assignor to Hardsocg Wonder Drill Company, Ottumwa, Iowa, a Corporation of Iowa. Filed Mar. 19, 1925. Serial No. 16,690. 2 Claims. (Cl. 121—18.)

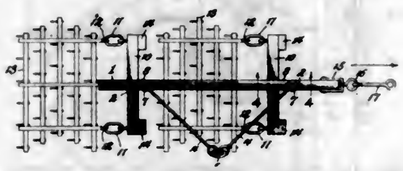


1. In a pneumatic hammer, a cylinder having a forward portion of comparatively large diameter and a rearward portion of comparatively small diameter, a piston having a head sliding in the larger forward portion of the cylinder, a shank sliding in the smaller rearward portion of the cylinder, and a neck connecting said head and shank and having a diameter less than either, means for constantly admitting fluid under pressure to the rear end of the rearward portion of the cylinder, means for intermittently admitting said fluid to the rearward end of the larger forward portion of the cylinder, a passage leading from the constant pressure end of the cylinder to the opposite end and opening into the larger forward portion of the cylinder, a valve for controlling said passage, a valve chest for said valve, a port leading from the smaller portion of the cylinder to one end of the valve chest but independent of said passage and uncovered by the shank of the piston toward the end of its forward stroke to admit fluid under pressure to open said valve, another port leading from the larger forward portion of the cylinder to the other end of the valve chest and serving to admit fluid to close said valve toward the conclusion of the rearward stroke, a bleed hole leading from the first mentioned port and serving to release the fluid from beneath the valve head while the valve is being closed, and an exhaust port leading from the larger forward end of the cylinder and controlled by the head of the piston.

1,679,690. BRAKE GEAR FOR MOTOR VEHICLES. SYDNEY SMITH, Chobham, England, assignor of one-half to Selwyn Francis Edge, Thames Ditton, England. Filed May 19, 1927, Serial No. 192,720, and in Great Britain June 3, 1926. 8 Claims. (Cl. 188—204.)

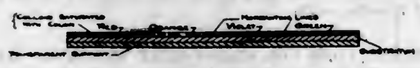
1. Brake gear comprising a single operating shaft, a plurality of cables, each cable being adapted to operate a pair of brakes, said brakes being compensated against each other in pairs and collectively, means on said operating shaft adapted to vary the effective length of the said cables, means for compensating said cables against each other comprising a member common to all of said cables and slidable longitudinally of said operating shaft and with which each of the said cables is associated.

1,679,691. PULLEY. WILLIAM P. SMITH, Capron, Va. Filed July 18, 1927. Serial No. 206,606. 3 Claims. (Cl. 308—15.)



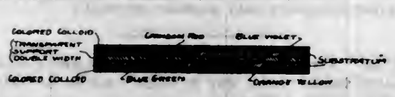
1. In a device for the purpose set forth, a shaft designed to be driven by a motor and having an outer headed end, a fixed sleeve surrounding the shaft, spaced bearing members fixed on the sleeve, an elongated ring member providing a felly surrounding the bearing members, bearing members carried by the felly, and affording a race-way with the first mentioned bearing members, anti-frictional elements in the race-ways, means connecting the head of the shaft with the felly and a removable rim fixed on the felly.

1,679,692. GRATE. JOSEPH S. STOGDALE, Cumberland, Md. Original application filed Sept. 21, 1926, Serial No. 136,826. Divided and this application filed May 12, 1927. Serial No. 190,843. 1 Claim. (Cl. 126—168.)



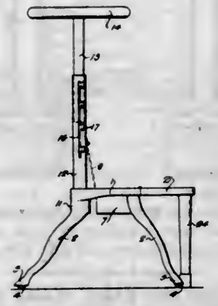
A grate of the character described comprising an open rectangular frame having side and end members of equal height, said end members being recessed at their inner upper edges to provide horizontal supporting surfaces below the upper plane of the frame, spaced bridge members connecting the sides of the frame and having their upper edges disposed in the plane of said horizontal surfaces and a plurality of grate sections arranged in the frame in end to end relation and provided with terminal flanges supported by said horizontal supporting surfaces and the upper edges of the bridge members.

1,679,693. DRAFT APPLIANCE. VICTOR J. TEGELER, Hopkinton, Iowa. Filed Nov. 23, 1925. Serial No. 70,895. 1 Claim. (Cl. 55—84.)



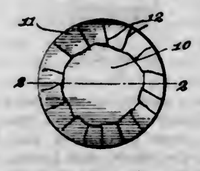
A draft appliance for harrows or the like comprising a main draft beam, a plurality of spaced supplemental beams flexibly hinged at spaced points to the rear edge of the main beam, terminal spacing means carried by the supplemental beams to limit their rocking movement in rear of the main beam, links flexibly connected to the front of the draft beam and having their free ends connected to a central ring, flexible link connections extending rearwardly from the terminals of the supplemental bars for detachable connection with harrows to draw the latter in active position over the ground, and a swivelled clevis mounted on one end of the main draft beam for connection to the source of power whereby, when the said main beam is drawn longitudinally the same will rock into edgewise position and the supplemental beams together with the harrows will swing around beneath the same and trail one in front of the other, the main beam then assuming a position at right angles to the original position and across the tops of the supplemental beams.

1,679,694. CINEMATOGRAPH AND PHOTOGRAPHIC COLOR FILM MATERIAL. JOHN EDWARD THORNTON, West Hampstead, London, England. Filed Oct. 3, 1925, Serial No. 60,349, and in Great Britain Nov. 3, 1924. 3 Claims. (Cl. 95—2.)



1. A multi-colored positive film-material comprising a web of cellulosic base material, an adhesive substratum over the entire width of said web, an even layer of colloid over the entire width of the substratum, a plurality of narrow border stripes at intervals on said layer of colloid, and a plurality of colored stripes absorbed in the colloid layer between said border stripes.

1,679,695. CINEMATOGRAPH FILM MATERIAL. JOHN EDWARD THORNTON, West Hampstead, London, England. Original application filed May 5, 1924, Serial No. 711,255, and in Great Britain May 18, 1923. Divided and this application filed Oct. 31, 1925. Serial No. 66,050. 4 Claims. (Cl. 95—2.)

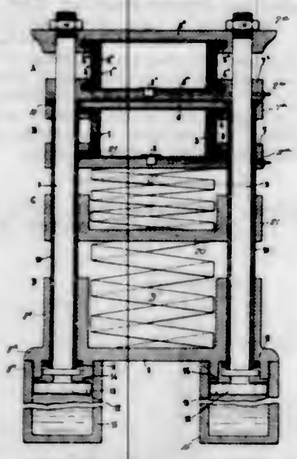


1. For the production of multi-color pictures in which four images of different colors are formed upon a single transparent support of double width by printing alternately upon the two sides by two separate succeeding exposures, then developing, finishing, severing into two parts and subsequently superimposing and cementing the two parts; a multi-color cinematograph or other positive film-material, comprising a strip of transparent waterproof support of double width and half thickness, a first layer of colored colloid in two parallel differently-colored stripes upon one side of the support and a second layer of colored colloid in two parallel differently-colored stripes upon the other side of the support, and an adhesive substratum layer between each colloid layer and its support without a light obstructing layer.

1,679,696. STOOL. GERRIT VAN DAAM, Kenmore, N. Y. Filed June 27, 1927. Serial No. 201,769. 2 Claims. (Cl. 228—2.)

1. In a device of the character described, the combination of a foot rest stool and a shoe cleaning stand, a frame, a plurality of legs extending downwardly therefrom, seat supporting means extending upwardly from one side of the frame, a shoe cleaning implement containing box positioned interiorly of the frame, the lid of the box forming in conjunction with the frame part of the foot rest of the stool, and a shoe cleaning stand foot rest portion pivotally mounted upon the frame and adapted to normally lie in the same plane as the frame and box lid foot rest portion to constitute in combination therewith an extended foot rest for the stool and a shoe cleaning stand.

1,679,697. CLOSURE CAP. SEVERIN WESTBY, Seattle, Wash. Filed Sept. 24, 1926. Serial No. 137,543. 3 Claims. (Cl. 215—51.)



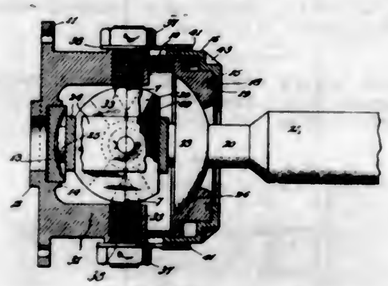
1. A closure cap constructed of one piece of sheet material of circular formation and having the portion adjacent the periphery thereof turned over on the body portion so as to increase the thickness of said cap at the horizontal circular marginal edge thereof.

1,679,698. SHOCK ABSORBER WORKING WITH PROGRESSIVE COMPRESSION. HUBERT JULES WEYDERT, Levallois-Perret, France. Filed Nov. 23, 1923, Serial No. 676,618, and in France Dec. 2, 1922. 2 Claims. (Cl. 267—65.)

1. A shock absorber comprising a base, a plurality of superposed yieldable elements arranged on the base, pistons movable with said elements and fluid containing members in which said pistons operate and are retarded,

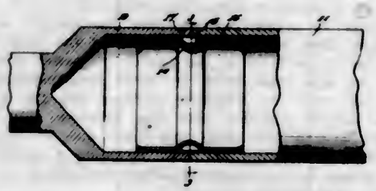
rods connecting said pistons to one of said elements and guiding devices in which said rods operate, said guiding devices comprising tubes connected to and movable with

one of said elements and also comprising abutments on the base and on base members of said elements having openings in which said tubes and said rods are movable.



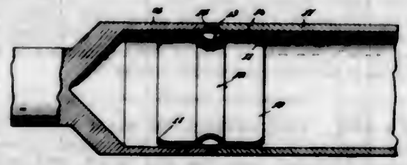
1,679,699. CHECKING TAG. ALBERT E. WRIGHT and ALBERT G. WRIGHT, San Francisco, Calif. Filed Aug. 11, 1926. Serial No. 128,694. 1 Claim. (Cl. 40—2.)

A tag formed of a single strip of destructible material divided into three conjoined sections, two of the sections constituting the check portion of the tag and being foldable one upon the other, and having their marginal edges secured together throughout their entire lengths, the other section constituting the portion to be attached to the article, said tag having corresponding characters, one being disposed on the portion attachable to the article, while the other is hidden within the sealed sections of the check portion, said check portion being removable from the article portion and said character of the check portion being readable only when the check portion is mutilated.



1,679,700. UNIVERSAL JOINT. MAXWELL W. WYSONG, North Plainfield, N. J., assignor of one-half to Herbert C. Poole, Newark, N. J. Filed Feb. 18, 1926. Serial No. 89,149. 8 Claims. (Cl. 64—91.)

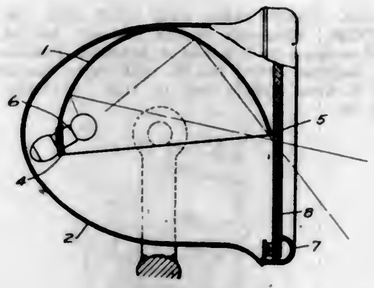
1. A universal joint including a shell, a shaft extending therein, a core carried by the shaft, shoes slidably coacting with the core and having tapered sockets therein, and pivot pins carried by the shell and pivotally engaging in the sockets in the shoes, the shoes being rotatable on said pins whereby the shaft may rock about the axes of



the pins and slidably supporting the core whereby the shaft may rock about an axis extending at a right angle to the axes of said pins.

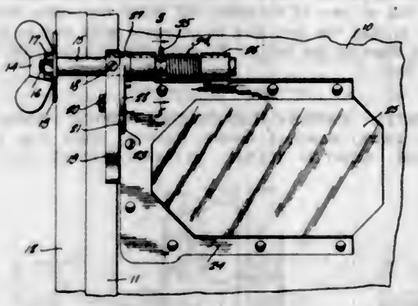
1,679,701. PROCESS OF BUTT-WELDING TUBULAR ARTICLES. MAXWELL W. WYSONG, North Plainfield, N. J., assignor of one-half to Herbert C. Poole, Newark, N. J. Filed Feb. 18, 1926. Serial No. 89,151. 2 Claims. (Cl. 219—10.)

1. The process of electric welding which consists in disposing meeting ends of members of conductive material to be joined about a core of conductive material having its end portions insulated from the members and its intermediate portion spaced from the members to provide a bead forming cavity, and passing an electric current through the members to fuse the ends together and form an internal strengthening bead for the joined ends in the bead forming cavity.



1,679,702. CORE FOR FLASH BUTT WELDING. MAXWELL W. WYSONG, North Plainfield, N. J., assignor of one-half to Herbert C. Poole, Newark, N. J. Filed Feb. 18, 1926. Serial No. 89,150. 11 Claims. (Cl. 219—4.)

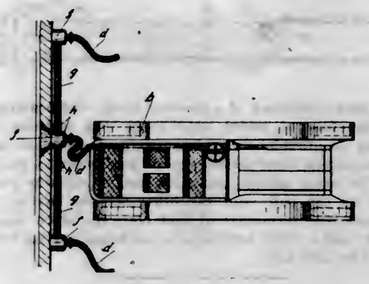
1. A core for butt-welding including a core member having an external fused metal receiving cavity, and means for insulating said member externally.



1,679,703. MOTOR-VEHICLE LAMP. ELISEO ZALLOCCO, Seattle, Wash. Filed May 25, 1926. Serial No. 111,481. 1 Claim. (Cl. 240—41.)

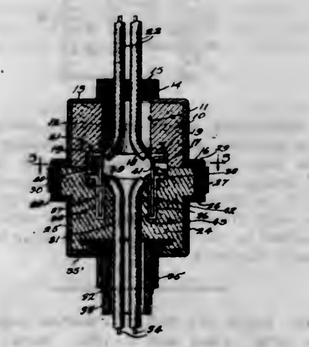
In a lamp of the class described, a lamp casing, a lens at the front of the casing, a substantially semi-spherical reflector in the upper portion of the casing, and a lamp bulb in the rear of the said reflector, the forward edge of the said reflector being positioned at a point approximately on the horizontal center of the lamp casing and curving backward and upward within the casing to a point approximately at the top thereof and then curving backward and downward with a somewhat sharper

curve to a point slightly below the horizontal center of the casing, said curvature forming a line on a vertical plane through the center of the said reflector and the sides of the said reflector curving downward to the lower edges thereof on lines connecting the forward and rear points of the said former curvature.



1,679,704. GLARE SHIELD. CLARENCE G. BARRON, Los Angeles, Calif. Filed Mar. 12, 1926. Serial No. 94,259. 3 Claims. (Cl. 296—97.)

1. A non-glare shield for vehicles comprising a rigidly mounted bearing member, a frame pivotally mounted thereon and adapted to be moved to an active or inactive position, a non-glare panel within the frame, an arm rigid with the bearing member, a movable member carried by the arm to detachably engage the frame when the panel is in an active position, a latch to hold the frame engaging member in position and means to move the panel to an inactive position when said member is released.

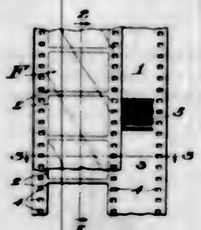


1,679,705. MEANS FOR CONVEYING AWAY EXHAUST GASES FROM MOTOR CARS IN GARAGES. MAX BAUMGÄRTEL, Rodewisch, Germany. Filed Nov. 2, 1926. Serial No. 145,838, and in Germany Aug. 31, 1926. 1 Claim. (Cl. 104—52.)

A ventilation means for garages, comprising in combination a ventilation pipe, silencers, one for each car, mounted on said ventilation pipe and projecting to the outer side of the garage, flexible metal tubes branching from said ventilation pipe and designed to be connected

to the exhaust pipes of the motor cars and shutting off valves in said ventilation pipe for preventing the back flow of the exhaust gases into the garage.

1,679,706. FIXTURE HANGER. THOMAS A. BROWN, Lake Charles, La. Filed Oct. 5, 1923. Serial No. 666,771. 1 Claim. (Cl. 173—324.)

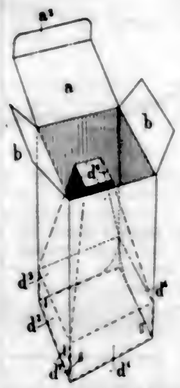


A device of the character described comprising upper and lower separable sections including shells and cylindrical insulating blocks arranged in end to end relation, said blocks being provided with relatively large axial openings extending throughout their length to receive lead-in wires, the adjacent faces of said blocks being provided with annular concentric recesses communicating with said axial openings, a pair of contacts formed of flat material having angular upper ends secured in the recess in said upper block, the lower ends of said contacts projecting a substantial distance downwardly beyond the lower face of said upper block, a pair of contact sockets formed of flat resilient material having angular upper ends secured in the bottom of the recess in said lower block, each of said sockets including a downwardly projecting portion bent back upon itself to provide parallel arms adapted to frictionally receive the lower end of one of said contacts, said parallel arms being arranged diametrically opposite each other and parallel to the axis of said blocks and spaced from the axial opening in said lower block, said lower block being provided with recesses corresponding in position to and snugly receiving said arms, the remote ends of said shells being provided with tubular axial extensions communicating with the axial openings in said block and constituting attaching members, and means for securing said separable members together, the lead-in wires being adapted to be connected to said contacts and contact sockets within said annular recesses.

1,679,707. PITMAN. WALTER L. BROWN, Gravette, Ark. Filed Mar. 23, 1926. Serial No. 96,787. 1 Claim. (Cl. 74—17.)

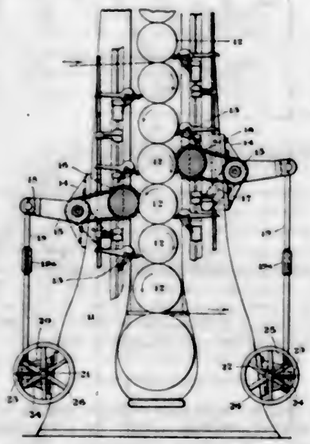
A pitman composed of a wooden stock, end bearing sections therefore of metal, said stock and sections being cut away to provide wrist-pin-engaging holes, a U-shaped bolt marginally surrounding one of said sections and said stock, the latter section and stock having exterior grooves entered by the bolt, and the other section having holes accommodating terminals of said bolt, the stock being in sections, and a shim between the sections having notches engaged by said bolt.

1,679,708. MOTION-PICTURE STRIP. HENRY CHARLES BULLIS, Wilmington, Del. Filed Dec. 1, 1926. Serial No. 151,969. 3 Claims. (Cl. 88—16.2.)



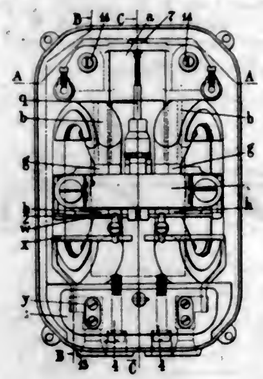
1. A combination sound and picture record strip including a metallic ribbon having a plurality of picture apertures and traction openings on each side thereof, and also having a relatively wide sound recording margin parallel to the picture apertures, said margin also being provided with traction openings at its outer edge, and a film carried by the said ribbon and being substantially co-extensive therewith.

1,679,709. HOSE COUPLER. CHARLES GEORGE COOPER, Yuma, Ariz. Filed Mar. 2, 1926. Serial No. 91,801. 5 Claims. (Cl. 285—71.)



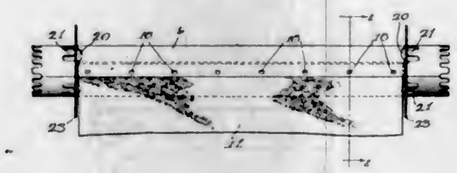
1. A hose coupler comprising a tubular body adapted to receive the confronting end portions of a pair of hose sections capable of radial expansion under the action of internal fluid pressure, said body having an intermediate tubular portion in which the extreme confronting ends of the hose sections are adapted to be received and expanded radially against the inner wall of the portion under the action of the fluid pressure so as to hermetically seal the joint between the sections, and end portions formed with openings between the intermediate portion and ends of the body into which the hose sections are capable of being expanded under the action of the fluid pressure to thereby lock the body to the sections.

1,679,710. CARDBOARD AND LIKE BOX OR CONTAINER. BENJAMIN JOSEPH CREASEY, Bristol, England, assignor to E. S. and A. Robinson, Limited, Bristol, England. Filed Dec. 8, 1924, Serial No. 754,686, and in Great Britain Dec. 11, 1923. 8 Claims. (Cl. 229—6.)



1. A collapsible rectangular box for fragile articles of the type described including an internal four-sided pyramidal unit, within which the fragile article is adapted to be supported, connected at its base to the walls of the box at two of its sides, the other two sides being free so that the unit may be collapsed with and in the same sense as the box by the extension of a diagonal of the base.

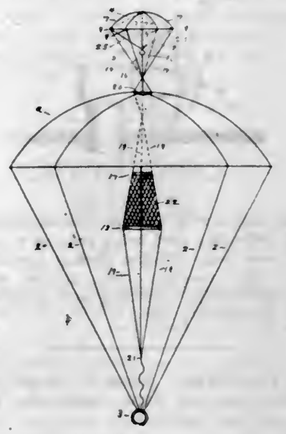
1,679,711. PAPER-CALENDERING DEVICE. ARTHUR L. DAWE, Montreal, Quebec, Canada. Filed Aug. 17, 1927. Serial No. 213,641. 10 Claims. (Cl. 92—71.)



1. In a paper calendering machine having calendering rolls, a finishing roll adapted to run at a different circumferential speed to that of the calendering rolls and in contact with the paper passing therethrough.

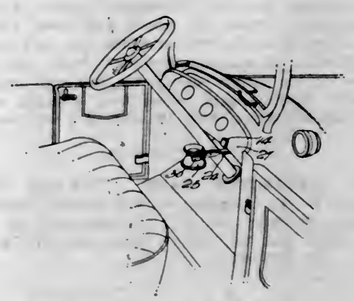
1,679,712. DIRECT-CURRENT ELECTRICITY METER. SEBASTIAN ZIANI DE FERRANTI, Hollinwood, England, assignor to Ferranti, Limited, Hollinwood, England. Filed Feb. 10, 1925, Serial No. 8,279, and in Great Britain Mar. 3, 1924. 8 Claims. (Cl. 171—265.)

7. An electricity meter of the type described including a non-magnetic frame upon which a mercury bath, top and bottom spindle bearings, rotor spindle, permanent magnet and terminal block are supported to form a unit which readily may be inserted and removed from the containing case.



1,679,713. RIBBON SPOOL. JOSEPH S. DUNCAN and HENRY E. HUBBARD, Chicago, Ill., assignors, by mesne assignments, to Addressograph Company, Chicago, Ill., a Corporation of Delaware. Filed Aug. 26, 1925. Serial No. 52,505. 7 Claims. (Cl. 242—70.)

1. An ink ribbon spool comprising a cylindrical body made of thin sheet metal and having integral tongues and shoulders struck up therefrom, and end flanges embracing the body between said tongues and shoulders and secured thereby.

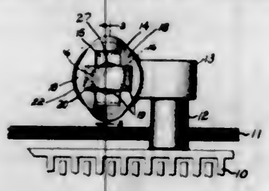


1,679,714. PARACHUTE. HALVOR OLSEN EIANE, Detroit Harbor, Wis. Filed Feb. 23, 1926. Serial No. 90,073. 5 Claims. (Cl. 244—21.)

1. An auxiliary parachute having radially disposed spring frames firmly secured to the head of a center staff, said spring frames normally spread out and capable of being compressed to parallel lines with said center staff, suitable fabric covering attached to said spring frames

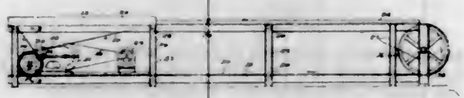
and a plurality of radially disposed stabilizers of suitable fabric attached to said spring frames and center staff, and suitable cord connection to a main parachute.

1,679,715. RECEPTACLE-HOLDING AUTOMOBILE ACCESSORY. SPENCER C. FISH, La Crosse, Wis. Filed Apr. 29, 1926. Serial No. 105,594. 3 Claims. (Cl. 228—20.)



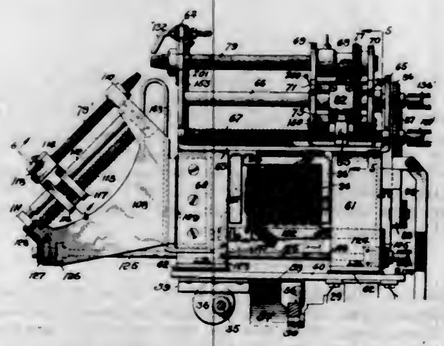
1. In an automobile accessory, a short stiff metal strip to engage a portion of an instrument board and extend forwardly from the latter, the front end of said strip being curved downwardly, rearwardly and upwardly to provide a lobe, a substantially horizontal arm having a curved front end conforming to the shape of the lobe and engaging the exterior of said lobe, and a screw and slot connection between the lobe and arm permitting vertical and horizontal adjustment thereof.

1,679,716. BATTERY CONNECTION. HARRY E. FRASIER, Devon, Conn., assignor of one-third to Odessa G. Marsh, Devon, Conn. Filed Mar. 29, 1921. Serial No. 456,714. 3 Claims. (Cl. 173—259.1.)



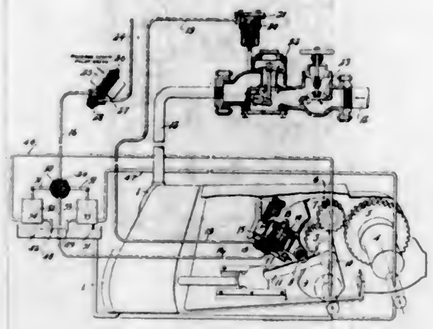
1. A connector for battery electrodes comprising a pair of cooperating coupling members secured respectively to the electrodes and to the conductor to be connected, said

members being composed of a relatively soft substantially inelastic electric conducting material, one of said members having an opening therethrough and a cam surface adjacent said opening, and the other of said members having a transversely extending part insertable through



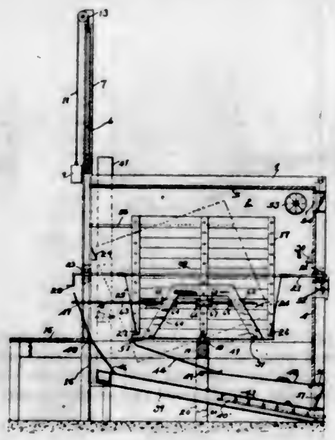
said opening and a stop shoulder spaced therefrom, said transversely extending part being adapted to engage said cam surface and clamp the first member against said stop shoulder by the camming action of the cam surface against the transversely extending part of the other member as said member is rotated.

1,679,717. CONVEYER. JESSE W. GREER, Cambridge, Mass. Filed Nov. 10, 1924. Serial No. 748,910. 3 Claims. (Cl. 107—57.)



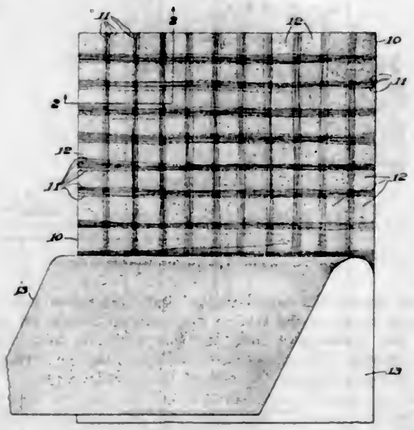
1. In a machine of the class described, in combination, a long sheet metal belt for conveying articles of food successively through a baking and cooling chamber and having an upper and a lower run, an oven, a cooling chamber and a packing table arranged along the upper run of the belt, rollers disposed at intervals along the upper run of the belt to support and drive the same as it passes through the oven and cooling chamber, a power shaft positioned between the upper and lower runs of the belt intermediate the ends of a belt run, and driving chains extending in opposite directions from said shaft lengthwise of the upper run of the belt and operable by the shaft to drive said rollers from a single source of power disposed intermediate the ends of a belt run.

1,679,718. PROJECTOR LAMP. THEODORE HALL, Brooklyn, N. Y., assignor to The Sperry Gyroscope Company, Brooklyn, N. Y., a Corporation of New York. Filed Apr. 30, 1920. Serial No. 377,743. 8 Claims. (Cl. 176—65.)



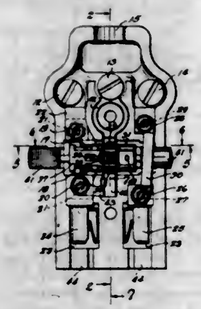
1. In an automatic arc lamp adapted to employ a pair of electrodes, a source of power, an operating member reciprocated thereby, a plurality of ratchets adapted to be actuated by said member, means connecting said ratchets with said electrodes for independently feeding each electrode, means responsive to the position of the arc for controlling the actuation of one ratchet, and means responsive to the arc length for controlling another ratchet.

1,679,719. ENTRAINMENT-CONTROLLING MECHANISM FOR AUXILIARY MOTORS. BRODERICK HASKELL, Jr., New York, N. Y., assignors to Franklin Railway Supply Company, New York, N. Y., a Corporation of Delaware. Filed Aug. 26, 1926. Serial No. 131,559. 8 Claims. (Cl. 105—48.)



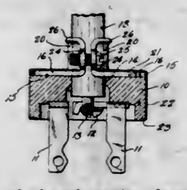
1. The combination of a railway vehicle axle, a booster, entraining mechanism for axle and booster, a motor for actuating said entraining mechanism, and means for preventing operation of said motor prior to synchronization of the speeds of booster and axle.

1,679,720. FRUIT DRIER. EARL D. HIGBY, Santa Rosa, Calif. Filed Sept. 28, 1927. Serial No. 222,502. 6 Claims. (Cl. 34—39.)



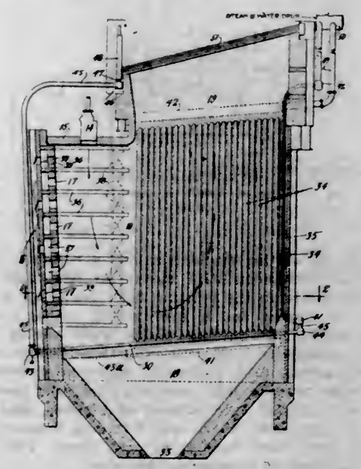
1. A drier of the class described comprising a housing, a fruit tray carrying cage pivoted in said housing, means to tilt said cage on its pivot, and means to hold said cage in adjusted positions.

1,679,721. REENFORCED-PAPER FABRIC. CHARLES H. HOWARD, Saugus, Mass., assignor, by mesne assignments, to American Re-Enforced Paper Company, Attleboro, Mass., a Corporation of Massachusetts. Filed Apr. 9, 1927. Serial No. 182,275. 6 Claims. (Cl. 154—52.)



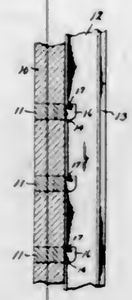
1. As an article of manufacture, a reenforced or strengthened fabric, comprising a strip of paper reenforced by approximately parallel unspun fibers adhesively secured to the paper in spaced groups disposed at frequent intervals over the face of the paper and separated by areas that are unreenforced by the unspun fibers.

1,679,722. SWITCH PLUG. HARVEY HUBBELL, Bridgeport, Conn.; Louie E. Hubbell executrix of said Harvey Hubbell, deceased. Filed July 18, 1924. Serial No. 726,682. 2 Claims. (Cl. 200—51.)



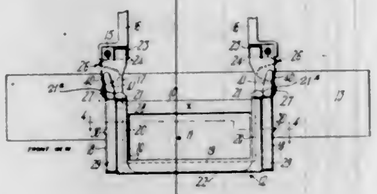
1. In an electrical device of the character described, an insulating body divided into two sections longitudinally thereof, the sections of said body being recessed on their opposed faces to provide an entrance for lead wires at one end, recesses adjacent the opposite end with guide openings leading from said end to the recesses for passage of the terminal blades of an attachment cap, and a switch chamber intermediate the recesses and the lead wire entrance, three binding posts mounted in one of the sections on opposite sides of and in alignment with said entrance, spaced switch contacts in the switch chamber connected to two of said posts, a movable switch element adapted to bridge said contacts, means for operating the switch element, contacts in said recesses electrically connected to one of the binding posts connected to the switch contacts and the third binding post respectively, and means for securing the sections together to enclose the contacts and switch.

1,679,723. CORD CLAMP. HARVEY HUBBELL, Bridgeport, Conn.; Louie E. Hubbell executrix of said Harvey Hubbell, deceased. Filed May 18, 1925. Serial No. 30,997. 9 Claims. (Cl. 173—322.)



1. In a device of the character described, an insulating body member having an opening, binding posts mounted on one side of said member, said member being provided with aligned recesses on the opposite side, a pair of clamping members having laterally extending feet slidable in said recesses, means for securing the feet to the body member, an insulated cord between the clamping members and having lead wires extending through said opening to the binding posts, and means for clamping the clamping members on the cord to secure the body member thereto.

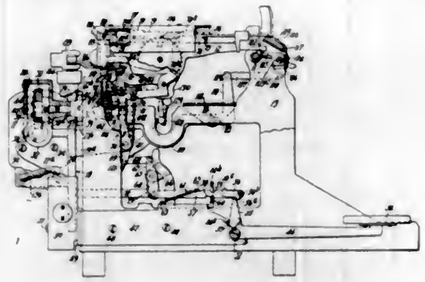
1,679,724. FURNACE. GEORGE P. JACKSON, Flushing, and HARLOW D. SAVAGE, Scarsdale, N. Y., assignors to Combustion Engineering Corporation, New York, N. Y., a Corporation of New York. Filed Sept. 17, 1924. Serial No. 738,132. 1 Claim. (Cl. 122—235.)



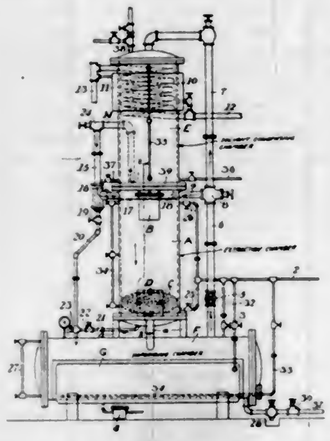
A pulverized fuel combustion chamber having a row of substantially upright closely spaced exposed water tubes forming the rear wall, a similar row forming a portion of each side wall, a sheathing for said rows of tubes, exposed refractories forming the front wall and the remaining portion of each side wall, a plurality of substantially horizontal vertically spaced air passages in said refractory front and side walls, inlets to said passages in the side walls adjacent the portion of the chamber formed by the water tubes and outlets from said passages into the chamber in the front wall, means for admitting fuel adjacent the said refractories to be burned in space in the chamber and an outlet from the chamber for the gaseous products of combustion.

1,679,725. FURNACE WALL. DAVID S. JACOBUS, Jersey City, N. J., assignor to The Babcock & Wilcox Company, Bayonne, N. J., a Corporation of New Jersey. Filed Apr. 2, 1925. Serial No. 20,026. 18 Claims. (Cl. 72—101.)

15. In an air-cooled furnace wall, fixed members spaced apart, a casing along one edge of said members and a wall along the other edge, said members, casing and wall forming air ducts, said wall comprising tile having recesses therein, transverse members engaging said fixed members and slidable thereon, and holding members engaging said recesses and said transverse members.



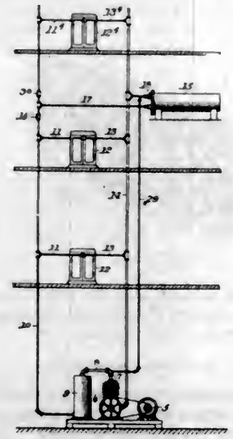
1,679,726. TYPEWRITING MACHINE. ALFRED G. F. KUROWSKI, Brooklyn, N. Y., assignor to Underwood Elliott Fisher Company, New York, N. Y., a Corporation of Delaware. Filed May 29, 1925. Serial No. 33,621. 8 Claims. (Cl. 197—135.)



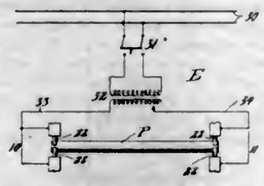
6. In a typewriting machine having a revoluble platen and typing instrumentalities, means for removably holding a stencil-card in the printing field, including, in combination, a support and a card-holding frame mounted thereon having side-guiding plates with gaging edges effective to laterally locate the card, there being a cross piece connecting said plates at their lower extremities to form a lower limit for said card, and retaining fingers to hold said card against said plates, and rigid means on said frame above said retaining fingers to deflect and strip said card from said frame when said card is fed upward from said cross-piece.

1,679,727. TYPEWRITING MACHINE. ALFRED G. F. KUROWSKI, Brooklyn, N. Y., assignor to Underwood Elliott Fisher Company, New York, N. Y., a Corporation of Delaware. Filed July 6, 1925. Serial No. 41,507. 23 Claims. (Cl. 197—65.)

1. In a typewriting machine, the combination with a platen and a letter-feeding carriage including a rack-bar, of a carriage-returning device attachable as a unit to the frame of the machine, said unit including a sub-frame attachable to the rear of the machine-frame, an electric motor carried by the sub-frame, a secondary shaft driven by the shaft of the motor, a support associated with the sub-frame for supporting the end of the secondary shaft, a clutch-jaw secured to the secondary shaft, a second clutch-jaw freely revoluble on the secondary shaft, a pinion fixed to the second clutch-jaw and in mesh with the rack-bar of the carriage, a frictional connection between the first clutch-jaw and the driving shaft of the motor, key-operated means for closing the clutch-jaws and the motor-circuit, and means for opening said clutch-jaws and said motor-circuit as the carriage reaches the end of its return travel.



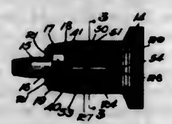
1,679,728. GREASE EXTRACTOR. FREDERICK E. LYNN, Springdale, Pa. Filed June 9, 1926. Serial No. 114,641. 2 Claims. (Cl. 87—6.)



1. Apparatus for the extraction of solvent soluble substances from a mass of solids, comprising a chamber for the solid material, a solvent condensing chamber above the material chamber, a siphon connection between said chambers, whereby solvent is drained to the material chamber when it has reached a predetermined level in the solvent chamber, a distilling chamber below the material chamber, a restricted outlet leading from the material chamber to said distilling chamber whereby flow of solvent from said material chamber is retarded, means for heating said distilling chamber, and means for conducting vapors produced by said heating to the solvent chamber.

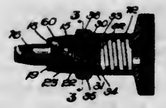
1,679,729. REFRIGERATING SYSTEM. FREDERICK E. LYNN, Springdale, Pa. Filed July 18, 1927. Serial No. 206,453. 6 Claims. (Cl. 62—115.)

1. A refrigerating system comprising a compressor, a condenser, a reservoir disposed above the condenser, a cabinet, a connection between the condenser and the reservoir, a connection between the reservoir and the inlet side of the compressor, a connection between the reservoir and the said cabinet, a connection between the compression chamber of the compressor and the reservoir, and valves for controlling flow through said connections.



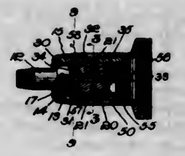
1,679,730. ELECTRICAL HEATING APPARATUS AND METHOD. ANGUS S. MACDONALD, Great Neck, N. Y., and CHARLES C. WAITE, Roselle Park, N. J., assignors to Snead & Company, Jersey City, N. J., a Corporation of New Jersey. Filed July 17, 1923. Serial No. 652,047. 15 Claims. (Cl. 219—11.)

1. A method of preventing deleterious cooling, by terminal clamps, of a piece electrically heated by passage of current through it, without risk of excessive local heating effects at the contacts between clamps and piece; which method comprises specially heating, by passage of electric current, portions of the clamps behind those which engage the piece, while minimizing heating effects at the latter portions.



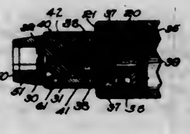
11. A terminal clamp for pieces to be heated by passage of current having a highly conductive piece-engaging portion, and a heater portion of high resistance behind such piece-engaging portion.

1,679,731. LUBRICATING APPARATUS. HOWARD J. MURPHY, Reading, Mass., assignor, by mesne assignments, to The Bassick Manufacturing Company, Chicago, Ill., a Corporation of Delaware. Filed Mar. 14, 1922. Serial No. 543,649. 26 Claims. (Cl. 284—10.)



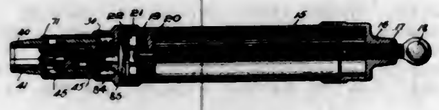
1. Lubricating apparatus of the class described comprising, in combination, a coupling part for connection with and disconnection from a nipple, an aligned valve, and shiftable clutch means for locking some of the parts of said coupling against relative rotation to insure initial completion of the coupling operation, said clutch means thereafter shiftable to unlock the parts of said coupling to permit opening of said valve.

1,679,732. LUBRICATING APPARATUS. HOWARD J. MURPHY, Reading, Mass., assignor, by mesne assignments, to The Bassick Manufacturing Company, Chicago, Ill., a Corporation of Delaware. Filed Mar. 14, 1922. Serial No. 543,650. 4 Claims. (Cl. 284—19.)



1. Lubricating apparatus of the class described including a lubricant-delivering compressor having at its discharge end a quick detachable coupling for connection by movement of said compressor relative to a lubricant-receiving element, said coupling providing a rotary valve, and clutch means positively opposing opening of said valve until completion of the coupling operation, said valve operable by a manipulative operation separate and distinct from the coupling operation.

1,679,733. LUBRICATING APPARATUS. HOWARD J. MURPHY, Reading, Mass., assignor, by mesne assignments, to The Bassick Manufacturing Company, Chicago, Ill., a Corporation of Delaware. Filed Mar. 14, 1922, Serial No. 543,651. Renewed Jan. 20, 1928. 2 Claims. (Cl. 284—19.)

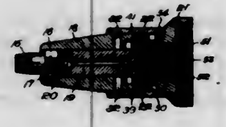


1. Lubricating apparatus including a lubricant compressor having a nozzle presenting a valve part and a sealing part assembled therewith reciprocable in said nozzle by rotary movement transmitted to said nozzle when engaged with a lubricant receiving nipple, said valve independent of said sealing part and disposed rearwardly thereof.

1,679,734. LUBRICATING SYSTEM AND APPARATUS. HOWARD J. MURPHY, Reading, Mass., assignor, by mesne assignments, to The Bassick Manufacturing Company, Chicago, Ill., a Corporation of Delaware. Filed Mar. 14, 1922. Serial No. 543,654. 6 Claims. (Cl. 221—47.4.)

1. A lubricant gun presenting a barrel having at its discharge end a coupling comprising unitary valve and sealing means, said means extending into said barrel, a protective sleeve surrounding said means, and a flanged over portion of said barrel for retaining said sleeve and means in their respective positions, said flanged over portion and sleeve serving to prevent tampering with said valve and sealing means.

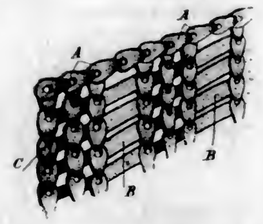
1,679,735. LUBRICATING APPARATUS. HOWARD J. MURPHY, Reading, Mass., assignor, by mesne assignments, to The Bassick Manufacturing Company, Chicago, Ill., a Corporation of Delaware. Filed Mar. 14, 1922. Serial No. 543,656. 4 Claims. (Cl. 284—18.)



1. Lubricating apparatus comprising, a lubricant gun for torsional engagement with a lubricant-receiving nipple, said gun presenting a valved coupling and interengaging pin and slot means independent of the coupling means between the gun and nipple for automatically effecting closure of said valve on release of torsion on said gun.

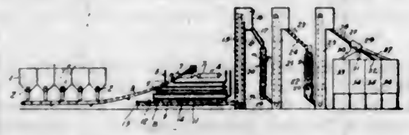
1,679,736. LUBRICATING APPARATUS. HOWARD J. MURPHY, Reading, Mass., assignor, by mesne assignments, to The Bassick Manufacturing Company, Chicago, Ill., a Corporation of Delaware. Filed Mar. 14, 1922. Serial No. 543,657. 7 Claims. (Cl. 284—18.)

1. Lubricating apparatus including a source of lubricant under pressure presenting a discharge terminal having a coupling including a retractile coupling sleeve and a sealing part retractable by retraction of said sleeve when a lubricant-receiving nipple is entered therein, and detent means positively opposing retraction of said sealing part until a nipple is entered in said coupling and said sleeve is turned relative thereto.



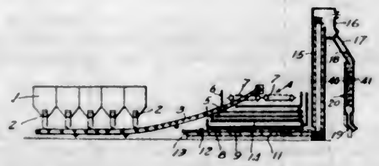
1,679,737. LUBRICATING APPARATUS. HOWARD J. MURPHY, Reading, Mass., assignor, by mesne assignments, to The Bassick Manufacturing Company, Chicago, Ill., a Corporation of Delaware. Filed Mar. 14, 1922. Serial No. 543,658. 5 Claims. (Cl. 284—18.)

1. Lubricating apparatus including a source of lubricant under pressure having a coupling sleeve rotatable relative to a nipple to provide an interlock with projecting means provided on the nipple, a cooperating sealing part and means for initiating retraction of said sleeve relative to the sealing part following completion of the interlock.



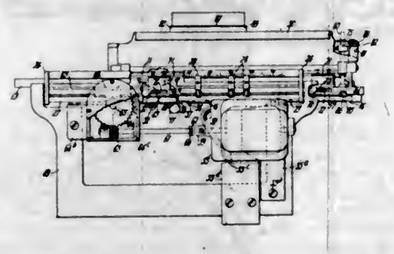
1,679,738. FABRIC MADE OF SCRAP FELT OR OTHER PLIANT MATERIAL. LOUIS ORIGONE, Marseille, France. Filed May 7, 1927. Serial No. 189,685, and in France Mar. 19, 1927. 4 Claims. (Cl. 28—1.)

1. In a fabric a plurality of elements, each element consisting of a strip of pliant material and having at each end an eye, said elements arranged in horizontal and vertical rows, said vertical rows composed by folded strips, two opposite strips of two vertical rows being always connected together by at least one horizontal strip, the



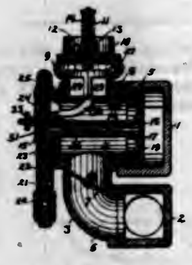
next folded strip passing with its central portion through the eye of the horizontal strip and through both eyes of the preceding strip of the vertical row.

1,679,739. PROCESS FOR PYROELECTRIC SEPARATION OF FINELY-DIVIDED MATERIALS. GUSTAV A. OVERSTROM, Pacific Grove, Calif. Filed Nov. 24, 1925. Serial No. 71,212. 10 Claims. (Cl. 209—129.)



1. The process of separation of constituents of a mixture of divided material which consists in subjecting said mixture to temperature changes in such manner as to produce by pyro-electric action electrification of a constituent of said mixture, and causing the mixture to pass into contact with and over a surface in such manner as to cause separation of a constituent of the mixture from the remainder thereof by the electrical action due to pyroelectrification of the materials, and in the absence of any electrification applied from an external generative apparatus.

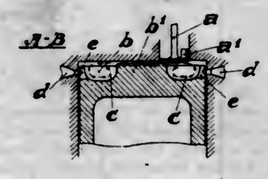
1,679,740. ART OF ELECTRICAL SEPARATION OF FINELY-DIVIDED MATERIALS. GUSTAV A. OVERSTROM, Big Sur, Calif. Original application filed Nov. 24, 1925, Serial No. 71,212. Divided and this application filed Nov. 23, 1926. Serial No. 150,320. 1 Claim. (Cl. 209—127.)



The method of separating mica from sand containing the same which consists in heating and drying the mixture, and subjecting the mixture to temperature changes in such manner as to develop pyro-electric action in a constituent of the mixture, causing the mixture while so electrified by pyro-electric action to pass over and in contact with a stationary supporting surface of glass and to fall from said surface in such manner that the mica constituent of the sand will separate from the rest of the sand as the latter falls from the glass surface, and separately collecting the mica and the sand constituents so separated.

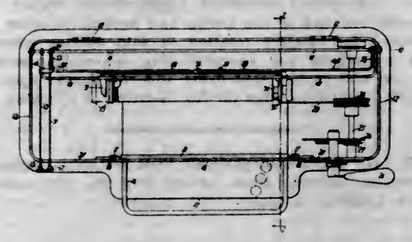
1,679,741. TYPEWRITING MACHINE. HENRY L. PITMAN, Westfield, N. J., assignor to Underwood Elliott Fisher Company, New York, N. Y., a Corporation of Delaware. Original application filed Feb. 27, 1923, Serial No. 621,520. Divided and this application filed Feb. 2, 1926. Serial No. 85,438. 17 Claims. (Cl. 197—65.)

1. In a typewriting machi e, a carriage, a platen therein shiftable for printing upper-case characters, automatic carriage-returning mechanism comprising a bar movable relatively to the carriage for a limited distance, a vertical rock-shaft operable by the bar during such relative movement of the bar and carriage, a slotted crank on the rock-shaft, and a line-spacing slide having a vertical pin received in the slot of the crank loosely enough to permit relative movement of the pin and crank in case-shifting operations, the arrangement being such that the rocking of the vertical shaft will draw the line-spacing slide rearward to line-space the platen.



1,679,742. CARBURETOR. WILLIAM B. RALSTON, Fort Wayne, Ind. Filed May 21, 1920. Serial No. 383,120. 4 Claims. (Cl. 261—13.)

1. In a charge forming device for an internal combustion engine having inlet and exhaust pipes and means for producing an initial mixture of air and fuel; a mixing chamber having an inlet for the bulk of the air supply and also a portion of the walls thereof extending into an opening in the wall of said exhaust pipe, a conduit of comparatively small cross-section extending from said initial mixture-forming means across said mixing chamber and terminating in an enlarged head of a shape similar to the cross section of the wall portion of the mixing chamber so extending into the exhaust pipe, so as to leave a narrow passage between said head and the adjacent walls of the mixing chamber, and also having baffles on its sides arranged transversely to the line of flow of the bulk of the air supply so as to direct said air against the interior of said enlarged head and across the line of flow of the heated mixture leaving said narrow passage, for heating said initial mixture and diluting it with the bulk of the air necessary for combustion.

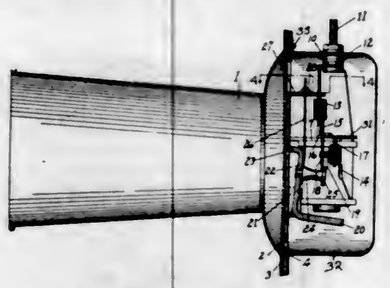


3. A carburetor comprising a mixing chamber, means for discharging fuel into said chamber, means controlling the amount of fuel discharged, two suction-responsive valves mounted in the air inlet to said mixing chamber and forming between them an entry chamber, the outer of said valves restricting, but not closing, the air inlet and having a greater resistance to opening than the inner valve, and means whereby the opening of the inner valve opens the fuel controlling means.

1,679,743. INTERNAL-COMBUSTION ENGINE WITH FUEL INJECTED SIDEWISE. WILHELM RIEHM, Augsburg, Germany, assignor to the Firm: Maschinenfabrik-Augsburg-Nuernberg Aktiengesellschaft, Augsburg, Germany, a Corporation of Germany. Filed Apr. 11, 1925, Serial No. 22,330, and in Germany Oct. 20, 1924. 9 Claims. (Cl. 123—32.)

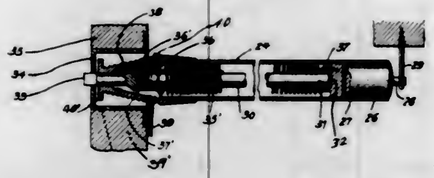
1. In an internal combustion engine of the character described, a cylinder having a cylinder head, a piston operating in said cylinder, an annular groove in the head of said piston formed intermediate the periphery and the center thereof, the middle part of said piston being in the form of a flat disk, said parts being so constructed that when the piston is in a dead centre position the middle part all but touches the cylinder head thus allowing only a necessary clearance, said parts forming an annular combustion chamber, means for admitting air to the combustion chamber and for imparting a rotary motion thereto, and means for injecting fuel into the air in said combustion chamber while the air is thus in motion.

1,679,744. TYPEWRITING MACHINE. EDWARD G. ROWLEY, Belleville, N. J., assignor to Underwood Elliott Fisher Company, New York, N. Y., a Corporation of Delaware. Filed Apr. 30, 1925, Serial No. 26,886. Renewed Jan. 28, 1927. 21 Claims. (Cl. 197—186.)



1. In a sound-deadening casing for a typewriting machine, said casing completely enclosing the machine except for the keyboard extending through an opening in front thereof, means for returning the carriage including an arm pivotally mounted on the side of said casing, and means controlled by a depressible button for releasing the carriage.

1,679,745. AUTOMOBILE HORN. GEORGE J. SEISS, Toledo, Ohio. Filed Aug. 6, 1923. Serial No. 655,810. 3 Claims. (Cl. 177—7.)

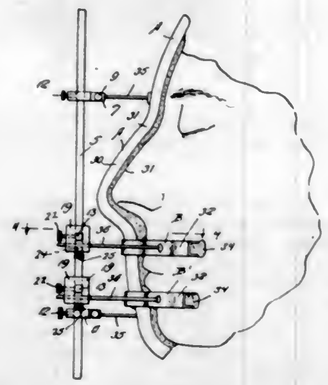


2. In an automobile horn, a main supporting plate, ears struck up from the main supporting plate, a connector plate and a magnet supported by the ears, a

pair of insulated binding posts and an elastic movable contact member and a fixed insulated contact member secured to the connector plate, an armature pivotally

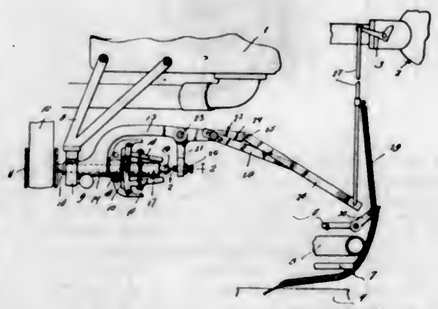
supported on the main supporting plate and in position to be operated upon by the electromagnet and having a part engaging the end of the elastic contact member, a shell for covering the said main supporting plate and enclosing the said parts and having openings through which the binding posts extend.

1,679,746. SASH BALANCE. SAMUEL E. SNYDER, Brooklyn, N. Y. Filed Mar. 28, 1923, Serial No. 628,179. Renewed Oct. 28, 1927. 2 Claims. (Cl. 16—198.)



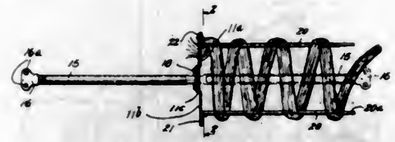
1. A spring roller comprising a casing, a conical winding drum on one end thereof, a bearing member rigid with the other end thereof and having a trunnion in its outer end, a rod extending longitudinally within and through one end of the casing and having its other end mounted for relative rotation in said bearing member, and a resilient and energy-storing connection between the rod and casing, said drum and rod having openings therein adapted to align for the insertion of a locking pin.

1,679,747. REENFORCEMENT FOR POLES. GEORGE B. SPRING, Newton, Mass. Filed May 21, 1926. Serial No. 110,661. 1 Claim. (Cl. 20—100.)



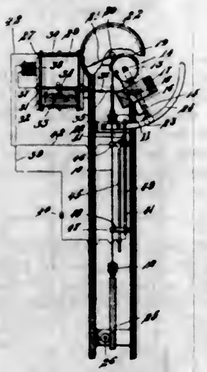
A reenforcement for poles comprising a reenforcing member adapted to be set into the earth alongside of the pole and means for clamping the reenforcing member to the pole, said means comprising a perforated plate adapted to rest against the pole, a clamping rod adjustably secured at one end to the reenforcing member and having a hook portion at the other end to enter an aperture of the plate from the outer face, the terminal of the hook portion being provided with a lip to underlie the plate said lip being situated between the plate and the pole and serving to lock the clamping member to the plate.

1,679,748. DENTAL APPLIANCE FOR INDICATING THE OUTLINE OF THE FACE. RAY A. STRATTON, Huron, S. Dak. Filed Feb. 23, 1927. Serial No. 170,276. 4 Claims. (Cl. 32—6.)



1. A device of the class described including, in combination, a frame consisting of a vertical bar, a pair of transverse bars, means for adjustably mounting the transverse bars on the vertical bar, a vertical record mask member, means for mounting the mask member on a vertical bar, a pair of transverse record mask members, and means for mounting the transverse record mask members on the transverse bars.

1,679,749. AUTOMOBILE SPEED GOVERNOR. THOMAS J. STRICKLER, Washington, D. C., assignor of one-half to Charles D. Holden. Filed Feb. 25, 1927. Serial No. 170,900. 4 Claims. (Cl. 264—1.)

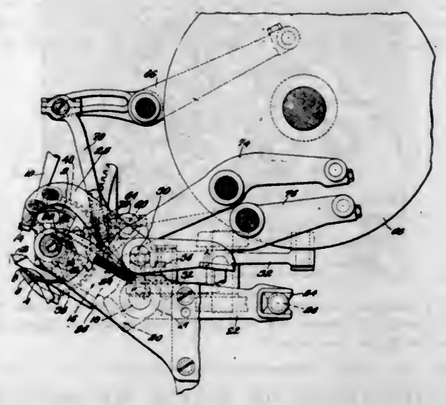


1. In a speed regulator of the class described, a bearing, a shaft mounted for rotation in said bearing, said shaft being provided with a pulley adapted to be driven by a fan belt, an attaching bracket for the bearing, a supporting arm connected with the bearing, a bell crank pivotally mounted on the supporting arm, an operating connection associated with one arm of the bell crank for a throttle valve, centrifugal governor actuated means on the shaft cooperable with the remaining arm of the bell crank, together with adjustable means carried by the last crank arm for cooperation with said means.

1,679,750. HAIR WAVER. CHARLES M. SZIRMAY, Cold Spring, N. Y. Filed Sept. 30, 1927. Serial No. 223,069. 9 Claims. (Cl. 132—41.)

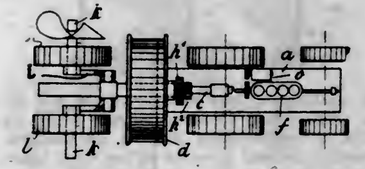
1. The herein described hair waver comprising a pair of rods, means holding the rods parallel to each other and in position to receive a strand of hair thereon, a bar movable between said rods and serving to put the hair under tension, and means to lock the bar in proper position with respect to the hair and rods, said means for locking the bar and rods together comprising a hasp pivoted to one of the members and having detachable connection with the others.

1,679,751. TESTING MACHINE. ROBERT P. STEVENSON, Providence, R. I., assignor to Henry L. Scott Company, Providence, R. I., a Corporation of Rhode Island. Filed Mar. 31, 1927. Serial No. 179,879. 11 Claims. (Cl. 265—2.)



1. In a testing machine, a tensile testing mechanism, a stretch testing mechanism, an electric circuit, a chart support in said circuit and means responsive to movement of said stretch testing mechanism for closing the circuit intermittently to cause a spark to jump through the chart at intervals to the support beyond.

1,679,752. FINELY-DIVIDED NITROGUANIDINE AND METHOD OF MAKING SAME. ARTHUR P. TANBERG and RICHARD L. KRAMER, Wilmington, Del., assignors to E. I. du Pont de Nemours & Company, Wilmington, Del., a Corporation of Delaware. Filed Apr. 6, 1922. Serial No. 550,178. 15 Claims. (Cl. 260—125.)



1. The method of preparing finely divided nitroguanidine which comprises dissolving sufficient nitroguanidine in water at a temperature substantially above 100° C., under super-atmospheric pressure, to form a solution containing substantially more nitroguanidine than would saturate said water at 100° C., and then discharging said solution into a cold liquid medium to precipitate the nitroguanidine in a finely subdivided state.

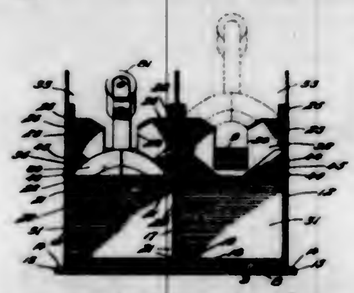
1,679,753. SEWING MACHINE. LAURENCE E. TOPHAM, Swampscott, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed May 24, 1920. Serial No. 383,634. 21 Claims. (Cl. 112—47.)

1. A sewing machine having, in combination, stitch forming mechanism including a needle, an awl, a work support, and a presser foot, all of which are movable in the line of feed, and means for back feeding the work support and presser foot while the awl is in the work.

1,679,754. TRACTOR. GÉZA VON JALSOVICZKY, Budapest, Hungary. Filed July 8, 1926, Serial No. 121,239, and in Hungary Mar. 30, 1926. 5 Claims. (Cl. 104—169.)

1. In combination two tractors, each having a power engine, an electric machine capable of running either as a dynamo or as a motor, removable supports, a shaft fixed in the said supports, a rope drum capable of rotating on the shaft, means for transmitting the rotary motion of the electric machine to the rope drum, stub shafts, guide wheels on the stub shafts, tilling appliances mounted on the stub shafts for preventing a lateral displacement of the tractor, a hauling rope between the two hauling drums capable of being wound from one on to the other and of hauling a reversible plough and means for supplying electric energy generated by the electric machine on one tractor to the electric machine on the other tractor in accordance with the load, as set forth.

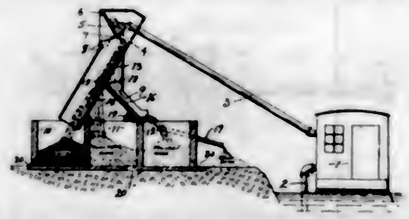
1,679,755. EXHIBITING APPARATUS OR AMUSEMENT DEVICE. ALONZO V. WARREN, Hastings upon Hudson, N. Y. Filed July 2, 1927. Serial No. 203,008. 9 Claims. (Cl. 46—40.)



1. A device of the character described comprising a flat extended support, a figure formed of a plurality of articulated members, joints connecting said members, free ends of some of said members being anchored at spaced points

to said flat extended support, and means for actuating one of said members so as to impart movement through the medium of said joints to the other of said members

in a manner determined by the said anchored points of the members whereby a distinctive operation is imparted to the figure as a whole.

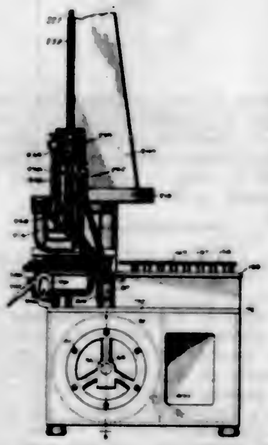


1,679,756. STAND FOR HEATING ELECTRIC SAD-IRONS. RAYMOND E. ALLEN, Providence, R. I. Filed Jan. 28, 1928. Serial No. 250,151. 6 Claims. (Cl. 219—25.)

3. In combination with an electric sad iron having a heating element and electrical contact plugs connected therewith, a heating stand therefor, an abutment block of insulating material mounted in the stand transversely of the iron and in the rear of the iron provided with a recess having abutment faces, electrical contact members comprising contact plates fixed in the faces, and metallic rods extending through the abutment blocks to the plates, electrical circuit conductors engaging the free ends of the rods, a centering block of insulating material provided with holes adapted to receive the contact plugs and provided with lateral faces, and electrical contact members comprising metallic plates on the lateral faces adapted to register with the first contact plates, and metallic screws in the centering block connecting the second mentioned contact plates and the contact plugs.

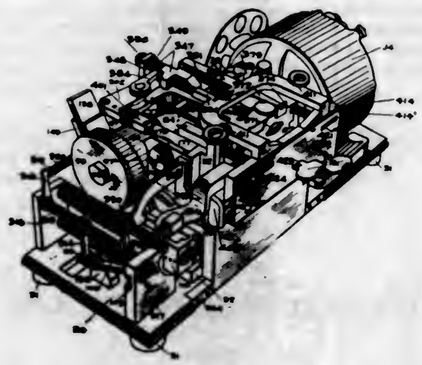
1,679,757. SAND-GRADING DEVICE. FRANK M. ANDERSON and CHESTER O. ANDERSON, St. Joseph, Mo. Filed June 5, 1926. Serial No. 113,892. 1 Claim. (Cl. 209—356.)

In a sand grading device, a chute having screened openings in the bottom as distribution means for the graded sand and an extension on the upper end thereof in which to pivotally connect a baffle plate and means to stationarily place the angle of the plate relative to the longitudinal plane of the chute so that the discharge from a pumping plant will be spread thereby to equally distribute on the bottom of the chute in its downward travel, a chute laterally extending from the under side of the first said chute to register with the upper screened opening, a screening spaced from the bottom of last said chute, a spout registering between the last said screening



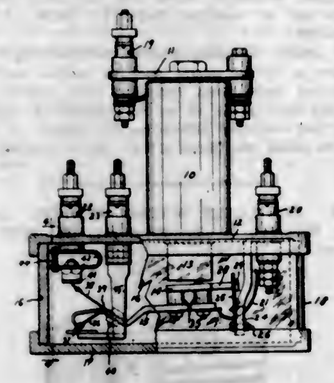
and the bottom of the last said chute as conveying means for silt, fine sand or the like from the graded sand, all as, and for the purpose described.

1,679,758. JUNCTION-POINT CONSTRUCTION FOR IRON NETWORK. WALTHER BAUERSFELD and OTTO SCHMIDT, Jena, Germany, assignors to the Firm of Carl Zeiss, Jena, Germany. Filed Nov. 6, 1923, Serial No. 673,203, and in Germany Nov. 8, 1922. 2 Claims. (Cl. 287—14.)



1. In a connection for several bars of an iron network, two discs, each provided with a circular projection, one of these discs engaging each of the bars from one side and the other from the other side of the network, behind a projection at the end of each bar, this latter projection being perpendicular to the axis of the bar, and means adapted to clamp the discs against the bars for rigidly fixing the bars in their position.

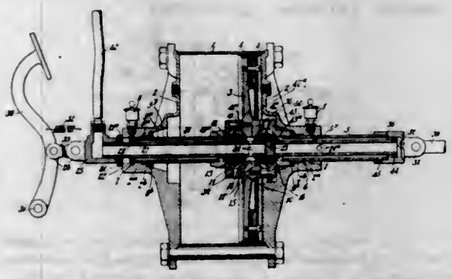
1,679,759. LOCK-FILLING MACHINE. FRANK ELLISON BEST, Seattle, Wash., assignor to Frank E. Best, Inc., Seattle, Wash., a Corporation of Washington. Filed June 6, 1921. Serial No. 475,405. 16 Claims. (Cl. 29—84.)



1. A lock filling machine embodying permutation devices and means governed by said permutation devices for forming pin tumblers of predetermined lengths.

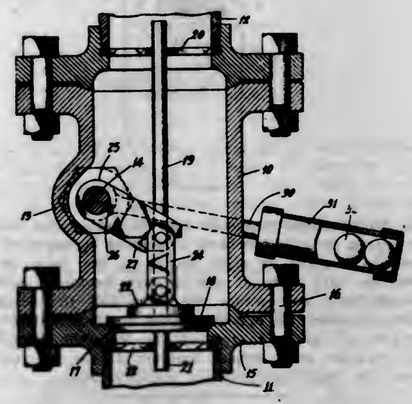
1,679,760. LOCK COMBINATOR. FRANK ELLISON BEST, Seattle, Wash., assignor to Frank E. Best, Inc., Seattle, Wash., a Corporation of Washington. Filed May 9, 1923. Serial No. 637,721. 56 Claims. (Cl. 29—1.)

1. In a lock filing machine, devices for cutting off tumbler pins and means governed by the shape of a key for automatically determining the lengths of said tumbler pins.



1,679,761. RELAY. DAVID C. BETTISON, Omaha, Nebr. Filed Aug. 9, 1926. Serial No. 128,287. 7 Claims. (Cl. 200—87.)

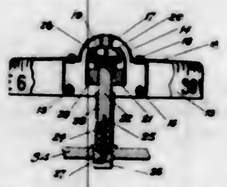
1. In a relay of the class described, the combination with an electromagnet and its armature, of means for supporting said armature for movement toward and from the electromagnet, comprising a laterally flexible member secured at one end to the armature and at the other end to a frame-member fixedly associated with the electromagnet, said laterally flexible member extending substantially parallel with but spaced laterally from the line of traction of the electromagnet.



1,679,762. POPPET-VALVE MECHANISM FOR POWER ACTUATORS AND THE LIKE. CALEB S. BRAGG, Palm Beach, Fla., and VICTOR W. KLIESRATH, Port Washington, N. Y., assignors to Bragg-Kliesrath Corporation, Long Island City, N. Y., a Corporation of New York. Filed Oct. 20, 1925, Serial No. 63,697. Renewed June 22, 1927. 7 Claims. (Cl. 121—41.)

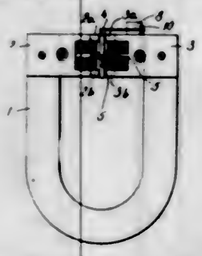
1. A power actuator comprising among its members, a cylinder closed at each end by a head provided with a guiding aperture, a double acting piston in the cylinder, reversing valve mechanism located in the piston, a hollow piston rod connected to the piston and extending through the guiding aperture in each of the cylinder heads, each of said hollow piston rods being provided with means for conducting air under atmospheric pressure to the reversing valve mechanism, one of said piston rods being constructed so as to be withdrawn within the bearing aperture of the cylinder head through which it passes, when the piston is in "off" position, a hollow valve actuating

member extending through said hollow piston rod and operatively connected with the reversing valve mechanism for actuating the same, means for connecting said hollow valve actuating member with a source of suction, and a part carried by said hollow valve actuating part for engaging the adjacent cylinder head when the piston is in "off" position, to limit the return movement of said valve actuating part, and to close the outer end of the bearing aperture in the cylinder head, and prevent access of water and dirt to the hollow piston rod engaging the said bearing aperture.



1,679,763. RELIEF VALVE. GUNTHER H. BRUNOW, Port Arthur, Tex. Filed Aug. 28, 1926. Serial No. 132,293. 3 Claims. (Cl. 251—147.)

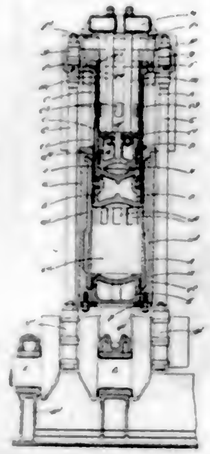
1. In a pressure relief valve, the combination with a casing having an inlet and an outlet port and a valve normally closing the inlet port, of a valve stem formed integral with the valve, a ring loosely mounted on the valve stem and seated on the valve, a rotatable shaft mounted in the casing with one end extending through the wall of the casing, means operatively connecting the ring and the shaft so that any movement of the stem imparts a rotary movement to the shaft, a tubular member secured to the end of the shaft outside the casing, a movable weight, normally maintained in the outer end of the tubular member for maintaining the valve closed



against the pressure for which it is adjusted, said movable member being adapted to shift its position rapidly to decrease the pressure exerted against the opening of the valve.

1,679,764. MAGNETIC COMPASS. CHARLES H. COLVIN, Brooklyn, N. Y., assignor to Pioneer Instrument Company, a Copartnership consisting of Charles H. Colvin, Brice H. Goldsborough, and Morris M. Titterington, Brooklyn, N. Y. Filed Oct. 11, 1922. Serial No. 593,696. 11 Claims. (Cl. 33—223.)

1. In a magnetic compass, in combination, a magnetic element, and supporting means for said magnetic element: comprising a plunger, a cup-bearing mounted therein, a socket in which said plunger is carried, elastic means between said plunger and said socket, an axial extension on said plunger terminating in a positioning element, an extension on said socket member terminating in a slot in which said positioning element is contained, and said socket having a passage connecting from the inside to the outside of said socket.

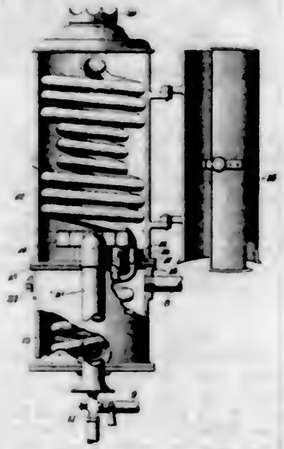


1,679,765. ELECTROMAGNETIC DEVICE. CLAIR L. FARRAND, Forest Hills, N. Y., and ERNEST ROSS, East Orange, N. J.; said Ross assignor to Farrand Mfg. Co. Inc., Long Island City, N. Y., a Corporation of New Jersey. Filed Nov. 5, 1926. Serial No. 146,351. 7 Claims. (Cl. 175—339.)

1. An armature assembly for electromagnetic devices comprising an armature and a strip of spring steel disposed in a plane at right angles to the plane of the armature, said strip of spring steel having a slot extending part way across the same and the armature having grooves on opposite faces to receive the edge portions of the steel strip at the slot, the steel strip and armature being brazed together at the junction between the two.

1,679,766. INTERNAL-COMBUSTION ENGINE. EDWARD HENRY FRIEND and ALBERT GILRAD BENTLEY, Holborn, London, England, assignors to The Friend Bentley Elements Company Limited, Melbourne, Australia, a Corporation of Victoria, Australia. Filed Sept. 17, 1925, Serial No. 56,874, and in Great Britain Oct. 18, 1924. 6 Claims. (Cl. 123—57.)

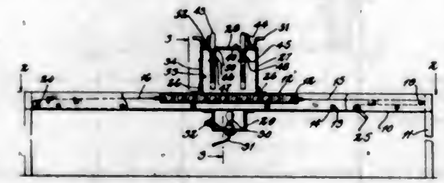
5. In an internal combustion engine a cylinder closed at its lower end, a fixed abutment of the piston type partly closing the upper end of the cylinder, a sleeved piston of which the sleeved portion slides over the fixed abutment, a trunnion member to which the sleeved portion of the piston is secured, which trunnion member is entirely above the upper end of the cylinder, connecting rods externally to the cylinder and connected



to the said trunnion member, and liquid cooling means for supplying the piston with cooling liquid through the trunnion member.

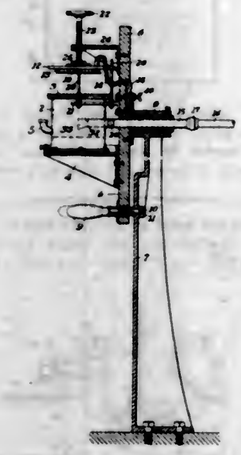
1,679,767. COTTON FABRIC AND PROCESS OF MANUFACTURING THE SAME. EMIL GMINDER, Reutlingen, Germany. Filed Dec. 23, 1925, Serial No. 77,366, and in Germany Sept. 17, 1924. 4 Claims. (Cl. 8—20.)

1. The herein described process of imparting a woolly appearance to textile goods, such as woven, knitted and other fabrics made from vegetable fibre, which consists in treating the goods so as to produce a slight nap thereon, and treating the same by means of alkaline solution to cause the fibres of the nap to shrink or curl.



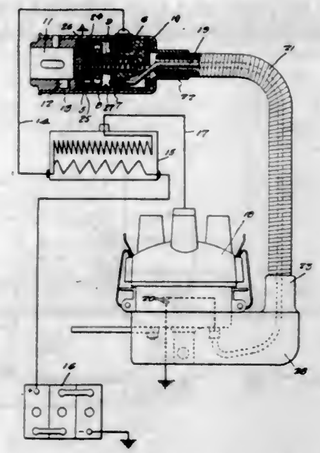
1,679,768. AUXILIARY WATER HEATER. ANDRÉ F. GORIN, Brooklyn, N. Y. Filed May 18, 1926. Serial No. 109,838. 1 Claim. (Cl. 122—32.)

In a device of the character described, a pipe circuit comprising a plurality of coils of pipe arranged in series to conduct a fluid serially therethrough, said pipe circuit



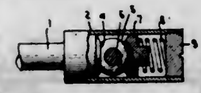
being divided into sections, a casing surrounding the coils of the pipe circuit, a partition dividing said casing into compartments, said partition having an opening through which the pipe extends and wherein abutting ends of the pipes comprising the sections are placed and meet, a watertight joint surrounding said ends in said opening, said joint serving to seal the abutting ends of the sections and the opening, means for supplying a heated fluid to one of said compartments and around the coils therein, and a burner within another of said compartments for heating the coils therein.

1,679,769. EGG CANDLER. WALTER S. GUSTAFSON and EDWARD D. SMITH, Manor, Tex. Filed Jan. 15, 1926. Serial No. 81,480. 1 Claim. (Cl. 99—6.)



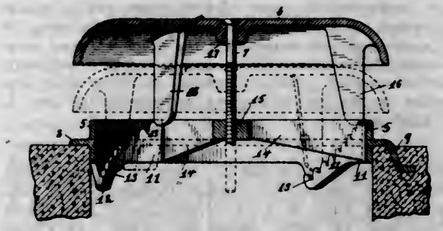
In an egg candling apparatus of the class described including a slotted casing, a means for candling a plurality of eggs passed slowly below the slot in said casing, and a means for marking the candled eggs according to their quality, said means comprising a pair of stamps suspended in said casing and displaceable in the slots thereof, collars on said stamps, springs resting with their lower ends upon said collars and wound about said stamps, abutting with their upper ends the casing wall, and curved handles for said stamps for operating the same and for normally keeping the same suspended in the casing by resting on the top of said casing.

1,679,770. METHOD AND APPARATUS FOR STENCILING. DALTON M. GORTACHUS, Canonsburg, Pa., assignor to Radium Dial Company, Pittsburgh, Pa., a Corporation of Delaware. Filed Feb. 26, 1926. Serial No. 90,831. 16 Claims. (Cl. 101—114.)



6. The method of stenciling, which includes placing a blank to be stenciled against a paint container having a stencil opening formed therein, tilting the container to effect a stenciling operation, removing the stenciled blank and reducing the pressure within the container to clear the stencil opening of paint.

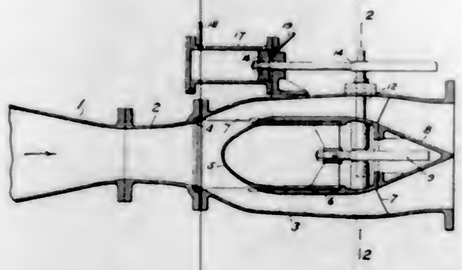
1,679,771. IGNITION SYSTEM. WILSON HEMINGWAY, Jr., Philadelphia, Pa., assignor to The Electrolock Manufacturing Company, Vicksburg, Miss., a Corporation of Mississippi. Filed July 7, 1925. Serial No. 42,058. 7 Claims. (Cl. 123—146.5.)



1. The combination in an ignition circuit and a lock therefor, of a metallic casing which encloses the lock and switch, a metallic casing which is in contact with the timer-distributor casing, and armor which connects said casings, whereby, when the switch is grounded, the metallic casings and armor form a path for a ground.

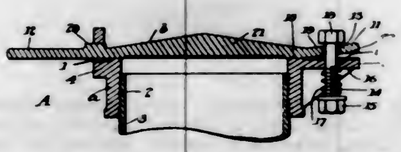
1,679,772. METHOD OF MAKING BEARINGS. CARL W. JOHNSON, Shaker Heights, Ohio, assignor to The Cleveland Graphite Bronze Company, Cleveland, Ohio, a Corporation of Ohio. Original application filed Apr. 16, 1925, Serial No. 23,532. Divided and this application filed Jan. 3, 1927. Serial No. 158,785. 4 Claims. (Cl. 29—149.5.)

1. In a method of making a partly spherical bearing, the steps which consist in forming a plurality of lubricant-receiving pockets in a relatively thin sheet of bearing metal, pressing such sheet into a recess in an element and then deforming said element to engage and lock the edges of said sheet in place.



1,679,773. VENTILATING DEVICE. ARTHUR F. KNOWLES, Upper Montclair, N. J. Filed Oct. 6, 1926. Serial No. 139,817. 2 Claims. (Cl. 98—37.)

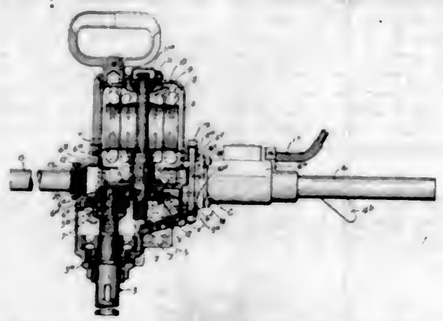
1. In a device of the character set forth, a hollow cylindrical base, a plurality of series of ascending serrations disposed spirally on the annular interior of said



base concentrically thereto and below the upper edge thereof, a bodily rotatable cover located above said base, downwardly projecting legs on said cover, arranged to coact with said serrations to support said cover and permit the rotative adjustment thereof vertically relatively to said base, and a screw connecting said cover to said base and serving to hold said legs in engagement with said serrations.

1,679,774. VALVE. CHESTER W. LARNER, Philadelphia, Pa. Filed July 24, 1923. Serial No. 653,428. 6 Claims. (Cl. 137—139.)

1. A valve including in combination a Venturi tube, a plunger located in and confined to the expanding leg of the tube and pointing upstream, there being space provided between the throat of the tube and the nose of the plunger in all positions thereof to afford undisturbed flow in the throat, and means for seating and unseating the plunger.

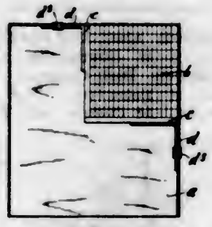


1,679,775. COVER. ANDREW LOCHOK, Los Angeles, Calif. Filed July 26, 1926. Serial No. 124,884. 1 Claim. (Cl. 220—35.)

In a device of the character disclosed, a hatch-way formed with a seat, a cover therefor adapted to cooperate with said seat, said hatch-way being formed with a catch portion and said cover being formed with a latch arm adapted to cooperate with said catch, a lug formed at an angle to the plane of the cover, and a second lug formed on said hatch-way, and means between the last named lugs for maintaining the hatch-way and cover in cooperative relation; said means including a resiliently actuated member normally tending to draw said lugs together to tip the said cover relative to the seat of the hatch-way.

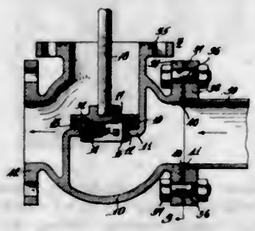
1,679,776. PORTABLE TOOL. LEON F. MEUNIER, Cleveland, Ohio, assignor to Chicago Pneumatic Tool Company, New York, N. Y., a Corporation of New Jersey. Filed Mar. 14, 1925. Serial No. 15,606. 15 Claims. (Cl. 172—36.)

14. A power tool of the portable or hand type comprising a two pole A. C. induction motor adapted to operate on current at a frequency of 120 cycles or more, a spindle, a transmission to enable said spindle to be



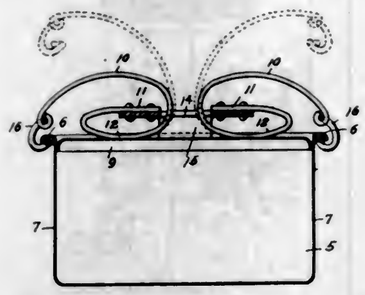
rotated by said motor, and manual supporting means disposed at a point substantially intermediate said motor and said transmission.

1,679,777. PROCESS OF TREATING WATER. ARTHUR R. MOBERG, Elmhurst, Ill., assignor, by mesne assignments, to National Aluminate Corporation, Chicago, Ill., a Corporation of Delaware. Filed Dec. 23, 1926. Serial No. 156,767. 13 Claims. (Cl. 210—23.)



1. The process of purifying and clarifying water which comprises adding sodium aluminate and aluminum sulphate to the water to be treated, the sodium aluminate being in relatively small quantities as compared with the aluminum sulphate.

1,679,778. LOCKING DEVICE FOR GALLEYS. FRANCIS J. NUGENT, Astoria, N. Y. Filed Aug. 18, 1927. Serial No. 213,747. 2 Claims. (Cl. 101—404.)



1. A galley clamp comprising means to engage the type to be secured, means to engage a galley, and a spring finger carried by the last means to engage the galley frictionally to secure the type in a desired position.

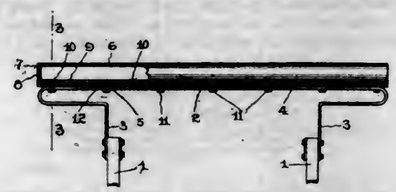
1,679,779. VALVE AND FLANGED SEAL. WILLIAM F. OBERHUBER, Landsdowne, Pa. Filed Apr. 8, 1926. Serial No. 100,560. 14 Claims. (Cl. 251—167.)

5. A valve body having a diaphragm containing a threaded opening and having a plain face about the opening in combination with a valve seat threaded into the opening, having a flange and annular teeth upon the flange on the side toward the plain face, abrupt at the edges toward the pressure and having very narrow engagement with the plain face at these edges.

1,679,780. HAM BOILER. OTHO M. OTTE, Tarentum, Pa., assignor to Allegheny Steel Company, Brackenridge, Pa., a Corporation of Pennsylvania. Filed Apr. 1, 1925. Serial No. 19,867. 3 Claims. (Cl. 100—57.)

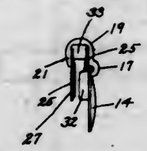
1. A cooking utensil having in combination a container, a telescoping lid, a pair of springs adapted to press upon said lid, a connecting plate for securing the adjacent ends of said springs together, means for attaching the outer ends of said springs to said container so as to cause said lid to compress the contents thereof and means on said plate for balancing said lid.

1,679,781. ROTARY TIME SWITCH. JERRY W. PEYTON and JOHN E. LIPSCHULTZ, Washington, D. C.; said Peyton assignor to said Lipschultz, Washington, D. C. Filed July 20, 1927. Serial No. 207,143. 3 Claims. (Cl. 200—36.)



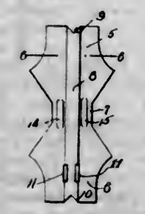
1. In combination with the hour hand of a clock, a switch including upper and lower ring members mounted for rotary movement over the face of the clock, said ring members being constructed of fibrous material, a segmental contact member carried by each ring member, one of said ring members having a groove, means for guiding the hour hand from one of the contact segments into the groove, and means for directing the hour hand from the groove to the upper surface of the ring member supplied with the groove.

1,679,782. AUTOMOBILE BUMPER. JOHN WILLIAM POSTEL, Palisade, N. J. Filed Feb. 4, 1927. Serial No. 165,809. 1 Claim. (Cl. 293—55.)



A device of the character described comprising a bumper supporting bracket provided with laterally extending arms for attaching same to a vehicle chassis, a cushioning tube, a longitudinally extending reinforcing strip disposed within said cushioning tube, and a

plurality of attaching bolts mounted in said bracket and engaging said tube and reinforcing strip for fastening said tube in detachable relation to said aforesaid bracket,



said reinforcing strip being provided with a rib adapted to be embedded in said tube to prevent the movement of the respective engaging members thereof.

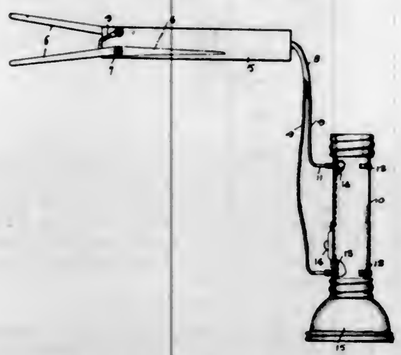
1,679,783. SLIDE CONSTRUCTION. GEORGE EDWARD PRENTICE, Berlin, Conn. Filed Aug. 29, 1924. Serial No. 735,014. 13 Claims. (Cl. 24—205.)

5. A slider for fasteners of the class described, said slider comprising an integral piece of sheet material having wide end portions or wings united at one end by a relatively narrow neck bent to bring the wing portions into substantially parallel relation, each wing being furnished with an integral reinforcing rib extending from its free end toward the neck portion, and a pull device for actuating the slider.

1,679,784. SLIDER FOR FASTENERS AND PROCESS OF MAKING THE SAME. GEORGE E. PRENTICE, Berlin, Conn. Filed Dec. 30, 1926. Serial No. 157,952. 20 Claims. (Cl. 24—205.)

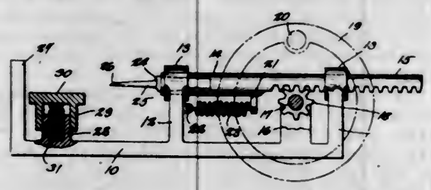
1. A slider for separable fasteners of the class described comprising spaced wings of sheet material united at one end by a neck, and a fold in the material of said neck constituting a projecting stiffening rib.

1,679,785. TOOTHBRUSH. GILBERT F. QUINN, Beachmont, Mass. Reflled for abandoned application Serial No. 717,820, filed June 4, 1924. This application filed Oct. 26, 1927. Serial No. 228,796. 2 Claims. (Cl. 15—167.)



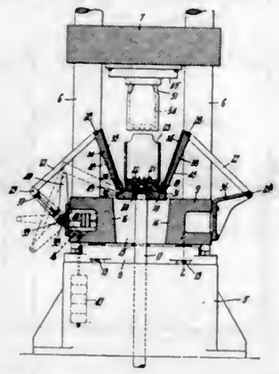
1. A tooth-brush comprising an oblong back, a handle longitudinally alined therewith, so that the back and handle have a common longitudinal median line, and flexible brush material projecting from the inner face of the back and disposed in an inner and an outer series of substantially parallel oblong rows whose sides are substantially perpendicular to the back face from which they project, said rows being spaced apart to provide refuse channels between their adjacent sides, the rows of the outer series extending obliquely in one direction from the

outer end portion to the midlength portion of the back, while the rows of the inner series extend obliquely in a different direction from said midlength portion to the inner end portion of the back, the arrangement being such that when the back is reciprocated endwise, refuse dislodged by the sides of said rods, is delivered to said chan-



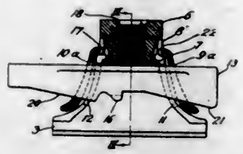
nels and passes therethrough toward the longitudinal edges of the back, one series of rows, and the channels formed thereby, acting to dislodge and deliver such refuse at one longitudinal edge of the back, when the back is moved in one direction, and the other series acting similarly, when the back is moved in the opposite direction.

1,679,786. CIRCUIT TESTER. ABRAHAM M. ROBERTS, Osgood, Ind. Filed Sept. 23, 1925. Serial No. 58,155. 2 Claims. (Cl. 175—183.)



1. A circuit tester of the character described, comprising a hand flash light including a casing designed to receive a dry cell, and having a pair of apertures formed therethrough, conductor elements within said casing each one thereof arranged adjacent one of said apertures and one of said elements having an electrical engagement with said cell, an incandescent lamp arranged between the other pole of said cell and said other conductor element, a pair of resilient band members designed to be engaged about said casing, a contact post carried by said bands and each adapted to have one end extended through an adjacent casing aperture for engagement with a conductor element, and flexible conducting elements each leading from one of said contact posts, substantially as and for the purpose described.

1,679,787. OYSTER OPENER. ADOLF SCHERMER, Baltimore, Md. Filed Dec. 10, 1927. Serial No. 239,064. 2 Claims. (Cl. 17—10.)

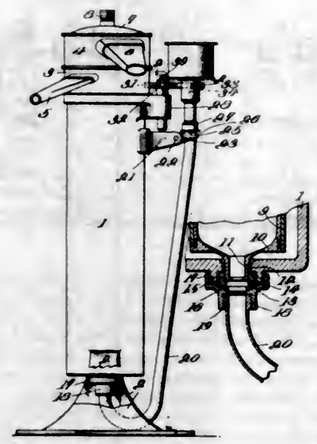


1. In an oyster opener, a base having a stop mounted thereon, an oyster supporting table mounted upon the base adjacent said stop and movable along the stop, a horizontal movable tool bar mounted upon the base, a chisel movable over and from said table and carried by said bar, and means to actuate said bar.

1,679,788. MOLD. LOUIS J. SCHROEDER, Watertown, Mass., assignor to Hood Rubber Company, Watertown, Mass., a Corporation of Massachusetts. Filed May 7, 1927. Serial No. 189,683. 13 Claims. (Cl. 18—19.)

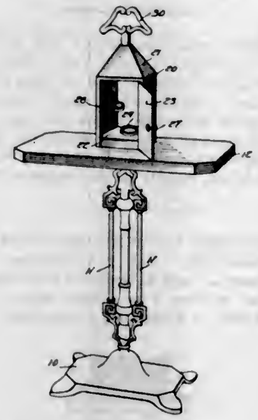
1. A machine for forming articles from plastic material having, in combination, a base, a mold retaining member yieldingly mounted upon said base, a bottom plate adapted to rest in its lowermost position upon said base, a plurality of side plates pivotally attached at their lower ends to said bottom plate and operatively connected at their upper ends to said retaining member, means to move said bottom plate to successively close and open said side plates, and a form adapted to co-operate with said plates to mold an article therebetween.

1,679,789. CLAMP FOR TROLLEY CONDUCTORS. HERMANN SCHUTTE, Pittsburgh, Pa. Filed Aug. 6, 1925. Serial No. 48,468. 5 Claims. (Cl. 191—43.)



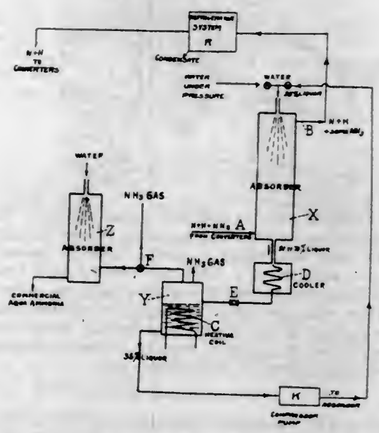
1. A hanger for trolley conductors, comprising clamping ears adapted to receive and clamp a trolley conductor, a supporting member mounted in the upper portions of the ears, a yoke mounted on and movable relatively to the ears, and a wedge engaging said member and so located in the yoke as to lock the parts in operative position.

1,679,790. CENTRIFUGAL SEPARATOR. DAVID T. SHARPLES, West Chester, Pa., assignor to The Sharples Separator Company, West Chester, Pa., a Corporation of Pennsylvania. Filed Mar. 21, 1925. Serial No. 17,316. 9 Claims. (Cl. 233—21.)



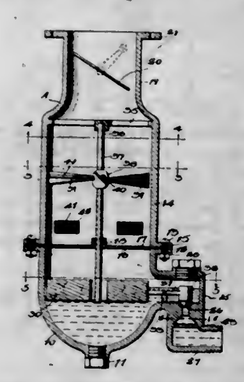
1. In a centrifugal separator, a rotatable bowl, a stationary jacket, a bottom boss on said bowl, a drag bush loosely surrounding said boss, a feed tube engaging said drag bush, and means to force said feed tube upward to frictionally engage said drag bush.

8. In a centrifugal separator, a jacket, a metal bowl rotatively suspended in said jacket and having a boss at the lower end thereof, a non-metallic drag bush surrounding said boss and guiding said bowl in its rotations, said drag bush being formed wholly of laminated phenolic condensation material, which is lighter than the material of the bowl and which is permanently impervious to moisture



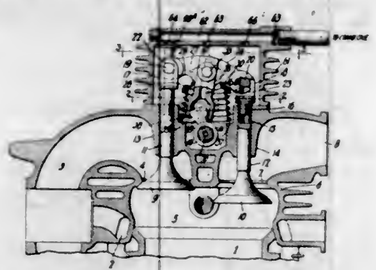
and the material treated in the bowl, and means for engaging the drag bush for retarding the lateral movement thereof.

1,679,791. SMOKER'S STAND. PHILIP SILBERHARTZ, Brooklyn, N. Y., assignor to Majestic Lamp Works, New York, N. Y., a Partnership composed of said Philip Silberhartz, Jacob Silberhartz, and Harry Scheiner. Filed Feb. 6, 1928. Serial No. 252,326. 4 Claims. (Cl. 211—133.)



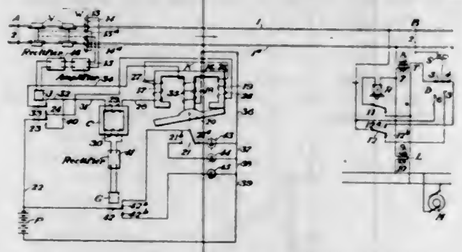
3. A smoker's stand comprising a base, a standard, an apertured table member resting on the standard, a threaded rod carried by the standard and extending upwardly through the table member, a washer above the table member, and a cabinet in the form of a box having side walls, a side door, a bottom, and a bushing carried by the lower side of the bottom, the lower edges of the side walls extending below the bushing, the bushing being threaded onto the upper end of he rod and brought down against the washer, to place the lower edges of the cabinet walls close to the table member, the bushing and washer being hidden by the surrounding side walls.

1,679,792. PROCESS OF REMOVING AMMONIA FROM SYNTHESIS GASES. ROLAND EDGAR SLADE, Billingham-on-Tees, and KENNETH GORDON, Stockton-on-Tees, England, assignors to Atmospheric Nitrogen Corporation, Solvay, N. Y., a Corporation of New York. Filed Jan. 28, 1926, Serial No. 84,322, and in Great Britain Jan. 30, 1925. 5 Claims. (Cl. 23—199.)



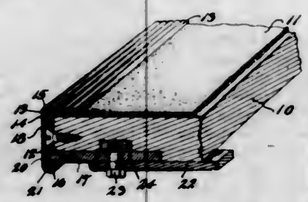
1. The process of removing ammonia from compressed synthesis gases which consists in scrubbing the gases at high pressure with an aqueous medium in limited amount so as to form a solution containing from about 50% to 70% of ammonia (NH_3).

1,679,793. CARBURETOR. GEORGE L. SMITH and ORAL C. SMITH, Cleveland, Idaho. Filed May 29, 1923. Serial No. 642,280. 2 Claims. (Cl. 261—91.)



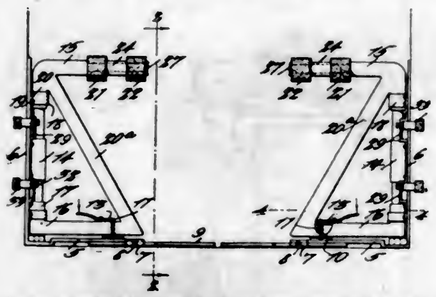
1. A carburetor comprising a fuel bowl, means for controlling the level of liquid in said bowl, a mixing chamber connected with the upper end of the bowl, a plate with multiple perforations disposed between the mixing chamber and bowl having an axial shaft bearing formed therein, a spider carried by the upper end of the mixing chamber, a hollow propeller shaft rotatably carried by the bearings of the plate and spider and having its lower end extending into the fuel bowl, radial blades carried by the hollow propeller shaft, hollow spraying tubes carried by the blades and communicating with the bore of the propeller shaft, and a throttle valve arranged above the propeller, the mixing chamber having screened air inlet openings formed therein below said propeller.

1,679,794. VALVE GEAR. WILLIAM F. SMITH, Poughkeepsie, N. Y., assignor of one-half to Herman A. Schatz, Poughkeepsie, N. Y. Filed Nov. 9, 1925. Serial No. 67,884. 14 Claims. (Cl. 123—90.)



12. A valve gear, two valves, stems for said valves, valve-operating mechanism comprising a lever engaging at its two ends said stems, a spring bearing against the centre of said lever, a shaft for rocking said lever, a cam, a lifter cooperating therewith, a push rod connecting said lifter with said shaft, and a second spring opposing the movement of said lifter, said springs being so proportioned that they jointly tend to overcome the inertia of said valve-operating mechanism.

1,679,795. RAILWAY-TRAFFIC-CONTROLLING APPARATUS. CLARENCE S. SNAVELY, Pittsburgh, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Jan. 6, 1927. Serial No. 159,300. 8 Claims. (Cl. 246—63.)



1. In combination, a relay comprising a core having a first magnetic circuit, a magnetized member on the core forming a part of two other magnetic circuits, means for creating in the first magnetic circuit alternately reversed surges of magnetic flux of unequal lengths, and a movable member responsive to the relative average values of the fluxes in the said two other magnetic circuits.

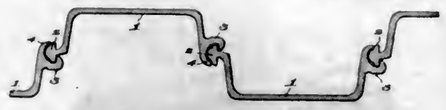
1,679,796. FASTENING FOR RUNNING-BOARD MOLDING. WALTER J. SPIRO, White Plains, N. Y. Filed Aug. 5, 1926. Serial No. 127,329. 7 Claims. (Cl. 280—163.)

1. A fastening for molding strips comprising a support having an interlocking member and a longitudinally movable key device at its opposite edges, and a molding strip formed with means engaging said member and device.

1,679,797. CASKET SUPPORT AND TRANSFER. SAMUEL C. SWEIGART, Linglestown, Pa. Filed Mar. 10, 1927. Serial No. 174,262. 3 Claims. (Cl. 193—42.)

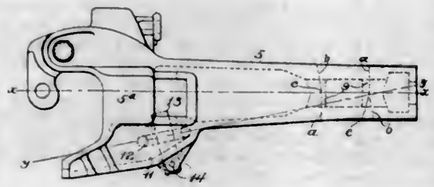
1. In a casket support and transfer, adjustable frames consisting of bases and standards, each of said bases having camming upper surfaces and latch seats, an upright element rotatably mounted on each of the frames, an arm extending outwardly from the rotatable element near its upper end, means for bracing the structure, means for holding the rotatable element against movement, rollers on each arm in spaced relation to each other, and means for holding the rollers assembled on the said arm.

1,679,798. WASHING MACHINE. ALFRED SWENSEN, Riverside, Ill. Filed June 20, 1921. Serial No. 478,778. 6 Claims. Cl. 259—75.)



2. A washing machine comprising a tub, and means for imparting to the clothes in said tub a back and forth movement, and also a movement of rotation about a substantially vertical axis, said last means comprising two projections, one on each side of the tub, each projection having an inclined portion along which the clothes slide easily in one direction, and an abrupt shoulder to hinder the movement of the clothes in the opposite direction.

1,679,799. SUPPORT CONSTRUCTION FOR ELECTRICAL APPLIANCES. DON N. THOMPSON, Syracuse, N. Y., assignor to Pass & Seymour Inc., Solvay, N. Y., a Corporation of New York. Filed May 9, 1924. Serial No. 712,082. 1 Claim. (Cl. 173—362.)

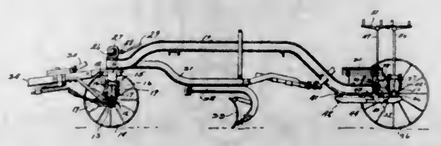


A support construction for electrical appliances comprising a nipple formed with an annular, peripheral groove at its inner end, and with a notch intersecting the groove, and also with a shoulder above and spaced from the groove, a ring member having its inner margin extending into the groove of the nipple and a tongue extending into the notch, the ring member being formed with threaded openings for receiving the fastening screws of the appliance, a sheet metal shell in the form of a canopy having its upper end thrusting against said shoulder and being formed between its ends with a shoulder thrusting against the upper face of the ring member.

1,679,800. SHEET PILING. JULIUS R. WEMLINGER, Brooklyn, N. Y. Filed Jan. 29, 1927. Serial No. 164,504. 2 Claims. (Cl. 61—62.)

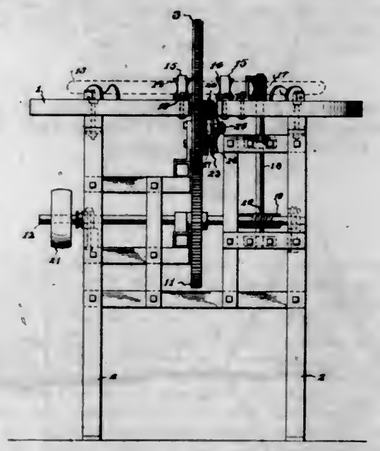
1. A retaining wall of sheet piling, comprising a plurality of identical trough-shaped rolled sections, each section having a rounded T head on one edge and an open mouth socket on the other edge, whereby the sections can be engaged laterally and the front and back depth of the wall can be doubled by reversing alternate sections.

1,679,801. DRAFT CONNECTION FOR CAR COUPLINGS. HARRY H. WOLFE, Columbus, Ohio, assignor to The Buckeye Steel Castings Company, Columbus, Ohio. Filed Feb. 10, 1927. Serial No. 167,262. 5 Claims. (Cl. 213—69.)



1. In draft means for railway cars, the combination with a draft yoke adapted to receive a transverse key, of a draw-bar having a key slot, a key passing transversely through the yoke and through the slot in the draw-bar, the rear end wall of said slot providing two pulling faces for the key, disposed at an angle to each other.

1,679,802. FROST-PROOF GUARD. ALBERT H. ALLERHEILIGEN, LEWIS F. CRAIN, and CHRIS ERICHSEN, Missouri Valley, Iowa. Filed Jan. 25, 1928. Serial No. 249,335. 1 Claim. (Cl. 20—40.5.)

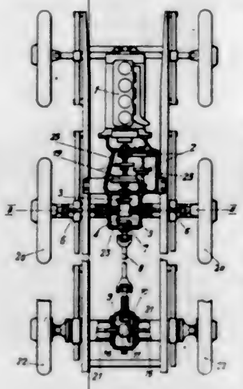


In a frost-proof guard, a frame having dovetailed grooves on its sides, cushions anchored in the grooves and adapted to be forced into engagement with a plate of glass, an L-shaped flange carried by the frame, a transparent plate embraced by said flange, a packing strip interposed between a portion of the flange and the said plate, arms projecting from the frame, said arms having slotted ends, suction cups, threaded shanks anchored to the suction cups and projecting into the slots, and nuts threaded on the shanks for binding the suction cups and arms together.

1,679,803. LEANING-WHEEL GRADER. FRANKLIN E. ARNDT, Galion, Ohio, assignor to The Galion Iron Works & Mfg. Co., Galion, Ohio, a Corporation of Ohio. Filed Oct. 25, 1927. Serial No. 228,672. 7 Claims. (Cl. 37—157.)

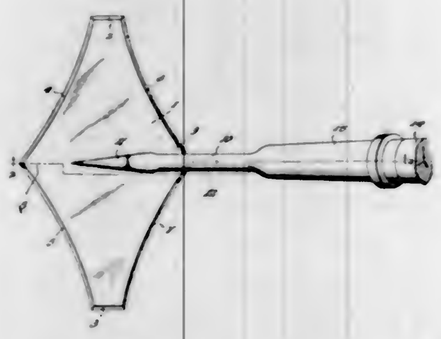
6. A leaning wheel grader including a framework consisting of flexibly connected sections whereby the frame may be angled, a rear axle, and means for automatically swinging the rear axle to an oblique angular position relative to the longitudinal axis of the machine by and upon the angling of the frame.

1,679,804. WIRE-WINDING MACHINE. WILBER S. BISEL and OTHELLO J. BISEL, Atchison, Kans., assignors of one-half to George Baudry, Atchison, Kans. Filed Jan. 26, 1927. Serial No. 163,785. 3 Claims. (Cl. 242—4.)



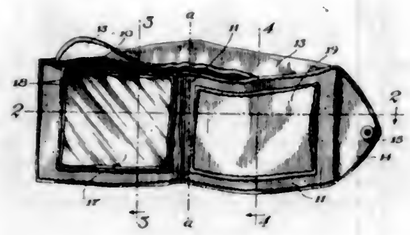
1. A winding machine of the character specified, comprising horizontally disposed rollers for supporting the work, vertically disposed rollers adapted to receive the work therebetween and adjustable laterally to provide for the ingress and the egress of the work, a rotary carrier and a reel mounted upon the carrier and rotatable therewith to carry the strand and wind it about the the work.

1,679,805. THREE-AXLED MOTOR VEHICLE. HEINRICH BLUMER, Zurich, Switzerland. Filed Dec. 2, 1926, Serial No. 152,206, and in Switzerland Dec. 12, 1925. 5 Claims. (Cl. 180—22.)



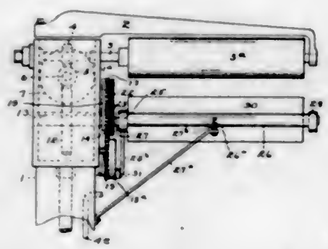
1. In a three-axled motor vehicle having approximately equidistant axles, a wheel drive transmission mechanism for driving the pairs of wheels of the middle and rear

axle, comprising in combination, a change speed gear enclosed in a box fixed to the vehicle frame and operatively connected to the driving motor, a shaft extending in the longitudinal direction of the vehicle, transverse Cardan shafts operatively connected to the wheels of the middle axle, a bevel wheel gearing interposed between



the change speed gear and said longitudinal shaft and operatively connected to said transverse Cardan shafts, and an operative driving connection between the wheels of the rear axle and said longitudinal shaft, said bevel wheel gearing being arranged in a casing rigidly and directly connected to the change-speed gear box.

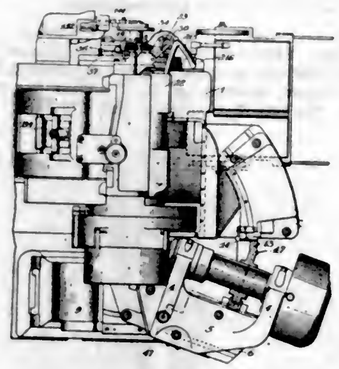
1,679,806. GARDEN IMPLEMENT. JOHN H. BOCKSTADTER, Hastings, Nebr. Filed Mar. 26, 1927. Serial No. 178,706. 3 Claims. (Cl. 97—68.)



1. A hoe comprising a blade, a shank extending upwardly and rearwardly from said blade in spaced relation to the rear edge thereof, said blade having sharpened front and rear edges each having portions converging from the ends of the blade towards a point intermediate the width thereof and intersecting to form a forward penetrating point in front of said shank and a rear penetrating point beneath the shank, and a web extending between said shank and the tapered rear portion of the blade and constituting an auxiliary blade having a sharpened rear edge.

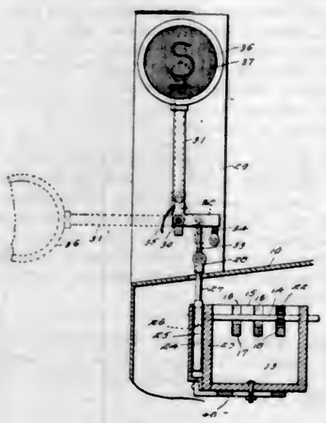
1,679,807. COMBINED CHECK-BOOK HOLDER AND BILL FOLD. ALEXANDER LEWIS BOHL, Medford, Oreg. Filed Mar. 14, 1923. Serial No. 625,113. 1 Claim. (Cl. 150—38.)

A bill-fold of the character described having two flexible walls secured to each other at their ends and along the lower edge to thereby form a bill compartment extending longitudinally of the entire length of the bill-fold, one of the walls of the bill compartment having a flap extending longitudinally the entire length of the wall, the inner wall of the bill-fold upon its inner face and adjacent one end having a longitudinally extending check book engaging pocket less than one-half the length of the bill-fold and open at its outer end, that end of the bill-fold adjacent the open end of the check book engaging pocket having a flap folding over upon the exterior face of the bill-fold when the bill-fold is folded, the body of said bill-fold and said last named flap each having complementary fastening members.



1,679,808. IRONING MACHINE. THOMAS N. BROWN, Fort Wayne, Ind. Filed Aug. 16, 1926. Serial No. 129,300. 7 Claims. (Cl. 68—9.)

1. In an ironing machine, the combination of two cooperating revoluble rolls one of which is bodily movable toward the other, a driven member, a member adapted to be driven by the driven member and having a pivotally mounted support, a revoluble drum and a member having operative connection to the bodily movable roll and adapted to frictionally engage the drum for causing the said roll to move toward the other roll and to cause it to operatively connect to the member having a pivotally mounted support.

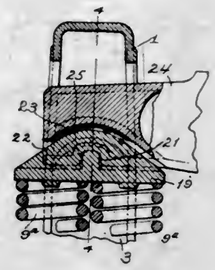


1,679,809. GEAR-GRINDING MACHINE. EDWARD W. BULLOCK and ALTON P. SLADE, Rochester, N. Y., assignors to Gleason Works, Rochester, N. Y., a Corporation of New York. Filed July 5, 1924. Serial No. 724,356. 47 Claims. (Cl. 57—52.)

1. In a machine for grinding, curved tooth tapered gears, the combination with a rotary annular grinding member having a cross section conforming to a straight sided rack tooth and with unbroken tooth engaging grinding faces and blank support, of a bed on which the grinding member is mounted, said bed being intermittently movable away from the blank support to permit indexing the blank, and automatic mechanism for imparting to

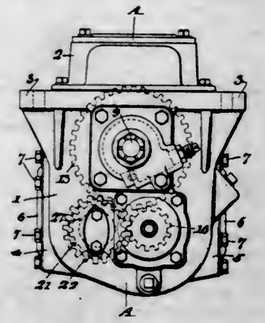
the blank support a translatory movement and also a partial rotation about its axis whereby to roll the blank past the grinding member during operation of the latter.

1,679,810. SIGNALING DEVICE FOR AUTOMOBILES. WILLIAM J. BURT, Holland, Mich. Filed Mar. 3, 1928. Serial No. 258,980. 4 Claims. (Cl. 116—53.)



1. In combination with a vehicle including a cowl, a casing arranged beneath the cowl, a shaft rotatable in the casing, a bar reciprocatable in the casing and having connection with the shaft whereby the shaft is rotated as the bar is reciprocated, a vertically extending bar guided by the casing and at its upper end projecting through an opening in the cowl, a connection between said last named bar and the shaft whereby the bar is vertically shifted when the shaft is rotated, and a signal operated by the upper end of the bar.

1,679,811. CAR-TRUCK CONSTRUCTION. SAMUEL P. BUSH, Columbus, Ohio, assignor to The Buckeye Steel Castings Company, Columbus, Ohio. Filed Jan. 4, 1927. Serial No. 158,951. 3 Claims. (Cl. 105—187.)

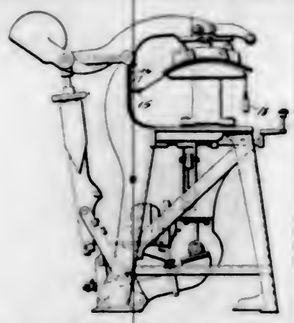


3. In a car truck, the combination of a side frame having columns defining a bolster opening, a bolster entering said opening and having a longitudinal arcuate groove and a transverse groove in its bottom, a spring

plank, springs below the bolster, and a cap mounted on said springs, said cap having an arcuate rib projecting upwardly and freely entering the arcuate groove in the

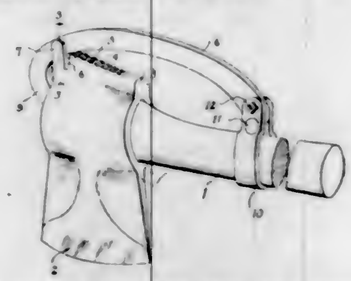
bottom of the bolster and said cap also having a transverse rib entering the transverse groove in the bottom of the bolster, and forming a support for the bolster.

1,679,812. TRANSMISSION GEARING. GEORGE C. CARHART, Syracuse, N. Y., assignor to Brown-Lipe Gear Company, Syracuse, N. Y., a Corporation of New York. Filed Nov. 7, 1923. Serial No. 673,246. 1 Claim. (Cl. 74—58.)



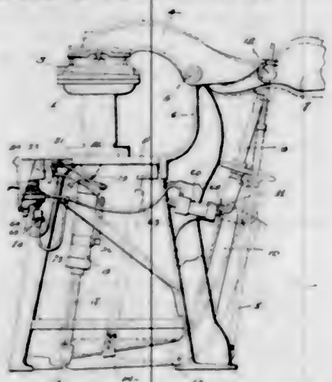
In a transmission gearing of the sliding gear type comprising a gear case, axially alined driving and driven shafts journalled in the end walls of the casing, a countershaft journalled in the end walls of the case and arranged below the driving and driven shafts, and intermediary gearing mounted on a stud adjacent one end wall of a case near the countershaft, and shifter mechanism supported in the case above the driving and driven shafts, the combination with such gear casing having its side walls located substantially equidistant from the vertical median plane of the case containing the axis of the driving and driven shafts, the countershaft being offset at one side of such median plane, and the intermediary gearing being mounted below the driving and driven shafts at one side of the countershaft and at the opposite side of said plane from that on which the countershaft is located whereby the side walls of the case are located equidistant from said vertical plane.

1,679,813. PRESSING-MACHINE PLAITING ATTACHMENT. SERVATIUS R. CHRIST and PHILIP N. BRAUN, Syracuse, N. Y., assignors to The Prosperity Company Inc., Syracuse, N. Y., a Corporation of New York. Filed May 19, 1926. Serial No. 110,046. 1 Claim. (Cl. 68—9.)



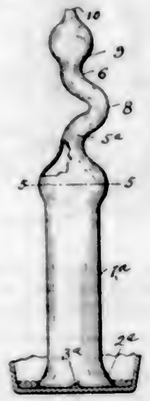
A pressing machine comprising upper and lower cooperating pressing elements, one of which is movable toward

and from the other, and means for holding the work on the lower element comprising a flexible strap ar-



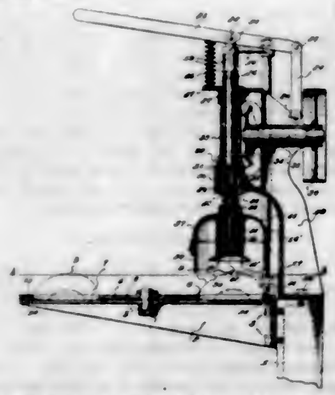
ranged to extend transversely of the lower element, said strap being secured at its rear end and having a weight at its front end.

1,679,814. COMBINED CANT HOOK AND AX. WILLIAM A. CICERO, Birchdale, Minn. Filed June 4, 1927. Serial No. 196,545. 3 Claims. (Cl. 7—8.)



3. An implement comprising an ax head provided adjacent the forward end of its back with a clip, a helve fitted to the ax head, a clamp on the helve, a cant-hook pivoted to the clamp and adapted to extend over and engage the forward edge of the ax head, and positive interengaging means between the hook and clip.

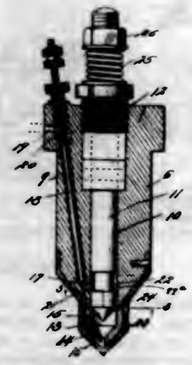
1,679,815. ACTUATING MECHANISM FOR PRESSING MACHINES. ERNEST DAVIS, Syracuse, N. Y., assignor to The Prosperity Company, Inc., Syracuse, N. Y., a Corporation of New York. Filed Oct. 5, 1926. Serial No. 139,726. 12 Claims. (Cl. 68—9.)



1. In a pressing machine, cooperating pressing elements, one of which is movable toward and from the other, means for actuating the movable element including power means, motion transmitting mechanism between the power means and the movable element, operator actuated means for controlling the actuation of the power means and additional operated controlled means for varying the power delivered through said mechanism.

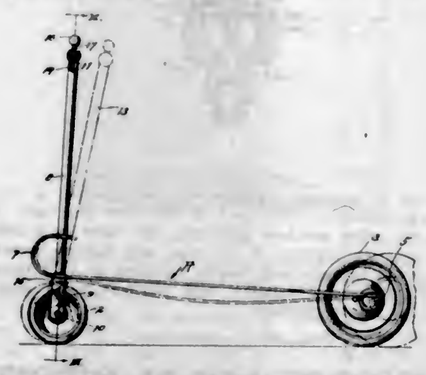
1,679,816. VAPORIZING INHALER. FRANK C. DORMENT, Wellington, Ohio, assignor of one-half to Albert T. Fletcher, Washington, D. C. Filed Oct. 29, 1925. Serial No. 65,537. 1 Claim. (Cl. 128—186.)

A vaporizing inhaler comprising a tubular body portion having an open outwardly flared lower end portion adapted to rest upon the bottom of a container in which there is a small quantity of liquid the lower edge of said body portion having circumferentially spaced indentations forming passages permitting air and liquid to flow along the bottom of the container to the interior of the body portion, said body portion having an enlargement at its upper end forming an expansion chamber, and a tube of a diameter relatively small with respect to the body portion connected to the enlarged upper end of the body portion, said tube having a restricted discharge opening and an enlarged portion forming an expansion chamber adjacent the discharge opening, the discharge opening and enlargement being substantially vertically above said body portion, said tube being laterally bent between its enlarged portion and the body portion, to thereby form a tortuous baffle passage.



1,679,817. METHOD AND APPARATUS FOR TRIMMING FRUIT. ARTHUR L. DUNCAN, Piedmont, Calif. Filed Apr. 7, 1926. Serial No. 100,312. 18 Claims. (Cl. 146—1.)

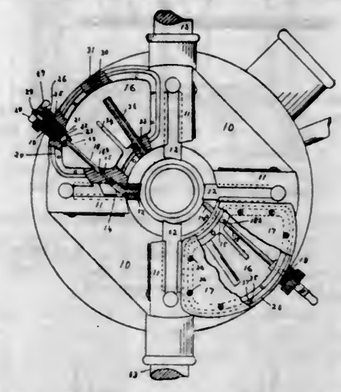
2. A method of trimming fruit of irregular shape and having the core removed to form a hollow body, which



comprises subjecting said body to a pressure acting in a direction to cause the edges of the fruit to spread laterally, and trimming said edges while maintaining said pressure.

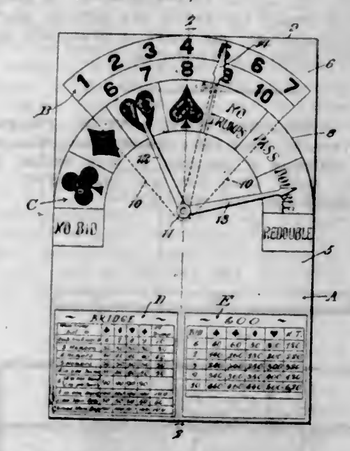
1,679,818. FUEL INJECTOR FOR INTERNAL-COMBUSTION ENGINES. JOHN W. ENRIGHT, New Orleans, La. Filed Jan. 5, 1925. Serial No. 628. 8 Claims. (Cl. 123—33.)

1. A fuel injector for internal combustion engines comprising an injector body adapted for insertion into the cylinder of the engine and having an air compression chamber, a fuel reservoir, a fuel passageway having means for supplying fuel thereto and through which air passes from the compression chamber to the reservoir, orifices being formed in the injector body and adapted to communicate with said compression chamber or said reservoir, and means operative to compress air in said chamber and to control the communication of said chamber and reservoir with said orifices.



1,679,819. TOY VEHICLE. ROLLIE B. FAGEOL, Los Angeles, Calif. Filed Mar. 17, 1926. Serial No. 95,208. 9 Claims. (Cl. 208—38.)

1. A toy vehicle of the class described comprising a running gear, a vertically yieldable spring bar constituting the bed of said vehicle and being mounted at opposite ends of the running gear, and means whereby yielding movement of the spring bar is transmitted to propel the vehicle.

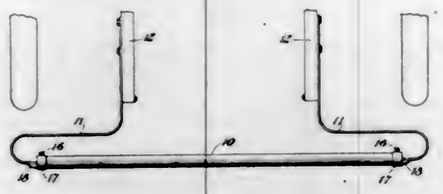


1,679,820. STOCK AND DIES WITH OILING DEVICE. ROCCO FERRO, Utica, N. Y. Filed Feb. 20, 1925. Serial No. 10,555. 3 Claims. (Cl. 10—126.)

1. In a stock and dies the combination of a stock casing with outwardly extending means for mounting said dies, dies mounted therein, a reservoir for lubricating oil located within said casing between adjacent die-holding means, a duct leading from said reservoir inwardly toward the die, a longitudinally slideable needle valve, mounted in said casing and having its inner end adapted to block the opening through said duct and having its outer end extending without the casing, a spring operatively connected to said valve tending to keep it yieldingly seated against said duct opening, and a swinging cam lever connected to

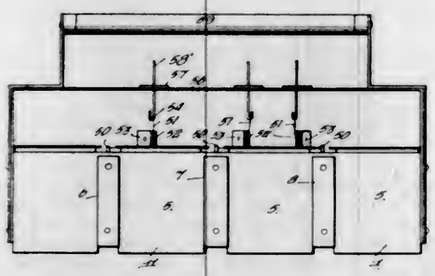
said valve and manually operable from without the casing and adapted to be set at one position to hold the valve open against said spring tension, and adapted in its other position to allow the valve to close under said spring tension and means interposed between said swinging lever and the casing and operative from without the device for varying the open position of the valve, such adjustment not being disturbed by the regular closing and opening of the valve by said swinging lever.

1,679,821. INDICATOR. CARTER B. FICKLEN, Fortress Monroe, Va. Filed Mar. 23, 1928. Serial No. 264,092. 1 Claim. (Cl. 273—148.)



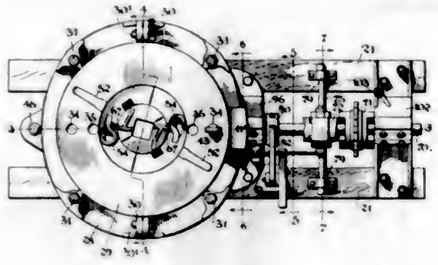
In a card game indicator, the combination with a board having a series of "trump" indicia thereon, said board including top and bottom superposed plates, and an intermediate plate, said "bid" indicia including a series of "trump" indicia and a series of "trick" indicia respectively arranged one on the bottom plate and the other on the top plate, the intermediate plate being provided with a quadrant shaped cut-out portion, and a pair of pointers fulcrumed on a common axis on said board for cooperation with the "trump" and "trick" indicia respectively, one of said pointers being movable in the cut-out portion of the intermediate plate.

1,679,822. SHORT-STRETCH COVERED ELASTIC THREAD. RAY C. HALL, Needham, Mass., assignor to Frank W. Gorse Co., Needham Heights, Mass., a Corporation of Massachusetts. Filed Feb. 28, 1927. Serial No. 171,673. 7 Claims. (Cl. 117—57.)



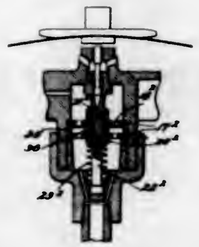
1. A short-stretch low-tension covered elastic thread having an elastic rubber thread characterized by being under but little tension when in repose and having a plurality of spirally-wound superimposed covers thereon applied one entirely outside the other, the inner covers having a greater pitch than the outermost cover.

1,679,823. AUTOMOBILE BUMPER. KENNETH LESTER HARRIS, New Brighton, Pa. Filed Feb. 7, 1928. Serial No. 252,579. 7 Claims. (Cl. 293—55.)



1. A vehicle bumper comprising, in combination, a buffer bar having slotted members associated with its opposite ends; flat spring arms adapted to be secured to the vehicle chassis and having end portions inserted in said slotted members; and means to secure said members and spring arms to said buffer bar.

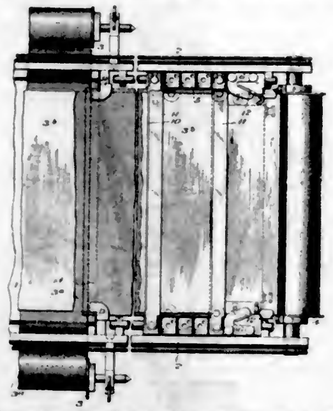
1,679,824. BOTTLE-DELIVERY DEVICE. FREDERICK HELFENSTEIN, Jr., and JOHN HELFENSTEIN, Bismarck, N. Dak., assignors of one-third to John Nathan, Bismarck, N. Dak. Filed Feb. 17, 1926. Serial No. 88,808. 20 Claims. (Cl. 224—48.)



1. In a bottle carrier means for the simultaneous delivery of a plurality of bottles therefrom, said means embracing movable bottom members, said members being rotatable.

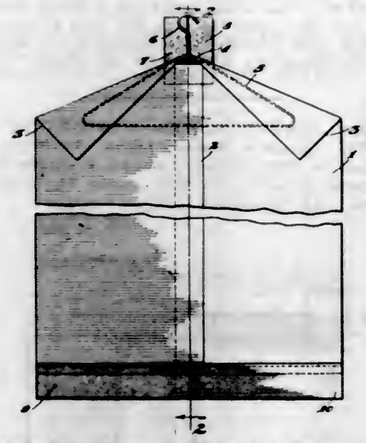
1,679,825. ROTARY WELL-DRILLING MACHINE. JULIUS H. HOLMGREEN and RICHARD J. HOLMGREEN, San Antonio, Tex., assignors to Alamo Iron Works, San Antonio, Tex., a Corporation of Texas. Filed June 23, 1923. Serial No. 647,384. 21 Claims. (Cl. 255—23.)

18. In a well drilling machine, a rotary table, means sustaining the weight of the table, means on the under side of the table for driving it, and a split ring having bearing engagement with the periphery of the table beyond said driving means, substantially as set forth.



1,679,826. FLUID-PRESSURE REGULATOR. ALEXANDER FREDERICK JENKINS, Baltimore, Md. Filed Nov. 8, 1923. Serial No. 673,614. 8 Claims. (Cl. 50—23.)

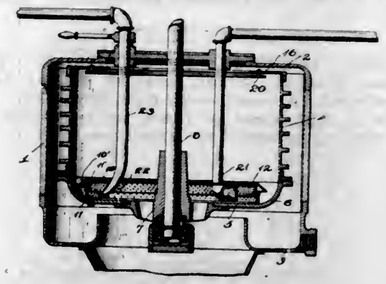
4. In a pressure regulator, in combination, a gas passage having a valve seat, a valve for said seat, a pair of flexible members supporting the valve as a unit for movement axially of the seat, and spacing means interposed between said flexible members to hold them in slightly spaced relation, said members being unresponsive to gas pressure.



1,679,827. CARBON GUARD FOR MANIFOLDING MACHINES. ALFRED JENSEN, New York, N. Y., assignor to Elliott-Fisher Company, a Corporation of Delaware. Filed Dec. 31, 1925. Serial No. 78,682. 2 Claims. (Cl. 197—134.)

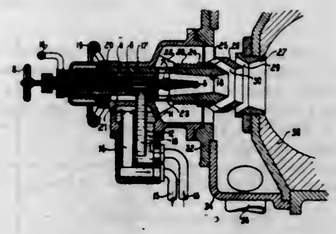
1. In a manifolding machine, the combination with a flat platen for supporting movable forms and interleaved cross carbons, of a carbon guard including a pair of superposed flexible flaps wider than said forms, and guard carrying means for supporting the guard intermediate two of the forms to receive the associated interleaved carbon between said flaps, the location of said carrying means being variable whereby the guard may be utilized either in the double capacity of a blind preventing printing on the subjacent forms and a guard separating intersecting edges of the said carbon and forms to prevent mutilation of the carbon by movement

of the forms, or in the single capacity of a guard for preventing mutilation of said edge in the manner aforesaid.



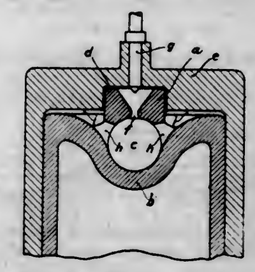
1,679,828. GARMENT BAG. SAMUEL J. JOHNSON, Cincinnati, Ohio, assignor to The Seinsheimer Paper Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Oct. 11, 1926. Serial No. 140,753. 1 Claims. (Cl. 206—7.)

A garment container formed from a tube, said tube having its upper and lower ends folded for closing the tube, the fold at the top providing edges inclined from a central point and providing an orifice at this point for protrusion therethrough of the hook of the hanger, and a slitted sticker secured at the rear of the container adjacent the orifice, the portions adjacent the slit adapted to straddle the hanger hook and to be folded and secured to the face of the container, said portions overlapping across the face of the container due to the folding thereof over the inclined upper edges of the container.



1,679,829. CENTRIFUGAL SEPARATOR. ERNST KOPKE, Honolulu, Territory of Hawaii. Filed Nov. 30, 1925, Serial No. 72,347. Renewed Dec. 23, 1927. 4 Claims. (Cl. 233—19.)

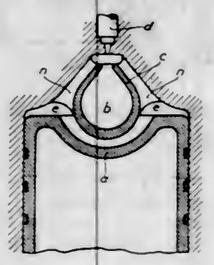
1. A centrifugal separator comprising a rotatable bowl having a cylindrical wall merged into the bottom by an inwardly inclined surface, an annular guide plate defining an antechamber adjacent said inclined surface,



and means for adjusting said guide plate vertically to vary the space between the periphery of the same and said inclined surface.

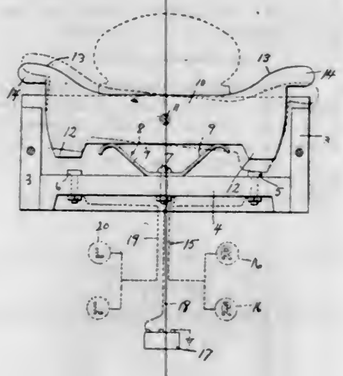
1,679,830. LIQUID-FUEL BURNER. ADOLF LANG, The Hague, Netherlands. Filed July 24, 1925, Serial No. 45,872, and in the Netherlands July 28, 1924. 7 Claims. (Cl. 158—76.)

1. An oil burner comprising a casing, a primary burner cone longitudinally adjustable therein, a sleeve mounted within the primary cone, a fuel feed pipe passing through an elongated slot in the primary cone and seated in an opening in the sleeve, a nozzle tube formed with an opening to register with the fuel feed pipe, said tube being mounted for rotation to control the fuel inlet, and a nozzle carried by the nozzle tube.



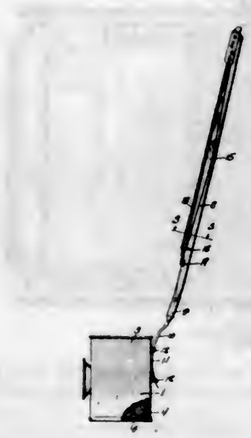
1,679,831. COMBUSTION POWER ENGINE WITH SELF-IGNITION. FRANZ LANG, Stuttgart, Germany, assignor to Acro Aktiengesellschaft, Kussnacht-on-the-Rigi, Switzerland. Filed Oct. 12, 1925, Serial No. 62,182, and in Germany Oct. 29, 1924. 6 Claims. (Cl. 123—32.)

1. In a combustion engine, a cylinder and a piston working therein, in combination with a combustion chamber arranged in the piston, a dislodging device between



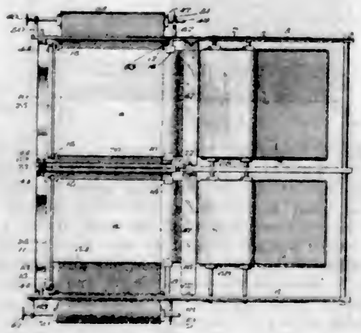
the cylinder and the piston and communicating with the combustion-chamber, and arranged to force the compressed air into said chamber, and a fuel injector arranged to inject fuel into the dislodging device.

1,679,832. COMBUSTION-POWER ENGINE. FRANZ LANG, Stuttgart, Germany, assignor to Acro Aktiengesellschaft, Kussnacht-on-the-Rigi, Switzerland. Filed Nov. 21, 1925, Serial No. 70,616, and in Germany Dec. 6, 1924. 11 Claims. (Cl. 123—32.)



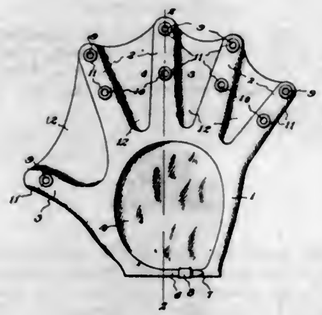
1. In a combustion-engine, a cylinder provided at its head with a fuel-injector and a combustion-chamber suspended within said cylinder, spaced from the walls thereof and provided with an opening for admitting compressed air from the cylinder and fuel from the fuel-injector, said combustion-chamber, being closed at all other points at the end of the compression stroke and the beginning of the expansion stroke of the piston.

1,679,833. CIRCUIT CLOSER FOR DIRECTION SIGNALS. EARL VIRGIL LAGGESON, Portland, Oreg. Filed Apr. 7, 1927. Serial No. 181,729. 2 Claims. (Cl. 200—59.)



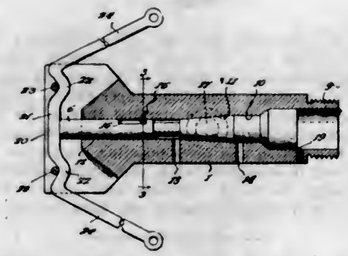
1. A circuit closer, comprising a support, a pair of contacts mounted at opposite ends of said support, a central contact member mounted in said support, and a rock lever pivotally mounted in said support and normally engaged and retained in one position by the central contact member, said lever being operable to engage either of said end contacts mounted in said support.

1,679,834. STRINGED MUSICAL INSTRUMENT. HERMAN M. LENTZ, Renville, Minn. Filed July 15, 1927. Serial No. 206,045. 4 Claims. (Cl. 84—274.)



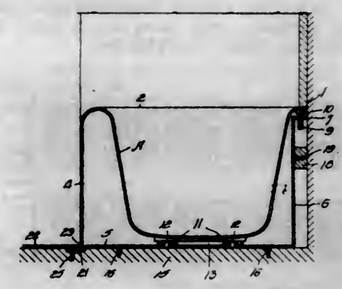
1. A stringed musical instrument comprising a sound box, a neck, resonant arms extending from the neck and connected to a wall of the sound box, a bridge upon the neck, a tail piece upon the neck, and keys at the upper end of the neck, and strings connected to the keys and to the tail piece and strung over the bridge.

1,679,835. DOUBLE-PLATEN MANIFOLDING MACHINE. LAURENCE EDWARD LENTZ, Harrisburg, Pa., assignor to Elliott-Fisher Company, a Corporation of Delaware. Filed Dec. 31, 1925. Serial No. 78,692. 15 Claims. (Cl. 197—126.)



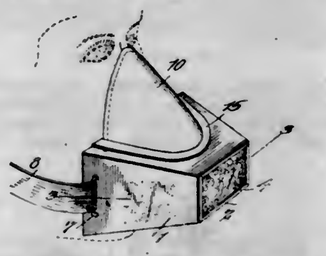
1. In a machine of the character described, the combination with a plurality of platens, of a single recording mechanism cooperating with said platens, carbon rolls located beyond the outer sides of the platens, and carbon clamping means located intermediate of the platens.

1,679,836. SWIMMING GLOVE. JOHN L. LINDER, Palo Alto, Calif. Filed Aug. 6, 1927. Serial No. 211,225. 4 Claims. (Cl. 9—21.)



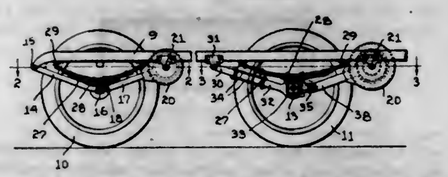
1. A swimming glove comprising a body adapted to fit about the hand and having thumb and finger stalls provided with openings to be closed at their inner ends by portions of the thumb and fingers of the wearer, sealing members of soft material encircling the outer ends of the openings and projecting from the outer surfaces of the stalls, and webs extending between said stalls.

1,679,837. AIR-BRAKE BLEEDER VALVE. CLYDE E. MARSHALL, Peach Creek, W. Va. Filed Apr. 28, 1927. Serial No. 187,262. 3 Claims. (Cl. 303—80.)



1. A bleeder valve for an air brake system, the same comprising a casing having a longitudinal opening therein and lateral openings, the longitudinal opening being adapted to be connected to the train line to receive pressure therefrom, and one of the lateral openings being adapted to be connected with the brake cylinder for relieving the pressure thereof, a plug valve movable in the longitudinal opening of the casing and adapted to be normally held seated by the pressure derived from the train line to close the lateral opening in communication with the brake cylinder, and means mounted upon the opposite end of the valve casing to effect an unseating of the valve when required, said valve having a portion cut away and a pin mounted in the valve casing and entering the cut away portion of the valve to limit its movement.

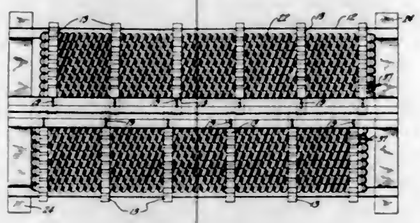
1,679,838. ADJUSTABLE SUPPORT FOR BUILT-IN BATHTUBS. JAMES E. MCHUGH and ALVIN G. FIELDS, East St. Louis, Ill. Filed Dec. 6, 1926. Serial No. 152,831. 8 Claims. (Cl. 4—173.)



1. The combination with a built in bath-tub having a laterally projecting rim and leveling strips of a support therefor, said support having spaced parallel leveling strips supports and vertically adjustable rim supporting means.

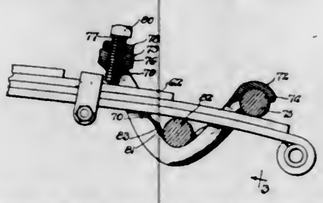
1,679,839. SMOKE PROTECTOR. WILLIAM D. MITCHELL, Spartanburg, S. C. Filed June 2, 1926. Serial No. 113,248. 2 Claims. (Cl. 128—146.)

1. A protector of the character specified, comprising a casing, adapted to fit close against the face opposite the mouth and below the nose, means associated with the casing for holding it in place, said casing having an opening in its top side in line with the nostrils, a flexible cover upon the top side of the casing adapted to envelope the nose and secure a close fit between the casing and the nose, a retainer securing the lower edge of the cover to the casing and a spring nose frame consisting of a single wire including similar side pieces and a lower connecting member, each of the side pieces comprising an upright at the side of the nose, an inclined member adjacent the bridge of the nose and a member at the lower end of the inclined member engaging the top of the casing and curving to conform to a side of the nose.



1,679,840. SUSPENSION FOR VEHICLE BODIES. BENJAMIN F. SEYMOUR, Washington, D. C. Filed Oct. 1, 1924. Serial No. 741,049. 5 Claims. (Cl. 267—16.)

1. In a vehicle construction, the combination of a vehicle frame, an axle, a wheel journalled on the axle, a pair of arms hinged at distal points on the frame, one of

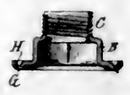


said arms being pivoted on the axle and the other rigidly secured thereon, and a spring between the axle and the frame, substantially as set forth.

1,679,841. ELECTRIC CONVECTION HEATER. HAROLD N. SHAW, Milwaukee, Wis. Filed Feb. 7, 1927. Serial No. 166,481. 5 Claims. (Cl. 219—34.)

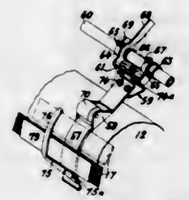
1. An electric convection heater, comprising a triangular frame, insulating supports carried by opposite side inclined faces of the frame, and a spiral resistance element mounted on the supports on each side face of the frame and extending back and forth on said supports longitudinally of the frame, said resistance elements being modified from standard practice by a substantial increase in width and a substantial reduction in the thickness of the metal in the element and also in a substantial increase in the diameter of the spiral to provide a comparatively large surface area and permit heating at a comparatively low temperature.

1,679,842. SHOCK ABSORBER. EARNEST R. SNOOK, Davenport, Iowa, assignor to Starkweather-Snook Corporation, Moline, Ill., a Corporation of Iowa. Filed June 4, 1925. Serial No. 34,776. 34 Claims. (Cl. 267—48.)



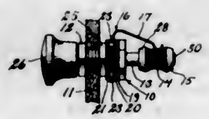
1. A stabilizer for vehicle springs, comprising adjustable bearing means at one end for engaging one side of a vehicle spring, a roller bearing at the other end for engaging the same side of said spring, and means for engaging an intermediate point of the other side of said spring.

1,679,843. CLEANING DEVICE. ABRAHAM TRAUBE, Brooklyn, N. Y. Filed June 26, 1926. Serial No. 118,630. 3 Claims. (Cl. 15—124.)



1. A fountain device for use in the dry cleaning of textiles comprising a hollow cylindrical handle adapted for use as a container for the liquid to be used, a scraper blade projecting from the container, said blade being adapted to be applied to a textile to clean the same, an outlet tube communicating with the container and having its discharge opening at the same side of the container as the scraper and located in close proximity to the scraper and so that liquid may be discharged while the scraper is applied to the textile, and means for controlling the flow of the liquid discharged through the tube.

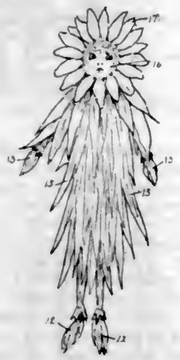
1,679,844. RIM NUT. JULIUS VOLCKHAUSEN, Weehawken, N. J., assignor to A. Schrader's Son, Inc., Brooklyn, N. Y., a Corporation of New York. Filed July 5, 1924. Serial No. 724,382. Renewed Jan. 13, 1928. 3 Claims. (Cl. 85—32.)



1. A sheet metal rim nut for tire valves or the like, comprising a body portion having wrench engaging faces, a lateral flange adapted to function as a washer for the rim nut when the latter is screwed over a tire valve into engagement with a wheel felly, the felly engaging face of the flange being formed with an annular rib pressed up from the metal of the flange intermediate its edges.

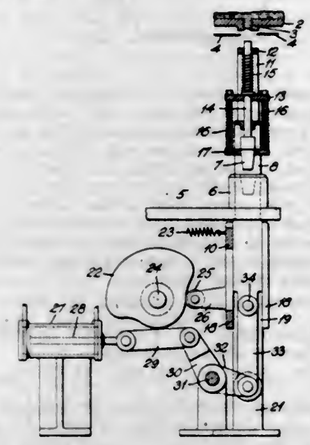
1,679,845. TYPEWRITING MACHINE. JOHN WALDHEIM, Elizabeth, N. J., assignor to Underwood Elliott Fisher Company, New York, N. Y., a Corporation of Delaware. Filed Aug. 16, 1924. Serial No. 732,356. 11 Claims. (Cl. 197—153.)

2. In a typewriting machine, the combination with a rotatable platen and a length of auxiliary ribbon disposed lengthwise of said platen at the printing line thereof, of two laterally adjustable paper-guides, each guide including a finger arranged parallel thereto for holding the portion of said ribbon intermediate said fingers closely against said platen and for supporting the ribbon against being moved downwardly below the typing position, said guides being arranged between said ribbon and the platen, to bear directly against the work on the platen.



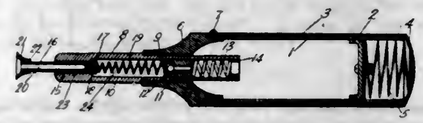
1,679,846. SWITCH CONSTRUCTION. CHESTER E. WARNER, Berwyn, Ill., assignor to Benjamin Electric Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed June 5, 1924. Serial No. 718,027. 6 Claims. (Cl. 200—163.)

1. A circuit controller comprising a metal bushing having a tubular threaded portion for extending through a panel and having also an annular flange, a nut screwed on the threaded tubular portion for holding it on the panel, a metal plunger slidable back and forth in said tubular portion, a contact carried by said metal plunger and electrically connected therewith, a



metal binding terminal member comprising a terminal portion and an annular securing portion integral with said terminal portion surrounding said tubular portion and held against said annular flange, and a combined binding terminal and contact member comprising an annular metal securing portion mounted on and surrounding said tubular portion but insulated therefrom and comprising also a contact portion integral with said securing portion for cooperating with the contact carried by the plunger.

1,679,847. GARDEN DOLL. ZAIDA B. WEBB, Norwich, Conn. Filed Apr. 4, 1924. Serial No. 704,119. 2 Claims. (Cl. 46—40.)

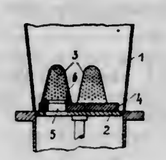


2. A doll simulating a plant, and comprising a head portion, petal simulating elements surrounding said head portion, a body portion having an opening therein adapted to contain powder or the like, leaf simulating elements secured to said body portion, arm and leg portions, leaf simulating elements secured to said arm and leg portions, and bud simulating elements secured to said arm and leg portions, and defining hand and feet portions respectively.

1,679,848. GLASS PRESS. WILLIAM T. BARKER, Jr., Hartford, Conn., assignor to Hartford-Empire Company, Hartford, Conn., a Corporation of Delaware. Filed Oct. 23, 1924. Serial No. 745,372. 20 Claims. (Cl. 49—5.)

1. In combination with a glass feeder having a feeding outlet, a glass pressing machine having a mold mounted for movement beneath said outlet and into vertical alignment therewith to receive a mold charge delivered therefrom, and a pressing plunger mounted for movement into alignment with said outlet and said mold for pressing said mold charge while said mold is in its charge-receiving position.

1,679,849. METHOD AND APPARATUS FOR EJECTING LUBRICANTS. WILLIAM D. BELL, Columbus, Ohio, assignor, by mesne assignments, to The Bassick Manufacturing Company, Chicago, Ill., a Corporation of Delaware. Filed Aug. 6, 1923. Serial No. 656,088. 17 Claims. (Cl. 221—47.4.)

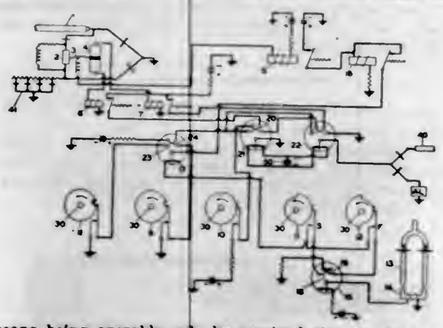


1. Lubricating means comprising a portable lubricant container, a cylinder receiving lubricant from said container, a plunger reciprocable in said cylinder, a spring for moving said plunger to discharge lubricant from said cylinder, a second plunger reciprocable in said cylinder for moving said first named plunger against the tension of said spring, and a valve for controlling the discharge of lubricant from said cylinder, and a coupling member for receiving said discharge and having means to form a sealed connection with a lubricant receiving member.

1,679,850. PROCESS FOR THE MANUFACTURE OF THREADS, FILMS, AND THE LIKE FROM CELLULOSE DERIVATIVES. ERNST BERL, Darmstadt, Germany. Filed Mar. 11, 1925. Serial No. 14,788, and in Germany Mar. 17, 1924. 9 Claims. (Cl. 18—54.)

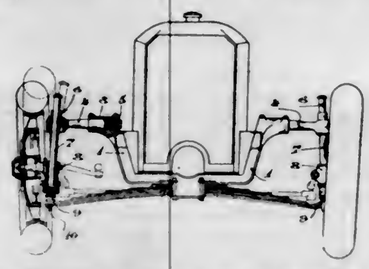
1. Process for the production of structures from cellulose derivatives consisting in converting the cellulose derivatives into solutions or gelations by means of organic solvents and treating the thus obtained products in precipitating baths which contain solvents in addition to salt solutions.

1,679,851. BLOWING MACHINE FOR THE MANUFACTURE OF HATS. EMIL BRECHT and RUDOLF FUGMANN, Guben, Germany. Filed Mar. 4, 1927, Serial No. 172,809, and in Germany Mar. 12, 1926. 4 Claims. (Cl. 19—148.)



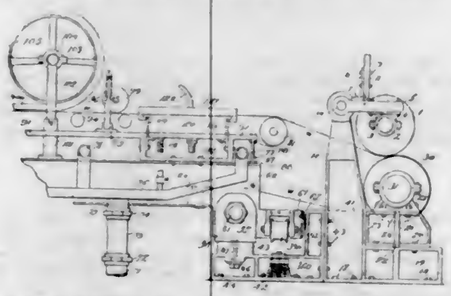
1. In a blowing machine for the manufacture of hat hoods the combination, with the blowing compartment, of a plurality of perforated forming cones adapted to receive the deposit of fibrous material introduced into the compartment, said cones being supported by and rotating with the bottom of the compartment.

1,679,852. SYNCHRONIZING SYSTEM. ALDER F. CONNERY, Jamaica, N. Y., assignor to Commercial Cable Company, New York, N. Y., a Corporation of New York. Filed Oct. 22, 1926. Serial No. 143,471. 6 Claims. (Cl. 178—53.)



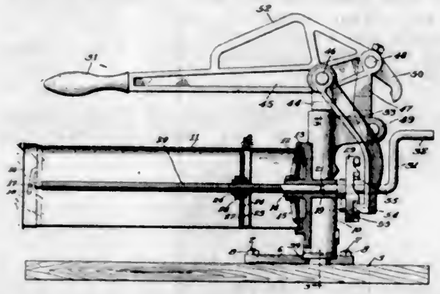
1. A three-element code synchronizing system comprising, signal receiving means, means co-operative with said receiving means for generating potentially available sig-

nals in approximate synchronism with the received signals, and means for correcting the synchronism, said



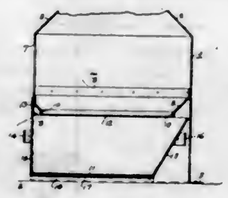
means being operable only by received signals which are preceded by a signal of predetermined invariable character.

1,679,853. SPRINGING OF MOTOR VEHICLES. CYRILLE EDOUARD COTTIN, Lyon, France, assignor to Automobiles Cottin & Desgouttes, Societe Anonyme, Lyon, France. Filed Oct. 8, 1926, Serial No. 140,330, and in France Nov. 27, 1925. 3 Claims. (Cl. 280—124.)



1. A transverse spring suspension applicable to the driving or steering wheels of motor vehicles, comprising a spring, guide rods connected to said spring, axle members for the wheels mounted on said guide rods and arms arranged to be carried by the chassis, and to which said guide rods are connected for sliding movement and also for universal angular movement, said arms being adjustable to vary the extent of the space between the upper portions of the guide rods.

1,679,854. PAPER-MAKING MACHINE. JAMES K. DARBY, Dayton, Ohio, assignor to Frank C. Trowbridge, Hamilton, Ohio. Filed Jan. 30, 1926. Serial No. 84,845. 42 Claims. (Cl. 92—44.)



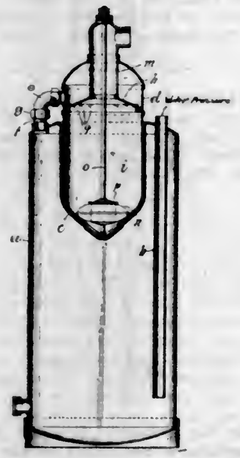
1. In a paper making machine, a transverse movable forming table and gravity means for causing the transverse movement.

1,679,855. LUBRICANT COMPRESSOR. ERNEST W. DAVIS, Oak Park, Ill., assignor to The Bassick Manufacturing Company, Chicago, Ill., a Corporation of Delaware. Filed Nov. 10, 1924. Serial No. 748,956. 15 Claims. (Cl. 221—47.1.)

1. A lubricant compressor comprising a low pressure cylinder, a closure for one end of said low pressure cylinder, a high pressure cylinder receiving material from said low pressure cylinder formed integrally with said closure and disposed eccentrically of said low pressure cylinder, a threaded piston rod rotatably mounted in said closure and extending substantially the entire length of said low pressure cylinder, a piston threaded onto said piston rod, a ratchet wheel secured to the outer end of said piston rod, a plunger reciprocably mounted in said high pressure cylinder, a lever for reciprocating said plunger, and a pawl having one end pivotally mounted upon said lever and its other end positioned to engage the teeth on said ratchet wheel.

1,679,856. DUSTLESS ASH CONTAINER. WALTER DITSCH and FRANK O. DAVIS, Mishawaka, Ind. Filed Jan. 28, 1926. Serial No. 84,324. 1 Claim. (Cl. 126—242.)

In dustless ash containers, a rectangular casing having a hood, a vent pipe attached to the hood, said casing having an ash receiving opening located above an ash pan opening formed in one end of the casing, a hopper attached to and extending all around on the inside of the casing positioned between the two openings combined with a removable ash pan provided with a sloping rear end, a flanged front end adapted to cover the lower opening of the casing, and an extra reinforcing plate attached to the bottom of the pan said plate having depending flanged edges.

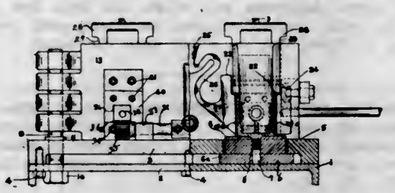


1,679,857. RECOVERY OF PRECIOUS MINERALS. TALBOTT HEWITT FRANCE, Brooklyn, N. Y. Filed July 9, 1926. Serial No. 121,496. 12 Claims. (Cl. 209—11.)

1. The improvement in the recovery of diamonds from sedimentary rocks which comprises artificially heating the rock to a substantial degree above normal atmospheric temperatures sufficient to induce material differences in expansion between the diamonds and their matrices and then abruptly cooling the so heated materials.

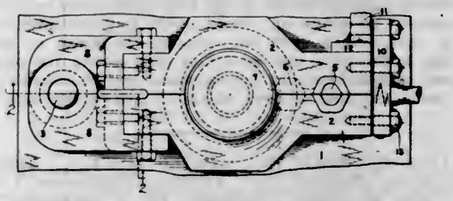
1,679,858. PROCESS FOR PURIFYING GASES. WALTER H. FULWEILER, Wallingford, Pa., assignor to The U. G. I. Contracting Company, Philadelphia, Pa., a Corporation of Delaware. Filed Dec. 4, 1923. Serial No. 678,431. 3 Claims. (Cl. 23—225.)

1. In the process for purifying gas by the action of a solution of a salt sufficiently alkaline to absorb hydrogen sulphide gas as sulf-hydrate thereby becoming foul, the improvement which consists in preferentially oxidizing the sulf-hydrate principally to the original salt with liberation of sulphur as such by passing the foul solution in film form over coke in the presence of air.



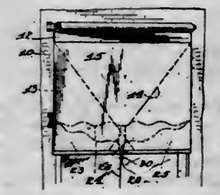
1,679,859. FOAM FIRE-EXTINGUISHING APPARATUS. WILHELM GRAAFF, Berlin, Germany, assignor to Pyrene-Minimax Corporation, a Corporation of Delaware. Filed Jan. 29, 1924, Serial No. 689,363, and in Germany Jan. 29, 1923. 1 Claim. (Cl. 169—15.)

In a foam fire extinguisher the combination of a receptacle containing a salt solution, a pipe for the admission of water under pressure extending from the top to near the bottom of said receptacle, a recess in the top of said receptacle, a second receptacle adapted to be inserted in said recess, an elbow pipe connecting the top of said first receptacle with the top of said second receptacle, a perforated partition in said second receptacle adapted to divide said second receptacle into two compartments the lower of which contains a reacting chemical and a foam generator, a central vertical extension from said partition, a central rod extending from the bottom of said second receptacle to the top of said extension, a float within said lower compartment and adapted to ascend along said rod and to seal the entrance to said extension, and an outlet pipe upon said extension.



1,679,860. MOLD FOR CASTING METALS. MARIUS GUYOT, Cleveland, Ohio, assignor to Aluminum Company of America, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Apr. 13, 1925, Serial No. 22,590. Renewed Feb. 29, 1928. 9 Claims. (Cl. 22—153.)

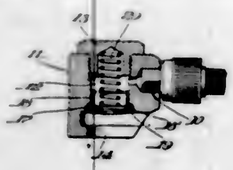
1. A mold having a plurality of casting cavities comprising a mold base, two hinged mold halves fixed at one end thereof and adapted to be moved on the mold base, and pilots movable in and extending above the top



of the mold base, the top surface of each of the said pilots cooperating with adjacent surfaces of the said mold halves to form a casting cavity.

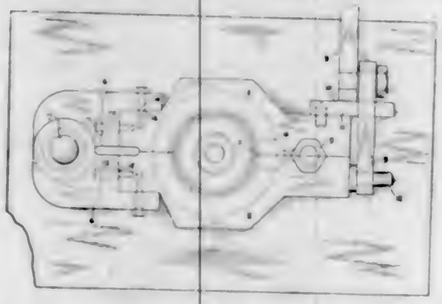
1,679,861. MOLD FOR CASTING METALS. MARIUS GUYOT, Cleveland, Ohio, assignor to Aluminum Company of America, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Apr. 13, 1925, Serial No. 22,591. Renewed Feb. 29, 1928. 14 Claims. (Cl. 22—153.)

1. A multipart permanent mold, for casting high melting point metals, composed of differentially expansible mold parts and comprising a base member, hinged mold halves on the base member, the said base and halves being suitably surfaced and recessed to form casting cavities for the molten metal being cast, and means for maintaining the original alignment and location of mold parts and cavity walls.



1,679,862. AWNING. GEORGE S. HENRITZY, Hazleton, Pa. Filed June 27, 1922. Serial No. 571,193. 1 Claim. (Cl. 156—44.)

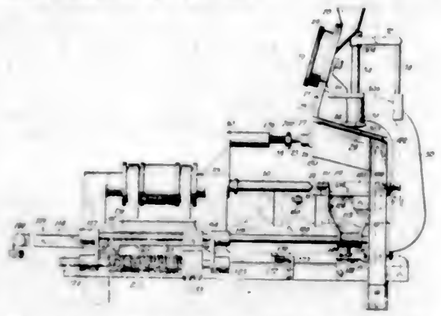
An awning comprising a roller, a flexible body member having its upper edge attached to the roller and having a front and side portions, a hinged three part frame for shaping the flexible body member adjacent its bottom, the middle section of the hinged frame being secured across the same and of a length to hold smooth that part of the front portion between itself and the roller, the side portions of the frame being secured to the side portions of the flexible body member, the two being foldable in a flat position against the front member with the two side frame members lying along the front frame member, the flexible body member being provided with a substantially rectangular portion below the front frame member and with portions below the side frame members, attached to the rectangular



portions at their respective front ends, to the side portions at their respective tops and tapering from front to rear, the portions below the frame being foldable above the frame and within the front and sides of the body member whereby the whole body member when so folded may be rolled upon the roller.

1,679,863. COUPLING MEMBER. OTTO J. HERR, Chicago, Ill., assignor to The Bassick Manufacturing Company, Chicago, Ill., a Corporation of Delaware. Filed Apr. 25, 1924. Serial No. 708,928. 3 Claims. (Cl. 285—143.)

1. A coupling member for a lubricant compressor comprising a body member having a bore therethrough, a toroidal groove formed in the wall of said bore adjacent one end thereof, a cup leather in the last mentioned end of said bore, a split ring pressing the flange of said cup leather into said groove, a plug closing the other end of said bore, and a compression spring confined between said plug and the bottom of said cup leather.

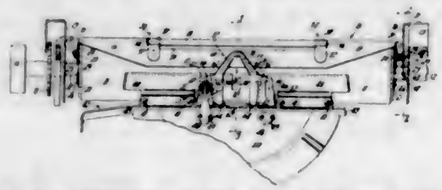


1,679,864. MOLD FOR CASTING METALS. GEORGE KOHL, Cleveland, Ohio, assignor to Aluminum Company of America, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Apr. 13, 1925. Serial No. 22,571. Renewed Feb. 29, 1928. 7 Claims. (Cl. 22—153.)

1. In a multipart permanent mold for casting metals the combination of a mold part, a movable mold part cooperating with the first said part and exposed to the heat of the molten metal being cast, and a hinge for connecting the said mold parts and secured to the movable mold part for adjustment laterally with respect thereto.

1,679,865. TUBE FINISHING AND CAPPING MACHINE. JOSEPH H. KONIGSBERG, Brooklyn, N. Y., assignor to Victor Metal Products Corporation, Brooklyn, N. Y., a Corporation of New York. Filed May 26, 1923. Serial No. 641,634. 47 Claims. (Cl. 29—27.)

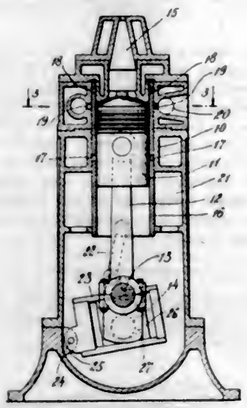
1. In a tube finishing and capping machine, a cap hopper, means for delivering a single cap at a time from said hopper to the capping position, a reservoir for thin collapsible tubes, means for delivering a single tube at a time from said reservoir into finishing position, comprising means for supporting said tube in finishing position, an oscillatory and reciprocatory tube carriage, means for delivering a single tube at a time to said carriage, and means for operating said carriage for causing said carriage to mount a tube on said supporting means, means for finishing said tube, and means for causing said cap delivering means to cap said tube.



20. In a tube finishing machine, a mandrel, a tip on said mandrel hexagonal in cross section, and means for mounting a tube on said mandrel, whereby said hexagonal tip engages the inside of the tip of said tube.

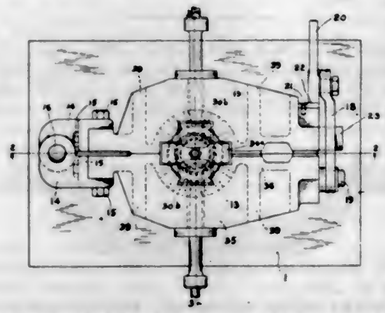
1,679,866. SLIDER FOR FASTENERS, ROBERT C. LEGAT, New Britain, Conn., assignor to G. E. Prentice Manufacturing Company, New Britain, Conn., a Corporation of Connecticut. Filed June 2, 1926. Serial No. 113,154. 25 Claims. (Cl. 24—205.)

1. A slider for separable fasteners of the class described comprising spaced wings, means connecting said wings, the connecting means having opposed lugs, and a stiffener device disposed between said lugs, said lugs preventing lateral displacement of the stiffener device, the latter having a part engaging the outer face of at least one of the wings.



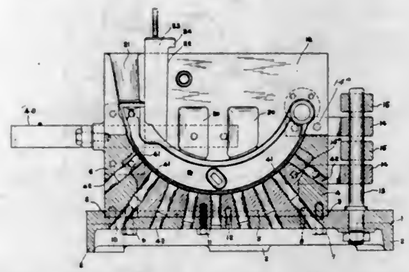
1,679,867. TYPEWRITING MACHINE. JOSEPH LINDBURG, Brooklyn, N. Y., assignor to Underwood Elliott Fisher Company, New York, N. Y., a Corporation of Delaware. Filed June 30, 1924. Serial No. 723,176. Renewed June 16, 1925. 15 Claims. (Cl. 197—136.)

1. In a typewriting machine, the combination with a platen, of a card-holder including a plate extending along the platen and conforming to the curvature thereof, said plate including an opening forming with said platen a curved pocket for the reception of a card, the upper and lower edges of the plate formed by said opening providing respectively upper and lower gages for the card, and



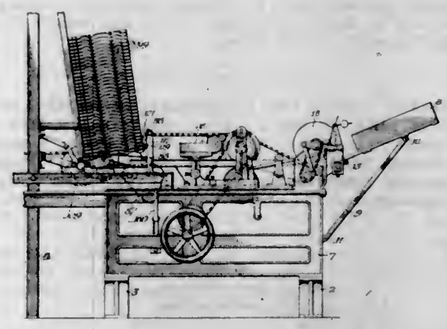
resilient clips adjacent the opposite ends of said pocket for engaging the card over the side margins thereof to shield the side margins and to guide the card into the pocket, to bring the lower edge of the card against said lower gage, said clips also effective to press the card completely into said plate-opening, to bring the upper edge of the card against the upper gage and to hold the card by said side margins comformably against the platen.

1,679,868. INTERNAL-COMBUSTION ENGINE. WILLIAM H. MILLSPAUGH, Sandusky, Ohio. Filed Oct. 11, 1923. Serial No. 667,862. 5 Claims. (Cl. 123—75.)



1. A two-cycle internal combustion engine comprising a cylinder having exhaust ports adjacent the inner end thereof, a piston operating in said cylinder, a crank shaft, a sleeve valve slidably mounted between the piston and cylinder and having exhaust ports, air intake ports intermediate the ends thereof, and operative connections including a quick return yoke between said sleeve valve and the crank shaft so arranged that said sleeve valve will be given a relatively slow movement near the end of each outward stroke to open the exhaust ports and the air intake ports and will close the exhaust ports near the end of each outward stroke, and a relatively fast return movement during the inward stroke of the piston whereby air admitted under pressure will be entrapped in the cylinder.

1,679,869. METAL MOLD. ALLEN B. NORTON and MARIUS GUYOT, Cleveland, Ohio, assignors to Aluminum Company of America, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Apr. 13, 1925. Serial No. 22,547. Renewed Feb. 29, 1928. 11 Claims. (Cl. 22—153.)

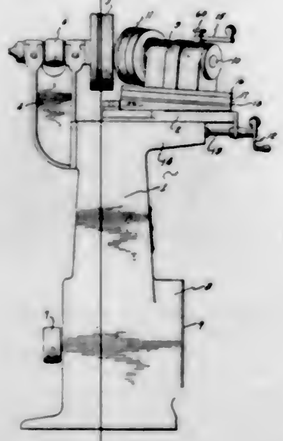


1. A permanent mold for casting high melting point metals comprising a mold base, and hinged cooperating mold halves movable thereon having adjacent faces recessed to form cavities for molten metal, the said faces being out of contact with each other from the hinged ends of the mold halves to points close to the said cavities, the outer side surface of the mold halves being substantially free from flanges.

1,679,870. METHOD OF AND MOLD FOR MAKING CASTINGS. ALLEN B. NORTON and MARIUS GUYOT, Cleveland, Ohio, assignors to Aluminum Company of America, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Apr. 13, 1925. Serial No. 22,766. 35 Claims. (Cl. 22—136.)

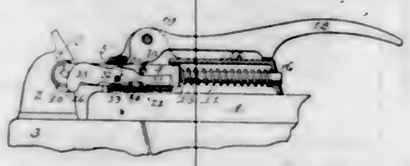
21. A multipart mold for casting high melting point metals comprising a plurality of large solid mold parts which are substantially isothermal, isoexpansive and non-warping forming certain walls of a casting cavity and a large, irregular, non-warping mold part forming a wall of the casting cavity and provided with means for rendering the said part substantially isoexpansive and isothermal as compared with the said plurality of mold parts.

1,679,871. MACHINE FOR MANUFACTURING BOOK COVERS AND THE LIKE. ALBERT OLGAY, Glen Ellyn, assignor to Gaw-O'Hara Envelope Co., Chicago, Ill., a Corporation of Illinois. Filed Mar. 11, 1925. Serial No. 14,658. 10 Claims. (Cl. 91—55.)



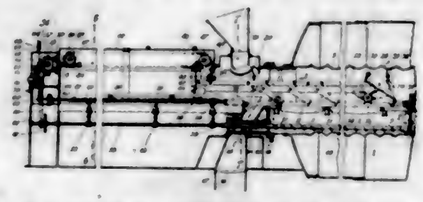
2. In combination, a gumming roll, a roll cooperative therewith for passing sheet material therebetween, means for automatically supplying a continuous stream of sheets to said rolls, and means between said rolls and said feeding means operative upon a break in said continuous stream to permit gravity to move one of said rolls from the other.

9. In a machine of the character described including an endless conveyor having a plurality of leaves adapted to receive and hold a sheet of material containing a substance to be dried between pairs thereof, means for supporting said conveyor for travel, means for opening pairs of said leaves at one place to receive a sheet of material



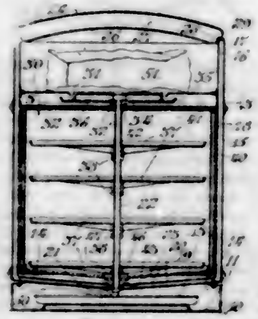
and at a place remote therefrom for removal of the sheet, and means for inserting a sheet at the first said place, means operative to grasp an edge of each sheet for removing the same from said conveyor at the second said place, and means for operating said removing means in predetermined timed relation to the travel of said conveyor.

1,679,872. TWIST-DRILL GRINDER. EDD C. OLIVER, Adrian, Mich. Filed Oct. 9, 1925. Serial No. 61,434. 11 Claims. (Cl. 51—131.)



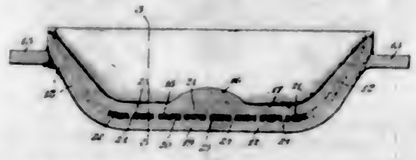
1. In a machine for grinding twist drills, a frame member, a fixedly positioned rotatable grinding wheel, a holder for the drill for maintaining the same in a fixed angular relation with the face of the grinding wheel and adapted to be moved to move the drill across the grinding wheel, manual means for turning the drill on its axis during grinding movement, and automatic means actuated through the said means for turning the drill for causing the drill to feed longitudinally of its axis toward the grinding wheel as it is turned.

1,679,873. LATCH FOR REFRIGERATOR DOORS AND THE LIKE. ELMER C. OSBECK, Grand Rapids, Mich., assignor to Grand Rapids Brass Company, Grand Rapids, Mich., a Corporation of Michigan. Filed May 16, 1924. Serial No. 713,644. 2 Claims. (Cl. 292—335.)



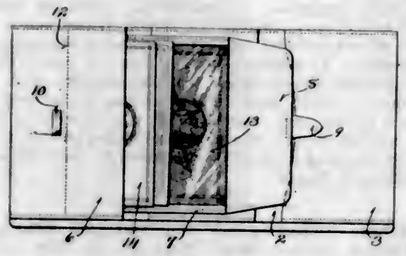
1. In combination with a keeper therefor, a door latch comprising: a slide bearing; a bolt movable longitudinally therein and spring-pressed into latching engagement with the keeper; a detent mounted in its middle extraneously of the bolt swingably to extreme swung positions within the bearing and spring-pressed into engagement at one of its ends with the bolt to hold the same in non-latching position, and adapted to be swung by its opposite end striking the keeper to a position disengaging the bolt.

1,679,874. FEEDING DEVICE FOR FURNACES. ANTON PASTERNAK, Velke Kuncice, Czechoslovakia. Filed Oct. 23, 1924, Serial No. 745,416, and in Germany Nov. 30, 1923. 11 Claims. (Cl. 110—111.)



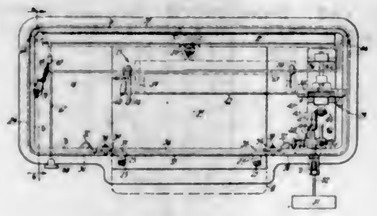
3. In a fuel feeding mechanism for furnaces and the like, the combination with a grate and a fire bridge at the inner end thereof; of a bucket movable to dumping position for depositing fuel upon the grate in proximity to said fire bridge, a frame carrying said bucket and movable into and out of said furnace, a plurality of spreaders also carried by said frame and movable to spreading position to evenly distribute the fuel over said grate when said frame is being moved out of the furnace, means for actuating said bucket and spreaders, and means for reciprocating said frame.

1,679,875. REFRIGERATOR. HEINRICH A. W. PETERSEN, Gary, Ind. Filed Dec. 19, 1923. Serial No. 681,548. 13 Claims. (Cl. 62—46.)



1. A refrigerator comprising a base, a refrigerator casing mounted on said base, a disappearing arcuately shaped revolving door operatively mounted on said casing, and means adapted to revolve with said door whereby communication between certain portions of said refrigerator and certain other portions thereof is cut off when said door is opened.

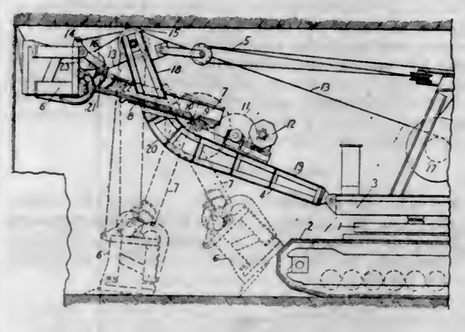
1,679,876. PIG IRON MOLD AND THE LIKE. FELIX QUINN, Buffalo, N. Y., assignor of one-half to Emil Neuhart, Buffalo, N. Y. Filed Mar. 11, 1925. Serial No. 14,664. 28 Claims. (Cl. 22—143.)



1. A mold having an inner wall region, an outer wall region, and an intermediate wall region including means to retard the expansive force of said inner wall region toward said outer wall region.

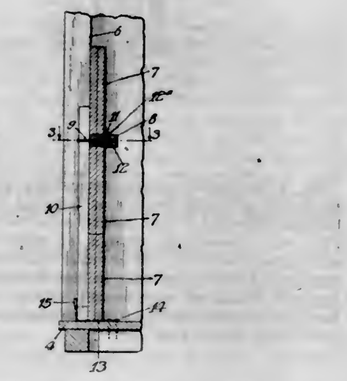
1,679,877. BILL FOLDER. BALTUS ROLFS, West Bend, Wis., assignor to Amity Leather Products Co., West Bend, Wis. Filed Feb. 9, 1927. Serial No. 166,897. 4 Claims. (Cl. 150—39.)

1. A pocketbook having a pocket adapted to receive identification and similar cards, a member adapted to be withdrawn from said pocket and normally housed therein and having a flap positioned below the bottom edge of said cards and secured to a wall of said pocket, and a reenforcing sheet secured to said member and forming a pocket therewith, whereby said member may be freely pushed back into said pocket by a pressure directly applied to said member.



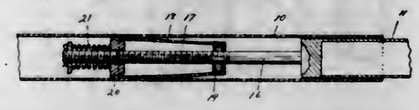
1,679,878. TYPEWRITING MACHINE. EDWARD G. ROWLEY, Belleville, N. J., assignor to Underwood Elliott Fisher Company, New York, N. Y., a Corporation of Delaware. Filed May 12, 1926. Serial No. 108,495. 24 Claims. (Cl. 197—186.)

1. A carriage-return mechanism for a typewriting machine having a traveling carriage and a carriage-return lever therefor, said mechanism including, in combination, a rotatably-mounted drum, a cord wound therearound, the cord having one end fast to the drum and the other end fast to the carriage-return lever, a bevel gear operatively connected to said drum in a manner to rotate therewith, a geared sector meshing with said gear, a pivot-shaft for said sector, and a handle for swinging said sector to thus rotate the drum and return the carriage.



1,679,879. EXCAVATING MECHANISM. LOUIS R. RUSSELL, Marion, Ohio, assignor to The Marion Steam Shovel Company, Marion, Ohio, a Corporation of Ohio. Filed May 25, 1925. Serial No. 32,637. 6 Claims. (Cl. 214—135.)

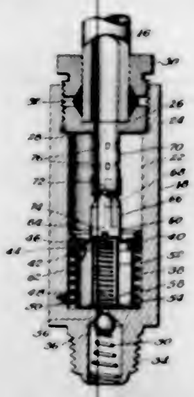
1. In a boom for a mechanism of the character described, comprising a rear portion adapted to be connected with a supporting structure, a forward portion extending upwardly with relation to said rear portion, and means



for mounting a dipper handle on said boom with its fulcrum point above the rear portion thereof and near the adjacent ends of the two portions thereof.

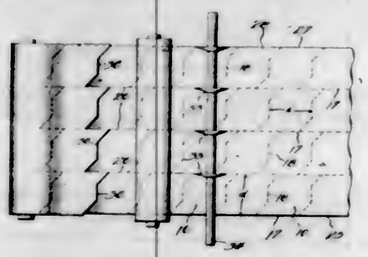
1,679,880. GRAIN DOOR FOR BOX CARS. JOSEPH A. SCHMITZ, Chicago, Ill. Filed Mar. 26, 1927. Serial No. 178,521. 4 Claims. (Cl. 20—30.)

1. A grain door for box cars comprising a series of boards extending horizontally across the door opening, a brace bar removably secured at its lower end to the floor of the car and extending upwardly and overlapping said boards, a horizontal cross bar intermediate the edges of adjacent boards, and means detachably connecting the brace bar to the cross bar.



1,679,881. HANGER ROD. HERBERT A. SIMPSON, East Lansing, Mich. Filed Oct. 5, 1925. Serial No. 60,582. 12 Claims. (Cl. 156—19.)

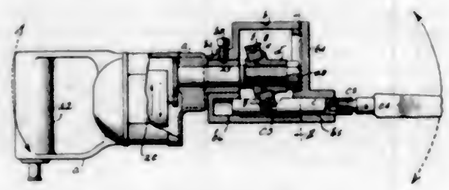
8. A hanger rod comprising a pair of telescoped sections, a threaded member fixed to one of said sections, an element frictionally engageable with the second section



and normally longitudinally movable with the first section, an element threaded for engagement with the said threaded member and connected to move the said friction element, and means including an expanding elemet effective upon a relative rotative movement of said sections at various positions of their longitudinal adjustment for causing the expanding element to move the friction element into locking engagement with the second section, continued relative rotation of the sections thereafter causing travel of the threaded element with respect to the threaded member and first section to positively and relatively longitudinally move the sections.

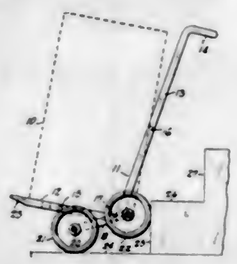
1,679,882. MEASURING VALVE. DONALD H. SWEET, Evanston, Ill., assignor to The Bassick Manufacturing Company, Chicago, Ill., a Corporation of Delaware. Filed July 30, 1926. Serial No. 125,980. 19 Claims. (Cl. 184—7.)

19. A lubricating system comprising source means for producing alternate periods of low and high pressure, a bearing connected to said source, a barrier forming a complete seal against the passage of lubricant, means permitting said barrier to yield under a pressure impulse and move the lubricant column in the direction of the bearing, and means for opening said barrier and re-establishing it at another point in the lubricant column more remote from the bearing.



1,679,883. MANUFACTURE OF SHINGLES. ALEXANDER S. SPEER, Buffalo, N. Y., assignor, by mesne assignments, to Certain-teed Products Corporation. Filed Feb. 13, 1922. Serial No. 536,282. Renewed Aug. 10, 1927. 20 Claims. (Cl. 164—68.)

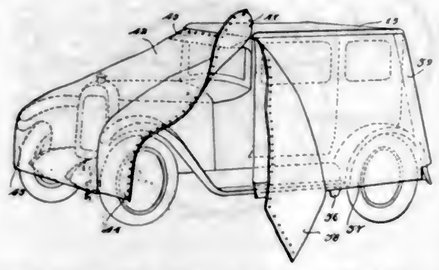
1. The method of making individual shingles of the type described from sheet roofing material which comprises slitting the sheet longitudinally into a number of strips of a width corresponding to one dimension of the individual shingles to be cut, and then severing each strip transversely at intervals along a line extending from edge to edge of said strip, part of which is oblique to the length of the sheet and forms the lower edge of the shingle.



15. Apparatus for making bias-cut shingles of the type described, comprising in combination, means for feeding a sheet of roofing material, a cutting device across the path of said material and adapted to sever said material transversely at intervals along a line, the general direction of which is less oblique than the obliquity of the cut of the individual shingles, said cutting device provided with a cutting edge adapted to cut said material to form the end and one side of a plurality of shingles, and means for cutting said material longitudinally to form the other side of said shingles.

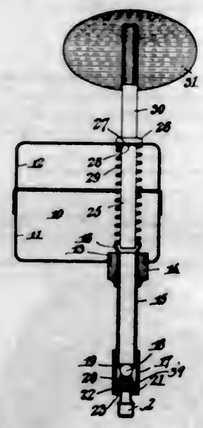
1,679,884. ATTACHMENT FOR DRILLS. HORACE T. THOMAS, Lansing, Mich. Filed Oct. 22, 1926. Serial No. 143,470. 5 Claims. (Cl. 29—73.)

1. The combination of a portable apparatus of the kind described having a spindle and means for rotating the same, a part adapted to carry a tool and reciprocate in the direction of the axis of said spindle, a wobble-plate on said spindle, a ring surrounding said plate, a friction bearing between said ring and plate, said ring engaging said part to reciprocate the same.



1,679,885. HAND TRUCK. BENJAMIN F. WALKER, Bridgeport, Conn. Filed Nov. 4, 1926. Serial No. 146,155. 5 Claims. (Cl. 280—29.)

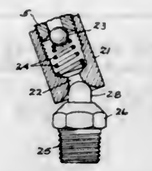
1. In a hand truck, a body for carrying the load, handles for said body, a carriage pivoted to the body, a support on the carriage for the body forwardly of said pivot to limit forward turning movements of the body about said pivot, and supporting wheels carried by the carriage forwardly and rearwardly of said pivot.



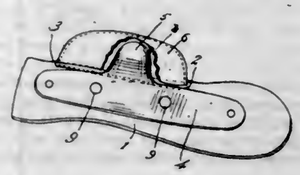
1,679,886. AUTO TOP AND COVER. JOHN K. WRIGHT, Detroit, Mich. Filed May 24, 1926. Serial No. 111,198. 1 Claim. (Cl. 296—136.)

An auto top and cover of the class described comprising: a vehicle top having a pair of longitudinally extending pockets formed at opposite sides and a pair of transversely extending pockets formed at opposite ends, said transversely extending pockets communicating at their ends with said longitudinally extending pockets; a plurality of ledges on said top overhanging said pockets, the interior of said pockets being accessible beneath said ledges; a roller mounted in each of said pockets; gear

wheels connecting said rollers for effecting a simultaneous rotation of each of said rollers; a crank for rotating said rollers from beneath said top; side curtains mounted on said longitudinally extending rollers, each of said side curtains having at its opposite edges tapered flaps, said flaps being foldable on the main body of said curtain preliminarily to rolling the same on said roller.



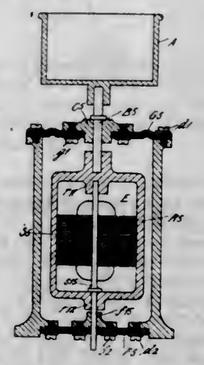
1,679,887. LUBRICATING APPARATUS. OSCAR ZERK, now, by judicial change of name, Oscar Ulysses Zerk, Cleveland, Ohio, assignor, by mesne assignments, to The Bassick Manufacturing Company. Filed Nov. 21, 1922. Serial No. 602,466. 16 Claims. (Cl. 221—47.4.)



1. A lubricating pistol comprising a lubricant container, a valve controlled outlet nozzle telescopically secured to and in open communication with said container, said nozzle including means for forming a sealed connection with a lubricant receiving nipple, and means to close the inner end of said nozzle and eject the lubricant trapped therein when said nozzle and container are telescoped.

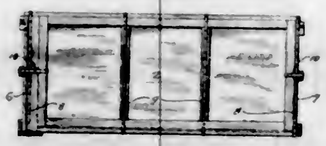
1,679,888. LUBRICATING APPARATUS. OSCAR U. ZERK, Cleveland, Ohio, assignor to Bassick Manufacturing Company, Chicago, Ill., a Corporation of Delaware. Filed Apr. 11, 1924. Serial No. 705,815. 5 Claims. (Cl. 221—47.4.)

1. Lubricating apparatus comprising a nipple element and a nozzle element, said nipple element terminating in a spherical end, the other element fitting outside said end and having a flaring mouth defined by rotating a curved line about the axis of said nozzle, the angle between the line and the axis, which measures the flare of the mouth increasing to a maximum at the end of the nozzle.



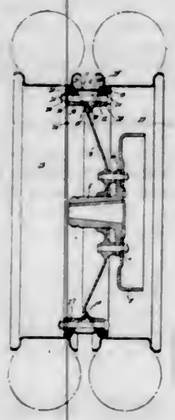
1,679,889. SHOE. EMMERICK ANDERSON, Dayton, Ky. Filed Mar. 7, 1924. Serial No. 697,656. 1 Claim. (Cl. 36—71.)

A turned shoe comprising in combination a sole with a shoe upper lasted to the sole, a shank piece secured in the shoe, a pocket formed of a stiffening member secured at its lower edge to the under edge of said shank piece and a complementary flexible portion secured at all of its edges to the stiffening member excepting at its lower edge thereby forming an inverted pocket, and an arch supporting plate having a tongue extending into said pocket, said plate secured to the under surface of said shank piece, and said shank piece and plate secured to said sole with rivets extending through said shank piece, plate and sole.



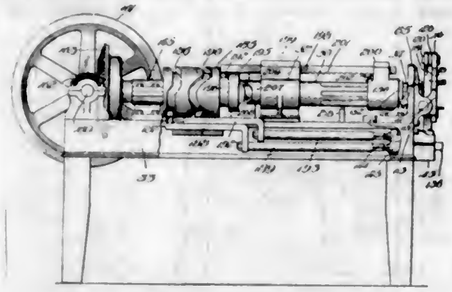
1,679,890. MODE OF SUPPORTING AND JOURNALING MOTORS AND HIGH-SPEED SHAFTS DRIVEN THEREBY. ROBERT ALEXANDER BALDWIN, Ashton-on-Mersey, England. Filed Sept. 14, 1927. Serial No. 219,547, and in Great Britain July 9, 1926. 3 Claims. (Cl. 172—36.)

1. In combination, an inner fixed stator member, an outer rotor member, a frame surrounding and enclosing said stator and rotor members, a bearing for supporting



said rotor and stator, and a flexible connection between said bearing and said frame, whereby the axis of the stator and rotor members may assume angular position in said frame during rotation under load.

1,679,891. BATHTUB SHIPPING CRATE AND COVER. PAUL M. BEES, Chicago, Ill., assignor to Cornell Wood Products Company, a Corporation of Wisconsin. Filed May 24, 1926, Serial No. 111,230. Renewed Jan. 12, 1928. 2 Claims. (Cl. 217—36.)



1. A bath-tub shipping and protecting device comprising a cover, an apron secured thereto to form a bath-tub protecting unit, a rear wall, a bottom wall and end walls secured to one another to form a second unit adapted to interfit with the first unit, and metal straps connecting the two units to completely enclose the bath-tub for shipment, said metal straps adapted to be cut at predetermined points to permit the second unit to be removed from the bath-tub leaving the first unit as a protective covering for the top and front faces of the bath-tub.

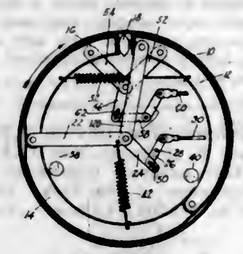
1,679,892. WHEEL AND RIM MOUNTING. JOSEPH V. BERTAUD, Detroit, Mich., assignor to Swedish Crucible Steel Company, a Corporation of Michigan. Filed May 13, 1927. Serial No. 190,975. 2 Claims. (Cl. 301—13.)

1. A wheel comprising a hub and felly portion, a web extending from the felly portion and embodying a circular and a tapered seat, a rim having a rib bearing at one side on the tapered seat, a spacer ring having a tapered circumferential seat bearing on the other side of said rib and a circular seat bearing on the circular seat of the web, a demountable ring bearing at one edge on the felly, said ring having a circular and a tapered seat, a second circular and tapered seat on the spacer ring, the former bearing on the circular seat of the demountable ring, a second tire rim having a rib engaged between the two latter tapered seats and means for drawing the four tapered seats toward each other to wedge the ribs between the two pairs of them and thereby support and secure the rims.

1,679,893. MACHINE FOR MAKING SHEET-METAL PIPE ELBOWS. FRIEDERICH BRUNE, Milwaukee, Wis. Filed Mar. 28, 1925. Serial No. 19,011. 12 Claims. (Cl. 153—69.5.)

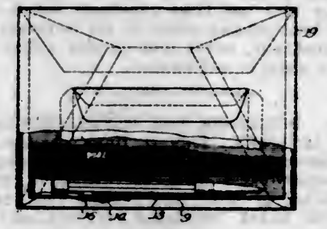
1. In a machine of the class described, a mandrel, a pair of clamping jaws cooperating therewith, said jaws being pivoted at a distance from each other and crossing each other intermediate their respective pivots and the mandrel, and means operating on the free ends of the jaws for opening and closing them.

1,679,894. X-RAY TUBE. GUSTAV BUCKY, New York, N. Y. Filed Sept. 22, 1925, Serial No. 57,820. Renewed Jan. 14, 1928. 3 Claims. (Cl. 250—35.)



2. An X-ray tube having a body with an opening, an apertured support, the marginal portion of which is anchored in said opening, and a pane of material readily pervious to X-rays, carried by said support and sealing said opening.

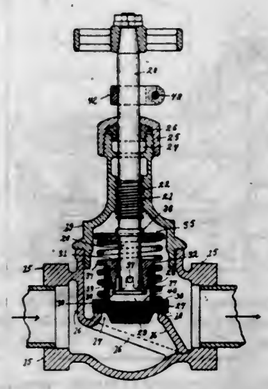
1,679,895. COMB FOR LONG BOBS. SIGNE CARLSON, Chicago, Ill. Filed Apr. 12, 1928. Serial No. 269,329. 2 Claims. (Cl. 132—22.)



1. A hair holder comprising two curved bars overlying each other and secured together at the middle by a spring hinge, the upper bar having fingers extending upwardly and then downwardly on the concave side, and the lower bar having fingers extending downwardly and then upwardly on the concave side and projecting past the free ends of the fingers on the upper bar when the holder is closed.

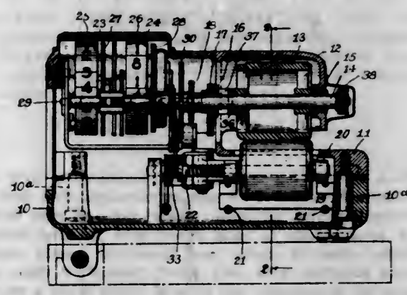
1,679,896. BRAKE. ADIEL Y. DODGE, South Bend, Ind., assignor to Bendix Brake Company, Chicago, Ill., a Corporation of Illinois. Filed Dec. 17, 1925. Serial No. 75,904. 31 Claims. (Cl. 188—78.)

1. A brake comprising, in combination with a drum, a friction device having a plurality of sections all engaging the same zone of the drum and effective in both directions of rotation of the drum, and brake-applying means for forcing the friction device against the drum, the friction device and the brake-applying means being so constructed and so arranged that at least one section of the friction device engages the drum when the drum is turning in one direction but does not engage it when it is turning in the opposite direction.



1,679,897. MAILING CONTAINER FOR PENCILS AND OTHER ARTICLES. CHARLES F. ELMORE, Chicago, Ill., assignor to Gaw-O'Hara Envelope Company, Chicago, Ill., a Corporation of Illinois. Filed Apr. 16, 1926. Serial No. 102,414. 2 Claims. (Cl. 206—46.)

1. A pencil container comprising a pair of side walls connected together at one edge only and spaced apart at said edge by an intervening transversely disposed back wall adapted to prevent the approach of said connected edges of the side walls, said wall being made of relatively stiff material and arranged to form an open ended container substantially triangular in cross section, said back wall being adapted for the attachment thereto of a pencil or the like, and means whereby a pencil may be secured to said back wall.

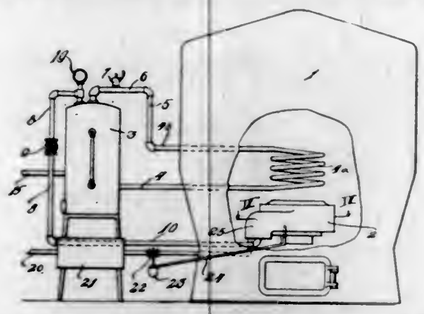


1,679,898. CHECK VALVE. ISRAEL B. GILBERT, Cincinnati, Ohio. Filed Apr. 12, 1924. Serial No. 706,208. 2 Claims. (Cl. 251—38.)

2. In a valve, a casing having a seat, a valve stem axially movable with respect to the seat upon rotation within the casing, a valve plug carried by the stem, and means of connection between the plug and stem to permit of a limited relative axial movement therebetween when the plug is in engagement with the seat, said means of connection comprising an interiorly threaded axially recessed portion in the plug at the opposite side from its face, a sleeve threadedly engaged in said recess and having longitudinal diametrically disposed slots, the end of the stem extending through said sleeve and provided with radially

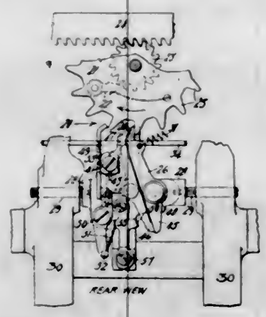
projecting shoulders engaging in said slots, a spring seat surrounding the stem and a coiled expansion spring having its opposite ends respectively engaging the spring seat and valve plug for normally projecting the plug from the end of the stem.

1,679,899. FABRIC-MEASURING MACHINE. HARRY T. GOSS, Rutherford, N. J., assignor to Cozzens Trading Company, Inc., New York, N. Y., a Corporation of New York. Filed July 13, 1920. Serial No. 395,932. 6 Claims. (Cl. 33—129.)



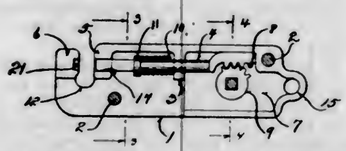
6. In a fabric measuring machine the combination with a measuring roller, of a long-measuring register, a short-measuring register, and mechanism, including shiftable gear-means, for driving either but not both simultaneously, from the measuring roller.

1,679,900. OIL-BURNING SYSTEM. FRANK HIGGINS and ARTHUR E. NORDSTROM, Princeton, Ill. Original application filed June 22, 1925, Serial No. 38,942. Divided and this application filed Feb. 7, 1927. Serial No. 166,415. 1 Claim. (Cl. 158—73.)



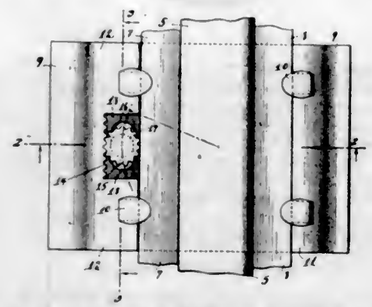
In an oil burning system, a furnace having a fire pot therein, a fuel nozzle in the fire pot, a coil positioned over the fire pot, a tank having an upper steam storage space and a lower water storage space connected by pipes to the top and bottom of the coil respectively, water flow controlling means adapted to maintain the level of the water in the coil below the top thereof to ensure a steam generating and superheating space in the upper portion of

the coil, the lower end of the coil being connected to the tank in the upper part of its water space to maintain a supply of relatively hot water to the coil, steam con-



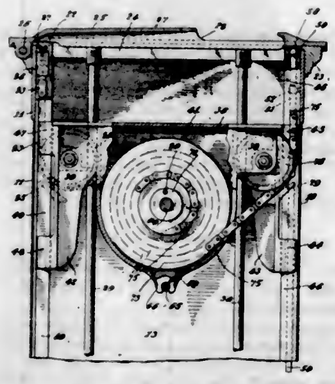
dult means extending from the tank to the nozzle, and means for feeding fuel to said nozzle for commingling with the steam.

1,679,901. TYPEWRITING MACHINE. WILLIAM F. HELMOND, Hartford, Conn., assignor to Underwood Elliott Fisher Company, New York, N. Y., a Corporation of Delaware. Filed Dec. 21, 1925. Serial No. 76,617. 13 Claims. (Cl. 197—88.)



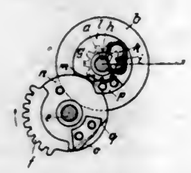
3. In a typewriting machine, the combination with a power-driven carriage, of an escapement-mechanism therefor, including two adjacent levers side by side and pivoted eccentrically to each other, said pivoting being sufficiently close to enable said levers to loosely slide upon and interfere with each other, permitting them to have limited movements, one of said levers being a stepping dog of the escapement-mechanism, and the other being an interfering idle lever, said stepping dog being driven by the carriage, and the movement of said stepping dog being limited by the action of the interfering lever, thereby arresting said carriage with a minimum of noise.

1,679,902. TIRE-CHAIN LOCK. WILLIAM F. HELWIG, Milton, Wis. Filed Jan. 29, 1927. Serial No. 164,607. 2 Claims. (Cl. 24—241.)



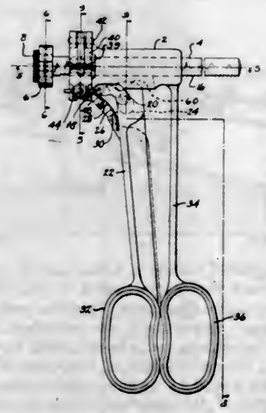
1. A tire chain lock comprising a relatively flat elongated member formed of two small plate-like portions and having together a hollow interior, said body portion having a notch at one end adapted to detachably receive a terminal link of the tire chain and having an aperture at the other end adapted to receive the other terminal link, a plunger slidably carried within said body portion and adapted to slide across said notch, a spring normally holding the plunger across said notch, a rock shaft projecting from said body portion, and rack and pinion mechanism connecting said rock shaft with said plunger, said rock shaft having a traverse aperture therethrough for the reception of a pin.

1,679,903. ANTICREEPING DEVICE FOR RAILWAY RAILS. EMIL F. HOLINGER, New York, N. Y., assignor to Chase Appliance Corporation, New York, N. Y., a Corporation of New York. Filed Jan. 12, 1928. Serial No. 246,204. 4 Claims. (Cl. 238—304.)



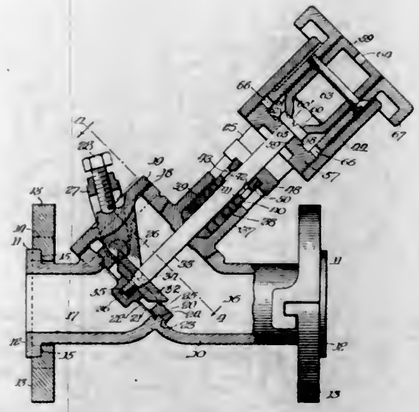
1. In an anticreeping device, a tie-plate adapted to support a rail, means on such plate for engaging the outer base-flange of such rail to hold the latter against lateral movement, a surface on said plate adjacent to and separated from the inner base-flange of said rail, a rolling member located in the space between said inner base-flange and said surface, adapted to engage frictionally with said inner base-flange and to increase such frictional gripping action by the movement of said rail longitudinally, and a stud on said rolling member received in a slot in said tie-plate.

1,679,904. DISPENSER FOR PAPER NAPKINS AND LIKE ARTICLES. JOHN O. HUNT, Brooklyn, N. Y., and GEORGE H. NORTH, Cranston, R. I., assignors to Independent Paper Mills, Inc., Brooklyn, N. Y., a Corporation of New York. Filed June 24, 1925. Serial No. 39,215. 27 Claims. (Cl. 312—61.)



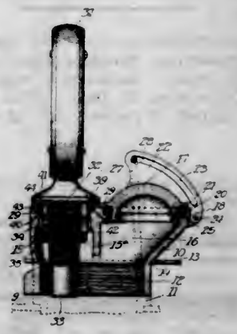
1. In a dispenser for paper napkins and like articles, a casing, a carriage comprising a platform, a motor housing integral therewith, and a spring winding motor within the housing, guides for directing the movement of the carriage, and a flexible winding member between the motor and the casing for advancing the carriage and a superimposed pile of paper napkins or like articles placed on the platform for maintaining the outermost article in position to be readily grasped and removed through the discharge opening in the casing.

1,679,905. RESETTING MECHANISM. ERNST KASSNER, Berlin, Germany. Filed June 18, 1926, Serial No. 116,770, and in Germany Apr. 17, 1926. 7 Claims. (Cl. 235—144.)



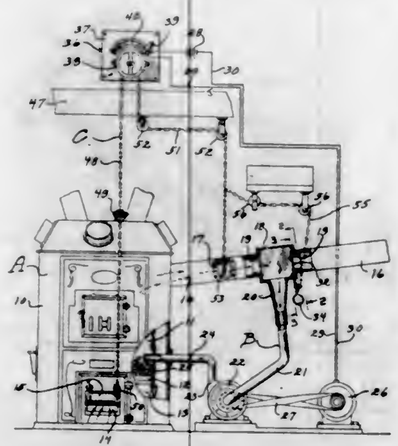
1. In a machine of the kind described, having number wheels, and means for turning the number wheels into any desired positions, a restoring member for turning the wheels into their zero positions, and means for positively moving the restoring member in one direction through a predetermined angle beyond its normal position during its restoring operation and means for thereupon rigidly engaging it and positively moving it in the opposite direction back into its normal position.

1,679,906. METAL-DRAWING APPARATUS. DELAMAR C. KINNEAR, Waterbury, Conn., assignor to The American Brass Company, Waterbury, Conn., a Corporation of Connecticut. Filed Mar. 23, 1927. Serial No. 177,529. 8 Claims. (Cl. 205—17.)



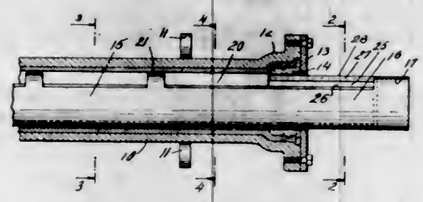
1. In a device of the character described, the combination of a support, a slide movably mounted on said support and provided with a series of teeth, a clamp and a die, one mounted rigidly on said support and the other on said slide, a pawl engaging said slide, and means carried by said support for reciprocating said pawl so as to successively engage said teeth and move said die and clamp away from each other.

1,679,907. VALVE. HARRY E. LA BOUR, Homewood, Ill. Filed Mar. 18, 1926. Serial No. 95,519. 16 Claims. (Cl. 251—156.)



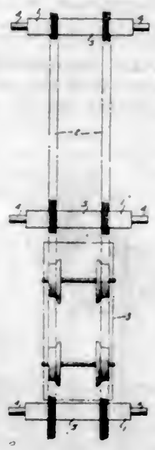
1. In a valve, a casing, valve mechanism including a removable valve seat disposed therein, an opening in said casing adjacent said valve mechanism, a cover for said opening including arm means on the under side of said cover for contacting with said valve seat to hold the same in place, and means for simultaneously clamping said cover and said valve seat in place.

1,679,908. MOTOMETER MOUNTING AND LOCK. WARREN MCARTHUR, Jr., Phoenix, Ariz., assignor to McArthur Brothers Mercantile Co., Phoenix, Ariz., a Corporation of Arizona. Filed Apr. 6, 1925. Serial No. 20,909. 12 Claims. (Cl. 220—24.)



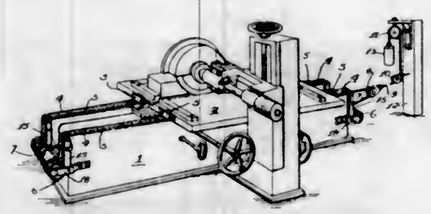
1. The combination of a radiator filling spout having an opening, a motometer having a stem adapted to project through said opening, means on said stem permitting the motometer to be applied while the spout is attached to the radiator and preventing removal of the motometer from the spout except when the spout is detached from the radiator.

1,679,909. SMOKE CONSUMER. GEORGE MICHAEL and HURSHELL MICHAEL, Benton Harbor, Mich. Filed Apr. 25, 1927. Serial No. 186,427. 7 Claims. (Cl. 110—49.)



1. In a device of the class described, the combination with a furnace including a fire box provided with a smoke pipe having a check draft, of return means connected in the smoke pipe past the check draft and opening into the fire box and including a blower and drive means therefor, a pivotally mounted damper plate for selectively causing the products of combustion to circulate through said return means or closing communication therethrough and opening communication through the smoke pipe, actuating means for simultaneous opening of the check draft upon movement of the damper plate to a position for closing communication through the return means, and means connected between the actuating means and said blower drive means for setting the drive means in motion upon movement of the actuating means to a position for closing of the check draft and movement of the damper plate for opening communication through the return means.

1,679,910. CENTRIFUGAL CASTING MACHINE. WILLIAM H. MILLSPAUGH, Sandusky, Ohio, assignor to The Paper and Textile Machinery Company, Sandusky, Ohio, a Corporation of Ohio. Filed Mar. 4, 1926. Serial No. 92,106. 9 Claims. (Cl. 22—65.)

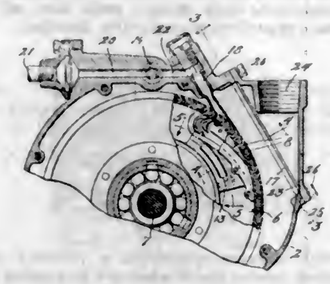


1. A dumper trough for centrifugal casting machines comprising an elongated hollow body having a longitudinally extending pouring slot therein and a filling opening adjacent one end of the body, one edge of said filling opening being displaced circumferentially from the corresponding edge of the pouring slot.

1,679,911. TOY RAILROAD. JOHN A. MOFFITT, New Haven, Conn. Filed Mar. 26, 1927. Serial No. 178,549. 89 Claims. (Cl. 238—10.)

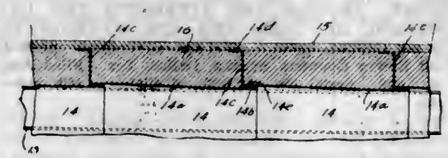
36. A rail for use in a toy railroad, made from a wire bent about the longitudinal center line of the rail.

1,679,912. AUTOMATIC SLIDE COVER. JOHN B. MONDLOCH, Cold Spring, Minn., assignor of one-half to Cold Spring Granite Company, Cold Spring, Minn., a Corporation of Minnesota. Filed Aug. 3, 1925. Serial No. 47,852. 3 Claims. (Cl. 90—34.)



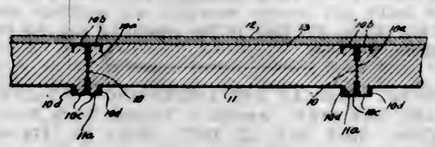
1. In a machine having a reciprocating part with an upwardly-exposed runway on which it travels, a pair of flexible aprons extending from opposite ends of the reciprocating part respectively for covering the exposed portions of the runway; a take-up roller for each apron around which the end portion of the apron is wrapped in direction to be wound up as the reciprocating part moves toward the end of the runway which the apron covers, and means interconnecting the take-up rollers for winding up one apron as the other unwinds.

1,679,913. TURBINE CONSTRUCTION. LEWIS H. MORRILL, Harvey, Ill., assignor to The Buda Company, Harvey, Ill., a Corporation of Illinois. Filed Mar. 3, 1927. Serial No. 172,292. 11 Claims. (Cl. 253—53.)



1. In a turbine construction, a casing, a turbine wheel mounted therein, said casing having an opening and

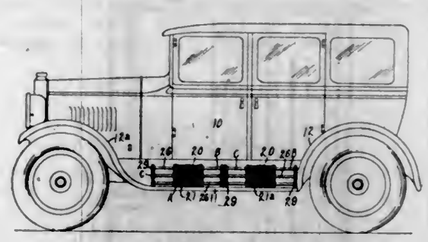
closure therefor adjacent the periphery of said wheel, and return buckets and mounting therefor within said



casing, said mounting including means accessible through said opening for permitting the removal of said buckets.

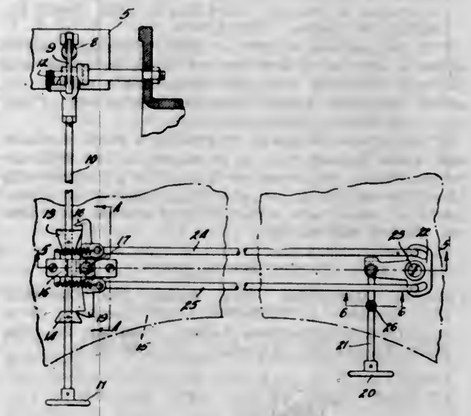
1,679,914. FLOOR AND CEILING CONSTRUCTION. RICHARD MURRAY, New York, N. Y. Filed May 20, 1926. Serial No. 110,396. 7 Claims. (Cl. 72—70.)

1. A ceiling construction for buildings fashioned from a plurality of interlocking members adapted to extend from one wall to another, said members being formed from strips of sheet metal, one side of said strips being folded upon itself to form a projecting flange of two thicknesses of the metal of said strip, and a part extending substantially at right angles to one face of said strip, and a flange at the free edge of said part, said part forming a joist member upon which the floor surface is adapted to be supported.



1,679,915. CEILING CONSTRUCTION. RICHARD MURRAY, New York, N. Y. Filed May 21, 1926. Serial No. 110,672. 5 Claims. (Cl. 72—70.)

1. In a ceiling construction, the combination with spaced and parallel floor joists of T-beam cross sectional form, of strips of sheet metal transversing the spaces between said joists and extending longitudinally of the lower end portions thereof, and resting upon the lower flanges of said joists, and with the lower faces of said strips flush and parallel with the lower faces of said joists.

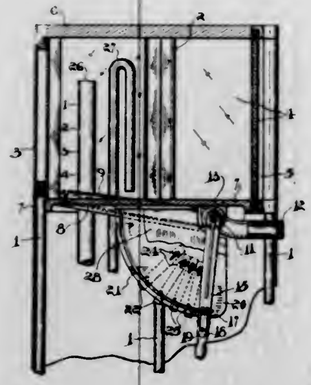


1,679,916. COMBINATION RUNNING-BOARD FOOT-PAD AND LUGGAGE CARRIER. NEAL NIELSEN, Spencer, Iowa. Filed Nov. 29, 1926. Serial No. 151,435. 6 Claims. (Cl. 280—164.)

6. A combination running board foot pad and luggage carrier comprising a running board foot pad plate, means for hinging the plate to a foot board to move from horizontal position lying on the foot board to vertical position along the outer edge of the foot board, and an extensible luggage carrier member slidably mounted on said plate and having its larger portion received be-

tween the plate and the running board when the plate is lying on the foot board and adapted to be extended substantially in alignment with the plate when the plate is raised.

1,679,917. TWO-HAND CONTROL. ROBERT C. PAULY, Cincinnati, Ohio, assignor to The American Laundry Machinery Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Feb. 12, 1926. Serial No. 87,846. 7 Claims. (Cl. 192—131.)

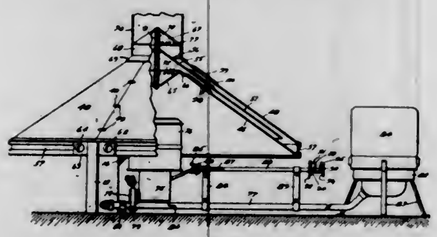


2. In a machine of the character described, a hand operable control member movable in one direction to produce one machine operation and movable in the opposite direction to produce the reverse machine operation, a pair of latch means for said control member, and a single hand operable control member for both of said latch means, said latch control member being movable in one direction to control one latch means and being movable in the opposite direction to control the other latch means.

1,679,918. LIQUID-DISPENSING APPARATUS. FREDERICK A. PFLUG, Kitchener, Ontario, Canada. Filed Dec. 10, 1925. Serial No. 74,570. 5 Claims. (Cl. 221—100.)

1. Liquid dispensing apparatus comprising a chamber shaped as a rectangular right prism; and a draw-off tube journalled at the bottom of the chamber adjacent to

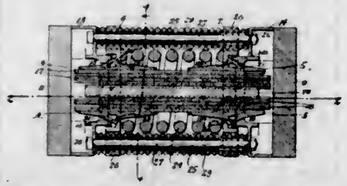
one corner and having its mouth adjacent the diagonally opposite corner when in its lowermost position, the tube being adapted to swing in the vertical plane in which



the aforesaid corners lie, whereby may be used a relatively long tube compared to the cross-sectional area of the chamber.

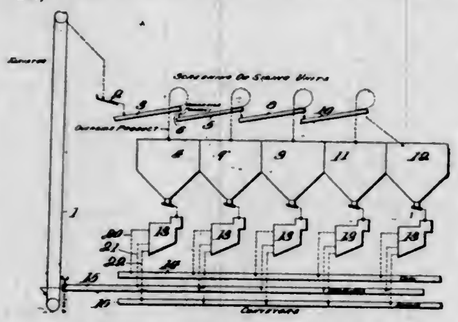
1,679,919. INSECTICIDE AND FUNGICIDE. FRANCIS M. ROGERS and CLAUDE P. MCNEIL, Whiting, Ind., assignors to Standard Oil Company, Whiting, Ind., a Corporation of Indiana. Filed May 3, 1926. Serial No. 106,549. 6 Claims. (Cl. 167—6.)

1. A composition capable of readily forming a stable emulsion with water and effective as an insecticide and fungicide for plants and seeds, comprising a mineral oil, an oil dispersible copper compound and a salt of sulfonic acid derived from mineral oil.



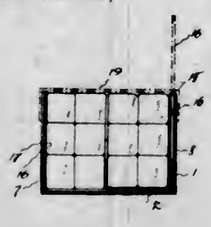
5. A composition capable of forming a stable emulsion with water and effective as an insecticide and fungicide for plants and seeds, comprising a salt of a preferentially oil soluble sulfonic acid derived from mineral oil, a compound of copper with a sulfonic acid derived from mineral oil, and mineral oil.

1,679,920. BROODER. MARC RESEK, East Cleveland, Ohio, assignor to Perfection Stove Company, Cleveland, Ohio, a Corporation of Ohio. Filed May 21, 1924. Serial No. 714,761. 9 Claims. (Cl. 119—32.)



1. In a brooder, the combination of a combustion device, and a hood disposed over said device and comprising inner and outer walls that are spaced apart, said inner and outer walls having, respectively, inlet and outlet openings, a partition intermediate said walls and separating the respective openings thereof, a deflector applied to the inner wall and extending across its opening, the deflector having a series of holes, and a cap surmounting the outer wall over its opening, said cap also having a series of holes.

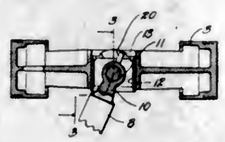
1,679,921. SHOCK ABSORBER. CLIFTON W. SHERMAN and JOSEPH M. HALL, Hamilton, Ontario, Canada, assignors to Hall Draft Gear Corporation, Buffalo, N. Y., a Corporation of New York. Filed Feb. 24, 1927. Serial No. 170,611. 9 Claims. (Cl. 213—36.)



1. A shock absorber comprising a plurality of sets of intercalated friction plates which are corrugated lengthwise and have their corrugations fitting into one another, means for moving said plates lengthwise relative to each other, and means for producing a lateral pressure of said plates against each other, including shoes provided on their inner sides with longitudinal corrugations engaging with the corrugations on the exterior of the outermost friction plates.

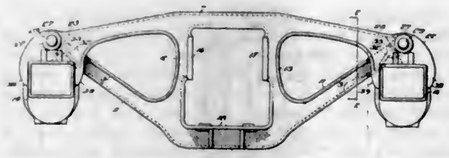
1,679,922. PROCESS AND APPARATUS FOR DRY MILLING OF COAL AND ITS BY-PRODUCTS. HENRY MOORE SUTTON, WALTER LIVINGSTON STEELE, and EDWIN GOODWIN STEELE, Dallas, Tex. Filed Aug. 15, 1923. Serial No. 657,567. 6 Claims. (Cl. 209—44.)

1. A continuous process for dry separating the elements of a mass, which consists in sizing and separating the elements into clean, middlings, and refuse products and finally and directly returning said middlings first to said sizing and then to the separating step for the purpose described.



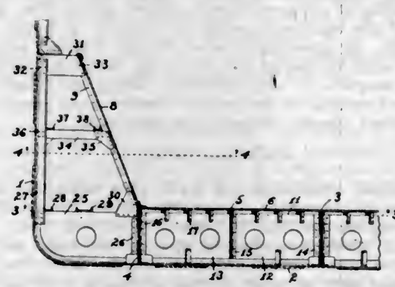
1,679,923. DISPLAY AND DISPENSING CONTAINER AND THE LIKE. ARNOLD J. TANNER, North Haven, Conn. Filed Mar. 12, 1927. Serial No. 174,743. 5 Claims. (Cl. 206—44.)

1. A folding container as described having a body open at the top and front constituting a receptacle; an extension from the back wall of said body adapted



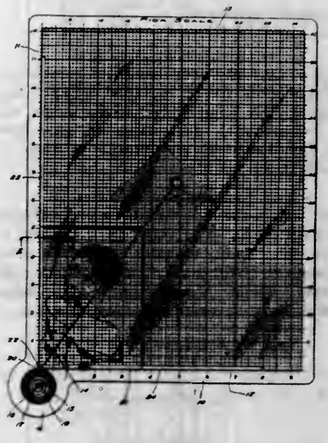
to be folded into said receptacle to form a lining for said back wall; a separate removable panel forming a closure means for the open front of the container and means for supporting said panel at the back of the container to permit utilization thereof as a display card.

1,679,924. INTERNAL-COMBUSTION ENGINE. JOHN OTTO ALMEN, Seattle, Wash. Filed May 21, 1923. Serial No. 640,388. 3 Claims. (Cl. 123—58.)



2. In an engine of the class described, a shaft having an inclined journal, a piston mounted to reciprocate parallel with the shaft and having a yoke provided with a transverse bore, a rocker rotatable on the journal and having an arm extended therefrom, a bearing fitted slidably and rotatably in the piston and pivotally attached to the rocker arm and having guide surfaces therein and means on the arm adapted to engage the said guide surfaces whereby the movement of the rocker is confined to and guided in its natural path.

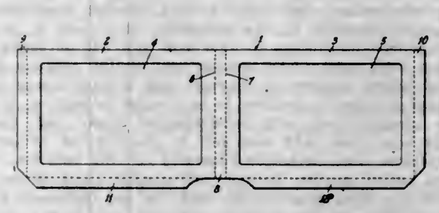
1,679,925. TRUCK SIDE FRAME. DONALD S. BARROWS, Rochester, N. Y., assignor to The Symington Company, New York, N. Y., a Corporation of Maryland. Filed Mar. 16, 1925. Serial No. 15,857. 21 Claims. (Cl. 105—204.)



1. A cast truck side frame comprising flanged compression and tension members with a non-rigid connection between the ends thereof.

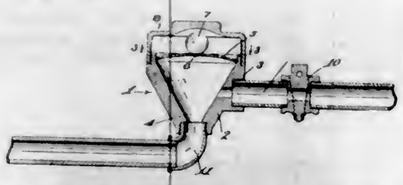
1,679,926. CHANNEL CONSTRUCTION FOR THE SIDES AND TOPS OF TANKS OF VESSELS. WILFORD G. BARTENFELD, Lorain, Ohio. Filed Aug. 2, 1927. Serial No. 210,082. 10 Claims. (Cl. 114—79.)

1. In a channel construction for the sides and tops of the tanks of vessels, the combination with channels forming the sides of the tank, of channels forming the top of the tank, floor plates, and the channels forming the top of the tank having their flanges resting upon the floor plates.



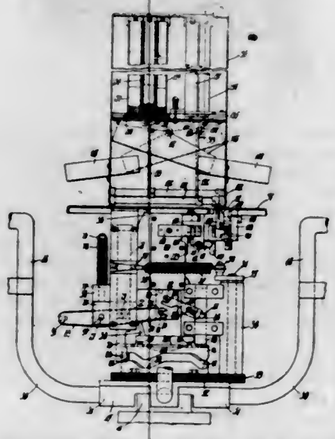
1,679,927. MEASURING DEVICE. KENNETH D. BELL, South Bend, Ind., and ERNEST MEINZINGER, Dearborn, Mich. Filed Dec. 23, 1926. Serial No. 156,595. 7 Claims. (Cl. 33—76.)

1. A device of the class described comprising a transparent base having indicia thereon dividing said base into rectangular sections, a housing secured to said base, and a flexible straight edge mounted in said housing and operable to be withdrawn from said housing diagonally of said base to intersect said indicia.



4. In a device of the class described, a transparent base, there being two scales on said base dividing the same into rectangular sections, a flexible straight edge pivoted on said base adjacent one corner thereof and adapted to extend diagonally across said scales to intersect said sections, and there being a slot formed in said base at the edge of one of said scales, one of the edges of said slots being in line with the pivot of said straight edge.

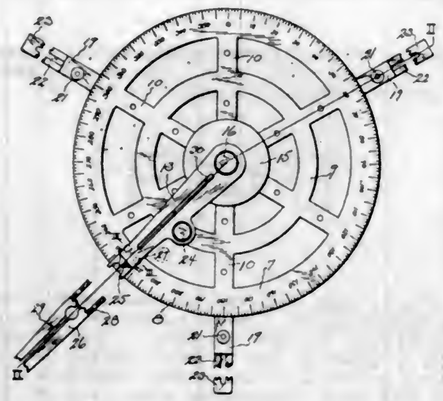
1,679,928. SLIDE HOLDER. WILFRED T. BIRDSALL, Montclair, N. J., assignor to Trans-Lux Daylight Picture Screen Corporation, New York, N. Y., a Corporation of Delaware. Filed Apr. 16, 1926. Serial No. 102,596. 5 Claims. (Cl. 88—26.)



1. A slide holder comprising two plates formed of one piece of material folded over to bring said plates substantially parallel to each other to receive a slide therebetween, said plates each having overlapping flanges along certain of their edges and disposed substantially at right angles to said plates, and means for securing said flanges together to form sides of a recess adapted to receive a slide therein.

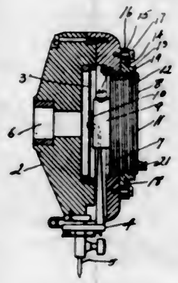
1,679,929. AUTOMATIC VIBRATING POWER SHUT-OFF. ARTHUR H. BRANDON, Los Angeles, Calif. Filed Sept. 7, 1926. Serial No. 134,075. 8 Claims. (Cl. 137—139.)

1. A pipe shut-off comprising in combination pipes having a valve, a freely movable weight, means supporting same, the supporting means being adapted to drop the weight on a disturbance in any direction, or shock in any direction, and means to close the valve by the weight.



1,679,930. COIN-CONTROLLED AND CHANGE-MAKING TURNSTILE APPARATUS. DANIEL L. CHANDLER, Boston, Mass., assignor, by mesne assignments, to William H. Whitcomb, Newton, Mass. Filed Jan. 11, 1924. Serial No. 685,581. 42 Claims. (Cl. 194—69.)

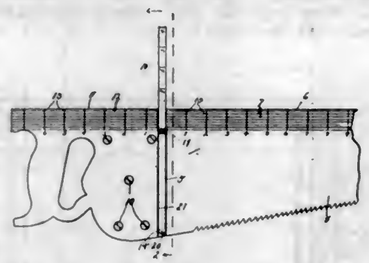
1. A coin controlled and change-making turnstile apparatus provided with a coin slot and having, in combination, a rotary member, locking means embodying a reciprocatory slide adapted to be engaged by and to prevent said rotary member from being rotated beyond a predetermined angle and manually operable mechanism rendered operable by the depositing of a coin of predetermined dimensions in said coin slot out of engagement with said rotary member and by the rotation of said rotary member to operate said locking means to allow said rotary member to be rotated through an angle greater than said predetermined angle and feed said coin from said coin slot to the interior of said apparatus and mechanism operated by the rotation of said rotary member through said greater angle to eject from the apparatus change equal to the difference between the coin deposited in the coin slot and a coin of predetermined denomination.



1,679,931. DEGREE COMPASS. ARLEIGH G. COVELL, Corunna, Mich. Filed Mar. 15, 1926. Serial No. 94,862. 3 Claims. (Cl. 33—75.)

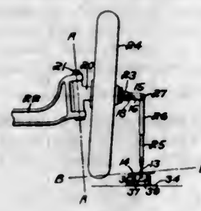
1. A degree compass comprising a scale disk having degree markings on the face thereof around the outer periphery, a pointer pivotally supported at the center of said disk, a tapped rivet, said pointer being supported for rotation by said tapped rivet, an adjustable centering pin in said tapped rivet, the head of said rivet adjacent the

work engaging end of said pin being dome-shaped to cooperate therewith in centering said scale disk in the operative position.



1,679,932. ADJUSTABLE COMBINED SOUND BOX AND RADIOPHONE. CHARLES J. DEL MARMOL, Philadelphia, Pa. Filed Aug. 1, 1924. Serial No. 729,470. 3 Claims. (Cl. 179—100.1.)

1. The combination with a reproducer including a casing having openings in opposite faces, one of which forms a communication between the interior of the reproducer casing and a horn, a diaphragm and a stylus mounting, of a magnet element located in the other opening of the reproducer casing for coaction with the diaphragm, an adjusting member having threaded engagement with the magnet element, means to rotatably mount said members on the reproducer casing, and means to prevent rotation of the magnet element while permitting movement thereof relative to the diaphragm.

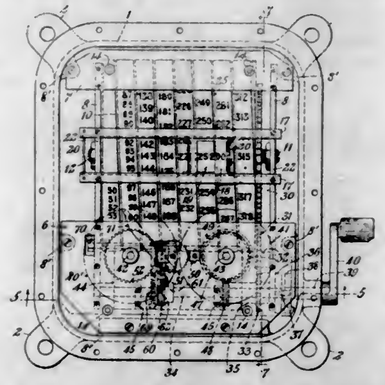


1,679,933. COMBINATION SAW AND SQUARE. WILLIAM V. DORSANEO, Devon, Pa. Filed Dec. 9, 1927. Serial No. 238,792. 2 Claims. (Cl. 7—13.)

1. A combination saw and square, comprising, in combination, a saw blade having a straight back edge and provided with an up-set portion to form a pocket at the back edge, said saw also having measures delineated thereon, a handle fixed to the blade and having an inner edge at right angles to the back edge of the blade, said handle having a recess in its inner edge on one side of the blade, said recess alining with the pocket, and an extensible arm hinged to the handle for insertion in the recess when in a closed position and for registration with

the pocket when in an open position, the walls of said pocket positively positioning the extensible arm at right angles to the back of the blade.

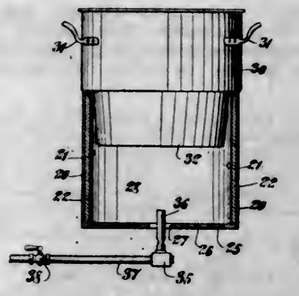
1,679,934. GEOMETRIC INSTRUMENT. JOHN F. DUBY, Dorchester, Mass. Filed Oct. 6, 1925. Serial No. 60,803. 17 Claims. (Cl. 33—203.)



1. Instrumentalities for measuring the angularity of the axis of the steering gear king-pin of a land vehicle with reference to a floor or other body having a plane surface, comprising in combination, a pointer, means for securing said pointer to the steering knuckle whereby said pointer may be moved with said steering knuckle in an arc about the axis of the king-pin, and means for utilizing the plane of said arc to ascertain the angular position of the axis of said king-pin with reference to said surface.

1,679,935. TREATMENT OF CELLULOSE DERIVATIVES. GEORGE HOLLAND ELLIS, HENRY CHARLES OLPIN, and WILLIAM BERTRAM MILLER, Spondon, near Derby, England, assignors to Celanese Corporation of America, a Corporation of Delaware. Filed Aug. 15, 1927, Serial No. 213,214, and in Great Britain Sept. 30, 1926. 14 Claims. (Cl. 8—5.)

1. Process for dyeing materials comprising cellulose acetate, comprising applying to the materials a nitro derivative of a compound containing at least two aryl radicles linked together by at least one linkage which is at the most only partly constituted by nitrogen.

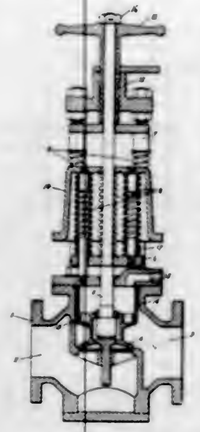


1,679,936. RANGE CONVERTER. HANNIBAL C. FORD, Jamaica, N. Y., assignor to Ford Instrument Company, Inc., New York, N. Y., a Corporation of New York. Filed Aug. 16, 1918. Serial No. 250,227. 6 Claims. (Cl. 235—61.5.)

3. In an instrument for indicating corresponding values of two quantities one of which varies non-uniformly with respect to the other, a rotatable member having a series of equally spaced graduations thereon representing values of one of the quantities, a cylindrical rotatable member provided with a helically disposed series of graduations representing values of the other quantity, said graduations being unequally spaced in accordance with the non-uniform variation of the first quantity with respect to said other quantity, means associated with one of the members for indicating values of the quantities shown

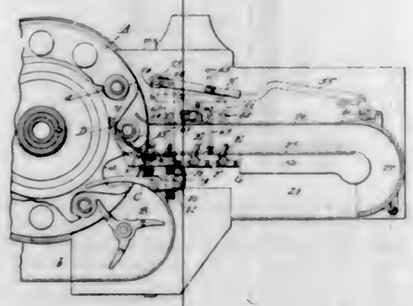
thereon corresponding to values of the quantities shown by the other member and means whereby the members and indicating means may be operated in unison.

1,679,937. HEATER. FRANKLIN GRADY, New York, N. Y. Filed June 22, 1925. Serial No. 38,772. 1 Claim. (Cl. 126—39.)



In a heater of the character described the combination of a casing, said casing comprising an outer shell and an inner shell, insulating material between the shells, a bottom wall for the casing containing an opening for the inflow of air, a burner located to direct its heat through said opening into said casing, said bottom wall also having a plurality of other openings for the discharge of air after having performed its function, a wall dividing said casing into two chambers, and a top for said casing, said insulation extending throughout the side walls to insulate both the lower and upper chambers, a valved vent at the upper part of the upper chamber, and a door in one side wall of the upper chamber.

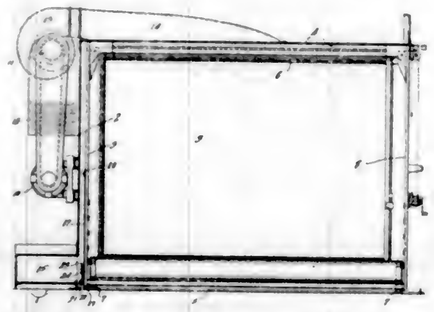
1,679,938. FLUID-PRESSURE RELIEF VALVE. JAMES LEWIS KIMBALL, Beverly, Mass., assignor to Ruggles-Klingemann Manufacturing Company, Salem, Mass. Filed Jan. 10, 1927. Serial No. 160,172. 6 Claims. (Cl. 137—139.)



1. In a fluid pressure relief valve comprising a valve structure having an inlet and an outlet, a valve disc for normally preventing fluid pressure flow through said valve, a plurality of pressure counteracting springs divided into an inner and an outer group, overlapping each other, a cylinder surrounding the inner group, an upper inturned

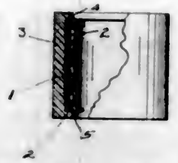
flange on said cylinder engaging the upper end of the inner group, and a lower outturned flange engaging the lower end of the outer group, a spring plate and means

to adjust said plate to collectively adjust the tension on both the inner and outer group uniformly to vary the pressure setting of said valve.



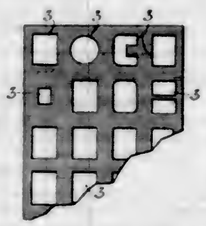
1,679,939. BOTTLE-ADVANCING MECHANISM. FRANCIS R. MAW, Buffalo, N. Y., assignor to Rice & Adams Corporation, Buffalo, N. Y. Filed Feb. 6, 1924. Serial No. 690,996. 28 Claims. (Cl. 198—22.)

1. The combination of a slidable bottle feed member, a lever connected with said member for actuating the same, a connecting rod for swinging said lever, a pair of cranks for actuating said connecting rod, and means for varying the axis of one of said cranks relatively to the fulcrum of said lever to change the throw of said feed member.



13. In a combined filling and capping machine having a rotary bottle filling mechanism and a capping mechanism, the combination of a deflector for removing bottles from said rotary filling mechanism, a pair of guide bars between which the bottles are passed after leaving said deflector, and which are disconnected from said deflector and means for simultaneously adjusting said guide bars towards and from each other and for moving said deflector to maintain the same in operative relation to said guide bars to enable the machine to operate on bottles of different sizes.

1,679,940. DAMPER FOR BLANKET AND CURTAIN DRYING MACHINES. JOHN E. MCCARTHY, Cincinnati, Ohio, assignor to The American Laundry Machinery Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Sept. 28, 1927. Serial No. 222,675. 5 Claims. (Cl. 34—40.)

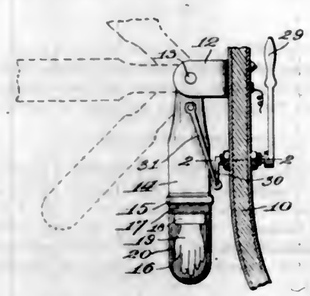


1. Drying apparatus, comprising a drying room, a stretcher frame movable into and out of said room through an opening therein and having a member adapted to close said opening when moved to outer position, said member being perforated, a damper movable on said member to open or close said perforation, and cam means arranged to control said damper movement dependent upon said movement of said frame.

1,679,941. STEERING-COLUMN BUSHING. FRED C. MORRIS, San Francisco, Calif. Filed Dec. 21, 1927. Serial No. 241,520. 3 Claims. (Cl. 308—238.)

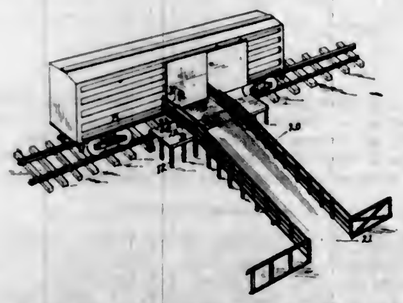
1. A bushing for motor car steering wheels comprising a bushing knurled inside and outside, a fabric bushing within the knurled bushing, and a rubber covering for the knurled bushing.

1,679,942. METHOD OF PREPARING LARGE ASSEMBLED NEGATIVES FOR PHOTOREPRODUCTION WORK. ALFRED J. NEWTON, Rochester, N. Y., assignor to Eastman Kodak Company, Rochester, N. Y., a Corporation of New York. Filed June 28, 1927. Serial No. 202,141. 1 Claim. (Cl. 95—79.)



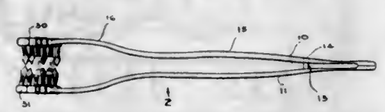
In the method of preparing large assembled negatives for photo-reproduction work, the steps of coating a glass plate with a waterproof lacquer which is opaque to actinic light, can be cut without chipping, and can be stripped from the glass, cutting and stripping said coating from separate areas to leave the latter transparent but surrounded by a mask of said coating, and attaching film negatives over said areas, said negatives being cut at least large enough to cover said areas.

1,679,943. PROCESS FOR REDUCING THE VISCOSITY CHARACTERISTICS OF CELLULOSE ETHERS AND PRODUCTS THEREOF. CHAUNCEY U. PRACHEL and LEONARD E. BRANCHEN, Rochester, N. Y., assignors to Eastman Kodak Company, Rochester, N. Y., a Corporation of New York. Filed Dec. 21, 1925. Serial No. 76,888. 10 Claims. (Cl. 260—152.)



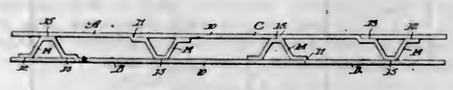
1. The process of treating cellulose ether which comprises acting thereon with an acid until the viscosity characteristics of said cellulose ether are lowered at least one-third.

1,679,944. AUTOMOBILE SIGNAL. JOHN F. RAUSCHELBACH, Los Angeles, Calif. Filed Apr. 20, 1927. Serial No. 185,158. 4 Claims. (Cl. 116—48.)



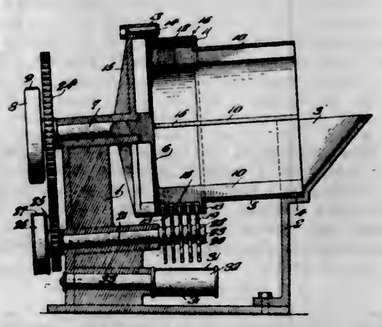
1. In a direction indicating signal for automobiles, a bracket adapted to be secured to the side of a motor vehicle, an arm pivotally mounted on said bracket for vertical swinging movement, a hollow box-shaped member formed in a single piece from translucent material carried by the outer end of said arm, the side walls of which hollow member are substantially parallel, the centrale area of each side wall of said hollow member bearing the representation of an open hand and that portion of the side wall of the hollow member that surrounds the representation of said open hand being distinctively colored.

1,679,945. MOVABLE PLATFORM FOR UNLOADING STOCK. FRANK RIEDER, Huntington Park, Calif. Filed Sept. 8, 1925. Serial No. 55,055. 2 Claims. (Cl. 119—82.)



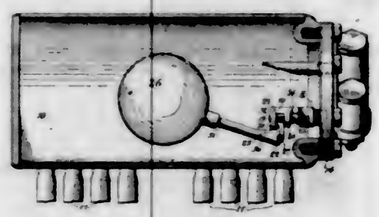
1. A car loading and unloading platform, comprising a stationary platform and a movable platform mounted thereon, adapted to be projected beyond the edge of the stationary platform, braces pivoted to the stationary platform adapted to be swung outwardly therefrom to support the projecting ends of the movable platform, spring means for urging the braces into outermost position and flexible elements connecting said braces to the movable platform whereby when the movable platform is moved into its retracted position the braces will be swung against the side of the stationary platform.

1,679,946. DUPLEX TOOTHBRUSH. GUY M. RUFF, Los Angeles, Calif. Filed June 8, 1927. Serial No. 197,470. 2 Claims. (Cl. 15—167.)



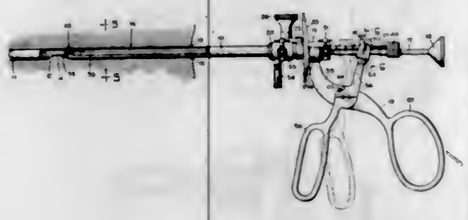
1. A toothbrush comprising a pair of handles, an inclined flat portion having a groove thereon on the ends of each of said handles, brush backs having bristles embedded therein, U-shaped wire clips attached to said backs and extending outwardly therefrom, said flat portion being receivable between the U-shaped wire clips and said backs, certain of said wire clips resting in said grooves.

1,679,947. WALL BOARD. HAROLD C. SANBORN, Chicago, Ill. Filed Dec. 11, 1926. Serial No. 154,101. 5 Claims. (Cl. 72—16.)



1. A strip of wall board having a thin main portion bounded by two parallel planes, parallel edges on said strip, one of said sides being depressed the depth of said strip so as to receive the other side of the next strip in overlapping relation, and means on said strips for spacing two of said strips when placed back to back.

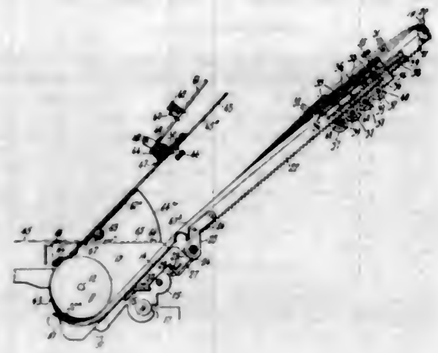
1,679,948. TOBACCO-FEEDING MECHANISM. WALTER H. SCHUSSLER, Philadelphia, Pa. Filed May 8, 1926. Serial No. 107,630. 3 Claims. (Cl. 131—39.)



1. Tobacco feeding mechanism comprising a revoluble drum having its axis of rotation inclined to the horizontal and having a discharge opening at its lower end, and means to remove tobacco from said opening.

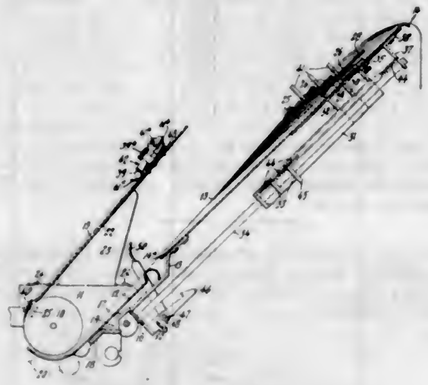
1,679,949. FLOAT-VALVE MECHANISM. FRANKLIN G. SLAGEL, Buffalo, N. Y., assignor to Fedders Manufacturing Company, Inc., Buffalo, N. Y., a Corporation of New York. Filed July 5, 1927. Serial No. 203,306. 5 Claims. (Cl. 137—104.)

3. A float valve mechanism comprising a body having a passage provided at its front end with a valve seat, a bracket projecting forwardly from the upper front part of said body and provided at its front end with a depending supporting arm and on its intermediate part with a depending guide arm, a valve stem guided on said guide arm to move axially in line with said seat and provided at its rear end with a valve movable toward and from said seat, an elbow lever pivoted at its elbow on said arm and having a rear arm projecting upwardly from said pivot and connected with the front end of said valve stem and a front arm projecting forwardly from said pivot, a float mounted on said front arm, and an adjustable screw stop arranged in said supporting arm and adapted to arrest the forward movement of said valve stem.



1,679,950. METHOD AND APPARATUS FOR SURGICAL RESECTION. MAXIMILIAN STERN, New York, N. Y. Filed Dec. 18, 1925. Serial No. 76,140. 36 Claims. (Cl. 174—89.)

1. In a speculum of the character described, an endoscopic tube, and a movable electrode mounted therein for reciprocating longitudinal movement with respect thereto, said electrode comprising a conducting element arranged and constructed to lie substantially in a plane perpendicular to the tube axis and hence perpendicular to its line of travel.

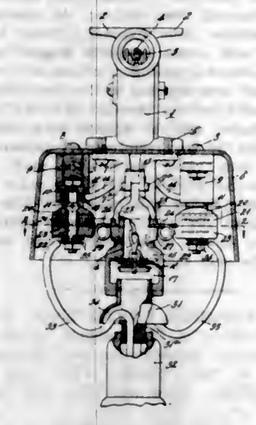


1,679,951. TYPEWRITING MACHINE. BURNHAM C. STICKNEY, Portsmouth, N. H., assignor to Underwood Elliott Fisher Company, New York, N. Y., a Corporation of Delaware. Filed July 1, 1925. Serial No. 40,741. 26 Claims. (Cl. 197—126.)

1. In a web-manifolding typewriting machine, the combination with a platen and types, of tracks extending rearwardly from the intake side of the platen, a set of carbon-strippers individual to the carbons and movable independently of one another along said tracks towards

and away from the platen, and parallel motion mechanisms individual to said strippers and movable relatively to said tracks, for guiding said strippers in parallelism.

1,679,952. TYPEWRITING MACHINE. BURNHAM C. STICKNEY, Portsmouth, N. H., assignor to Underwood Elliott Fisher Company, New York, N. Y., a Corporation of Delaware. Continuation of application filed June 17, 1925, Serial No. 37,609. This application filed July 9, 1925. Serial No. 42,382. 57 Claims. (Cl. 197—126.)

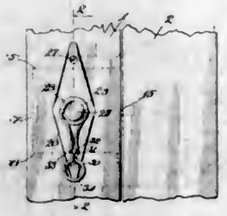


1. A multiple-ply web-manifolding typewriting machine, including, in combination, a platen, types and a multiplicity of strippers individual to superposed carbons, said strippers movable seriatim to strip the carbons one by one, between the work-sheets and relatively thereto.

1,679,953. LAMP-HANGER STRUCTURE. ALLISON J. THOMPSON, Cleveland, Ohio. Filed Jan. 24, 1925. Serial No. 4,503. 6 Claims. (Cl. 240—66.)

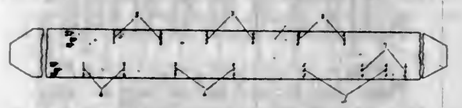
1. In a lamp hanger structure, a lamp carrying hanger means provided with an upwardly extending projection, an electric contact for the lamp of said hanger means, and a support for said contact provided with an

opening to receive the projection of said hanger means, whereby said support may be hung upon said hanger means, the removal of said contact support from said



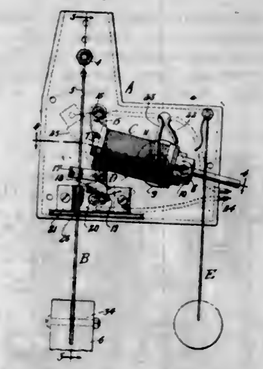
hanger means being effected solely by lifting movement of said contact support and without the manipulation of a screw, nut or the like.

1,679,954. PIPE-BENDING APPARATUS. GEORGE CLIFFORD WEBBER, Los Angeles, Calif. Filed June 22, 1926. Serial No. 117,703. 12 Claims. (Cl. 153—32.)



1. A pipe bending device comprising in combination, a pipe holder having a flat base to rest on a floor or the like, said holder having a longitudinal passage on one side and open at the side and with a belled mouth, means to secure the holder in position, and means to grip a pipe and bend same, the main body of the pipe being retained in the passage of the holder.

1,679,955. FRENCH WINDOW AND DOOR CASEMENT FASTENER. BERT E. BARTHOLOMEW, Pasadena, Calif., assignor to Sands Production Company, Cleveland, Ohio, a Corporation of Ohio. Filed Mar. 16, 1927. Serial No. 175,737. 2 Claims. (Cl. 292—140.)

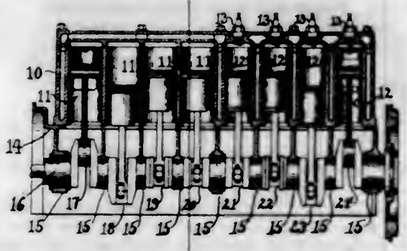


1. A door catch comprising in combination a substantially rectangular casing, a rectangular follower slidably and loosely mounted in said casing, a substantially elliptical aperture extending through said follower, a cylindrical member eccentrically mounted in said casing, extending through said aperture, a bolt extending from said follower through said casing, a handle member keyed to said cylindrical member, serving as a shaft upon which said cylindrical member is eccentrically mounted, said handle member extending exteriorly of said casing, a fastening member pivoted to said handle member so as to swing therefrom, there being a catch on said fastening member and a stationary lug over which said catch is adapted to be inserted to hold said handle stationary, whereby said follower will be fastened against movement.

1,679,956. PHOTOGRAPHIC-FILM CARTRIDGE. CARL A. BORNMANN, Binghamton, N. Y., assignor, by mesne assignments, to Agfa Ansco Corporation, Binghamton, N. Y., a Corporation of New York. Filed Feb. 16 1926. Serial No. 88,593. 1 Claim. (Cl. 95—9.)

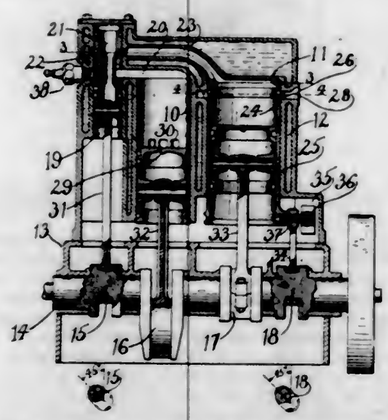
A photographic film cartridge including a strip of sensitized film, and an overlying strip of protective material having a set of uniformly spaced exposure indicating characters therein, a second set of exposure indicating characters on said strip, the spaces between said characters of said second set progressively increasing from one end.

1,679,957. ELECTRIC MOTOR. CHARLES T. BRADSHAW, Philadelphia, Pa., assignor to Eugene Carraine, Philadelphia, Pa. Filed Dec. 17, 1924. Serial No. 756,451. 6 Claims. (Cl. 172—126.)



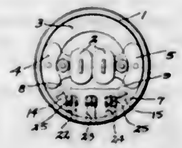
2. In an electric motor, the combination of a support, an electro-magnet carried thereby, a pendulum mounted on the support and having an armature adjacent to said electro-magnet, a member movable on the support and provided with an electrical contact part and two spaced abutments between which the pendulum extends, a fixed contact part, means to include the electro-magnet and said contact parts in an electric circuit which may be opened and closed by said contact parts, the pendulum and the abutments being constructed to move the contact part carried by the member into engagement with the fixed contact part when the pendulum swings from the electro-magnet and out of engagement with the fixed contact part when the pendulum swings toward the electro-magnet, and means operable to vary the distance between the electro-magnet and the armature of the pendulum.

1,679,958. INTERNAL-COMBUSTION ENGINE. EVERETT R. BURTNETT, Los Angeles, Calif., assignor, by direct and mesne assignments, to The Automotive Valves Corporation, Reno, Nev., a Corporation. Filed Mar. 31, 1926. Serial No. 98,736. 2 Claims. (Cl. 123—60.)



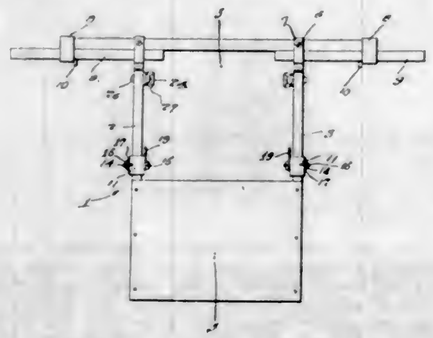
1. In a two-stroke cycle internal combustion engine, eight cylinders arranged in a row with their axes paral-

lel, the four cylinders at the forward end of the row functioning as charge pumping cylinders, the four cylinders at the rear end of the row and from which the power is taken, functioning as combustion cylinders, pistons arranged for operation within the eight cylinders, a crankshaft having eight separate throws to which the eight pistons are respectively connected, the first and second crank throws of the crankshaft from each end



thereof, being arranged 180° apart and occupying the same relative radial positions, the third and fourth crank throws from each end of the crankshaft being disposed 180° apart and occupying the same relative radial positions, and said second and third crank throws from each end of the crankshaft being disposed 90° from the first and second crank throws from each end of said crankshaft.

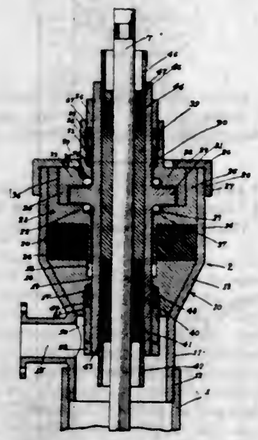
1,679,959. INTERNAL-COMBUSTION ENGINE. EVERETT R. BURTNETT, Los Angeles, Calif., assignor, by direct and mesne assignments, to The Automotive Valves Corporation, Reno, Nev., a Corporation. Filed Apr. 6, 1926. Serial No. 100,042. 4 Claims. (Cl. 123—70.)



1. In a two stroke cycle internal combustion engine, the combination of a combustion cylinder, an inlet valve cylinder, a passage communicating between the said inlet valve cylinder and the said combustion cylinder, a valve of balanced area exposed to the combustion chamber arranged for reciprocatory movement within the said inlet valve cylinder, a charge pumping cylinder, the three cylinders being arranged in a row with their axes parallel and the combustion cylinder being arranged between the pumping cylinder and the inlet valve cylinder, an inlet sleeve valve arranged for reciprocatory movement within the said charge pumping cylinder, a charge pumping piston arranged for reciprocatory movement within the said sleeve valve of the charge pumping cylinder, a series of ports formed through the wall of the said inlet valve cylinder, a duct leading from the head end of the said charge pumping cylinder to the said ports, said duct being disposed directly above and parallel with the passage that leads from the combustion chamber to the inlet valve chamber, a second series of ports formed through the wall of the charge pumping cylinder, an annular duct extending from a source of supply to the said series of ports formed in the wall of the charge pumping cylinder, means of actuating the valve of balanced area exposed to the combustion chamber whereby the ports formed through the wall of the said inlet valve cylinder will be opened and closed in two stroke cycle time by the reciprocatory movement of the said balanced area valve within the said inlet valve cylinder and means whereby the sleeve valve within the charge pumping cylinder will open and close the series of ports formed in the wall of the said charge pumping cylinder in two stroke cycle time by the reciprocatory movement of the said sleeve valve.

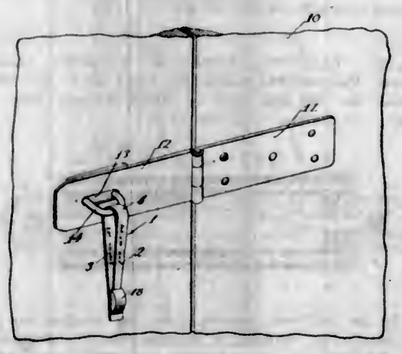
1,679,960. ELECTRICAL CONNECTION. NICHOLAS J. CELENZA, Brooklyn, N. Y., assignor, by mesne assignments, to Brandes Laboratories Inc., Newark, N. J., a Corporation of New Jersey. Filed July 25, 1925. Serial No. 46,171. 2 Claims. (Cl. 173—33.)

1. A terminal block, a plurality of resilient-sleeve-like contacts therein, said block and said contacts having aligned entrances located at one side of said block to admit a plurality of terminal tips, each of said contacts comprising a split cylindrical portion with an inwardly extending annular ridge adjacent one end thereof, and a collar member extending around each of said contacts and having extended portions passing through said block to provide a lug by means of which an electrical conductor may be connected to the contacts, each of said tips comprising a cylindrical portion and a spherial head separated by a neck portion, said neck portion being arranged to be gripped by said annular ridge within said sleeve-like contacts when said terminal tips are forced into said sleeve-like contacts.



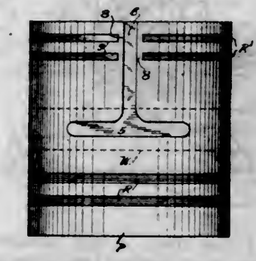
1,679,961. ADJUSTABLE WINDOW JACK. EDWIN L. EMBREY, Springfield, Mo. Filed Dec. 20, 1927. Serial No. 241,359. 1 Claim. (Cl. 304—24.)

In a window jack of the class described, a pair of spaced longitudinal bars, the outer ends thereof adapted to extend outwardly of a window frame, a seat board



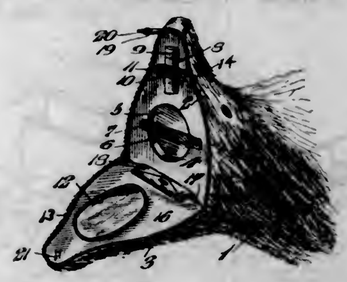
arranged across the outer ends of the bars, an adjustable cross member secured on the inner ends of the bars and adapted to engage the inner face of the window frame, main sill engaging feet carried by the longitudinal bars, and means for holding said feet against the outer edge of the subsill of the window, said last mentioned means comprising a flexible element secured at one end to one side of each foot, a looped member at the inner end of each longitudinal bar through which the intermediate portion of the respective flexible member extends, the free end of the flexible member being adjustably secured to the other side of the respective foot.

1,679,962. BLOW-OUT PREVENTER. LESTER M. CRANS, Venice, Calif. Filed Jan. 18, 1927. Serial No. 161,776. 10 Claims. (Cl. 255—1.)



1. A blow out preventer comprising in combination a well casing, a casing head structure connected thereto, a plug, a first packing and a bearing element, in the casing head structure, a tubular sleeve having a bearing on the bearing structure, a rotatable rod extending through said sleeve, packing between the rod and the sleeve, and packing between the sleeve and the said plug, the first packing being between the plug, the bearing element and the casing structure.

1,679,963. CAR SEAL. ANDREW J. EASON, San Bernardino, Calif. Filed Nov. 10, 1926. Serial No. 147,452. 3 Claims. (Cl. 292—320.)

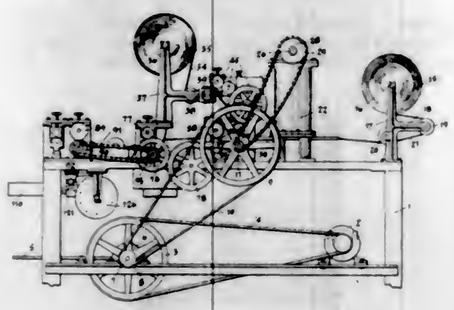


1. A seal for car doors comprising a U-shaped member of flat resilient material, one of the arms of said member having a curved outer portion, said portion having apertures therethrough, the other arm being bent to provide a flat portion, a plate having an up-struck tongue fastened to said flat portion, a curved plate having three adjacent edges fastened to said flat portion and overlying the same, a second curved plate having an upstruck tongue secured to the under side of the first mentioned curved plate, said curved plates being adapted to have the curved portion of said first mentioned arm inserted therebeneath, said upstruck tongues being adapted to engage in said apertures to prevent removal of said arm from beneath said curved plates.

1,679,964. COUNTERTHRUST PRESSURE PISTON. CLARENCE G. EDWARDS, Los Angeles, Calif. Filed Mar. 22, 1926. Serial No. 96,521. 12 Claims. (Cl. 74—108.)

1. A piston of cylindrical form and having wrist-pin, and having in its external cylindrical surface a shallow recess for the flow of motive pressure; said recess extending from the piston head corner down to about the plane of the wrist-pin axis.

1,679,965. VANITY CASE AND POCKETBOOK FOR ANIMAL HEADS. ROBERT EISENBERG and MAX RAJEWSKY, Chicago, Ill. Filed June 28, 1926. Serial No. 119,042. 2 Claims. (Cl. 2—65.)



2. The combination with an animal head having an upper and a lower jaw, of a vanity and pocket book container comprising two hinged members secured in and to said jaws, a lining covering the inner faces of said members and secured thereto, said lining being tensioned across the plane of hinging and also extending rearwardly beyond the plane of hinging to form a pouch, said lining having means to receive vanity appliances, and means to secure said jaws in closed position.

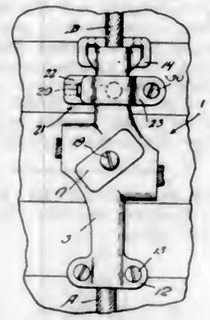
1,679,966. PROCESS OF MAKING CELLULOSE ACETATE. EDWARD S. FARROW, Jr., Rochester, N. Y., assignor to Eastman Kodak Company, Rochester, N. Y., a Corporation of New York. Filed September 5, 1925. Serial No. 54,816. 2 Claims. (Cl. 260—101.)

1. The process of making cellulose acetate, which comprises treating cellulosic material with an aqueous solu-

tion of hydrochloric acid having a concentration greater than 25% and free from oxidizing agents at room temperature for two to six hours, the action being stopped before the physical appearance of said material is appreciably changed, and thereafter acetylating the treated materials.

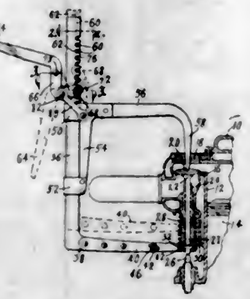
1,679,967. DISPENSING MACHINE. ADINO F. FILES, Maumee, Ohio. Filed May 27, 1927. Serial No. 194,837. 17 Claims. (Cl. 93—1.)

1. In a dispensing machine having means for dispensing portions of a material in spaced relation on a strip of paper, means for feeding a pair of strips of paper through the machine, means for imprinting outlines of cementitious material on the other of the strips, squeeze rollers, one of the squeeze rollers having a cushioned surface for squeezing the air from and flattening the material located between the said strips.



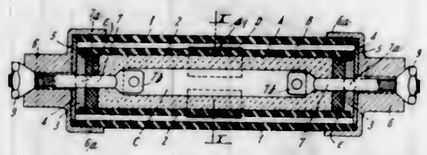
1,679,968. OIL PACKAGE. FREDERICK D. GATCHELL, New York, N. Y. Filed Oct. 23, 1925. Serial No. 64,383. 2 Claims. (Cl. 224—45.)

1. Means for carrying independent cans or like sealed containers, comprising a box or casing to receive a row of cans, cans having their tops equipped upstanding angular lugs, and an element performing the dual office of a cover for the box and a clip for the cans, said element having pairs of reversely formed depending claws adapted for engagement or disengagement with said lugs.



1,679,969. DETACHABLE CONNECTION FOR THE CABLES OF LIGHTNING-ARRESTER SYSTEMS. HENRY HERZ, Jersey City, N. J. Filed Jan. 26, 1925. Serial No. 4,877. 2 Claims. (Cl. 173—31.)

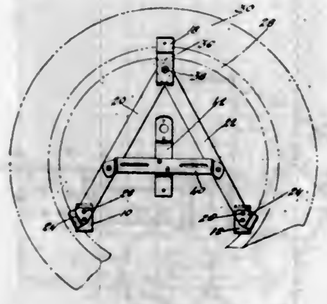
1. A device of the class described comprising a connection including a pair of complementary sections, said sections being provided with cooperating channels for receiving the end portions of a pair of cables, the intermediate portion of one of said sections being provided with an opening which communicates with the channels formed in said sections, a member adapted to



be disposed within the opening for securing the free ends of the cables in said connection, and means for detachably securing the sections together.

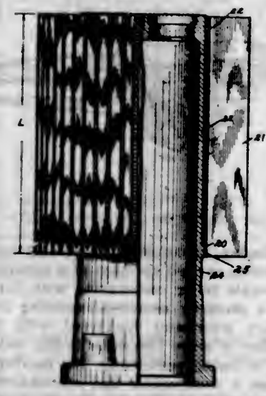
1,679,970. VALVE-SPRING LIFTER AND REMOVER. CHARLES E. HIRST, Ames, Iowa. Filed Mar. 9, 1927. Serial No. 173,926. 6 Claims. (Cl. 29—86.3.)

6. In a tool of the class described, a bar, a valve engaging member slidably mounted thereon, there being an extension on said bar, spreadable spring seat engaging members supported on said extension, and means for operating said tool by moving the valve engaging member relative to the bar, said means comprising a series of notches in the bar, a handle pivoted selectively in said notches and link connections between the valve engaging member and the handle.



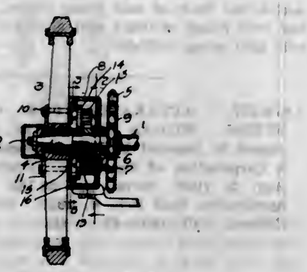
1,679,971. ELECTRIC FUSE OR CUT-OUT. VERNON HOPE, Macclesfield, England. Filed Nov. 21, 1922, Serial No. 602,454, and in Great Britain Nov. 28, 1921. 10 Claims. (Cl. 200—128.)

1. In an enclosed electric fuse; in combination;—a fuse containing chamber, a fusible element enclosed in said chamber, an incombustible material surrounding the fusible element and enclosed in said chamber, connected to the respective two ends of the fusible element and passing out of the said chamber in gas-tight man-



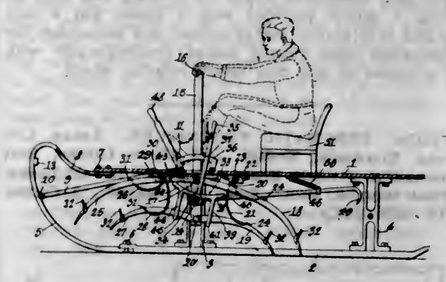
ner, an expansion chamber, a communicating passage-way between the said chambers and means adapted to close the said passage-way and adapted, when the pressure in the fuse containing chamber reaches a predetermined value, to open the said passage-way.

1,679,972. TIRE CARRIER. ORMOND E. HUNT, Detroit, Mich., assignor to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed May 19, 1924. Serial No. 714,348. 6 Claims. (Cl. 224—29.)



6. In a tire carrier, the combination of a pair of spaced supporting brackets, each having a lateral flange, a brace member connecting said brackets and having its opposite end portions overlying the flanges of the respective brackets, a pair of outwardly diverging rim supporting members, having portions overlying the flange of one of said brackets, common means for securing the overlying portions of the last mentioned bracket, the rim supporting members and adjacent end portion of the brace in assembled relation, a tire engaging clamp cooperatively associated with the other of said brackets to hold a spare tire thereon, and having a portion overlying the flange of said bracket, and common means for permanently securing the overlying portions of said flange and brace in assembled relation and detachably securing the clamp in place.

1,679,973. ENGINE CYLINDER. JAMES M. H. JACOBS, Dayton, Ohio, assignor to General Motors Research Corporation, Dayton, Ohio, a Corporation of Delaware. Filed Dec. 13, 1922. Serial No. 606,760. 3 Claims. (Cl. 257—261.)

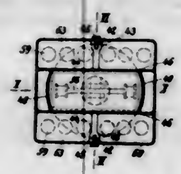


1. A finning structure adapted to be secured upon cylinders of internal combustion engines, comprising a strip of metal provided upon one face with a plurality of transverse spacing lugs, and on the other face with cross ribs extending parallel with said lugs, each rib being of considerably greater height than thickness, the strip being sufficiently thin between ribs to be flexible.

1,679,974. TRANSMISSION MECHANISM. DANFORD JEWELL, Spokane, Wash., assignor of one-half to Harve H. Phipps, Spokane, Wash. Filed Apr. 8, 1924, Serial No. 704,931. Renewed Apr. 23, 1928. 1 Claim. (Cl. 74—7.)

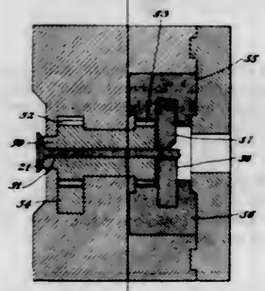
The combination with a shaft and traction wheel journaled thereon, an internal gear carried by said wheel, of a fixed housing inclosing the gear, a sleeve journaled on the shaft having a bearing within the housing, an exterior driving sprocket and an interior driving pinion integral with the sleeve, a series of studs fixed in said housing and driven pinions journaled thereon, an integral disk for each pinion, and a plurality of diametrically spaced pins on each disk for co-action with said internal gear.

1,679,975. SLED. JOHN JULIANO, Niagara Falls, N. Y. Filed Sept. 7, 1927. Serial No. 218,076. 6 Claims. (Cl. 208—158.)



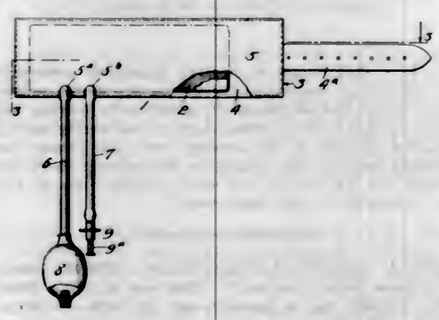
1. In a sled, a pair of runners, standards secured to the runners, a shaft mounted in the standards, a driving lever pivoted on the shaft, a forwardly driving propeller pivoted to the driving lever, a rearwardly driving propeller pivoted to the driving lever, and means for selecting one of the propellers for contact with the ground and for raising the other propeller out of contact therewith at the same time.

1,679,976. INTERNAL-COMBUSTION ENGINE. HUGO JUNKERS, Dessau, Germany. Filed Apr. 9, 1927. Serial No. 182,323, and in Germany Apr. 16, 1926. 9 Claims. (Cl. 123—66.)



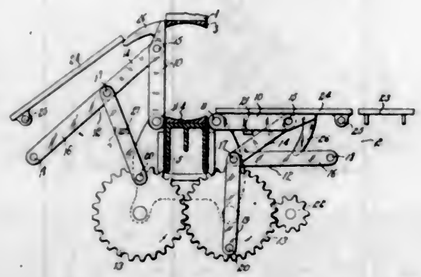
7. Internal combustion engine comprising a substantially cylindrical working cylinder and piston and a scavenging air pump cylinder and piston, said pump

piston having outwardly the form of a sector of a cylinder, said pump cylinder having a cross-section to



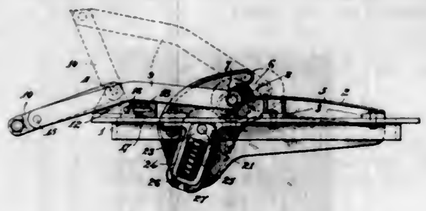
match the form of said pump piston, a casing surrounding said pump cylinder and a valve in said casing outside said pump cylinder.

1,679,977. APPARATUS FOR CUTTING VALVE STEMS. WILLIAM S. KNUDSEN, Detroit, Mich., assignor to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Original application filed Apr. 2, 1925, Serial No. 20,165. Divided and this application filed Feb. 6, 1926. Serial No. 86,553. 7 Claims. (Cl. 164—47.)



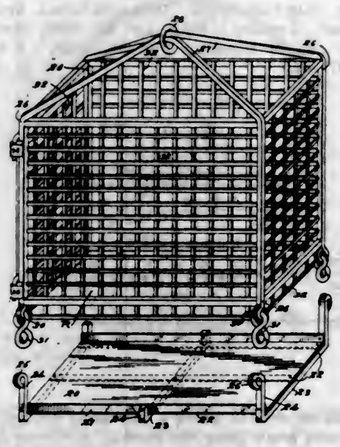
1. An apparatus for cutting off the stem of a valve, or the like, comprising means for rotating said stem including a carrier provided with a pinion and a rack engaging said pinion, cutting means, and mechanism for reciprocating said cutting means simultaneously with the actuation of said first named rotating means.

1,679,978. PNEUMATIC TOURNIQUET. ABRAM LINCOLN KONWISER, Newark, and DAVID LOESER, East Orange, N. J.; said Konwiser assignor to said Loeser. Filed May 14, 1926. Serial No. 108,992. 3 Claims. (Cl. 128—327.)



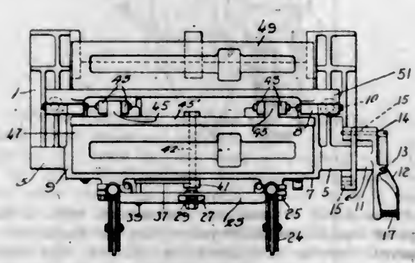
2. A pneumatic tourniquet embodying an inflatable bag, air-pumping means connected with said bag, and air-release means also connected with said bag and comprising a hollow metallic valve element having an air-release aperture and a valve member having a positive sliding movement to close and open said aperture.

1,679,979. HIGH-DENSITY ATTACHMENT FOR COMPRESSES FOR COTTON BALES. GEORGE W. LANGFORD, ALFORD C. BARROWS, and CHARLES W. GOOD, Ann Arbor, Mich., assignors to Economy Baler Company, Ann Arbor, Mich., a Corporation of Michigan. Filed Sept. 14, 1925. Serial No. 56,327. 9 Claims. (Cl. 100—19.)



1. The combination with a compress for cotton bales, of a high density attachment, including a side platen and means for actuating the same, including toggle levers connected to said side platen, a revoluble member and a link between said revoluble member and toggle levers for acutating the latter from the former.

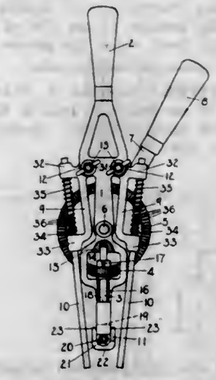
1,679,980. MOP WRINGER. SIMEON C. LAWLOR, Chicago, Ill., assignor to S. C. Lawlor Company, Chicago, Ill., a Corporation of Illinois. Filed Mar. 10, 1924. Serial No. 698,168. 2 Claims. (Cl. 15—262.)



1. In a wringing apparatus, the combination, with a frame and a roller carried thereby, of a rotatably mounted, bodily movable roller cooperating with the first-mentioned roller, a pivotally mounted operating lever, a link pivoted to said lever and connected with the second mentioned roller to move the same bodily, said lever being mounted to swing sufficiently for moving the pivot of the link past a dead center line represented by a line intersecting the axis of pivoting of the lever and the axis of rotation of the bodily movable roller, and adjustable means for supporting said lever at various points substantially at and beyond said dead center line.

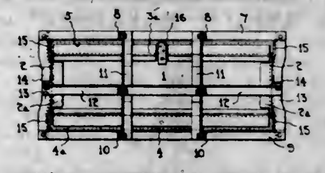
1,679,981. PORTABLE BUILDING-MATERIAL CONVEYER. JOHN D. LAWRENCE, San Diego, Calif. Filed Jan. 31, 1927. Serial No. 164,818. 2 Claims. (Cl. 294—67.)

1. A conveying receptacle including a tray having bottom supporting bars with upturned ends having eyes, a cage having corner alining bars with the said ends having eyes at their lower ends, and safety hitches for detachably connecting the tray to the eyes of the corner bars of the cage.



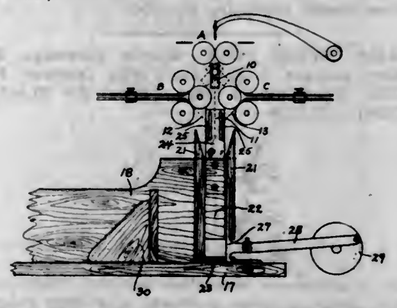
1,679,982. BOOKING CORE MACHINE. ARNOLD LENZ, Saginaw, Mich., assignor to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed Oct. 21, 1925. Serial No. 64,038. 22 Claims. (Cl. 22—10.)

22. In a booking core machine, a base, a rollover table pivoted thereto, a core box carried by the rollover table, a second core box mounted so as to be brought into face to face contact with the first core box and means to raise the second core box from the first.



1,679,983. VALVE GRINDER. DONATO MANCINI, Saxonville, Mass. Filed May 27, 1926. Serial No. 111,985. 2 Claims. (Cl. 51—29.)

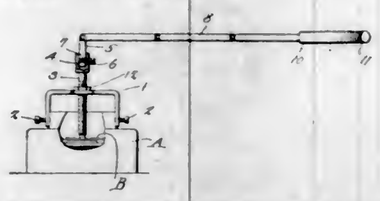
1. The combination, in a valve grinder, with a frame provided with a handle, a spindle, for a valve-engaging member, journaled in said frame, a driven member secured to said spindle, and a driving member mounted on said frame and engaging said driven member, said driving member being provided wtih an operating arm, of holders pivotally connected and parallel with said frame,



and having upper and under bearings, and legs carried by said holders in said bearings, said holders being adjustable to increase or decrease the distance between said legs.

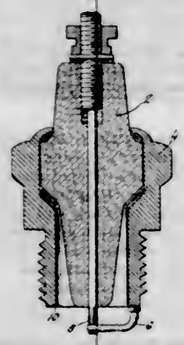
1,679,984. CONTAINER FOR LIQUIDS. JOHN WALTER MCCONNON, Palmerston North, Wellington, New Zealand. Filed Sept. 9, 1926, Serial No. 134,522, and in New Zealand Aug. 10, 1926. 3 Claims. (Cl. 220—6.)

1. A container comprising a receptacle of relatively fragile material, a protective casing surrounding said receptacle and composed of sectional members arranged to cover the surfaces of the receptacle, a cushion lining on the inner face of said sections, and reinforcing ribs on the outer surface of said sections extending at an angle to the edges of each section and projecting beyond said edges, the projected end of said ribs of adjacent sections being detachably secured together.



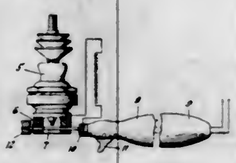
1,679,985. PAPER-FOLDING MACHINERY. JOHN MENTGES, Sidney, Ohio, assignor to The Mentges Folder Company, Sidney, Ohio, a Corporation of Ohio. Filed Nov. 8, 1926. Serial No. 146,935. 10 Claims. (Cl. 271—86.)

1. In a machine for folding paper, a guide comprising two vertical members mounted with a comparatively narrow space between them, by which members papers are



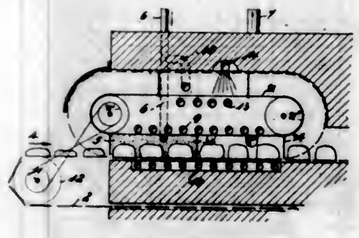
guided downwardly, means whereby papers are carried from either of two opposite directions to the upper end of said space, at an angle to said members, and means at the upper end of said space whereby to deflect the papers downwardly thereinto and thereby prevent the papers striking the member at the side of the space opposite to the point from which the papers come.

1,679,986. RECEIVER. CHARLES A. PLANTE, Madison, Wis., assignor of one-fourth to Paul R. Kaproth, Madison, Wis. Filed June 10, 1927. Serial No. 197,880. 2 Claims. (Cl. 179—107.)



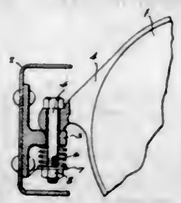
1. A device of the class described including means for clamping upon and receiving vibrations from a vibratory sound producing element, a mouth-piece, and a connection between the mouth-piece and the clamping member for conducting vibrations from said member to the mouth piece, said connection having a plurality of joints and being swiveled to the clamping member.

1,679,987. SPARK PLUG. HECTOR RABEZZANA, Flint, Mich., assignor to A C Spark Plug Company, Flint, Mich., a Company of Michigan. Filed July 9, 1925. Serial No. 42,489. 7 Claims. (Cl. 123—169.)



7. A spark plug comprising a shell having an electrode, an insulator in the shell, an electrode in the insulator, the portion of the shell which is normally exposed to the hot combustion gases and the said electrodes being coated with an enamel containing tin oxide.

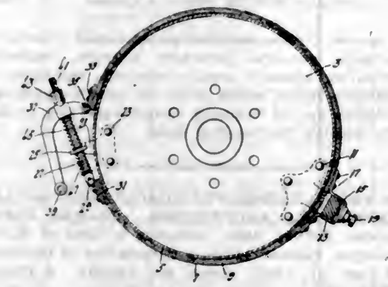
1,679,988. SPARK PLUG. HECTOR RABEZZANA, Flint, Mich., assignor to A C Spark Plug Company, Flint, Mich. Filed Mar. 1, 1926. Serial No. 91,487. 5 Claims. (Cl. 219—1.)



1. A spark plug including an electrode wire, a bottom wall provided with orifices of diameters somewhat larger than the diameter of the said wire, to receive the ends of the said electrode wire expanded thereinto by a combined heating and pressing operation, the said wire being connected to the wall of the spark plug in an intermediate union less than a weld.

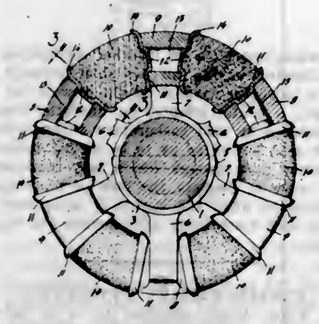
1,679,989. BAKING OVEN. HEINRICH ROSER, Stuttgart-Cannstatt, Germany. Filed Apr. 29, 1925, Serial No. 26,786, and in Germany Feb. 28, 1925. 4 Claims. (Cl. 107—57.)

1. A baking oven in which a passage is defined, means for conveying goods along the passage, partitions adapted to form a substantially closed chamber in the passage and means for supplying steam to and discharging steam from the chamber thus formed, said partitions being arranged to move along the passage in conformity with the motion of the goods.



1,679,990. ENGINE MOUNTING. ERIC OLIE SCHJOLIN, Birmingham, Mich., assignor to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed June 13, 1927. Serial No. 198,453. 2 Claims. (Cl. 180—64.)

1. In a motor vehicle, the combination with a pair of spaced chassis frame members and an engine to be supported thereon, of connections between said frame and the front and rear of the engine on a line intersecting the approximate center of gravity of the engine, an engine flywheel located beyond the rear connection, and an engine radiator located beyond the front connection to counterbalance the weight of said flywheel and maintain the stability of the engine in said supporting frame.



1,679,991. EXTERNAL CONTRACTING BRAKE. HENRY A. SCHWAGER, Royal Oak, Mich., assignor to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed Feb. 5, 1927. Serial No. 166,234. 4 Claims. (Cl. 188—77.)

4. In a brake, a drum, a brake member for frictional engagement with said drum, said brake member being constituted by parts of unequal length, anchoring means for said brake member, means including a lever for applying the parts of brake member to the drum, and springs associated with said lever to release said brake

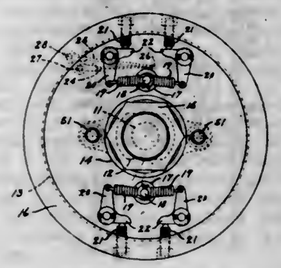
member, the deflections of the springs under equal loads being in the same ratio as the lengths of the parts of the brake member.

1,679,992. UNIVERSAL JOINT WITH RUBBER INSERTS. CHARLES R. SHORT, Detroit, Mich., assignor to General Motors Research Corporation, Detroit, Mich., a Corporation of Delaware. Filed Feb. 23, 1927. Serial No. 170,383. 4 Claims. (Cl. 64—96.)

1. Means to flexibly couple a pair of shafts including spider arms fixed to adjacent ends of shafts to be coupled, the arms on one shaft alternating with those on the other, and resilient elements interposed between said arms consisting of blocks of non-metallic elastic material, the intermediate portions of the blocks being of greater elasticity than the end portions, and retaining members for said blocks having portions for attachment with said arms and having roughened surfaces in engagement with said end portions of the blocks to hold the blocks in place.

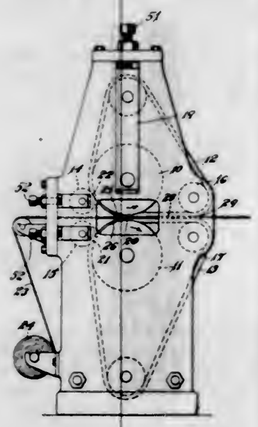
1,679,993. HEAT-EXCHANGING STRUCTURE FOR AIR HEATERS AND THE LIKE. OTTO STRACK, Auerbach, Hesse, Germany, assignor of one-half to the Firm Pfälzische Chamotte- und Thonwerke Schiffer & Kircher Aktiengesellschaft, Grunstadt, Germany. Filed Mar. 21, 1927, Serial No. 177,182, and in Germany Mar. 23, 1926. 3 Claims. (Cl. 257—251.)

2. A heat-exchanging structure for air-heaters and the like, comprising sets of superposed refractory bodies of equal external shape, having vertical passages, the number of which passages increases from the uppermost bodies to the lowermost ones and which are regularly distributed in each body having more than one passage, the thickness of the refractory material surrounding said passages decreasing correspondingly and the free total



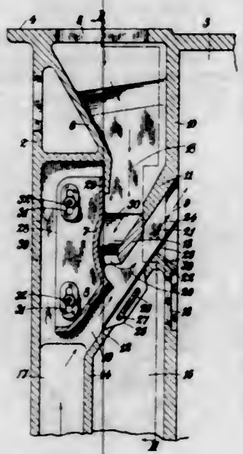
sectional area of the passages in any of said bodies being approximately the same in all bodies substantially as described.

1,679,994. MANUFACTURE OF ACETIC ACID AND ACETATES. PHILIP ARTHUR SMITH, London, and HAROLD GRENVILLE SMITH, Stockton-on-Tees, England, assignors to Synthetic Ammonia & Nitrates Limited, Billingham, Stockton-on-Tees, England, a British Company. Filed Mar. 10, 1927, Serial No. 174,407, and in Great Britain Mar. 13, 1926. 11 Claims. (Cl. 260—116.)



1. Process of producing alkali acetate which comprises causing free methanol to react with at least one alkali formate ingredient.

1,679,995. TORSIONAL VIBRATION INDICATOR AND RECORDER. CALEB E. SUMMERS, Dayton, Ohio, assignor to General Motors Research Corporation, Dayton, Ohio, a Corporation of Delaware. Filed Jan. 21, 1925. Serial No. 3,723. 5 Claims. (Cl. 234—1.)

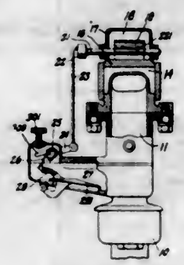


1. A record receiving instrument comprising a plate having an opening, a handle, a centering sleeve within the handle having an open end projecting through the opening beyond the face of the plate and means for holding a record receiving sheet on the plate.

1,679,996. FILIGREE-DESIGN PROCESS. PETER J. TRACY, Hartford, Conn., assignor to The Otaka Fabric Company, Hartford, Conn. Filed Apr. 26, 1926. Serial No. 104,577. 11 Claims. (Cl. 92—69.)

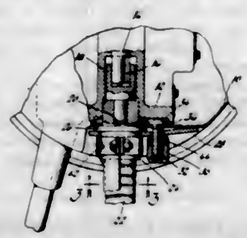
1. The process of forming designs in webs of paper and the like, which consists in progressively applying the web to and pressing the web into frictional engagement with an elastic under tension and relieving the tension.

1,679,997. COAL-PULVERIZING MACHINE. PERCY VENABLES VERNON, Keresley, near Coventry, and RALPH JACKSON, Coventry, England, assignors to Alfred Herbert Limited, Butts, Coventry, England, a British Company. Filed Apr. 12, 1926, Serial No. 101,249, and in Great Britain May 2, 1925. 6 Claims. (Cl. 83—11.)



1. A separating device comprising walls defining an air passage extending in a generally upward direction, one of said walls having therein an opening for material to be fed downwardly into the passage against the upcoming current of air, and means for varying the cross-sectional area of said air passage both above and below said opening.

1,679,998. CHLORINATED HYDROAROMATIC PRODUCTS CONTAINING NITROGEN AND PROCESS OF MAKING SAME. THEODOR VOLTZ, Basel, Switzerland, assignor to the Firm Durand & Huguenin S. A., Basel, Switzerland. Filed Feb. 24, 1923, Serial No. 621,095, and in Germany Feb. 23, 1922. 4 Claims. (Cl. 260—60.)

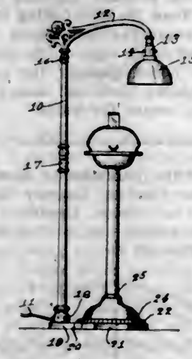


1. A process for the manufacture of highly chlorinated hydroaromatic products containing nitrogen, consisting in chlorinating aromatic amino-compounds suspended in an indifferent liquid, which does not permit hydrolysis, with chlorine gas at ordinary temperature and in subsequently heating the reaction mass.

1,679,999. THERMOSTATICALLY-CONTROLLED CHOKER FOR CARBURETORS. CHARLES ERNEST WILLIAMS, Detroit, Mich., assignor to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed June 21, 1923. Serial No. 646,801. 6 Claims. (Cl. 261—39.)

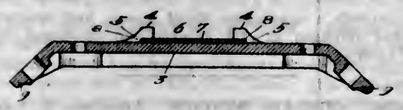
3. In combination with an internal combustion engine, and a carburetor having an air inlet passage leading thereinto; a valve for controlling the flow of air through said passage; a heater adapted to heat the combustible mixture produced by said carburetor; a thermostat associated with said heater so as to be heated thereby; and means whereby and through which said thermostat acts upon said valve to restrain the flow of air through the passage aforesaid when the engine is being started, and to interrupt such restraining action when the engine has been started.

1,680,000. FLEXIBLE-SHAFT CONNECTION. JOSEPH ZUBATY, Flint, Mich., assignor to A C Spark Plug Company, Flint, Mich. Filed Feb. 14, 1927. Serial No. 168,069. 4 Claims. (Cl. 64—30.)



1. A speedometer drive connection comprising, in combination, a speedometer casing, speedometer mechanism within the casing, a bolt secured in said casing, a flexible tube, a flexible shaft within said tube, a clamping member encircling said tube, and a nut engaging said bolt and bearing against said clamping member, said nut being counterbored to prevent engagement with the threads on the bolt until the flexible shaft is in proper driving relation with respect to the speedometer mechanism.

1,680,001. KNIFE. HUBERT ARNOLD, Calgary, Alberta, Canada. Filed Oct. 1, 1926. Serial No. 138,919, and in Canada Dec. 23, 1925. 5 Claims. (Cl. 30—10.)



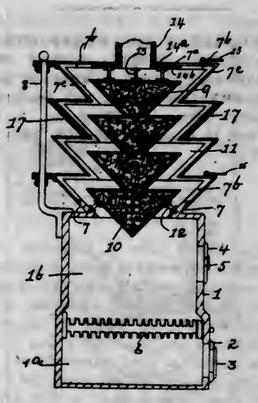
1. A knife of the character described comprising a holder, a cutter mounted in the holder, a cutter retaining latch movably carried by the holder and directly engaging the cutter to retain the latter in operative position, said part serving, when the latch is moved to a cutter releasing position, to partially eject the cutter from the holder in order to facilitate complete removal of the cutter without injury to the hands of the user.

1,680,002. COMBINATION LAMP AND SMOKER'S STAND. CHARLES E. BEARDSLEY and ALVA T. SMITH, Waterbury, Conn., assignors, by mesne assignments, to The Beardsley and Wolcott Manufacturing Company, Waterbury, Conn., a Corporation of Connecticut. Filed Nov. 21, 1927. Serial No. 234,597. 2 Claims. (Cl. 240—2.)

1. In an article of furniture, a hollow column for carrying electric conductors, a hollow lamp-holding bridge arm mounted on said column, a flat base for said column adapted to rest upon the floor, said base having an enlarged forwardly-extending section having a recess in its upper face, and a smoker's stand having a base fitted into said recess for preventing lateral movement of said stand relative to said base when said base is carried about, the top of said stand being located in a position accessible to the person using the lamp.

1,680,003. DRAFT-GEAR CARRIER IRON AND TANK-BAND ANCHOR. STARLEY F. BEASLEY, Kansas City, Kans., assignor of one-half to Frank E. Wellman, Kansas City, Kans. Filed Dec. 20, 1926. Serial No. 156,039. 2 Claims. (Cl. 213—61.)

1. A carrier iron provided with two sets of upwardly projecting guide lugs, the two sets being spaced apart laterally, and the lugs of each set spaced apart longitudinally, in combination with a shoe fitting flatly on the carrier iron between the laterally spaced lugs, and provided with outwardly projecting lugs fitting in the spaces between the longitudinally spaced lugs.



1,680,004. ALUMINUM ALLOY OF HIGH RESISTANCE. HENRI BENIT, Paris, France. Filed Feb. 25, 1926, Serial No. 90,657, and in Germany Feb. 19, 1925. 2 Claims. (Cl. 75—1.)

1. A homogeneous and stable light aluminum alloy capable of being subjected to repeated melting without losing its characteristic properties, said alloy having substantially the following composition:—

2 parts by weight of copper,
0.37 parts by weight of nickel,
027. parts by weight of tungsten,
0.45 parts by weight of magnesium,
96.91 parts by weight of commercial aluminum.

with 2 to 0.5% impurities, cast test bars showing a tensile strength of 22 kgs. per square mm. with 6% expansion and test bars of the forged, stamped or rolled alloy showing a tensile strength of 30 kgs. per square mm. with 23% expansion.

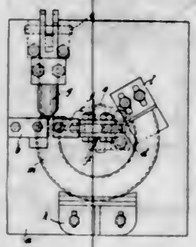
1,680,005. HEATER. HUTCHINSON L. BEVIER, Duluth, Minn.; The First National Bank of Duluth executor of Hutchinson L. Bevier, deceased. Filed Jan. 7, 1926. Serial No. 79,876. 1 Claim. (Cl. 126—58.)

In a heater, the combination of a base containing a fuel chamber; a core extending above said fuel chamber; means for supporting said core; side walls comprising a stationary portion extending up from said base and movable portions extending up from said stationary portions; a post adapted to pivotally support said movable portions; a chimney pipe extending above said core and provided with a horizontal flange; means for supporting said pipe; said movable portions having lips formed upon their opposing edges adapted to overlap each other when said movable portions are in closed or operative position, the upper ends of said movable portions of said side walls having lips formed thereon adapted to overlap a lip formed upon said flange; the lower ends of said movable portions having lips formed thereon adapted to overlap a lip formed upon the upper edge of said stationary part of said side walls; and means for securing said side walls in closed or operative position.

1,680,006. WINDSHIELD WEATHER STRIP. LLOYD BLACKMORE, Highland Park, Mich., assignor to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed June 23, 1924. Serial No. 721,796. 4 Claims. (Cl. 296—93.)

1. A windshield part comprising, in combination, a hollow metal tube member having a channel along one

edge for a pane of glass and having a sharply-bent re-entrant channel of uniform width along its opposite edge, and a rubber strip of uniform thickness through-

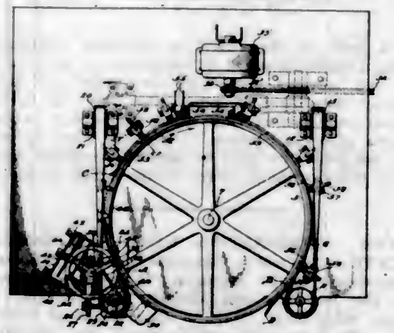


out and of substantially rectangular cross-section held along one edge of the reentrant channel and retained in the channel by reason of its elasticity.

1,680,007. HEAT-RESISTING ALLOY. ALFRED L. BOEGEHOLD, Detroit, Mich., assignor to General Motors Research Corporation, Detroit, Mich., a Corporation of Delaware. Filed June 6, 1927. Serial No. 197,016. 2 Claims. (Cl. 75—1.)

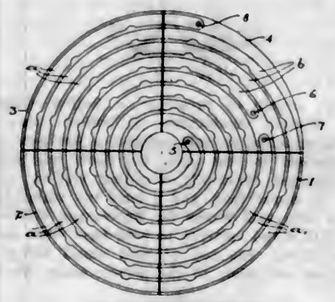
1. A heat resistant alloy composed of iron 2.40 to 2.80% carbon, 1.75 to 2.25% silicon, 3.75 to 4.25% nickel, and 5.75 to 6.25% aluminum.

1,680,008. APPARATUS FOR STRAIGHTENING THE ENDS OF BENT PIPES. RUDOLF HIERONYMUS BÖHLING, Hamburg, Germany, assignor to the Firm of Rohrbogenwerk Gesellschaft mit beschränkter Haftung, Hamburg, Germany. Filed Oct. 1, 1925, Serial No. 59,896, and in Germany Nov. 28, 1924. 3 Claims. (Cl. 153—79.)



3. Apparatus for reforming the ends of bent pipe comprising cooperative jaws adapted compressively to embrace the pipe end to be reformed, a reciprocating mandrel fitting the normal bore of the pipe end, adapted to be forcibly moved in a path intersecting the zone embraced by said jaws, adjustable supporting members arranged to engage respectively an intermediate part and the opposite end of said pipe, and a base upon which said jaws, mandrel, and supporting members are supported.

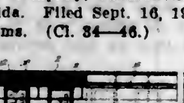
1,680,009. PACKAGE-SEALING MACHINE. CHARLES W. BOLGIANO, Washington, D. C. Filed Sept. 20, 1926. Serial No. 136,617. 7 Claims. (Cl. 226—49.)



2. A package sealing machine comprising means for applying adhesive to the open flap of a package, means for folding the flap down upon the body of the package subsequent to the application of adhesive and an electrically heated spring pressed band arranged to apply heat and pressure to the folded flap.

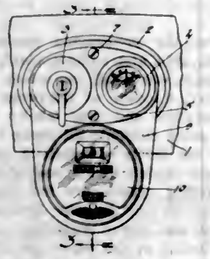
7. A package closing and sealing machine comprising a relatively large rotatably mounted wheel, an endless belt arranged to travel in contact with a substantial portion of the periphery of said wheel and forming therewith a package conveyor, the upper edge of said belt being located inwardly of one edge of the wheel to enable the packages to be carried between the belt and wheel with the flap portions of the packages projected upwardly beyond the upper edge of the belt, an adhesive applier arranged in proximity to the initial point of contact between the wheel and the belt so as to apply adhesive to the open flaps of the packages during the early movement thereof between the wheel and the belt, a flap folding plate mounted in proximity to the adhesive applier and

between the latter and the point where the belt leaves the wheel, a curved pressure applying plate extending around the wheel from the flap folding plate to a point in proximity to where the belt leaves the wheel and arranged above the upper edge of the belt so as to directly engage the folded flaps of the packages as the latter leave the folding plate and means for resiliently pressing said plate toward the wheel.



1,680,010. ELECTRIC ELEMENT. EDWARD D. BRAND, London, Ontario, Canada, assignor to The McClary Manufacturing Co., London, Canada. Filed July 14, 1925, Serial No. 43,536, and in Canada May 4, 1925. 1 Claim. (Cl. 219—37.)

An electric heater element comprising a plurality of uniform segments molded separately from refractory material and each having common concentric registering grooves molded therein to receive a heating coil, and a separate molded segment having eccentric grooves molded therein adapted to be interposed between the former segments to connect the alternate concentric grooves thereof to produce a continuous spiral groove, and resistance elements arranged in said grooves and extending from block to block.



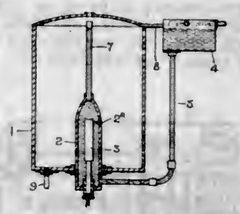
1,680,011. CURTAIN WINDOW. ALPHONSO S. CAMPBELL, West Medford, Mass., assignor to A. S. Campbell Company, East Boston, Mass., a Corporation of Massachusetts. Filed Apr. 14, 1923. Serial No. 632,037. 5 Claims. (Cl. 296—146.)

1. A curtain window installation comprising, in combination, a curtain, a frame member concealed at one side by said curtain, said frame member including inner and outer flanges connected by a bend overlain by said curtain, the curtain fabric being clamped between said flanges, a glass overlying said inner flange and means for

securing said glass in position relative to said frame member and said frame member presenting an upstanding flange abutting the edges of the glass and the inner flange for the purposes set forth.

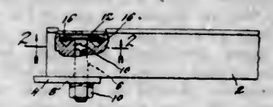
1,680,012. INSTRUMENT PANEL. ALBERT CHAMPION, Flint, Mich., assignor to A C Spark Plug Company, Flint, Mich., a Company of Michigan. Filed Oct. 7, 1925. Serial No. 61,037. 1 Claim. (Cl. 180—90.)

The combination with an instrument board having therein normally a plurality of apertures adapted to receive instruments, of an adapted plate having apertures intended to register with the apertures normally existing in the instrument board and having also an aperture intended to receive an additional instrument, said adapter plate being placed adjacent to the instrument board and a closing plate normally carrying a plurality of instruments adapted to be placed in the apertures of the instrument board, said closing plate being placed over the adapter plate with the instruments in the registering apertures and securing means for the closing plate.



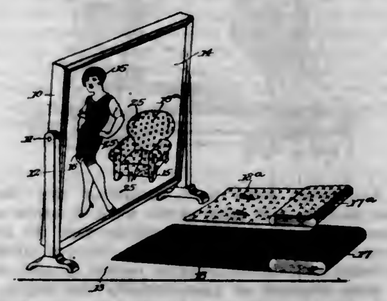
1,680,013. DRY KILN AND THE ART OF KILN DRYING. J. FORREST COBB, Portland, Oreg., assignor to Moore Dry Kiln Company, Jacksonville, Fla., a Corporation of Florida. Filed Sept. 16, 1926. Serial No. 135,891. 10 Claims. (Cl. 34—46.)

1. A dry kiln comprising within it a fan-duct defined, in part, by a continuous substantially vertical wall extending substantially the full length of the kiln in a zigzag direction.



1,680,014. WATER-HEATING SYSTEM. FERRIS FARRAR DALE and JAN WALTER GRACE, Martinborough, New Zealand. Filed Aug. 13, 1925, Serial No. 50,098, and in New Zealand Nov. 8, 1924. 5 Claims. (Cl. 219—38.)

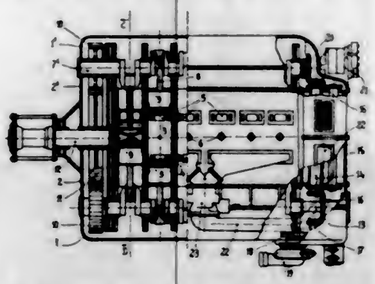
2. A water heating system, comprising, a water supply tank having means for automatically maintaining a constant level therein, a water storage cylinder, and an electrically operated heater located in the bottom of the storage cylinder, all in intercommunication, a hot water delivery pipe leading from the heater to and rising within the storage cylinder to such a point above the water level in the supply tank as will permit the column of water when heated to the predetermined degree for which said system is designed to overflow said delivery pipe into said storage tank, the height of said delivery pipe being such as to have its upper end above the constant level maintained within the supply tank.



4. A water heating system as set forth in claim 2, comprising, a combined vent and circulation pipe affording direct communication between the storage cylinder and the supply tank and located between the highest point of the hot water delivery pipe and the water level in the supply tank, for enabling water to circulate from the storage cylinder through the supply tank and the heater and back to the storage cylinder when the latter is filled to the level of said circulation pipe.

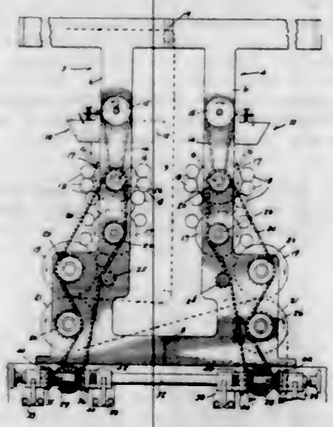
1,680,015. RUNNINGBOARD BOLT. GEORGE C. DAVIS, Lansing, Mich., assignor to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed Aug. 31, 1925. Serial No. 53,565. 1 Claim. (Cl. 151—32.)

A lag bolt, including a solid shank, adapted to be projected through a body, a plate-like integral head on said solid shank, having a flat undersurface, adapted to abut said body, said head having a single radial incision extending from the periphery thereof into proximity with the solid shank, and a dependent ear adapted to bite into said body as the plate-like head is forced into abutment therewith, said ear consisting of the material of the plate-like head to one side of the radial incision which is bent downwardly on a divergent line into substantially the direction of the longitudinal axis of the solid shank, and being of triangular shape, the apex thereof comprising the point of intersection of the peripheral edge of the plate-like head with the edge at the radial incision.



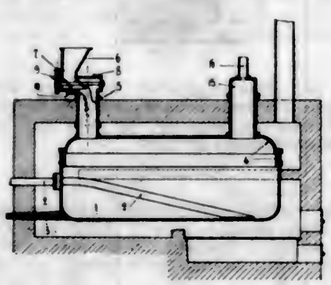
1,680,016. DISPLAY DEVICE. JAMES SEARLE DAWLEY, New York, N. Y. Filed Nov. 5, 1925. Serial No. 67,088. 9 Claims. (Cl. 35—17.)

1. A demonstrating device comprising a mirror having picture portions partially covering the same, the uncovered portions of the mirror being associated with the



picture portions, whereby when material is placed in reflecting relation to said uncovered portions the figure becomes completed by the reflection of material.

1,680,017. TWO-STROKE ENGINE OF THE OPPOSED-PISTON TYPE. GUIDO FORNACA, Turin, Italy. Filed Nov. 10, 1926, Serial No. 147,516, and in Italy Nov. 17, 1925. 1 Claim. (Cl. 123—51.)



In an internal combustion engine with oppositely arranged pistons, the combination of two end casings forming chambers, a series of cylinders containing the pistons arranged parallel to and interposed between the end casings, crank casings at both ends of the cylinders extending over and closing both chambers, crank shafts arranged in the crank casings and extending into both chambers, compressor rotors for generating the scavenging and forced feed air disposed in one of the end chambers so that their axes lie parallel to those of the cylinders, bevel gears operatively connecting both crank shafts with one of said rotors, a driven shaft journaled in the other chamber parallel to the crank shafts, and reducing gears in the last named chamber operatively connecting the driven and crank shafts.

1,680,018. PRINTING-PRESS UNIT. WALLACE H. GRANGER, San Francisco, Calif. Filed Apr. 10, 1926. Serial No. 101,192. 4 Claims. (Cl. 101—220.)

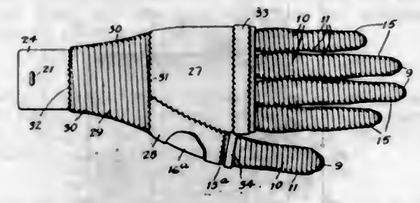
1. A printing press unit comprising two identical frames abutting each other at the top and bottom of the frames for providing a passageway between the frames, an impression cylinder and a plate cylinder carried by each frame and an ink fountain carried by each frame, and being disposed at approximately the height of a person when standing, said cylinders being disposed adjacent to the bottom of said frames and on the outer sides thereof.

1,680,019. APPARATUS FOR THE FORMATION OF NITRIC ACID OR HYDROCHLORIC ACID. GIUSEPPE GUADAGNI, Turin, Italy. Filed Jan. 13, 1925, Serial No. 2,201, and in Germany Dec. 12, 1924. 1 Claim. (Cl. 23—277.)

Apparatus for the continuous production of hydrochloric or nitric acid and sodium bisulphate, comprising an oven, a single elongated container mounted wholly within the latter, a cover of fire-proof material tightly closing the container and also wholly within the oven whereby burnt gases circulate all about the container and ensure within the latter a constant and uniform temperature, a single conduit at one end of the cover through which the re-acting agents are fed into the container, a delivery tower for the gaseous discharge at the other end, said conduit and tower projecting outwardly through the oven roof, means at the outer end of said conduit for feeding the re-acting agents in regulated quantities, and a tube for the continuous discharge of the bisulphate, having its inlet end dipping into the liquid mass at a point near the bottom of the container substantially below the point of gaseous discharge, and remote from the inlet for the reacting agents whereby a complete reaction of said agents is insured, the other end of said tube passing through the container at the normal liquid product level therein to maintain said level constant by continuous discharge.

1,680,020. PRODUCTION OF CARBOHYDRATE COMPOUNDS. WILLIAM HARRISON, Manchester, England. Filed Oct. 4, 1926, Serial No. 139,559, and in Great Britain Oct. 24, 1925. 14 Claims. (Cl. 260—100.)

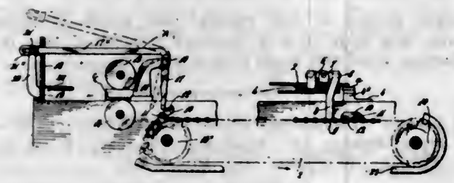
1. Process for the oxidation of carbohydrate xanthogenates consisting in treating a dilute solution of viscose containing not more than 5% of cellulose with an aqueous solution of nitrous acid in the presence of a weak acid other than an acid derived from an oxide of nitrogen.



1,680,021. MANUFACTURE OF WOOL-LIKE CELLULOSIC MATERIAL. WILLIAM HARRISON, Manchester, England. Filed Jan. 26, 1927, Serial No. 163,851, and in Great Britain Feb. 12, 1926. 5 Claims. (Cl. 8—20.)

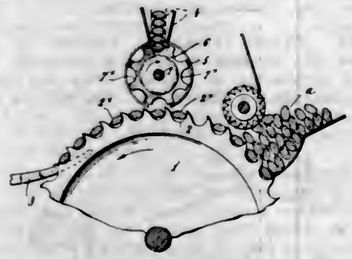
1. Process for the production of wool-like cellulosic material consisting in subjecting the unstable insoluble xanthate, formed by the combined action of a caustic alkali or alkaline sulphide or any mixture of these and carbon disulphide on cellulosic material, to the action of a mild oxidizing agent which does not completely split off the carbon disulphide previously combined with the cellulose and which converts the unstable insoluble xanthate into a stable compound.

1,680,022. PLASTIC ARTIFICIAL HAND. HARRIETTE E. HODGSON, New York, N. Y. Filed Oct. 29, 1923. Serial No. 671,489. 31 Claims. (Cl. 3—12.)



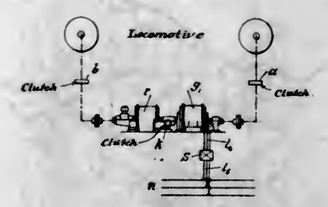
1. An artificial hand of the kind described, comprising a foundation block extending in the metacarpal region,

and strong and flexible finger members comprising tenacious, pliant cores and strong and compressible fabric



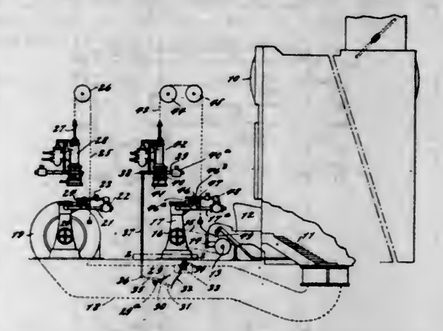
wrappings firmly combined, said finger members having metacarpal extensions applied along the block and bound thereto in an artificial metacarpus.

1,680,023. THROW-OUT MECHANISM FOR CIGARETTE-PACKING MACHINES. EWALD KOERNER, Dresden, Germany, assignor to United Cigarette Machine Co. Inc., Lynchburg, Va., a Corporation of Virginia. Filed Apr. 14, 1927. Serial No. 183,788. 7 Claims. (Cl. 226—5.)



1. In throw-out mechanism for cigarette packing machines, means for receiving a train of cigarettes, throw-out mechanism for incompletely filled packages of cigarettes, a trigger lying in the path of the train of cigarettes, a connection between the trigger and the throw-out mechanism, and means whereby less than a predetermined number of cigarettes fed to the receiving means will cause said trigger to assume a position whereby it may be swung to render the throw-out mechanism active.

1,680,024. MACHINE FOR PACKING CIGARETTES AND LIKE ARTICLES. EWALD KOERNER, Dresden, Germany, assignor to United Cigarette Machine Co., Inc., Lynchburg, Va., a Corporation of Virginia. Filed Apr. 14, 1927. Serial No. 183,789. 6 Claims. (Cl. 226—5.)

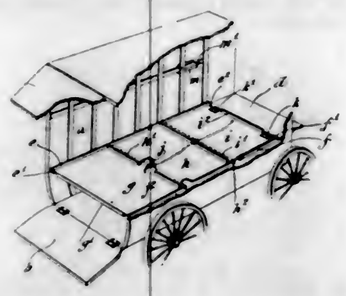


4. In cigarette packing machines, a primary feed drum provided with a plurality of grooves each adapted to receive a cigarette, a secondary feed drum provided with a plurality of grooves each adapted to receive a cigarette, and means for imparting step by step movements to said secondary feed drum comprising a member adapted to be actuated by the walls of a groove of the primary feed drum in its movement, said member being held inactive so long as the grooves of the primary feed drum are without gaps in the train of cigarettes fed thereby.

1,680,025. TURBINE LOCOMOTIVE. FRANZ LÖSEL, Brunn, Czechoslovakia. Filed Aug. 17, 1923, Serial No. 657,843, and in Germany Dec. 27, 1922. 3 Claims. (Cl. 105—36.)

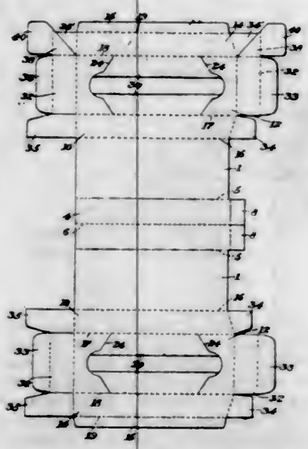
1. In a turbo-electric locomotive, a turbine, a motor-generator adapted to be mechanically coupled with the locomotive, electrical connections leading from said motor-generator to a net work, a switch for controlling said connections and disconnectible means mechanically coupling the turbine to said motor-generator and the locomotive.

1,680,026. METHOD AND APPARATUS FOR CONTROLLING FURNACES. EMBURY MCLEAN, Brooklyn, N. Y., assignor to The Engineer Company, New York, N. Y., a Corporation of New York. Continuation of application Serial No. 655,572, filed Aug. 4, 1923. This application filed Apr. 14, 1924. Serial No. 706,278. 17 Claims. (Cl. 236—15.)



9. In combination, a furnace, means for supplying fuel thereto, means for supplying air thereto, a pivoted member operable in accordance with the flow of air to the furnace, means for yieldingly resisting the movement of said member, means operable by the movement of said member for controlling the rate of feed of fuel to the furnace during the normal operation thereof, and means for varying the feed of fuel to the furnace in accordance with variations in the temperature of the air supplied to the furnace.

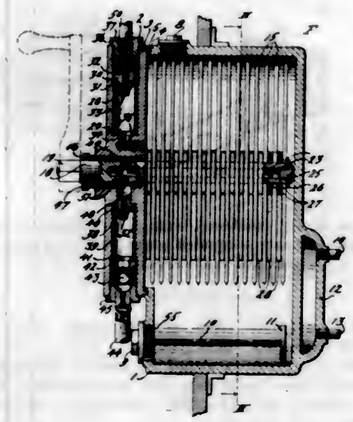
1,680,027. DELIVERY WAGON. CHARLES W. PEELLE, New York, N. Y., assignor to The Peelle Company, Brooklyn, N. Y., a Corporation of New York. Filed Dec. 12, 1924. Serial No. 755,444. 10 Claims. (Cl. 296—21.)



1. A delivery wagon embodying therein a body having a closed bottom, sides and top, runways extending horizontally from adjacent the front to adjacent the rear of said body, above the bottom and within and adjacent opposite sides thereof, means for supporting a load above

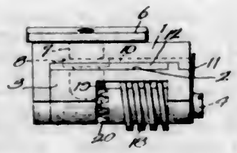
the bottom of the wagon body comprising a plurality of flat plates slidable upon said runways, each plate overlapping and resting upon the adjacent plate toward the rear of the wagon body, a flexible member attached to the front of the wagon body and engaging said plates respectively, whereby movement of the rearward of said

plates rearwardly of the wagon body will cause movement of the adjacent plate, and a flat plate nonslidably supported within the wagon body, said flexible member preventing removal of said slidable plates and permitting them to be telescoped in relation to each other and to said non-slidable plate.



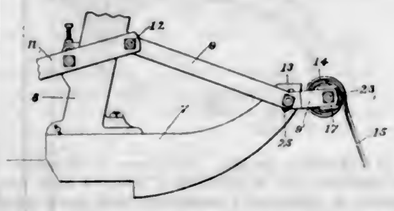
1,680,028. DISPLAY CONTAINER. JOHN J. RYAN and JOHN GAFFNEY, New Haven, Conn., assignors to National Folding Box Company, New Haven, Conn., a Corporation of New Jersey. Filed Oct. 14, 1925. Serial No. 62,340. 19 Claims. (Cl. 206—44.)

1. A display container comprising two compartments and a joining member therebetween having portions bent back upon themselves adapted to support the container in display position and foldable into flat engagement with the container, said portions being respectively connected to said compartments.



1,680,029. FILTER. ERNEST J. SWEETLAND, Hazleton, Pa. Filed Jan. 10, 1922. Serial No. 528,355. 6 Claims. (Cl. 210—182.)

1. A filter comprising a casing, a filter unit disposed in the upper part of said casing, said casing being provided with a settling chamber below said units for receiving the heavier impurities, a drain plug provided in the



lower portion of said chamber and means connected with said drain plug to facilitate removal of said impurities when said drain plug is removed.

1,680,030. CLAMPING DEVICE. WALLACE S. WARNOCK, Chicago, Ill. Filed Aug. 10, 1927. Serial No. 212,081. 16 Claims. (Cl. 101—388.)

1. A clamp structure including the body thereof; a jaw upon said body and having a stem journaled within the body; a cam upon said stem; an adjusting plate engageable with the cam; and a retaining plate with which the adjusting plate is in wedging engagement, said retaining plate being constrained to move transversely of the clamp body upon movement of the adjusting plate by the cam and projecting laterally beyond the clamp body in one position to serve to hold the clamp in place.

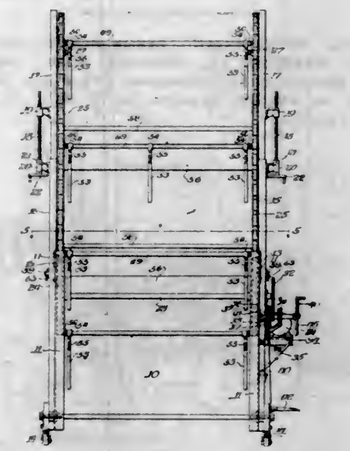
1,680,031. TRASH CLEANER. CHARLES H. WHITE, Moline, Ill., assignor to Deere & Company, Moline, Ill., a Corporation of Illinois. Filed Aug. 4, 1927. Serial No. 210,508. 12 Claims. (Cl. 97—194.)

1. In an implement of the class described, the combination of a furrow opener, a brace bar secured to the forward end of said furrow opener, and a trash

cleaner mounted on said brace bar in front of said furrow opener, said trash cleaner comprising a coiled spring having one end connected with said brace bar and having its other end extending down into soil engaging position in advance of the furrow opener.

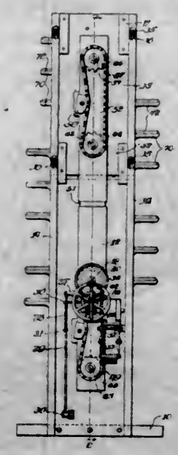
1,680,032. METAL STEP. HARRY T. ANDERSON, Butler, Pa., assignor to T-Z Railway Equipment Co., Chicago, Ill., a Corporation of Illinois. Filed Apr. 25, 1927. Serial No. 186,253. 3 Claims. (Cl. 20—79.)

1. As an article of manufacture, a normally horizontal step having a tread surface provided with a multiplicity of pairs of short adjacent slots, the step material between each pair of slots being upturned, the material on the opposite sides of the slots being downturned to form drainage openings as described said upturned portion being shaped to provide a transversely extending, curvilinear depression.



1,680,033. FLEXIBLE BUTTON. GEORGE W. BLANK, Philadelphia, Pa. Filed Oct. 7, 1927. Serial No. 224,594. 6 Claims. (Cl. 24—108.)

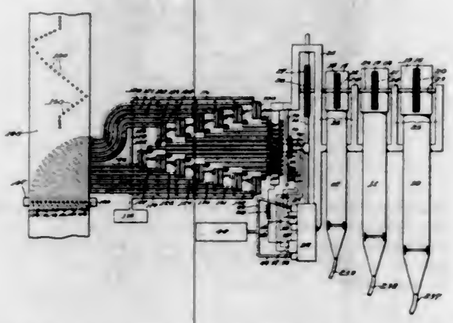
1. A button comprising a head of flexible material, a locking spring within said head, and a stud projecting into the button head for engagement with the locking spring and including a base, a shank and a head, the distance between the inner or under face of the button head and the stud engaging portion of the locking spring being greater than the distance between the stud base and its head whereby the button head will be slightly compressed when the parts are in co-operative relation.



1,680,034. DISPLAY APPARATUS. BENJAMIN J. BUCKINGHAM, Chicago, Ill., assignor to Milton M. Mayer, Chicago, Ill. Filed Feb. 28, 1924. Serial No. 695,648. 6 Claims. (Cl. 211—121.)

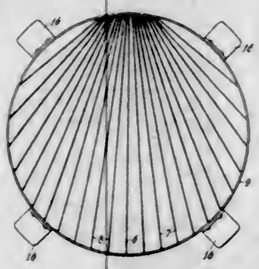
1. In a conveyor device of the class described comprising a pair of lower sprocket wheels, a pair of upper sprocket wheels, a pair of sprocket chains trained around said wheels, means for driving said chains on said wheels, said chains being arranged to move in spaced substantially parallel-vertical planes, and means disposed in the space between said chains and carried thereby for suspending articles therefrom, a frame for supporting said wheels and the associated chains in operative relationship, said frame comprising a rectangular frame unit extending to a portion of the height of said conveyor device and having the lower sprocket wheels mounted in oppositely disposed side walls thereof, a pair of standards upwardly extending from said side walls, each standard consisting of nested channel members, and means for supporting the upper wheels from the upper ends of said standards, said nested channel members

being relatively slidable to permit variations of the spacing between the upper chain wheels and the lower chain wheels.



1,680,035. DISPLAY APPARATUS. BENJAMIN J. BUCKINGHAM, Chicago, Ill., assignor to Milton M. Mayer, Chicago, Ill. Filed Feb. 28, 1924. Serial No. 695,649. 11 Claims. (Cl. 211—121.)

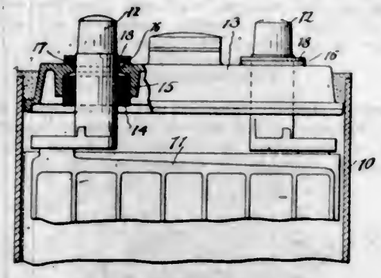
1. An apparatus of the class described, comprising an endless chain conveyor for the articles to be displayed, channel guides in which the stretches of the conveyor chains are adapted to travel, means for driving the conveyor, carries for the articles, transfer means independent of the conveyor coacting with said carriers to positively engage and propel the same in their transfer from one stretch of the conveyor to the other, and means



acting independently of the guide means for deflecting said carriers from said guides to said transfer means, whereby the latter serve to preserve the vertical position of the carriers in their transfer from one stretch of the conveyor to the other.

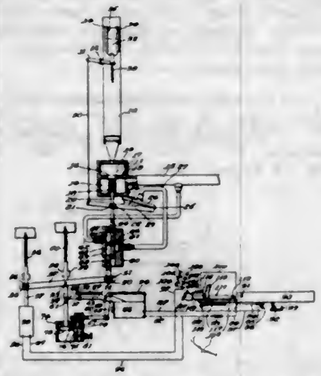
1,680,036. PIPE ORGAN. LESLIE BUSWELL and JOHN HAYS HAMMOND, Jr., Gloucester, Mass.; said Buswell assignor to said Hammond. Filed Apr. 19, 1921, Serial No. 462,579. Renewed Dec. 2, 1927. 15 Claims. (Cl. 84—88.)

7. In a musical instrument, a plurality of organ pipes, means for simultaneously varying the speaking lengths of the respective pipes to produce a glissando effect, and means including an electrically operated mechanism for controlling the glissando effect in a predetermined manner.



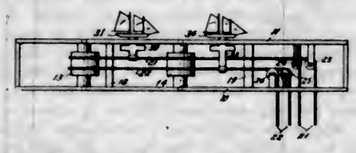
1,680,037. ANTIGLARE ATTACHMENT FOR HEADLIGHTS. AUGUSTUS R. DE TARTAS, Long Island City, N. Y., assignor to Emery C. Weller and E. Woodward Duke, New York, N. Y., and John B. Cornell, Orange, N. J. Filed Dec. 13, 1926. Serial No. 154,348. 9 Claims. (Cl. 240—48.4.)

9. An anti-glare device for a beam of light emitted from a head light comprising a plurality of blades in the form of irregular quadrilaterals, their width tapering from a point toward the two ends, the longer tapering portions converging at one side of the light beam axis, said blades also being disposed with their straight edges in a plane substantially at right angles to the light beam.



1,680,038. STORAGE BATTERY. CARL J. DUNZWEILER, Cleveland, Ohio, assignor to Willard Storage Battery Company, Cleveland, Ohio, a Corporation of West Virginia. Filed Nov. 20, 1924. Serial No. 750,981. 1 Claim. (Cl. 136—163.)

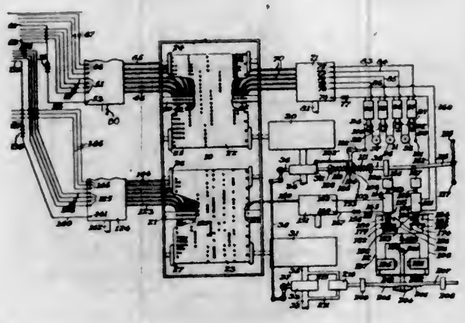
A storage battery comprising a container having a boss with a terminal post opening therein, a terminal post projecting through said opening and adapted to be surrounded with corrosion preventing substance adjacent said



boss, and a cover for the boss and opening shrunk onto the post to form a tight seal, whereby creepage of acid along the post is prevented.

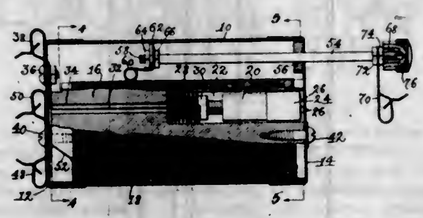
1,680,039. PIPE ORGAN. JOHN HAYS HAMMOND, Jr., Gloucester, Mass. Filed Feb. 16, 1921. Serial No. 445,499. Renewed Dec. 2, 1927. 16 Claims. (Cl. 84—338.)

11. In an organ, a key board for said organ comprising a pivoted lever, a second lever loosely mounted on a movable portion of the first named lever, a body having a relatively large mass secured to a free end of said second named lever, said second named lever and mass being movable independently of said first named lever, the extent of such movement varying according to the speed of movement of the first named lever, means for restoring the first named lever to normal, means for locking the second named lever in its displaced position relative to the first named lever arranged to be automatically released upon return of the first named lever to normal, and means controlled by the momentum of said mass for varying the intensity of the sound produced.



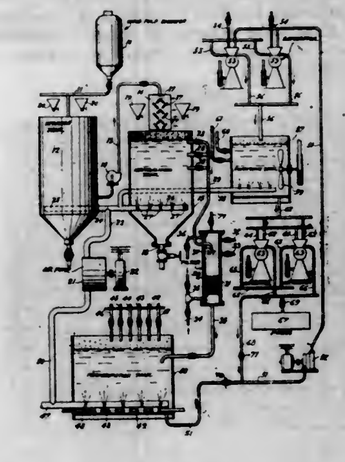
1,680,040. BOAT-RACE INDICATOR. JOHN HAYS HAMMOND, Jr., Gloucester, Mass. Filed Sept. 28, 1922. Serial No. 591,194. 5 Claims. (Cl. 116—120.)

2. An indicator for showing status of a race comprising a plurality of models each representing one of the contestants, a corresponding plurality of guiding means



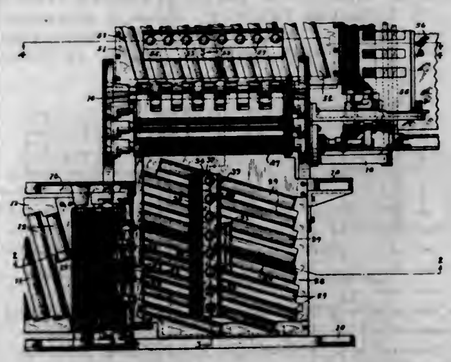
for said models respectively, each of said guiding means having a configuration corresponding to that of the race course, a corresponding plurality of movable control dials for said models respectively, each having a configuration different from that of the respective guiding means but calibrated to show distances thereon, a corresponding plurality of drums operatively interconnected with said dials respectively, and a plurality of endless belts each operatively interconnecting one of said models with its respective drum and operable upon movement of said dial for positively actuating the respective model.

1,680,041. AUTOMATIC CONTROL OF ORGAN MUSIC. JOHN HAYS HAMMOND, Jr., Gloucester, Mass. Filed Apr. 19, 1924. Serial No. 707,551. 11 Claims. (Cl. 84—119.)



11. In a musical instrument, a plurality of independently movable music sheets each provided with note perforations, a plurality of groups of actions for controlling portions of the musical instrument in accordance with a musical composition, each of said groups being controlled by the perforations of one of said note sheets respectively, means for driving each of said music sheets, and means associated with one of said driving means for accelerating the respective music sheet independently of the remainder.

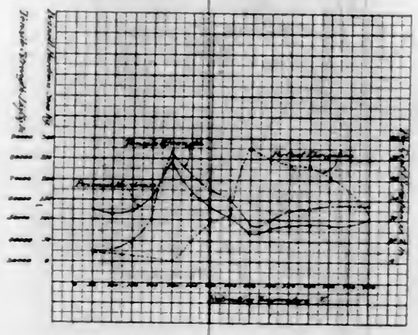
1,680,042. RADIO RECEIVING APPARATUS. ALBERT M. HARDING, Boston, Mass., assignor to Flash Radio Corporation, Boston, Mass., a Corporation of Massachusetts. Filed Oct. 22, 1926. Serial No. 143,488. 1 Claim. (Cl. 250—14.)



In a radio receiving set, in combination, a casing provided with end members, a tuning coil within said casing having a core of insulating material provided with a recess forming a housing for a fixed crystal detector and a choke coil, said fixed crystal detector and choke coil located in said housing to be moved with the tuning coil as a unit and with the choke coil connected with the output end of said crystal detector, and a slider provided with a contact member cooperating with said tuning coil.

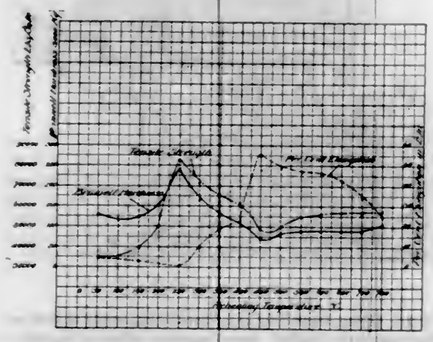
1,680,043. PREPARATION OF YEAST. GUSTAF OLOF WOLFGANG HEIJKENSKJÖLD, Stockholm, Sweden, assignor to Aktiebolaget Bästa, Stockholm, Sweden, a Corporation of Sweden. Filed Feb. 6, 1926, Serial No. 86,530, and in Sweden Mar. 28, 1925. 40 Claims. (Cl. 195—20.)

12. The method of cultivating yeast and utilizing acid sulphite waste liquor which comprises reducing the acidity of the sulphite waste liquor at least to the neutral point, filtering the treated liquor, planting propagative seed yeast in a wort of high sugar concentration, adding the treated sulphite liquor and such additional yeast nutriments as may be desired to the wort, aerating the wort, and removing the liquor from the yeast.



1,680,044. PAPER-HANDLING MACHINE. REUBEN HITCHCOCK, Cleveland, Ohio, assignor to The Cleveland Folding Machine Company, Cleveland, Ohio, a Corporation of Ohio. Filed Dec. 2, 1926. Serial No. 152,184. 21 Claims. (Cl. 271—52.)

1. In paper handling machines, the combination of a feed table comprising sheet moving means, means for feeding a plurality of sheets simultaneously onto said table transversely of the direction of movement given to the sheets by said sheet moving means, a stop for interrupting such transverse movement of the sheets, and rotatable members arranged above said sheet moving

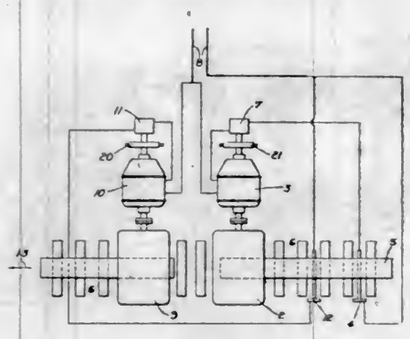


means adjacent said stop to engage the leading sheet on said table to give to that sheet a rapid acceleration longitudinally of said table for the purpose of separating said leading sheet from the sheet which follows it.

1,680,045. METHOD OF TREATING COPPER ALLOYS AND IMPROVED PRODUCT. VICTOR O. HOMERBERG, Belmont, Mass., and DEXTER N. SHAW, Philadelphia, Pa. Filed Jan. 28, 1926. Serial No. 84,386. 21 Claims. (Cl. 148—11.)

1. The process of treating those copper alloys whose composition is such that the particular alloy being treated falls within that portion of the temperature-composition diagram of its system which resembles the portion of the copper-zinc temperature-composition diagram in which 60-40 brass is found, which comprises heating the alloy above the critical temperature to obtain substantially a single solid solution; quenching to obtain this substantially single solid solution at room temperature; and thereafter selecting a predetermined reheating temperature corresponding to the physical properties desired, heating at said chosen temperature and subsequently cooling to obtain substantially the structure corresponding to that of the reheating temperature a room temperature.

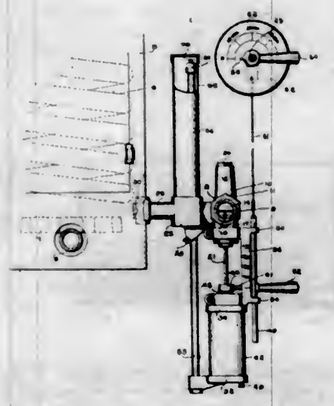
1,680,046. METHOD OF TREATING COPPER ALLOYS AND IMPROVED PRODUCT. VICTOR O. HOMERBERG, Cambridge, Mass., and DEXTER N. SHAW, Akron, Ohio. Filed Jan. 30, 1924. Serial No. 689,504. 18 Claims. (Cl. 148—11.)



17. Muntz metal characterized by a tensile strength of over 75,000 pounds per square inch and a Brinell hardness of over 200 and having these properties by reason of the presence therein of very finely divided crystals uniformly distributed.

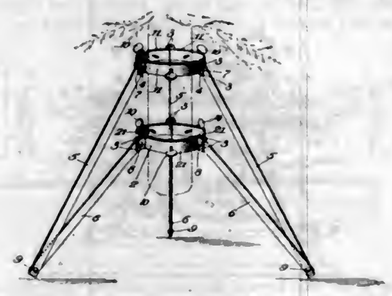
1,680,047. STABILIZATION OF OILS, FATS, AND WAXES. JOHN Y. HUBER, Jr., Ardmore, Pa. Filed Feb. 4, 1924. Serial No. 690,667. 3 Claims. (Cl. 99—17.)

2. The method of stabilizing food products containing fatty material, which consists in adding thereto furfural in amounts insufficient to affect the flavor of said products.



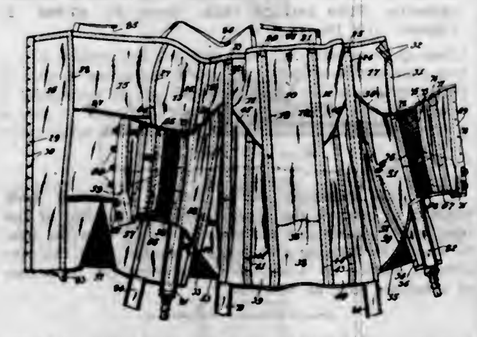
3. As a new article of manufacture, a food product containing fatty material and a stabilizer in the form of furfural in amount insufficient to affect the flavor of said product.

1,680,048. APPARATUS AND METHOD OF SHEARING. LORENZ IVERSEN, Pittsburgh, Pa., assignor to Mesta Machine Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Mar. 18, 1927. Serial No. 176,439. 12 Claims. (Cl. 164—17.)



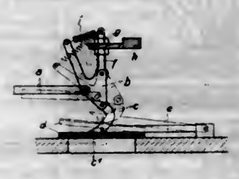
1. Apparatus for shearing a moving strip of material comprising means for cutting the strip into predetermined lengths, and means for cropping the trailing end of the strip.

1,680,049. HEATER APPLIANCE. FRANK A. GAUGER and ROY W. JOHNSON, Milwaukee, Wis., assignors, by mesne assignments, to Time-O-Stat Corporation, Milwaukee, Wis. Filed Jan. 16, 1922, Serial No. 529,732. Renewed Oct. 27, 1926. 18 Claims. (Cl. 158—99.) 99.)



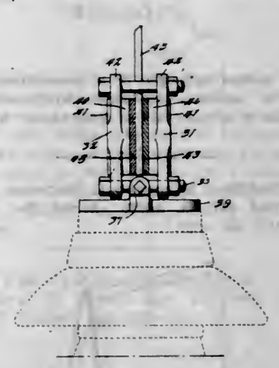
1. In a device of the class described, a fuel supply connectable with a burner, means for connecting the fuel supply with the burner, and means for flashing an igniting jet of flame toward the burner, said first named means automatically disconnecting the fuel supply from the burner after a predetermined period of operation.

1,680,050. FOLDING TREE HOLDER. ALBERT KEPPENS, Berwyn, Ill. Filed Nov. 9, 1926. Serial No. 147,213. 2 Claims. (Cl. 248—38.)



1. A tree holder of the class described comprising in combination two collars in vertical alinement, each composed of a plurality of arcuate sections, adapted to be fastened to the trunk of the tree having ears formed at each end thereof, the ears of one of said sections having slots formed therein to render it readily removable; and a plurality of legs, equal in number to the number of sections composing the collar, each leg composed of two bars pivotally connected to the two collars and to each other, adapted to be spread out to form a firm base for the tree, and to fold up when not in use, substantially as described.

1,680,051. APPAREL GARMENT. WALDEMAR KOPS, New York, N. Y., assignor to Kops Bros., Inc., New York, N. Y., a Corporation of New York. Filed June 25, 1927. Serial No. 201,324. 2 Claims. (Cl. 2—27.)

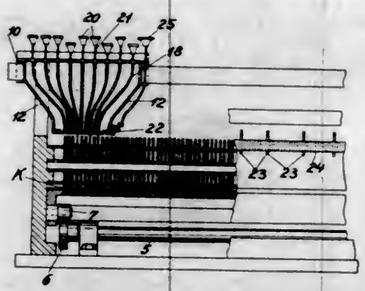


1. In an apparel garment, a body member adapted to surround the body of the wearer from a point above the busts to a point below the buttocks, the said body member including a back section, an abdominal support comprising sections of inelastic and elastic material adapted to extend across the abdomen of the wearer, and side sections of inelastic material connected at their forward edges to the distant edges of the abdominal support and at their rearward edges to the edges of the back section of the body member, the lower edges of the side sections extending downwardly from the lower edge portions of the abdominal support to substantially the lower edge of the lower side portions of the back section of the body member whereby the tension exerted by the elastic sections of the abdominal support is transmitted through the lower portion of the said side sections to the lower portion of the back section of the body member to cause the same to conform to and retain the buttocks of the wearer.

1,680,052. ACCORDION. ARTUR LANKA, Gera, Germany. Filed May 12, 1927. Serial No. 190,821. 4 Claims. (Cl. 84—376.)

4. Valve operating mechanism for key-operated accordions and similar musical instruments including bass and second valves, valve-plates for said valves, and systems of levers and plates for operating the same upon the operation and release of said keys, a member engaging the bass valve-plate and operatively connected to the second valve-plate for operating both the bass and the second valve simultaneously.

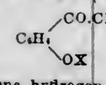
1,680,053. CLAMP FOR ELECTRICAL CONDUCTORS. JOEL S. LAWSON, St. James, N. Y., assignor to Memco Engineering & Manufacturing Company, Inc., Long Island City, N. Y., a Corporation of New York. Filed Jan. 26, 1927. Serial No. 163,766. 2 Claims. (Cl. 173—251.)



2. A bus bar clamp for bus bars of rectangular cross-section, comprising a pair of clamping plates, each plate being reversible and having a thick boss on one side thereof and a thin boss on the other side thereof, and lugs extending from the plates, said lugs having apertures for the reception of clamping bolts.

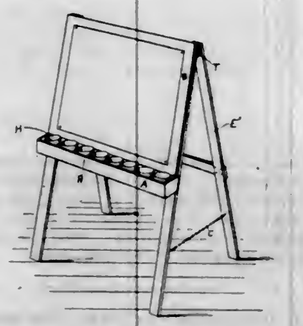
1,680,054. PUNCHING MACHINE FOR STATISTICAL CARDS. MARTIN LEBEIS, Berlin-Friedenau, Germany, assignor, by mesne assignments, to Remington Rand Inc., New York, N. Y., a Corporation of Delaware. Filed June 30, 1925, Serial No. 40,624, and in Germany July 3, 1924. 4 Claims. (Cl. 164—112.)

1. In a punching machine for statistical cards, a punching device having a plurality of rows of punches, corresponding rows of punch locking devices, a movable setting carriage having a keyboard provided with several rows of keys and provided with corresponding rows of key operated devices adapted to set in operative



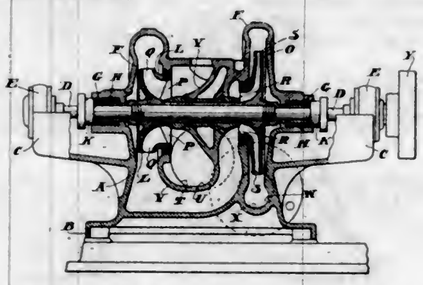
position punch locking devices above a plurality of punch rows which form a zone or portion of the total number of punch rows, a card carrier movable relatively to the locked punches, tabulating means including a tabulating key for moving said setting carriage step by

step from zone to zone of the rows of punches, and means cooperating with the inner ends of said key operated devices to lock the keys in depressed position, said key locking devices being releasable by depression of the tabulating key.



1,680,055. MONOOXY-ω-AMINOACETOPHENONE DERIVATIVES. HELMUT LEGERLOTZ, Berlin, Germany. Filed Mar. 23, 1927, Serial No. 177,829, and in Austria Mar. 22, 1926. 6 Claims. (Cl. 260—128.5.)

1. The hereinbefore described monohydroxy-ω-aminoacetophenone derivatives carrying substituents in the amino group and having the general formula

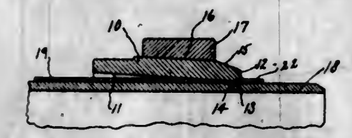


in which R' means hydrogen or a monovalent hydrocarbon radical, R'' means a monovalent hydrocarbon radical and X means hydrogen or a monovalent hydrocarbon radical.

1,680,056. EASEL. MARGARET E. MATHIAS, Montclair, N. J. Filed Jan. 8, 1926. Serial No. 80,071. 2 Claims. (Cl. 45—129.)

1. An easel comprising a board and a removable liquid tight trough below and in front of the face of said board to carry material holders in front of the board, said trough having a portion extending behind the face of said board to catch drippings from the board, in combination with a removable rack to retain material holders spaced apart in said trough and fitting the trough loosely to permit drippings to fall into the trough, said rack comprising a longitudinal perforated member and integral legs.

1,680,057. CENTRIFUGAL PUMP. JAMES K. MCINTYRE, Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed Sept. 23, 1926. Serial No. 137,297. 3 Claims. (Cl. 103—108.)

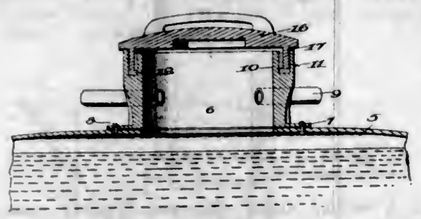


1. A two stage centrifugal pump comprising a casing, a pair of impellers having inlets opposed to each other, the first stage impeller inlets being larger than the second stage impeller inlets and the first stage impeller being of less diameter than the second stage impeller.

1,680,058. ADDITION MATERIAL FOR FERROUS METALS. PAUL D. MERICA, New York, N. Y., and THOMAS H. WICKENDEN, Roselle, N. J., assignors to The International Nickel Company, New York, N. Y., a Corporation of New Jersey. Filed Apr. 28, 1925. Serial No. 26,521. 18 Claims. (Cl. 75—45.)

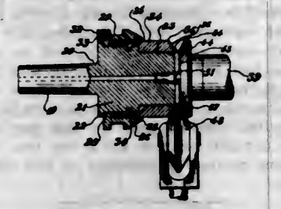
1. As an addition material for ferrous substances, nickel and another alloying element adapted to improve the properties of the ferrous substance, said material having its melting point artificially lowered by the addition thereto of another substance.

1,680,059. BEVELING AND SEALING CLAMP. THOMAS MIDGLEY, Hampden, Mass., assignor to The Fisk Rubber Company, Chicopee Falls, Mass., a Corporation of Massachusetts. Filed July 24, 1925. Serial No. 45,899. 2 Claims. (Cl. 18—43.)



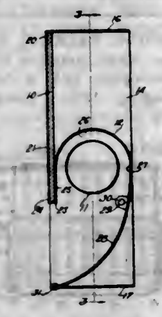
1. A tube clamping device having a skiving area adapted to produce the taper desired on the end of the tube, and a constricted portion adapted to trim the tube to length, the skiving area being separated from the constricted portion by a shoulder to prevent the formation of a feather edge on the tube.

1,680,060. MANHOLE COVER FOR OIL TANKS. ADOLPH EDWARD NELSON, Chelsea, Okla. Filed Mar. 15, 1926. Serial No. 94,886. 1 Claim. (Cl. 220—45.)



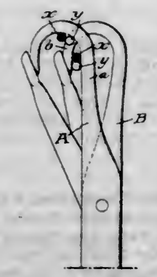
In an oil storage tank having a top opening, a manhole cover comprising a thick walled upstanding circular neck having means whereby the same may be rigidly attached to the top of an oil tank to surround said opening, said neck being provided with means intermediate its ends whereby the same may be connected to the pipes extending from a plurality of producing wells, the upper end portion of the neck being of uniform thickness and being formed with an annular channel for the reception of oil, the thick uniform cross section of said neck providing said channel with thick inner and outer walls, said inner wall being substantially thicker than the outer wall and terminating below the same, the thickness of the inner wall being the same throughout, a lid

having an integral circumferential depending skirt inwardly of its outer edge, said skirt being received in said channel and flatly engaging the inner surface of the outer wall of the channel with its lower edge in spaced relationship to the bottom and inner wall of the channel to provide a liquid seal between the lid and the neck, said skirt terminating short of the bottom of said channel and hav-



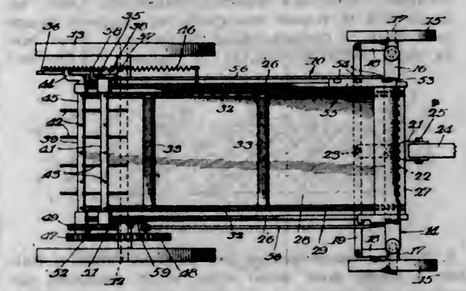
ing its marginal portion extended beyond the outer side of the neck to provide a shield and being adapted to be supported upon and flatly engaged with the upper edge of said outer wall with the under surface of the lid spaced from the inner wall of said channel, the lower portion of said neck having spaced recesses providing heat disseminating projections whereby heat will be carried off, and said pipes extending into said bosses.

1,680,061. SPUN METAL MANUFACTURE AND PRODUCT. REYNOLD G. NELSON, Canton, Ohio, assignor to The Spun Steel Corporation, Canton, Ohio, a Corporation of Ohio. Filed Sept. 16, 1926. Serial No. 135,852. 5 Claims. (Cl. 29—159.)



1. A pulley and the like made of sheet or strip metal of sixteen gauge or thicker including a wheel disk, and a peripheral flange integral with the wheel disk and having a relatively narrow and relatively deep groove roller spun therein.

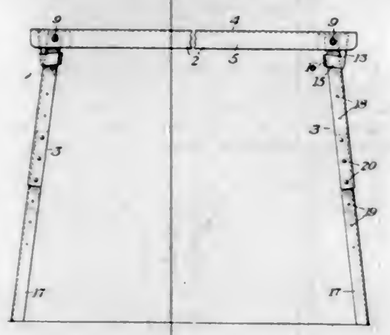
1,680,062. COMBINATION MIRROR AND ILLUMINATING DEVICE. WILLIAM J. NEWTON, Bridgeport, Conn., assignor to Metropolitan Electric Manufacturing Company, Long Island City, N. Y. Filed Feb. 24, 1925. Serial No. 11,299. 2 Claims. (Cl. 240—4.)



1. An article of manufacture, comprising a mirror, a lamp, and a reflector, and a frame carrying said mirror, lamp and reflector, said frame including flanges at its front engaging the marginal portions of the front face of the mirror at the top and sides of the mirror, said reflector being at the rear of the lower portion of said mirror and including a pocket in which the lower edge of the mirror rests, and said reflector also including a flat, vertical portion engaging a substantial part of the lower portion of the rear face of the mirror to fix, with the aid of the flanges of the frame and the pocket of the reflector, the position of the mirror in the frame, the flat, vertical portion of the reflector merging in a part-cylinder thereof which extends about a part of said lamp, and said part-cylinder of said reflector merging in a flat, parabolic surface extending downwardly and forwardly in the frame and terminating at a location below and spaced from the lower edge of said mirror.

1,680,063. METHOD OF AND MACHINE FOR MAKING PLATED FABRICS. ALBERT E. PAGE, Brooklyn, N. Y., assignor to Scott & Williams, Inc., New York, N. Y., a Corporation of Massachusetts. Filed July 12, 1924. Serial No. 725,625. 6 Claims. (Cl. 66—40.)

1. The method of producing longitudinal stripes in plated fabric, which comprises feeding yarns to the needles from unchanged positions, the needles by the positions of their hooks differentiated laterally in planes normal to the course of needles causing the needle wales of the back yarn to be drawn to the front face of the fabric when the needles are drawn down, while knitting both yarns together at those needles as well as at other needles.

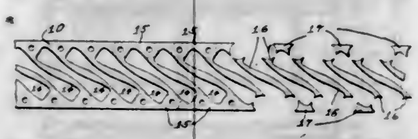


1,680,064. FERTILIZER DISTRIBUTOR. WILLIAM J. POPE, Plano, Ill. Filed Mar. 10, 1926. Serial No. 93,594. 3 Claims. (Cl. 275—5.)

1. In combination, a vehicle, manure spreader mechanism mounted on said vehicle, said mechanism comprising a rotating distributor having a shaft extending across said vehicle, a conveyor, a conveyor shaft journaled in the rear portion of said vehicle for operating said con-

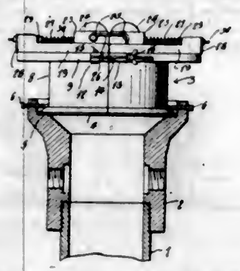
veyor, means including a single crank on said first named shaft and a lever intermittently oscillated by said crank for advancing said conveyor step by step, and means extending to the front of the vehicle for adjustably limiting the return of said lever for regulating the rate of movement of said conveyor.

1,680,065. FOLDABLE SUPPORT. ROBERT V. PROCTOR, Youngstown, Ohio, assignor to The Commercial Shearing & Stamping Company, Youngstown, Ohio, a Corporation of Ohio. Filed Feb. 10, 1927. Serial No. 167,166. 3 Claims. (Cl. 304—6.)



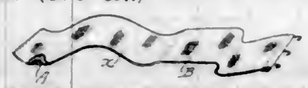
1. A foldable support comprising a frame having a supporting face, a flange inclined thereto, a supporting member secured to the frame and spaced from the flange, a leg fitting between the flange and the member, and a pivot pin for the leg extending from the flange to the member.

1,680,066. PROCESS FOR OBTAINING PURE ALUMINA AND ALKALI-METAL CARBONATES. FRITZ ROTHE, Aachen, and HANS BRENEK, Porz, near Cologne, Germany, assignors to the Firm Rhenania Verein Chemischer Fabriken A. G., Cologne, Germany. Filed Oct. 6, 1925, Serial No. 60,922, and in Germany Oct. 13, 1924. 8 Claims. (Cl. 23—52.)



1. The process which consists in mixing minerals containing alumina with an alkali-metal sulphate and heating said mixture to incandescence in the presence of steam at a temperature of at least 1100° C. avoiding any reduction in the mixture during the process.

1,680,067. PROCESS FOR MAKING SHEET-METAL CHAINS. THEODORE RUSSELL, Naugatuck, Conn., assignor to J. M. Russell Manufacturing Company, Naugatuck, Conn., a Corporation of Connecticut. Filed June 24, 1927. Serial No. 201,131. 2 Claims. (Cl. 59—35.)

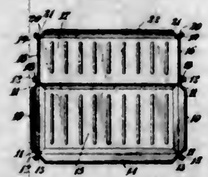


2. The process of making two different forms of links from a single sheet metal strip, which comprises successively stamping out a plurality of links diagonally to the grain of said strip, and then successively stamping a plurality of links longitudinally from both edges of the scrap left after said diagonally stamped links have been removed, said second-mentioned links having central recesses of the same outline as the corners of said first-mentioned links.

1,680,068. FLEXIBLE DRILL NIPPLE AND OIL SAVER. FREDERICK W. SADLER, Oklahoma City, Okla. Filed Mar. 30, 1927. Serial No. 179,622. 10 Claims. (Cl. 166—14.)

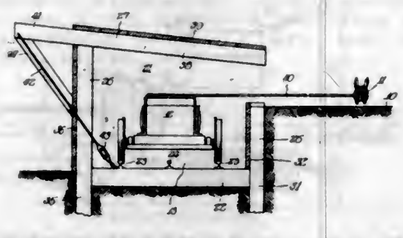
1. A drilling nipple comprising pivotally connected sections, means securing the sections in closed relation, a slide carried by each section, rollers journaled in the slides, means detachably connecting the slides, and springs bearing against the slides.

1,680,069. SANITARY PILLOW. NICHOLAS SCHENK, St. Louis, Mo. Filed Jan. 17, 1927. Serial No. 161,602. 2 Claims. (Cl. 5—337.)



1. A head rest composed of a supporting means comprising a relatively broad strip of resilient sheet metal having an upwardly curved intermediate portion and upwardly bowed end portions curved slightly in the opposite direction to said curved intermediate portion, a flexible head engaging portion attached to one of said end portions, and means for connecting said head engaging portion to the other of said end portions whereby the intermediate portion of said strip is held in a substantially horizontal position and the end portions of said strip in an upright position when the free end of said head engaging portion is attached to the other of said end portions.

1,680,070. PURIFICATION OF NAPHTHALENE. GEORG SCHROETER, Berlin, Germany. Original application filed Aug. 29, 1921, Serial No. 496,639, and in Germany May 13, 1916. Divided and this application filed Mar. 30, 1925. Serial No. 19,532. 4 Claims. (Cl. 260—168.)

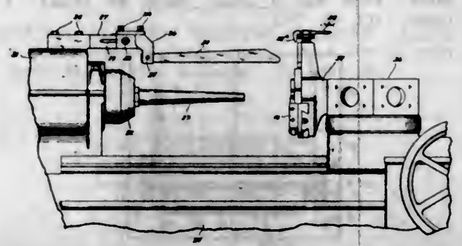


1. A process of treating naphthalene to remove those impurities which act as catalyzer poisons on hydrogenation in the presence of a hydrogenation catalyst, which comprises subjecting naphthalene, at a temperature above its melting point to the action of a metal loosely combined with a non-acid agent.

1,680,071. EXTENSION PACKING CASE. ROBERT W. STANLEY, Holyoke, Mass., assignor to Bergstan Patents Corporation, Wilmington, Del., a Corporation of Delaware. Filed May 1, 1925. Serial No. 27,163. 7 Claims. (Cl. 220—6.)

1. An extension packing case comprising a main member having inclined peripheral flanges lying within the plane of the adjacent sides of the case, an extension having inclined corners and peripheral flanges to fit the flanges of the main part of the case, and a cover having flanges to fit those of the extension and the main part of the case whereby the cover can be used either for the main case or for the extension.

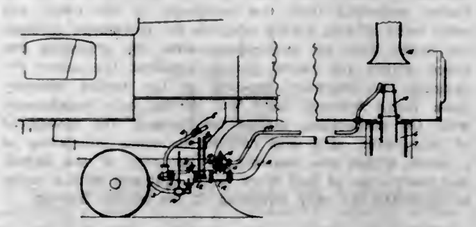
1,680,072. RACING-TRACK APPARATUS. HARRY B. STAVER, Chicago, Ill. Filed Jan. 13, 1927. Serial No. 160,807. 5 Claims. (Cl. 272—4.)



1. In an animal racing course comprising a racing track, a carriage track disposed on one side of said racing track, a carriage arranged to be driven on said carriage track and a lure carried on said racing track by said carriage to induce dogs to run therebehind, a housing for covering said carriage track, said housing comprising a wall disposed on the side of the carriage track opposite said racing track and a roof supported on said wall to provide a continuous opening on the side of the housing adjacent said racing track, said roof having extensions on the side of the wall opposite said tracks, and means for bracing said extensions against said wall below said roof to hold said roof in fixed position.

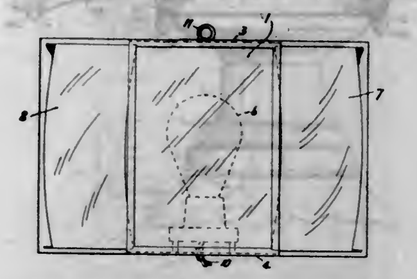
1,680,073. PROCESS OF MAKING NOZZLES. JAMES HALL TAYLOR, Oak Park, Ill. Filed Nov. 28, 1924. Serial No. 752,526. 5 Claims. (Cl. 29—157.)

1. The process of forming nozzles which comprises first forming a circular body with a flange at one end and with a central opening of substantially ultimate size therethrough, and then forming a peripheral groove in said body adjacent said flange to form a central neck and a flange on the other end of said neck.



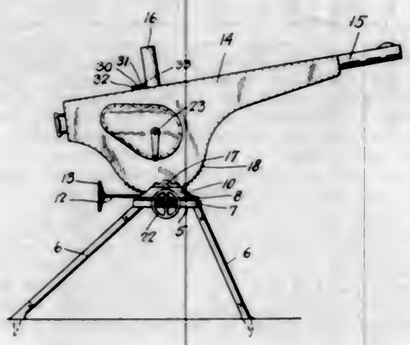
1,680,074. TAPER-TURNING ATTACHMENT FOR MACHINE TOOLS. JOHN J. N. VAN HAMERSVELD, Cleveland Heights, Ohio, assignor to The Warner and Swasey Company, Cleveland, Ohio, a Corporation of Ohio. Filed July 16, 1926. Serial No. 122,745. 22 Claims. (Cl. 82—17.)

1. A taper turning attachment for machine tools having two relatively movable members, said attachment comprising a cam adapted to be applied to one of said members and a unit adapted to be applied to the other and comprising a body having a follower engageable with the cam, a cutter holder, and two thrust resisting members having separate pivoted supports with independent connections with the follower.



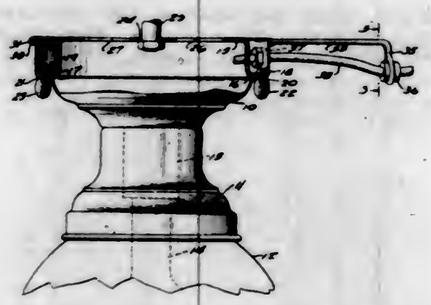
12. A taper turning attachment for machine tools having two relatively movable members, said attachment comprising a cam adapted to be applied to one of said members and a unit adapted to be applied to the other, said unit comprising a body having a cutter holder, thrust resisting means and a follower composed of two portions one engageable with the cam and the other operatively connected to the thrust resisting means and to the cutter holder, an adjusting member for shifting the last mentioned portion of the follower with respect to the first named and serving when moved in one direction to shift the thrust resisting means and the cutter holder away from the work piece, and when shifted in the opposite direction bringing the thrust engaging means and the cutter holder in operative position with respect to the work piece and an adjustable stop for positioning said adjusting member with the thrust resisting means and cutter holder in the last mentioned position.

1,680,075. EXHAUST-STEAM-PRESSURE CONTROL FOR INJECTORS. ROY J. VAN METER, Sturgis, Mich., assignor to The Superheater Company, New York, N. Y. Filed Mar. 23, 1925. Serial No. 17,496. 4 Claims. (Cl. 103—265.)



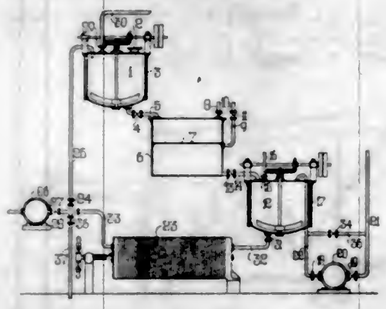
1. The combination of a boiler, an injector supplying feed water thereto, means for supplying exhaust steam to said injector, and a pressure relief valve located in said means, said valve being normally closed and opening only when the pressure within said means exceeds a pre-determined figure.

1,680,076. LIGHT FOR SHAVING AND THE LIKE. OSCAR WIEDERHOLD, Philadelphia, Pa. Filed Feb. 16, 1927. Serial No. 168,503. 2 Claims. (Cl. 240—4.)



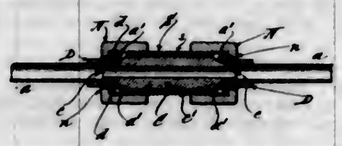
1. A light for shaving and the like comprising a receptacle of which the front consists of a mirror and which is open at the sides, a lamp in the receptacle behind the mirror, and movable reflectors arranged to project outwardly at each of the side edges of the mirror and back of the lamp and adapted to reflect light forwardly from opposite sides of the mirror.

1,680,077. TOY CATAPULT. FRED E. ALLENDER, Davenport, Iowa. Filed June 13, 1927. Serial No. 198,547. 2 Claims. (Cl. 124—13.)



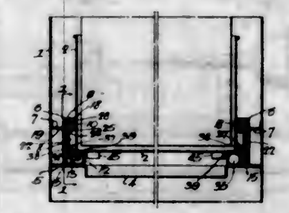
1. In a catapult of the character described, a chamber, a horizontal barrel within this chamber and projecting through the forward end thereof, the rear end of the barrel being slotted, means for feeding projectiles through the rear end of the barrel, a rotor within the chamber beneath the rear end of said barrel, spring blades radiating from the periphery of the rotor, the outer ends of said blades adapted for movement through the barrel slots for engagement with the projectile disposed within the barrel, means adjacent the barrel for causing the rearward bending of the blades whereby upon being released they will swing into engagement with the projectiles, means for causing the movement of said rotor, said first mentioned means consisting of a block within the chamber at the rear of the barrel, the lower edge of said block being equipped with a roller to facilitate the easy stripping of the blades thereby.

1,680,078. LIGHTING FIXTURE. ARTHUR B. ALLWORTH, Meriden, Conn., assignor to The Miller Company, Meriden, Conn., a Corporation of Connecticut. Filed Mar. 18, 1925. Serial No. 16,308. 6 Claims. (Cl. 240—78.)



1. A lighting fixture comprising a sheet metal canopy, a device attachable to a ceiling support and to which the canopy is removably attached, a wire loop, the upper edge of the canopy being rolled about the wire loop, a portion of the loop projecting laterally from the canopy, and a cord supporting bushing carried on the outer end of the loop.

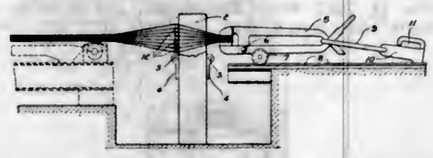
1,680,079. MANUFACTURE OF PURE SULPHUR. WILLIAM HENRY BENTLEY, Burnley, England, assignor of two-thirds to John Riley & Sons Limited, Hapton, England, a British Company. Filed Aug. 16, 1926, Serial No. 129,561, and in Great Britain Aug. 17, 1925. 11 Claims. (Cl. 23—224.)



1. The cyclic process of preparing pure sulphur which comprises decomposing a polysulphide solution by hydrogen sulphide, separating the precipitated pure sulphur from the mother liquor and dissolving crude sulphur in the hydrosulphide mother liquor to give a polysulphide solution which can again be treated with hydrogen sulphide.

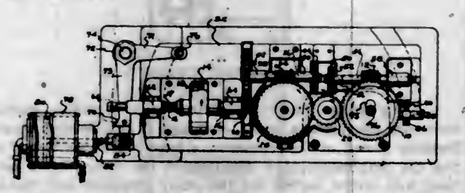
1,680,080. PIPE COUPLING. JOSEPH BENZION, New York, N. Y. Filed Sept. 18, 1926. Serial No. 136,219. 3 Claims. (Cl. 285—79.)

1. A pipe coupling of the character designated, including a splice-core-duct formed with conoidal extremities for contactual engagement with opposed flared ends of piping, and means for clamping said flared ends of piping against the conoidal extremities of said splice-core-duct including a connecting sleeve mounted on said splice-core-duct, clamping sleeves embracing said flared ends of the piping, and nuts threaded on said connecting sleeve at opposite ends thereof and loosely fitting around said clamping sleeves to permit adjustment thereof over the ends of the splice-core-duct while acting on said sleeves to clamp the tapered ends of said pipes against the ends of said splice-core-duct.



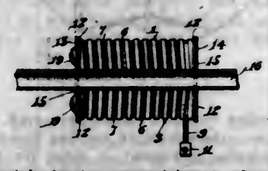
1,680,081. CABINET. CONRAD BERGMANN, Philadelphia, Pa., assignor to Columbia Steel Equipment Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Mar. 9, 1925. Serial No. 14,227. 1 Claim. (Cl. 45—77.)

A cabinet having a fixed track of channel form, said track having a rib extending longitudinally in the bottom thereof, telescoping tracks disposed in the channel



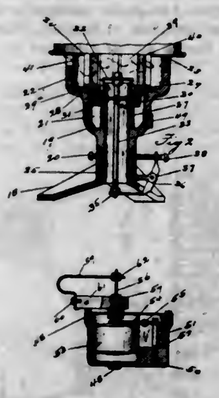
of the fixed track in spaced relation thereto, balls for supporting the telescoping tracks relatively to each other, and balls mounted in the bottom of the channel on each side of the rib for supporting respectively the said telescoping tracks relatively to the said fixed tracks.

1,680,082. SHEET-OPENING MECHANISM. FLORENCE C. BIGGERT, Jr., Pittsburgh, Pa., assignor to United Engineering & Foundry Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Original application filed Sept. 27, 1923, Serial No. 661,406. Divided and this application filed Nov. 4, 1926. Serial No. 146,126. 5 Claims. (Cl. 29—17.)



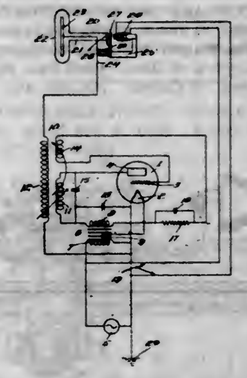
1. Opening mechanism for a pack of sheets including a plurality of loosely mounted separating bars free to move with the movement of the sheets, and means for drawing the sheets of the pack over opposite sides of adjacent bars.

1,680,083. GEAR-CHAMFERING MACHINE AND METHOD FOR CHAMFERING GEAR TEETH. ARTHUR BLADES and FREDERICK D. VAN VALKENBURG, Detroit, Mich., assignors, by mesne assignments, to Dodge Brothers, Inc., a Corporation of Maryland. Filed Sept. 25, 1923. Serial No. 664,680. 12 Claims. (Cl. 90—15.)



1. In a machine for finishing gear teeth, means for fastening a gear to be operated upon in fixed rotatable position, a cutter, means for rotating said cutter and gear in timed relation in engagement with each other, the said cutter having cutting teeth thereon of a form adapted to pass over the edges of the teeth of the gear on one face thereof in a continuous movement during the rotation so as to chamfer the edges of the teeth on one face of the gear in one revolution thereof with respect to said cutter, means for swinging said cutter into and out of cutting position on said gear, and means for automatically disconnecting said driving means when said cutter has been moved a predetermined distance away from said gear.

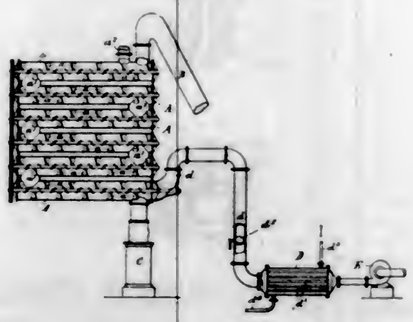
1,680,084. ELECTRIC HEATING ELEMENT. SAMUEL S. BOLSINGER, Roseburg, Oreg. Filed Oct. 8, 1927. Serial No. 224,911. 5 Claims. (Cl. 219—38.)



1. An electric heater comprising a plurality of heating elements consisting of tubular cores of non-conducting material and a single conductor common to the cores and adapted to have its ends connected with an electrical source, said conductor having a length thereof spirally wound on each of said cores, said cores being formed in their outer faces with squared, spiral threads to receive said conductor therein to permit expansion of said conductor and to prevent the convolutions thereof from crowding together, and supporting means connected to and maintaining said elements in spaced relation, said supporting means provided with openings for the mounting thereof on a fuel feed line to position said elements to surround the latter.

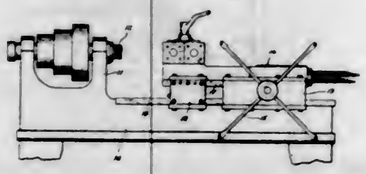
1,680,085. MEANS FOR BURNING LIQUID FUELS. JAMES L. BREESE, Jr., Lake Forest, Ill., assignor to Oil Devices Corporation, Chicago, Ill., a Corporation of Illinois. Filed Feb. 21, 1925. Serial No. 10,742. 9 Claims. (Cl. 158—67.)

1. In a burner of the class described, a chamber for containing a body of oil, a combustion chamber above the same, a heat conductor intermediate the combustion chamber and oil chamber and extending into the latter to vaporize oil therein, a thermostat, and means controlled jointly by the thermostat and the level of the oil in the oil chamber for feeding oil to the latter.



1,680,086. HIGH-FREQUENCY APPARATUS. WENDELL L. CARLSON, Schenectady, N. Y. Filed June 1, 1925. Serial No. 34,221. 2 Claims. (Cl. 174—177.)

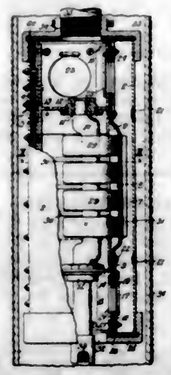
1. A high frequency apparatus comprising an electron tube oscillator including grid, filament and plate electrodes with input and output circuits connected there-



with, a source of low frequency alternating electrical energy, means for impressing said energy upon said output circuit, means for impressing a portion of said energy upon said filament, said input and output circuits including coupling coils arranged to impress high frequency electrical energy upon a third coil, a condenser electrode including a dielectric area, a conductive plate positioned within said dielectric area, a mechanical vibrator secured to said dielectric area, a connection between said third coil and said condenser electrode, an electromagnetic driver for said mechanical vibrator for imparting mechanical vibrations to said dielectric surface said electromagnetic driver being actuated from the same source of energy that excites said filament and said output circuit.

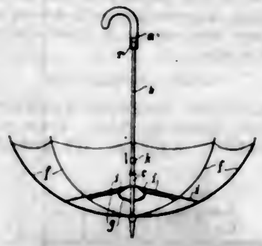
1,680,087. DRYING BLEACHING POWDER. JAMES TERENCE CONROY, ALFRED LAMBLE, and JOHN JAMES LATHAM, Liverpool, England, assignors to The United Alkali Company Limited, Liverpool, England. Filed Feb. 12, 1926, Serial No. 87,970, and in Great Britain May 15, 1925. 1 Claim. (Cl. 34—24.)

In the drying of bleaching powder the step of increasing the temperature and the stability of the bleaching powder as its moisture content is decreased, by passing the bleaching powder through an apparatus in one direction, and passing heated gas through the apparatus in the opposite direction, in combination with regulating the rate of travel of the gas.



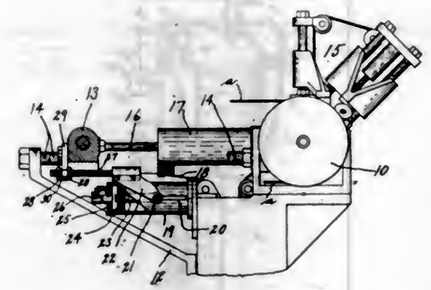
1,680,088. AUXILIARY SLIDE SUPPORT FOR MACHINE TOOLS. JAMES A. CRAIG, East Cleveland, Ohio, assignor to The Warner & Swasey Company, Cleveland, Ohio, a Corporation of Ohio. Filed Jan. 26, 1927. Serial No. 163,585. 6 Claims. (Cl. 29—46.)

1. In a machine tool, a bed having a slide support, a slide movable thereon, and an auxiliary slide support carried by the bed, said auxiliary support comprising upper and lower members relatively adjustable to vary the height of slide engaging surfaces and also having means for laterally adjusting the slide engaging surfaces.



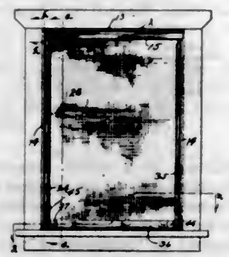
6. In a machine tool, a bed having a slide support, a slide movable thereon, an auxiliary support on the bed for the slide, said auxiliary support having inner members adjustable laterally, and means for adjusting said members comprising adjusting screws passing through the support, part having their ends abutting against the said members and part having threaded engagement therewith.

1,680,089. DIAPHRAGM PUMP. WILFRED BRERETON CROFTON, Johannesburg, Trasvaal, South Africa. Filed Jan. 15, 1927, Serial No. 161,322, and in Union of South Africa Nov. 8, 1926. 7 Claims. (Cl. 103—150.)



1. In a pump, the combination of a rotatable casing structure providing a pump chamber, a flexible diaphragm forming a wall of said chamber, a fixed crank positioned to flex the diaphragm upon rotation of the casing structure, inlet and outlet valves for the pump chamber and means to rotate the casing structure.

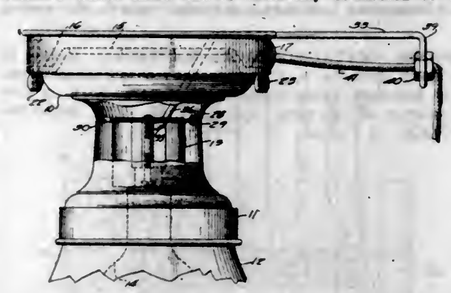
1,680,090. SELF-CLOSING UMBRELLA. ERNEST CULLMANN, Munich-Gladbach, Germany, assignor to the Firm Speck & Bonsmann Aktiengesellschaft, Haan, Germany. Filed Mar. 30, 1927, Serial No. 179,470, and in Germany Apr. 16, 1926. 5 Claims. (Cl. 135—44.)



1. A self-closing umbrella including a staff, a self-closing spring frame stressed on an opening movement thereof for a self-closing movement, a catch for holding the frame open, and a drop weight slidable upon the exterior of the staff for retracting the catch so as to permit the frame to close.

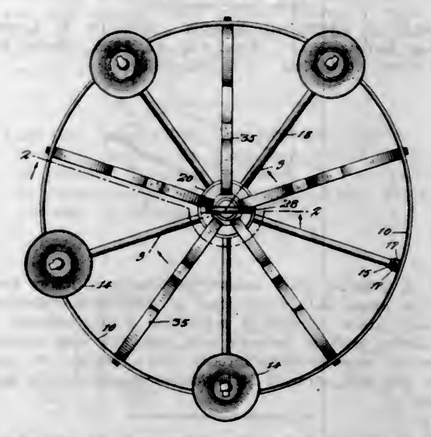
1,680,091. BEAD-COVERING MACHINE. CHARLES H. DESAUTELS, Springfield, Mass., assignor to The Fisk Rubber Company, Chicopee Falls, Mass., a Corporation of Massachusetts. Filed June 5, 1925. Serial No. 35,047. 2 Claims. (Cl. 154—9.)

1. A bead wire covering machine in which the wire is looped around separable pulleys; comprising means to force the pulleys apart and means coupling thereto by a lost motion connection for damping excessive speed of separation without materially decreasing the ultimate force of separation.



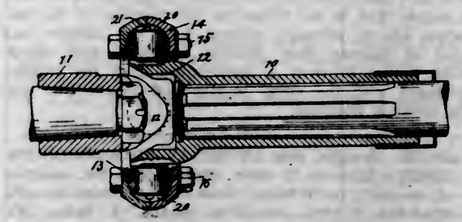
1,680,092. ROLLING-WINDOW-SCREEN CONSTRUCTION. HARRY DIXSON, Des Moines, Iowa, assignor to Rolscreen Company. Filed May 13, 1925. Serial No. 29,960. 16 Claims. (Cl. 156—39.)

1. In a structure of the class described, the combination of a screen mounted to be rolled and unrolled having enlarged portions at its side edges, and having a stiff binder strip provided with enlarged end portions, guides receiving the side edges of the screen including the enlarged portions thereof and the enlarged end portions of the binder strip when the screen is unrolled each guide comprising a pair of resilient semi-cylindrical members opening toward each other and resiliently frictionally gripping the binder strip end portion, and having at one side parallel relatively long adjacent flanges formed on the respective semi-cylindrical members and adapted to be sprung apart for portions of their lengths to facilitate the spreading and contracting action of the guide when the binder strip is slid therein.



1,680,093. LIGHTING FIXTURE. LEROY C. DOANE, Meriden, Conn., assignor to The Miller Company, Meriden, Conn., a Corporation of Connecticut. Filed Apr. 23, 1925. Serial No. 25,192. 7 Claims. (Cl. 240—78.)

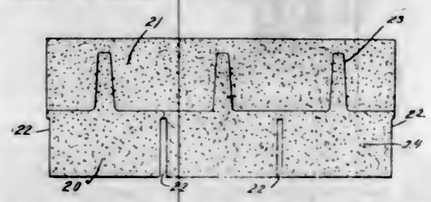
1. The combination with a lighting fixture having a canopy, a lamp socket, a shade supporting portion, and means for supporting the canopy from the ceiling, of a member whose inner end is releasably connected to the



canopy near the center thereof and which passes outwardly over the upper edge of the canopy, and a cord supporting bushing carried by the member.

1,680,094. LIGHTING FIXTURE. LEROY C. DOANE, Meriden, Conn., assignor to The Miller Company, Meriden, Conn., a Corporation of Connecticut. Filed Sept. 8, 1926. Serial No. 134,154. 11 Claims. (Cl. 240—78.)

1. In a lighting fixture, an outer ring, a central splicing chamber, a plurality of lamp sockets, hollow socket supports fastened to the ring, hollow spokes extending from the splicing chamber to the supports, wiring extending from the splicing chamber through the spokes and supports to the lamp sockets, and a detachable supporting column connected with the splicing chamber.



1,680,095. UNIVERSAL JOINT. DAVID F. DOMIZI, Cleveland, Ohio. Filed Feb. 6, 1924. Serial No. 690,900. 7 Claims. (Cl. 64—102.)

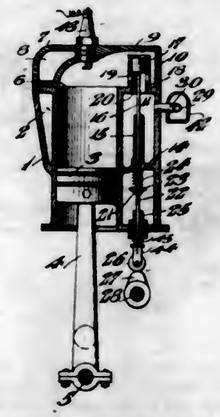
1. A universal joint comprising driving and driven members, each provided with a pair of diametrically opposite power transmitting extensions, one pair in a plane

at right angles to the other, an annular casing into which said extensions project, and spherical bushings receiving said extensions and having spherical seats in the casing.

1,680,096. METAL-SURFACED MATERIAL. RALPH E. DRAKE, Jamaica, N. Y., assignor, by mesne assignments, to Anaconda Sales Company, New York, N. Y., a Corporation of Delaware. Filed Aug. 15, 1925. Serial No. 50,420. 5 Claims. (Cl. 204—8.)

1. A sheet material comprising a substantially smooth non-metallic base coated with a layer of asphalt of substantial thickness, said layer having an embossed surface, a layer of electro-conductive material over the embossed surface of the asphalt, and a layer of metal over the electro-conductive layer and conforming to the irregularities of the embossing.

1,680,097. PRINTING PLATE. WILLIAM S. EATON, Sag Harbor, N. Y. Filed Aug. 31, 1926. Serial No. 132,666. 6 Claims. (Cl. 101—395.)



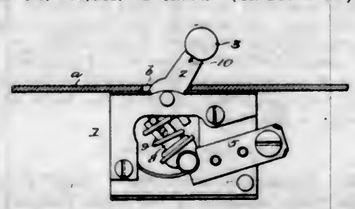
1. A printing plate embodying therein a heavy base of low grade unhardened steel, a thin surface stratum of high grade unhardened metal and a thin stratum of a uniting medium between said base and said surface stratum, whereby substantially every portion of said base and said stratum is permanently united with said base.

1,680,098. METHOD OF PRODUCING VOLATILE METALS FROM THEIR SULPHIDES. HENNING GUSTAV FLODIN, Roslags-Nasby, and EMIL GUSTAF TORVALD GUSTAFSSON, Stockholm, Sweden; said Henning Gustav Flodin assignor to Harry Broady, Stockholm, Sweden. Filed Apr. 10, 1924. Serial No. 705,531. 11 Claims. (Cl. 75—22.5.)

1. A method of producing metals from their sulphides, comprising heating in a closed electric furnace a charge of solidified briquettes of a mixture of a finely divided material containing a sulphide of a metal capable of being liberated from the sulphide by iron, with metallic iron in a finely divided state, said charge being of such a nature that in the briquettes the particles of the materials are in intimate contact with one another and fixed as regards their relative positions, said charge being heated to such a temperature that the sulphur combined with the metal is given off to the iron and the metal is liberated.

1,680,099. VALVE FOR INTERNAL-COMBUSTION ENGINES. WILLIAM C. GRAY, Philadelphia, Pa., assignor of one-half to William Goldstein, Philadelphia, Pa. Filed Feb. 5, 1926. Serial No. 86,168. 1 Claim. (Cl. 123—188.)

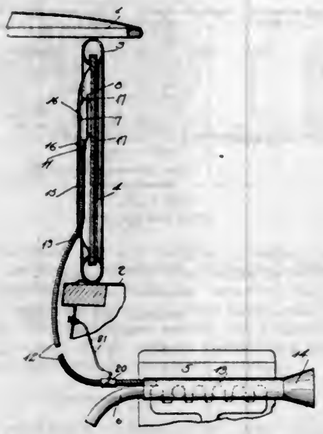
In a device of the character stated, an engine cylinder, an inlet chamber and an exhaust chamber at the side thereof, tubular, open ended inlet and exhaust valve housings integral with said cylinder and located above said chambers and at their bottom in communication therewith, and each having a pair of opposed side ports



opening into the explosion chamber of said cylinder, imperforate inlet and exhaust piston valves reciprocable in said valve housings, means for reciprocating said valves, and a head for said cylinder having pendant walls for isolating a pair of said valves from an adjacent pair.

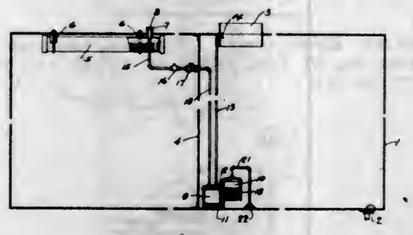
1,680,100. SWITCH. MONROE GUETT, Hartford, Conn., assignor to Hart & Hegeman Manufacturing Company, Hartford, Conn., a Corporation of Connecticut. Filed Feb. 19, 1927. Serial No. 169,518. 6 Claims. (Cl. 200—67.)

1. The combination in a switch structure of a base having a cavity therein; a pivot bearing at the bottom of the cavity; a member extending across the cavity of the base; a bearing on the cross-member; a switch-lever mounted on the pivot in the cavity of the base; a crank pivotally mounted in the bearing on the cross-member; a spring connected to the lever and the crank and tending to hold the two parts on their respective bearings; blades actuated by the crank; and terminals on the base.



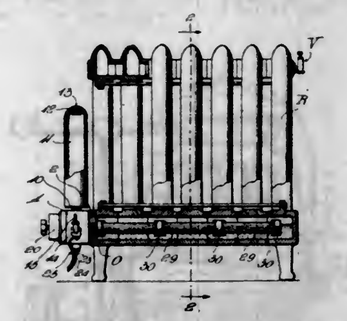
1,680,101. LEVER-OPERATED ELECTRIC SWITCH. MONROE GUETT, Hartford, Conn., assignor to The Hart & Hegeman Manufacturing Company, Hartford, Conn., a Corporation of Connecticut. Filed Mar. 30, 1927. Serial No. 179,642. 1 Claim. (Cl. 200—172.)

The combination in a lever actuated electric switch, of a body portion; a flat operating lever pivoted thereto, the outer end of the lever being slotted to form two arms;



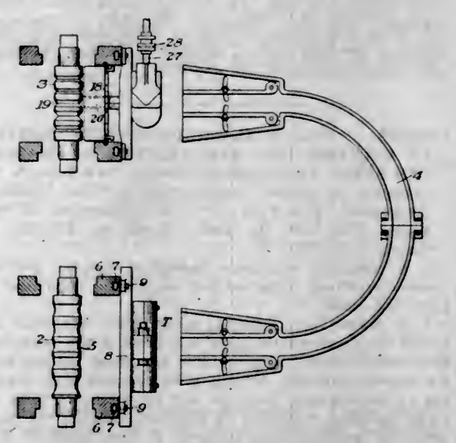
and an enlargement forming a hand-hold having an opening therein to receive the arms of the lever, the arms having notches and the enlargement having an internal rib arranged to enter the notches when the enlargement is mounted on the lever.

1,680,102. WINDSHIELD HEATER. LOUIS HAGEDORN, Luverne, Minn. Filed Oct. 18, 1927. Serial No. 226,985. 1 Claim. (Cl. 20—40.5.)



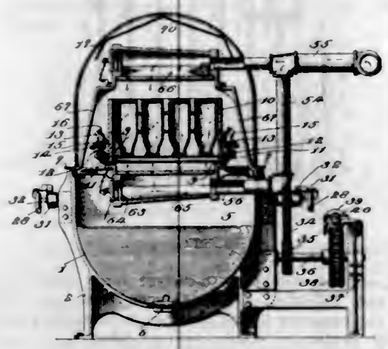
In a windshield heater for motor vehicles, the combination with the windshield frame, of a spring member detachably engaged at its ends with the frame, a heater device carried by the spring member, the heater device comprising a casing having openings in one wall directed toward the windshield glass, a flexible conduit attached to the heater, and an air heating chamber associated with the motor exhaust pipe and having the flexible conduit attached thereto.

1,680,103. LIQUID-MEASURING DEVICE. CHARLES R. HARDY, Mount Vernon, N. Y., assignor to The Superheater Company, New York, N. Y. Filed Dec. 13, 1924. Serial No. 755,804. 20 Claims. (Cl. 210—39.)



1. In apparatus of the class described, the combination, with a main receptacle having a varying quantity of liquid therein; of an auxiliary receptacle containing a second liquid, a confined fluid column maintained under a pressure above atmospheric by an amount equal to the difference in head between said liquids, and means whereby said column is actuated by variations in the liquid level of said main receptacle to transfer said second liquid from said auxiliary to said main receptacle in proportion to the quantity of liquid to said main receptacle.

1,680,104. STEAM-HEATING ATTACHMENT FOR RADIATORS. CECIL A. HEAD, Royal Oak, Mich. Filed Oct. 11, 1924. Serial No. 743,081. 10 Claims. (Cl. 219—38.)



4. A steam generating attachment for a steam generating and collecting chamber, comprising an electric heater for reception in the chamber, a controlling switch for said heater, a water receiver adapted to receive water forced from the chamber by steam pressure and a common carrying member for said heater, said switch and said receiver, said member having a passage to place the receiver in communication with the chamber; said carrying member having a threaded portion for coupling it to the chamber.

1,680,105. REPEATER FOR ROLLING MILLS. LANE JOHNSON, Ingram, Pa., assignor to United Engineering & Foundry Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Sept. 29, 1924. Serial No. 740,530. 4 Claims. (Cl. 80—52.)

1. In a repeater for rolling mills, a repeater, a rolling mill adjacent the delivery end of said repeater, a guide associated with said rolling mill for guiding the end of a bar from the delivery end of said repeater into the pass of said mill, a pair of driven rolls interposed between the delivery end of the repeater and said guide for pushing the end of the bar through said guide, means for driving said rolls at a smaller peripheral speed than that of the rolls of the rolling mill, and means in the driving connections of said rolls whereby the rolls are driven by the bar after the latter has been gripped by the rolls of said rolling mill, substantially as described.

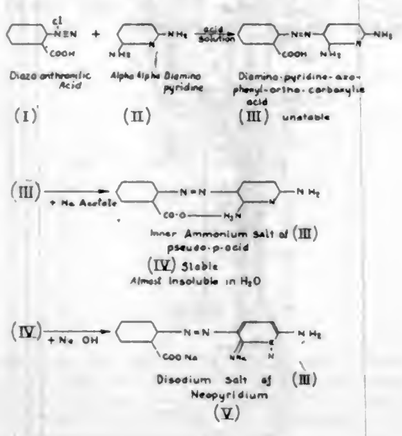
1,680,106. BOTTLE-WASHING MACHINE. ROY A. MANNING, Rutland, Vt., assignor to Manning Manufacturing Company, Rutland, Vt., a Corporation of Vermont. Filed July 30, 1920. Serial No. 400,007. 1 Claim. (Cl. 141—7.)

A spray head for bottle washing machines comprising having a jet box provided with a removable cover having a plurality of openings forming jets, said box having a bottom inclined transversely and longitudinally towards one end and a drain opening arranged within the lower end of said box.

1,680,107. PROCESS FOR PREPARING FLUE DUST FOR SMELTING IN BLAST FURNACES. FRANK F. MARQUARD, Clairton, Pa. Filed Oct. 15, 1927. Serial No. 226,524. 8 Claims. (Cl. 75—73.)

1. That step in the process of treating iron ore flue dust for smelting which consists in mixing ammonia still waste liquor with the flue dust.

1,680,108. ARYL-AZO-DIAMINOPYRIDINES USEFUL AS BACTERICIDES AND PROCESS OF MAKING THE SAME. IWAN OSTROMISLENSKY, New York, N. Y., assignor, by mesne assignments, to The Pyridium Corporation, New York, N. Y., a Corporation of New York. Filed Nov. 24, 1923. Serial No. 676,855. 6 Claims. (Cl. 167—7.)



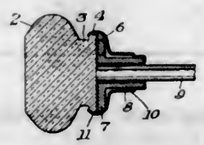
1. A medicinal substance including aryiated azotized diamino-pyridines, prepared for use in the treatment of germ infections.

6. A process for producing a medicinal substance for use in the treatment of germ infections, which comprises diazotizing aniline, coupling the diazotized aniline with 2-6 diamino-pyridine, forming a soluble acid salt, purifying by decomposing the acid salt by treatment with an alkali material, removing by-products, treating the purified basic material thus produced to form again an acid salt of phenyl-azo-diamino-pyridine.

1,680,109. METHOD OF OBTAINING PYRIDIUM. IWAN OSTROMISLENSKY, New York, N. Y., assignor to The Pyridium Corporation, New York, N. Y., a Corporation of New York. Filed Mar. 26, 1926. Serial No. 97,771. 5 Claims. (Cl. 260—42.)

1. The method of obtaining a substance of the character described, which consists in the direct coupling of diazotized amines of the aromatic series with diaminopyridine salts in hydrochloric acid solution, to the amount of more than one half and less than two molecules of the diazotized amines.

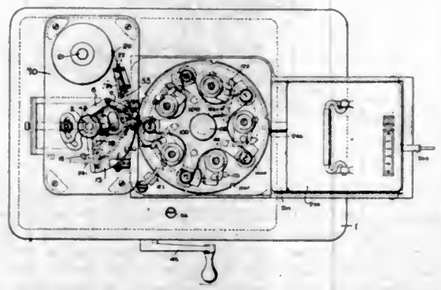
1,680,110. METHOD OF OBTAINING NEOPYRIDIUM. IWAN OSTROMISLENSKY, New York, N. Y., assignor to The Pyridium Corporation, New York, N. Y., a Corporation of New York. Filed Mar. 26, 1926. Serial No. 97,772. 12 Claims. (Cl. 260—42.)



12. As an article of manufacture a disodium salt of diaminopyridineazophenylorthocarboxylic acid, which has the probable structural formula:

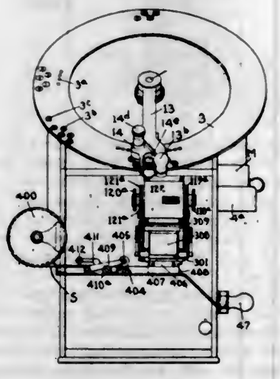
$$C_6H_4(COONa)N_2C_5H_2NNH_2(NNa).$$

1,680,111. PHENYL-AZO-ALPHA-ALPHA-DIAMINOPYRIDINE DIHYDROCHLORIDES AND METHOD OF OBTAINING THE SAME. IWAN OSTROMISLENSKY, New York, N. Y., assignor to The Pyridium Corporation, New York, N. Y., a Corporation of New York. Filed Sept. 23, 1927. Serial No. 221,629. 2 Claims. (Cl. 260—42.)



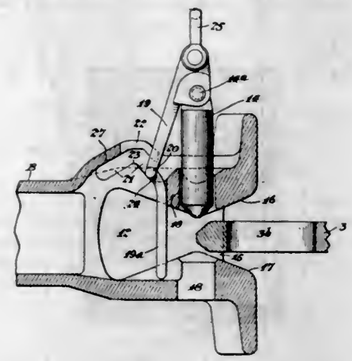
1. As an article of manufacture, phenyl-diazo-alpha-alpha-diaminopyridine dihydrochloride having the following characteristics: fine needle-like silky glistening crystals with violet shading.

1,680,112. KNOB. FRANK J. PETERSON, Pittsburgh, Pa. Filed Aug. 27, 1927. Serial No. 215,808. 4 Claims. (Cl. 292—347.)



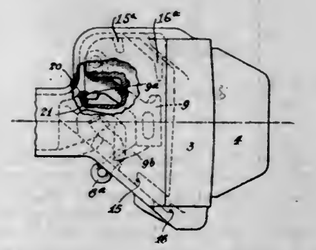
1. A knob assembly comprising a knob having an undercut slot in the rear face thereof, a sleeve having a cross bar engaging in said slot, and a shaft threaded through the sleeve and adapted to bear against the end face of the knob.

1,680,113. PRINTING AND REGISTERING MECHANISM. ARTHUR H. PITNEY and JACOB W. OGDEN, Stamford, Conn., assignors, by mesne assignments, to Pitney-Bowes Postage Meter Company, Stamford, Conn., a Corporation of Delaware. Filed Apr. 5, 1922. Serial No. 549,734. 40 Claims. (Cl. 235—132.)



37. In mechanism for the purpose specified; means for printing any one of various denominations or values; means for registering in units of currency the total value amount of successive impressions made; and means controlled by the registering means for automatically locking the printing means against further use when a predetermined value amount has been printed.

1,680,114. PRINTING MECHANISM FOR PARCEL-POST POSTAGE METER MACHINES. ARTHUR H. PITNEY, Stamford, Conn., assignor, by mesne assignments, to Pitney-Bowes Postage Meter Company, Stamford, Conn., a Corporation of Delaware. Original application filed Jan. 8, 1923, Serial No. 611,496. Divided and this application filed Sept. 23, 1924. Serial No. 739,353. 20 Claims. (Cl. 235—101.)

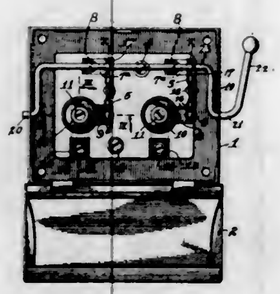


1. In mechanism of the character specified having an indexing gear, means for setting the gear preparatory to a printing operation, and means for returning the gear upon the completion of a printing operation; registering mechanism, means for actuating the registering mechanism in accordance with the setting of the indexing gear; a pin adapted to lock or unlock the registering mechanism; a lever operatively engaging the pin; means for moving said lever in one direction to cause the pin to engage and lock the registering mechanism, and means for moving the lever to cause the pin to release the registering mechanism, substantially as described.

1,680,115. CAR COUPLING. DAVID ROBINSON, Cleveland, Ohio, assignor to National Malleable and Steel Castings Company, Cleveland, Ohio, a Corporation of Ohio. Filed Dec. 20, 1924. Serial No. 757,225. 5 Claims. (Cl. 213—189.)

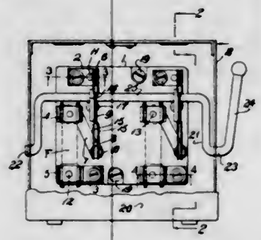
1. A link and pin coupler having a centrally disposed, horizontal pocket; a vertically movable coupling pin intended to engage a link in said pocket; and supporting means pivotally connected to the pin and arranged to hold the pin in uncoupled position; said means engaging one portion of the coupler head in coupled position and another portion in uncoupled position; said portions being separated by an intermediate raised portion, whereby accidental tripping of said supporting means is prevented.

1,680,116. CAR COUPLER. DAVID ROBINSON, Cleveland, and RUSSELL J. WITTMER, East Cleveland, Ohio, assignors to National Malleable and Steel Castings Company, Cleveland, Ohio, a Corporation of Ohio. Filed Aug. 5, 1926. Serial No. 127,230. 14 Claims. (C. 213—100.)



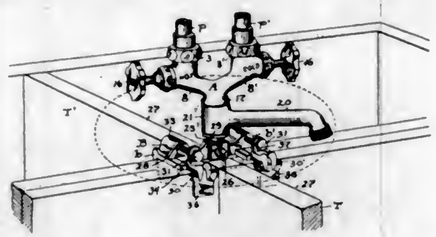
1. In a rigid jawed coupler head having a lock adapted to reciprocate in a cavity thereof; lock actuating means; and a lock-setting mechanism suspended in the cavity arranged to engage and support the lock in elevated position for lock-setting.

1,680,117. FUSED SWITCH. JOSEPH SACHS, Hartford, Conn. Filed Aug. 5, 1920. Serial No. 401,474. 9 Claims. (Cl. 200—114.)



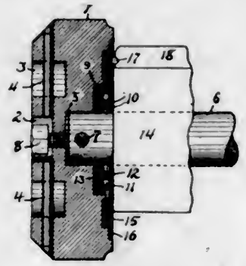
1. A fused switch comprising in combination, a base of insulating material, two separate wire attaching terminals respectively adjacent opposite edges of the base and accessible from the front thereof, a pair of fuse contacts on the front of the base comprising an outer screw shell and a center contact, the said contacts being adapted to receive a screw plug fuse and one of

them being directly connected with one wire terminal, a flat conducting member directly engaging at one end with the other fuse contact and extending transversely of the base in a direction approximately parallel to the aforesaid opposite edges thereof, the said member at the other end having a portion extending outward at right angles to the front face of the base and perpendic-



ular to the aforesaid opposite edges thereof so aa to form a switch contact, a second switch contact on the base in alignment with the first said switch contact, the said second contact being adjacent the remaining wire terminal and connected thereto, and a movable switch blade pivoted to one of the switch contacts and adapted to engage the other switch contact.

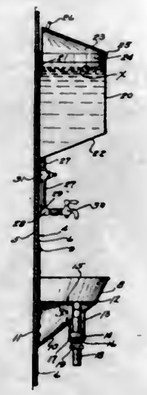
1,680,118. FUSED SWITCH. JOSEPH SACHS, West Hartford, Conn. Filed Sept. 7, 1926, Serial No. 134,121. Renewed June 23, 1928. 3 Claims. (Cl. 200—114.)



1. A fused switch comprising in combination, a base of insulating material, two separate wire attaching terminals respectively adjacent opposite edges of the base and accessible from the front thereof, a pair of fuse contacts spaced apart on the front face of the base and adapted to receive a cartridge enclosed fuse, the first of the said contacts being directly connected with one wire terminal, an outstanding switch contact at the front of the base adjacent and directly connected with the other wire terminal, a movable switch blade at the front of the base engaging the said switch contact when in closed position, the said fuse contacts and the said switch contact and blade being laterally offset from each other so as to form in conjunction with a fuse two parallel overlapping current paths, and a flat conducting member directly carried by the base and extending diagonally between the ends of the overlapping portions of the said current paths to connect them in series, the said member at one end directly engaging the second fuse contact and at the other end having an integral portion extending outward at right angles to the front face of the base so as to form a second switch contact which is also engaged by the switch blade when in closed position.

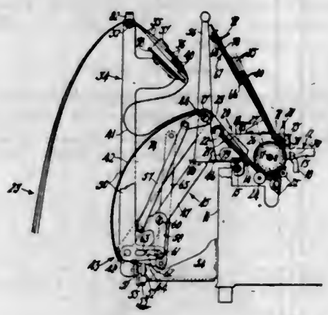
1,680,119. COMBINATION FIXTURE. FRED SCHULDER, Cleveland, Ohio. Filed Sept. 28, 1927. Serial No. 222,521. 12 Claims. (Cl. 4—193.)

1. A combination fixture, comprising a hollow body having a pair of intake branches adapted to be connected to separate supply pipes, said body also having a delivery branch formed with discharge openings in its side wall and an anchoring extension at its lower end constructed to prevent rotary movement of said body, and a discharge spout sleeved upon said delivery branch and adapted to rotate in a complete circle beneath said intake branches in a horizontal plane above said anchoring extension.



1,680,120. BALANCE WHEEL FOR ENGINES. ROBERT N. SHONER, Fort Wayne, Ind., assignor to Utility Strate Manufacturing Company, a Corporation of Indiana. Filed Sept. 9, 1927. Serial No. 218,433. 1 Claim. (Cl. 308—167.)

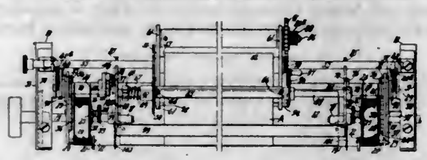
In combination with an engine having a crank-case and crank-shaft mounted therein, a fly wheel positioned on the end of the crank-shaft adjacent the end of the crank-case, said wheel having an annular chamfer in its rear face; a pin extending transversely through said shaft into the wheel; a screw threaded in said wheel in line with the axis thereof and bearing against the end of the crank-shaft whereby said pin is locked in place; a thrust bearing member including shims therefor disposed in said chamfer and acting against the adjacent end of the crank-case; an annular lubricating pad disposed in the wheel encompassing said bearing; and a retaining ring for said pad having a projecting tongue that engages the crank-case whereby rotation of the ring is prevented.



1,680,121. PORTABLE LAVATORY. HARRY L. SMITH, Minneapolis, Minn., assignor to Smith System Heating Company, Minneapolis, Minn., a Corporation of Minnesota. Filed Sept. 1, 1927. Serial No. 216,872. 3 Claims. (Cl. 4—167.)

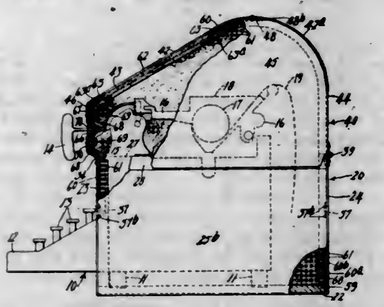
1. The combination with a lavatory, of a supporting bracket for the lavatory in the form of an inverted substantially semi-conical bracket supporting the basin of the lavatory on its base, a drain for the basin including a pipe extending through an aperture in said basin and a depending sleeve-like boss on the bracket and having a flange on its upper end resting on the bottom of the basin with a water-tight joint therebetween, and a

shouldered nut having screw-threaded engagement with said pipe and engaging the lower end of the sleeve-like boss as a base of resistance.



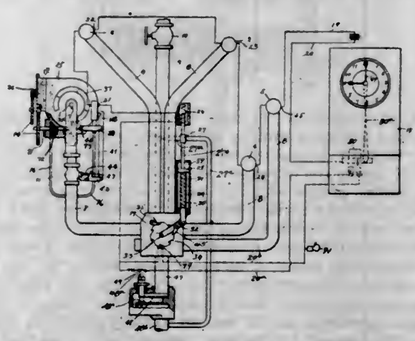
1,680,122. TYPEWRITING MACHINE. JOHN WALDHEIM, Elizabeth, N. J., assignor to Underwood Elliott Fisher Company, New York, N. Y., a Corporation of Delaware. Filed Sept. 4, 1923, Serial No. 660,724. Renewed Oct. 24, 1924. 17 Claims. (Cl. 197—126.)

1. In a continuous billing typewriting machine, the combination of a carriage, a platen on said carriage around which a continuous web comprising work-sheets with interleaved carbon-sheets may be fed, a carbon-carrier, a table, said carbon-carrier and said table being mounted independently of each other on said carriage, and a single finger-piece connected to said table and said carbon-carrier, and conditioned to simultaneously move the same upon their independent mountings.



1,680,123. TYPEWRITING MACHINE. JOHN WALDHEIM, Elizabeth, N. J., assignor to Underwood Elliott Fisher Company, New York, N. Y., a Corporation of Delaware. Filed Sept. 5, 1924. Serial No. 736,028. 33 Claims. (Cl. 197—132.)

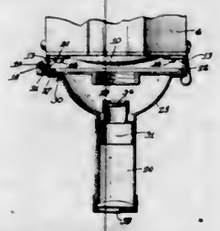
1. In a typewriting machine, the combination with a platen having a work-web engaging therearound, of an auxiliary ribbon positioned thereadjacent, means for supporting said auxiliary ribbon, manually-controlled means for lowering said supporting means to position said rib-



bon at the printing line of the platen, and means automatically operated during the lowering of said supporting means for line-spacing said web.

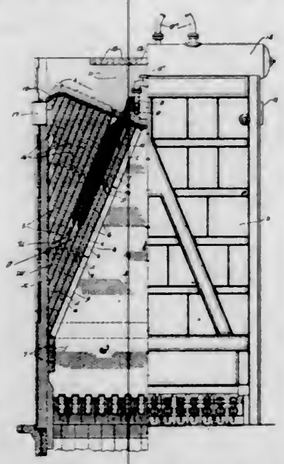
1,680,124. TYPEWRITING MACHINE. JOHN WALDHEIM, Elizabeth, N. J., assignor to Underwood Elliott Fisher Company, New York, N. Y., a Corporation of Delaware. Filed June 13, 1925. Serial No. 36,792. 15 Claims. (Cl. 197—186.)

1. The combination with a typewriting machine having an extended carriage finger-piece, of a sound-deadening cabinet having an outer casing of sheet-metal and an inner felt lining with an interior, pitted surface, said casing having a lower body-part arranged for receiving said machine and a cover, said body-part and said cover being hinged together at the back and arranged with a slot between them at the front through which said finger-piece projects, and two resilient felt lips arranged for sealing said slot.



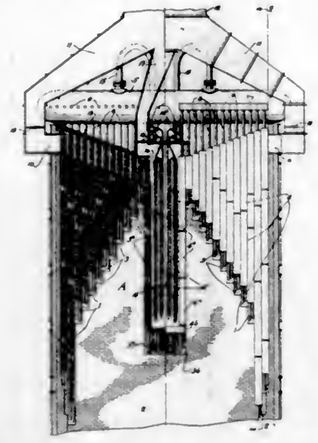
1,680,125. AUTOMATICALLY-OPERATED SOOT BLOWER. FRANK BOWERS, Detroit, Mich., assignor, by mesne assignments, to Diamond Power Specialty Corporation, Detroit, Mich., a Corporation of Michigan. Filed June 10, 1918, Serial No. 239,140. Renewed Aug. 23, 1924. 26 Claims. (Cl. 122—392.)

1. In a boiler cleaner system, the combination with a plurality of soot blower units connected with a main supply line, of electrically governed control means for



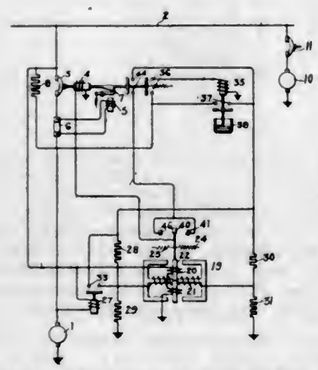
automatically bringing into operation successively the various units of the system, and means for draining the boiler cleaner system, said control means being arranged to prevent the automatic operation of the system until the said supply line has been thoroughly drained.

1,680,126. EXAMINATION LAMP. CHARLES T. BRADY, Detroit, Mich. Filed May 31, 1927. Serial No. 195,571. 1 Claim. (Cl. 240—41.)



A light comprising a lamp housing, a lens in a wall thereof, an apertured cover movably applied to said wall and adapted to overlie said lens, a hinge joining said cover to said housing, said hinge including a spring tending to move the cover away from said lens, and a latch for maintaining said cover over said lens, said cover being adapted to support a light-modifying device around the aperture thereof.

1,680,127. BOILER. CARL A. W. BRANDT, Great Neck, N. Y., assignor to The Superheater Company, New York, N. Y., a Corporation of Delaware. Filed Oct. 31, 1924. Serial No. 747,032. 2 Claims. (Cl. 122—303.)



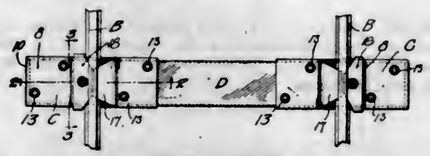
1. In a boiler of the class described the combination of a boiler setting, a furnace in the lower part of the setting, substantially horizontal boiler tubes extending across the boiler space and arranged in two unbaffled substantially triangular groups with the points of the triangles down defining an inverted V-shaped combustion space immediately above the furnace with said boiler tube groups adjacent to the space, headers at opposite ends of the tubes to which the tubes are secured, the headers at one end being in a higher position than those at the other end, whereby the tubes have a slight upward slope, a drum above the lower set of headers, a box above the higher set of headers, and tubes connecting the lower headers to the drum, the drum to the box, and the box to the upper headers, and a connection to the stack from each of the upper outer corners of the triangular spaces.

1,680,128. HIGH-PRESSURE WATER-TUBE BOILER. CARL A. W. BRANDT, Great Neck, N. Y., assignor to The Superheater Company, New York, N. Y. Filed Oct. 31, 1924. Serial No. 747,031. 4 Claims. (Cl. 122—303.)

1. In a boiler of the class described the combination of a setting, a furnace in the lower part of the setting, boiler tubes extending transversely across the boiler space and arranged in two substantially triangular groups with one side of the triangles against opposite walls of the boiler setting and the opposite point at the upper central part of the boiler space whereby there is defined an inverted V-shaped combustion space above the furnace, a connection from each of the upper outer corners of the triangular spaces to the stack, two parallel spaced groups of transverse tubes extending downward from the inner upper points of the triangles into the combustion space, a group of transverse tubes extending between their lower ends, whereby a generally rectangular space is delimited from the combustion space, and a superheater extending into said rectangular space.

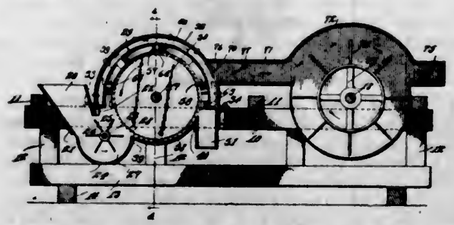
1,680,129. AUTOMATIC RECLOSING CIRCUIT-BREAKER SYSTEM. HAROLD W. BROWN, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Dec. 17, 1924. Serial No. 756,607. 7 Claims. (Cl. 175—294.)

1. In an automatic reclosing circuit breaker system, the combination with a source of current, a load circuit arranged to be supplied with current at a plurality of points, a circuit breaker arranged to connect said source to said load circuit, and closing means for said circuit breaker, of a polarized relay for controlling the operation of said closing means having an operating winding connected so



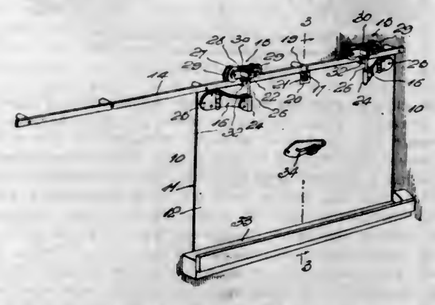
that the energization thereof varies with the load connected to the load circuit when said circuit breaker is open, and means whereby said relay controls the operation of said closing means in response to different conditions of the load circuit comprising means operative in response to a predetermined condition of said load circuit to vary the polarization of said relay.

1,680,130. MEDICAL-TABLET CONTAINER. BENJAMIN F. CONNER, Hartford, Conn., assignor to Colt's Patent Arms Manufacturing Company, Hartford, Conn., a Corporation of Connecticut. Filed Mar. 17, 1927. Serial No. 176,231. 4 Claims. (Cl. 206—42.)



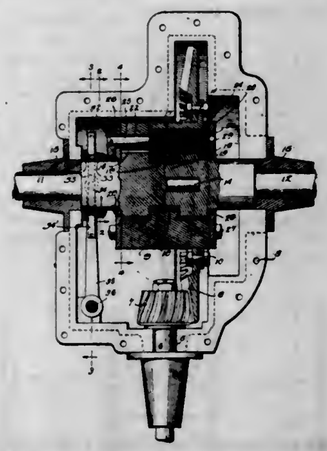
1. In a container for medical tablets and similar articles, the combination of a body comprising a substantially flat circular sheet metal bottom and a sheet metal means projecting upward from the bottom and forming a plurality of separate similar compartments uniformly spaced from the axis of the body each of the said compartments being substantially closed at the bottom and open at its outer side and being adapted to contain at least one of the said articles, and a sheet metal top cover pivotally connected with the body for movement about the axis thereof and having an annular skirt surrounding and approximately engaging the peripheral portions of the sheet metal means forming the compartments, the said skirt having an opening therein adapted to be brought into register with any one of the said compartments and of sufficient size to permit the removal therethrough of one of the said articles from its compartment and the said skirt serving when the opening is in register with one compartment to close all of the other compartments.

1,680,131. RAILWAY-TIE PLATE. JACOB COBL, Mount Ida, Va. Filed Nov. 10, 1927. Serial No. 232,346. 6 Claims. (Cl. 238—299.)



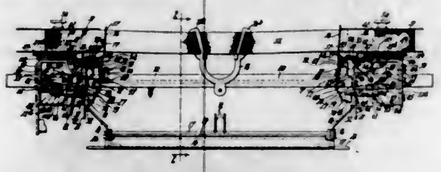
1. The combination with a wooden railway tie, of spaced tie plates supported on the tie and covering the end portions thereof, rails secured to the plates, and a sheet metal covering disposed on the tie intermediate the plates and having the opposite edges disposed under said plates.

1,680,132. COTTON GIN. CARY S. COX, Fresno, Calif., assignor of one-half to Jesse M. Cox and one-half to Frances Cox Whitt, Fresno, Calif. Filed July 20, 1927. Serial No. 207,307. 11 Claims. (Cl. 19—50.)



1. A cotton gin having a rotor provided with a plurality of teeth, a housing embracing the rotor and provided with a plurality of ribs on an inner face thereof and closely associated with the teeth, said ribs being in staggered relation to provide tracks for the cotton seeds, an air suction chamber associated with the housing, said ribs having a plurality of openings connecting the space between the housing and the teeth with the air chamber.

1,680,133. DOOR-MOUNTING MEANS. WARD S. CRAWFORD, Ottawa, Kans. Filed May 16, 1927. Serial No. 191,878. 2 Claims. (Cl. 16—104.)



1. In combination, a door frame, a door of a size to fit therein, a track at the upper end of said frame spaced outwardly from the outer side thereof, carriages mounted on said track, horizontally swingable arms pivoted to said carriages and to the door on vertical axes, and co-acting means on the upper ends of the frame and door for suspending the latter independently of the carriages when said door is closed, said co-acting means being related to cause hanging of the door in a strictly vertical plane.

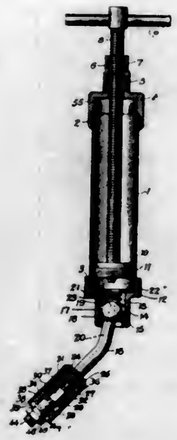
1,680,134. DIFFERENTIAL GEAR. ROBERT L. DENNISON, New York, N. Y. Filed Dec. 22, 1924, Serial No. 757,546. Renewed Nov. 15, 1926. 2 Claims. (Cl. 74—99.)

1. In a differential gear, a main driven member, a pair of sets of pinions carried by said member, axle sections arranged adjacent said main driven member, each of said axle sections being provided with a pinion meshing with one of said sets of pinions, one of said sets of pinions being provided with stub shafts extending therefrom, star shaped members mounted on the ends of said stub shafts, and a tapered sleeve loosely mounted on one of said axle sections and adapted to slide to a position within said star shaped members to contact therewith and prevent rotation thereof.

1,680,135. TYPEWRITING MACHINE. WILLIAM A. DOBSON, Bridgeport, Conn., assignor to Underwood Elliott Fisher Company, New York, N. Y., a Corporation of Delaware. Filed Sept. 18, 1924. Serial No. 738,336. 23 Claims. (Cl. 197—165.)

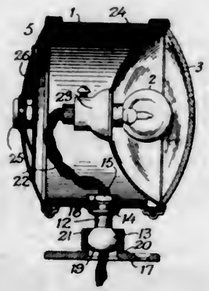
19. In a typewriting machine, the combination of a pair of rotatable spools having a ribbon trained thereon, a follower for each spool pivotally mounted for universal movement and engaged by said ribbon, key-operated means including a pivoted pawl-carrying lever for rotating each ribbon-spool, and means for each spool including a pivoted pawl-lifting cam for rendering its pawl inoperative, and at the same time rendering the pawls of the other spool operative, thus reversing the direction of ribbon-feed, each follower being swingable by said ribbon into co-operative relation with one of the pawl-carrying levers, and swingable thereby to actuate the pawl-lifting cam to effect a reversal of the direction of ribbon-feed.

1,680,136. COMPOSITION OF MATTER FOR TREATING HIDES AND SKINS. HARRY DODGE, Danvers, Mass. Filed Jan. 18, 1928. Serial No. 247,752. 2 Claims. (Cl. 149—1.)



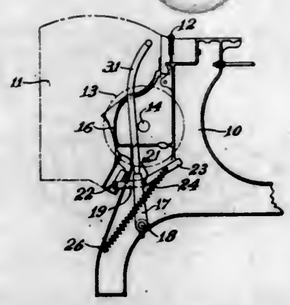
1. A composition of matter for the treatment of hides and skins consisting of formaldehyde, nitre, bicarbonate of soda and sulphate of sodium.

1,680,137. STOCKING PROTECTOR. SARAH DUNBAR, Lawton, W. Va. Filed Dec. 30, 1927. Serial No. 243,681. 3 Claims. (Cl. 36—2.)



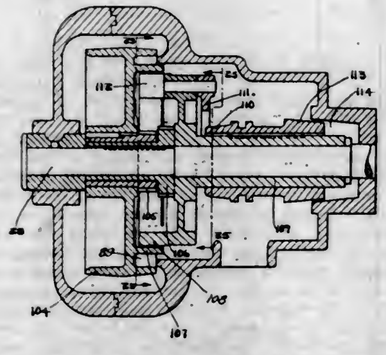
1. A stocking protector comprising a body adapted to fit about a stocking in encircling relation thereto with its side marginal portions overlapped and having its lower portion extended forwardly to overlie a portion of the foot of the stocking, a stirrup strap for anchoring the lower end of said body, a securing strap for the upper portion of said body having one end secured to the inner side edge portion of the body, said securing strap being passed outwardly through an opening in the body and wrapped about the body adjacent the upper end thereof with its free end overlapping the portion projecting outwardly from the body, and means to releasably secure the free end of the securing strap.

1,680,138. HIGH-PRESSURE GREASE-GUN CONNECTION. LEO EDELMANN, Chicago, Ill., assignor to E. Edelmann & Co., Chicago, Ill., a Corporation of Illinois. Filed July 17, 1925. Serial No. 44,308. 3 Claims. (Cl. 285—170.)



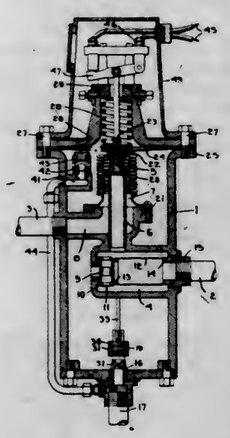
1. In combination with a lubricant receiving bearing fitting having a projection thereon and a lubricant conducting nozzle, a bearing member carried at the outer end of said nozzle having a bearing bead thereon, tapered jaws mounted for rocking movement on the bearing bead to separate to receive the bearing fitting, and a sleeve slidably mounted on the nozzle bearing to be moved to a position to close the jaws upon the bearing fitting and secure the same against rocking to the open position.

1,680,139. ROAD LIGHT. LEO EDELMANN, Chicago, Ill., assignor to E. Edelmann & Co., Chicago, Ill., a Corporation of Illinois. Filed Oct. 20, 1925. Serial No. 63,786. 3 Claims. (Cl. 240—7.1.)



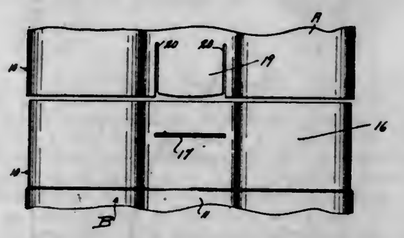
1. A road light comprising, in combination with a substantially cylindrical lamp casing having one end thereof closed and the remaining end open, said casing being provided with openings through the closed end and through the side wall thereof, a lamp mounted in the open end of the casing, a bracket member interchangeably connected in the openings of the casing provided with a bearing ball at this free end, and a mounting member provided with a socket to receive the bearing ball and support the light casing for universal adjustment.

1,680,140. GIN-BREAST LIFT. THOMAS ELLIOTT, Birmingham, Ala., assignor to Continental Gin Company, a Corporation of Delaware. Filed Aug. 24, 1927. Serial No. 215,067. 3 Claims. (Cl. 19—48.)



1. The combination with a gin frame having a breast pivoted thereto and held in operating position by gravity, of an operating arm, a floating lever carried by the operating arm and pivoted to the gin breast, and counterbalance means coacting with the operating arm to exert a lifting force on the gin breast while raising it, said floating lever and said counter-balance means being so arranged that the gin breast is held in raised position by gravity and the exertion of force is required to lower the breast.

1,680,141. REVERSING AND BRAKING MECHANISM FOR MACHINE TOOLS. WILLIAM T. EMMES, Cincinnati, Ohio. Original application filed Apr. 16, 1924, Serial No. 707,004. Divided and this application filed Oct. 4, 1924. Serial No. 741,599½. 3 Claims. (Cl. 74—34.)

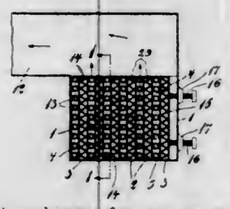


1. A reversing and braking mechanism comprising a drive shaft in the bearings of a stationary casing, a primary hubbed gear mounted and fastened to and on one end of said shaft, a secondary hubbed gear rotatively mounting the hub portion of the primary gear, a pulley and below the rim thereof a brake drum, said pulley by means of its hub portion mounting and being fastened to the hub portion of the secondary gear, an expanding brake band element with an elongated hub rotatively mounted on the other end of the drive shaft, said brake band element being aligned for engagement with the inner portion of the brake drum, an arm to expand the brake band element, and a double ended cone mounted in splined engagement on the elongated hub portion of the brake band element, with means adapted to move the cone to bring one end thereof into engagement with a recess in the wall of the casing to prevent rotation of the cone or to move the cone to bring its other end for operation of the arm to a position for expanding the brake band element, and a planetary gear system mounted on the brake band element adapted to cause reverse rotation of the shaft and comprising small elongated gears, and short large gears wtih one end of each elongated gear thereof engaging the primary gear, while the other ends thereof engage one of the short large gears, the latter gears engaging with the secondary gear.

1,680,142. RETARDING CHAMBER FOR AUTOMATIC SPRINKLER SYSTEMS. JOHN EDWARD EVANS, New York, and FRANCIS HERBERT GRIFFITHS, Yonkers, N. Y., assignors to The Reliable Automatic Sprinkler Co. Inc., New York, N. Y., a Corporation of New York. Filed Aug. 30, 1922. Serial No. 585,244. 12 Claims. (Cl. 169—23.)

1. In a retarding device for fire alarm systems, the combination with a retarding chamber, of a normally closed passage leading from a source of supply to an alarm mechanism, said passage being separate from the retarding chamber and having a continuously-open but restricted communication with said chamber, and means operated by fluid under pressure in said chamber to open said passage.

1,680,143. WHEEL BRIDGING FOR BAD ROADS. CARL F. W. FIEBKE, Athens, Wis., assignor of one-tenth to Oscar Rademacher, Westboro, Wis. Filed Feb. 4, 1928. Serial No. 251,973. 4 Claims. (Cl. 238—14.)



1. A wheel track consisting of a sheet of metal adapted to be laid down temporarily over a bad place in the road, the sheet having a depressed middle portion, upwardly and laterally inclined side portions, and downwardly extending lateral flanges, and bolts passing through said lateral flanges and beneath the middle portion and contacting with the middle portion.

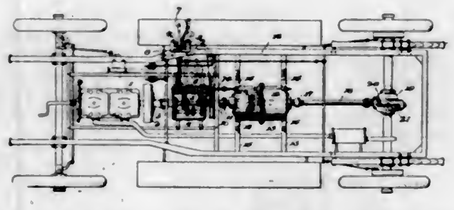
1,680,144. METHOD OF PREPARING EXPANSION-JOINT COMPOSITION. ALBERT C. FISCHER, Chicago, Ill. Filed May 10, 1922. Serial No. 559,908. 4 Claims. (Cl. 106—31.)

2. The method of preparing expansion joint composition, which consists in mixing fibrous material of cellular structure with bituminous matter, while the bituminous matter is of a consistency below that at which it will saturate fibrous material.

1,680,145. HEAT EXCHANGER. NILS RICHARD FORSSBLAD, Vasteras, Sweden. Filed Jan. 27, 1925, Serial No. 5,143, and in Sweden Jan. 30, 1924. 4 Claims. (Cl. 257—166.)

3. In a heat exchanger for gaseous mediums in combination, a parallel arrangement of sheet metal partitions providing flat channels for the heat delivering gaseous medium and alternately therewith providing flat channels for the heat absorbing gaseous medium, all of said channels being substantially parallel with one another and communicating at their ends with inlets and outlets respectively, heat conducting filling material interposed between the partitions and forming thin gas passages extending substantially longitudinally in each channel, and a pressing device arranged in such a manner that the two external channel walls are subjected to a uniformly distributed pressure which is propagated by means of the filling members throughout the whole of the exchanger so as to establish uniformly distributed contact pressure between each partition and the filling material along longitudinal contact surfaces parallel with said gas passages.

1,680,146. OIL-TUBE STRAINER. JAYSON E. GILLESPIE, Normal, Nebr. Filed Feb. 2, 1925. Serial No. 6,489. 1 Claim. (Cl. 184—11.)

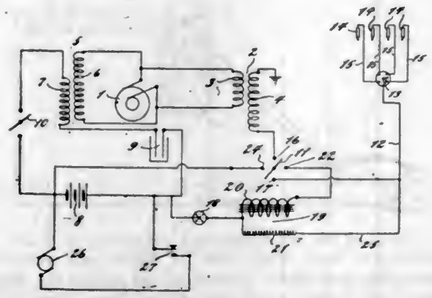


A strainer for the funnel of an oil tube of an internal combustion motor comprising a pair of spaced curved bars, a cap to which the upper ends of the bars are connected, said cap having a flange fitting over the upper end of the funnel and a plate to which the lower ends of the bars are connected, said plate having holes therein for receiving fastening means for connecting it with the lower part of the funnel.

1,680,147. TAP SOLE. BENJAMIN GILOWITZ, New York, N. Y. Filed Aug. 26, 1926. Serial No. 131,717. 4 Claims. (Cl. 36—32.)

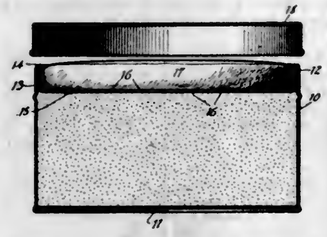
1. A tap-sole having a relatively small integral substantially flat extension at its edge adapted to fill a worn spot on the sole of a shoe being repaired, said extension being readily severable from the tap-sole.

1,680,148. DEVICE FOR PREVENTING RETROGRADE MOVEMENT. JOHN LOUIS GONARD, Englewood Cliffs, N. J., assignor, by mesne assignments, to Kant-Back Corporation, a Corporation of New Jersey. Filed July 25, 1924. Serial No. 728,219. 3 Claims. (Cl. 188—30.)



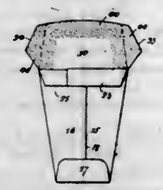
2. In a vehicle having rear wheels for propelling said vehicle, the combination of a drive shaft operatively connected with said wheels of the vehicle, a transmission, a shifter rod for the transmission, a casing fixed to the vehicle, said shaft passing through the casing, a braking ring secured within the casing, a disc loose upon the shaft and provided with a plurality of pockets at the periphery thereof, rollers mounted in the pockets, said pockets having a reduced portion adapted to force the rollers into engagement with the brake ring when the disc is revolved in one direction for locking the shaft against rotation, said pockets having enlarged portions adapted to receive the rollers when the disc is revolved in the opposite direction and thereby maintain the rollers out of engagement with the brake ring, means for locking the disc to the shaft and comprising a clutch element carried by the disc, and a clutch element driven by the shaft adapted to be moved in operative engagement with the clutch element on the disc, and means connecting the shifter rod with the second mentioned clutch element, whereby the second mentioned clutch element may be moved into operative engagement with the first mentioned clutch element.

1,680,149. SYSTEM OF DISTRIBUTION. WILLIAM S. GOULD, New York, N. Y., assignor, by mesne assignments, to Gould Storage Battery Company, Inc., New York, N. Y., a Corporation of New York. Filed June 5, 1923. Serial No. 643,536. 5 Claims. (Cl. 171—314.)



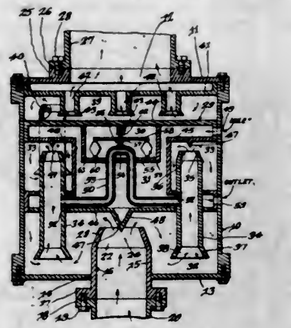
1. In a system of the character described, the combination of an alternating current generator, a battery,

an ignition circuit, a low ratio step-up transformer for impressing alternating current voltage from said generator on said ignition circuit, a high ratio step-up trans-



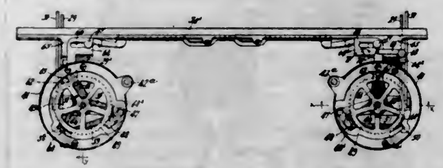
former for impressing ignition voltage on said ignition circuit from the battery, and means for charging said battery from said alternating current generator.

1,680,150. POWDER BOX. CLEN S. HUMPHREY, Brooklyn, N. Y. Filed June 15, 1926. Serial No. 116,180. 2 Claims. (Cl. 132—82.)



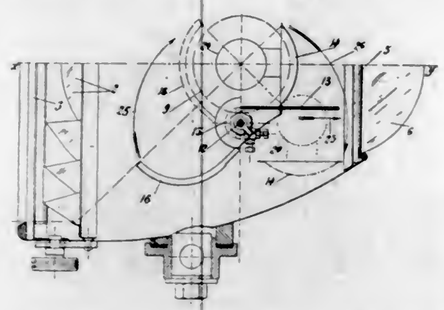
1. A powder box, including a body having an open upper end, a friction cover therefor adapted to telescopically fit over said upper end, a tray adapted to frictionally and telescopically fit within said upper open end, said tray having sifter openings, and an applicator puff adapted to be arranged within the tray and of a sufficient size to fill said tray, whereby when the friction cover is applied the face of the puff covers and closes the sifter openings.

1,680,151. POCKET SPUTUM CUP. JACOB KAUFFMAN, New York, N. Y. Filed Aug. 4, 1927. Serial No. 210,646. 3 Claims. (Cl. 4—259.)



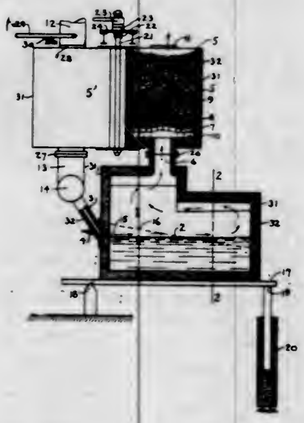
1. A pocket sputum cup, cut, bent and formed from a single sheet of material to provide a cup body open at one end, and a closure flap for said open end adapted to be closed and sealed when the cup is filled, said closure flap including side wings adapted to extend around the opposite side edges of the cup adjacent the open end for sealing engagement with the opposite face of the cup.

1,680,152. COMBINED FUEL VAPORIZER AND AUXILIARY AIR-INLET DEVICE. HERSCHEL S. KNIGHT, Indianapolis, Ind. Filed Aug. 9, 1926. Serial No. 128,218. 6 Claims. (Cl. 48—180.)



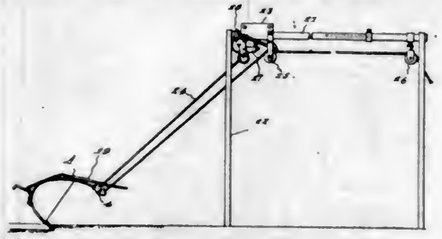
1. A device of the class described including an outer body defining an inlet and outlet opening, an inner body confined within the outer body and dividing the outer body into an expansion chamber, a mixing chamber, and a discharge chamber, said discharge chamber being in communication with said outlet opening said mixing chamber being in communication with said discharge chamber and said expansion chamber being in communication with the inlet opening, said inner body defining an air supply chamber and a heating chamber, means opening communication from the bottom portion of the expansion chamber to the top portion of the mixing chamber, and a member in communication with said means having thermostatically operated passage controlling means therein and defining a portion confined in and in communication with the air supply chamber and portions confined in the heating chamber, said member being adapted to deliver atmospheric air from the air supply chamber to the mixing chamber, and said heating chamber being adapted to receive exhaust gas from the exhaust manifold of an internal combustion engine and the exhaust gas being adapted to heat the air as delivered by the member to said means.

1,680,153. TYPEWRITING MACHINE. ALFRED G. F. KUNOWSKI, Brooklyn, N. Y., assignor to Underwood Elliott Fisher Company, New York, N. Y., a Corporation of Delaware. Filed May 2, 1924. Serial No. 710,528. 12 Claims. (Cl. 197—151.)



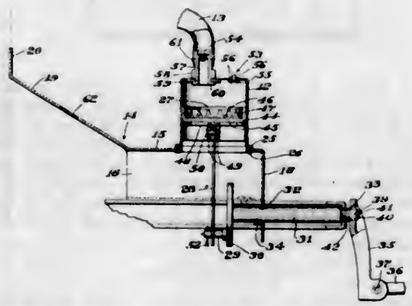
1. In a typewriting machine provided with a ribbon, a pair of spools for feeding said ribbon, a ratchet for each of said spools movable therewith, an oscillatory arm for each of said ratchets having a pawl thereon for imparting ribbon-feed movement to the corresponding ratchet, a detent for each of said ratchets for preventing reverse movement thereof, oscillatory cam-plates for said ratchets movable to cam said pawls and detents out of engagement with said ratchets, and a shift-bar connected to said cam-plates and manually movable from a position wherein both of said pawls and both of said detents are disengaged from said ratchets into selective positions wherein a selected one of said pawls and its corresponding detent are in operative position, while the other of said pawls and its corresponding detent are in inoperative position.

1,680,154. VEHICLE HEADLIGHT. GUSTAVE ALPHONSE MARIE LAMBLIN PARENT, Lille, France. Filed Dec. 12, 1925, Serial No. 74,959, and in France Apr. 7, 1925. 3 Claims. (Cl. 240—7.1.)



1. In a head lamp for motor cars and other vehicles, the following combination: a casing; a source of light arranged in the said casing; a front optical system arranged in the casing in front of the said source of light; a rear optical system arranged in the casing at the back of the said source of light; a movable coloured screen mounted in the casing; a movable reflector mounted in the casing; control means operating simultaneously the coloured screen and the reflector, so as to hold the coloured screen away from the source of light, and the reflector between the said source and the rear optical system in the position for travelling along an unobstructed path, whilst when the vehicle meets an obstacle, these control means bring the coloured screen between the source and the front optical system whereby the movable reflector leaves free the rear portion of the source of light and thus enabling the said source to light the rear optical system and to give a warning rearwards to any following vehicles, whilst at the same time lighting the road to be followed by the vehicle coming from the opposite direction.

1,680,155. FUEL-HEATED FURNACE AND CONVERTER USING PREHEATED AIR. OTTO LELLEP, Egypt, Pa., assignor to The International Nickel Company, New York, N. Y., a Corporation of New Jersey. Filed Oct. 29, 1923. Serial No. 71,496. 6 Claims. (Cl. 75—66.)



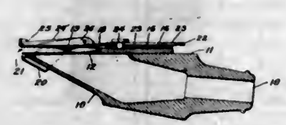
1. In the treatment of nickel-containing matte or metal, the step consisting in applying a pressure blast of preheated air directly to the molten metal.

1,680,156. SCRAPER. NELS MADSON, Coeur d'Alene, Idaho. Filed Dec. 27, 1926, Serial No. 157,379. Renewed June 2, 1928. 1 Claim. (Cl. 37—117.)

A scoop of the class described comprising a frame of substantially hook shape with its upper limb extending beyond the lower limb, a clevis at the end of the upper limb, teeth formed at the end of the lower limb, sheet metal fastened to the upper and lower portions of the frame to form the top and bottom of the scoop, sheet metal attached to the sides of the frame, doors for closing the rear of the scoop, hinges connecting the doors with side portions of the frame, a vertically movable locking bar at the rear of the scoop having projections thereon engaging portions of the doors to hold them in closed position, the free edges of the doors having notches therein for permitting the projections to pass through them during the opening movement of the doors and a lever pivoted to the top of the scoop and attached to the locking bar for adjusting the same.

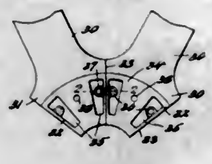
1,680,157. PUMP. ISIDORE MARKS, Dorchester, Mass., assignor to Keystone Mfg. Co., Boston, Mass., a Corporation of Massachusetts. Filed Mar. 26, 1927. Serial No. 178,764. 5 Claims. (Cl. 230—33.)

1. A pump unit designated for toy trucks and comprising, in combination, a pump cylinder, pump operating mechanism including a rotary shaft and a sheet metal frame having a cylinder supporting portion, downwardly and outwardly extending side walls flanged for attachment to a support, and a downwardly extending front wall for supporting said pump operating shaft.



1,680,158. CUFF LINK. CHARLES I. MATSON, Chicago, Ill. Filed Sept. 2, 1927. Serial No. 217,160. 6 Claims. (Cl. 24—102.)

1. A cuff link comprising a button including two plates spaced from each other, pin members connecting said plates in said spaced relation, roller members carried by said pin members, a cord having one end portion arranged between the plates and passing over said rollers, means connecting said end portion between said plates, a second button comprising two plates arranged in opposed relation with respect to each other, pin members connecting said plates in said spaced relation, roller members on said pin members, the opposite end portion of said cord being arranged between said plates of said second button and passing over said second

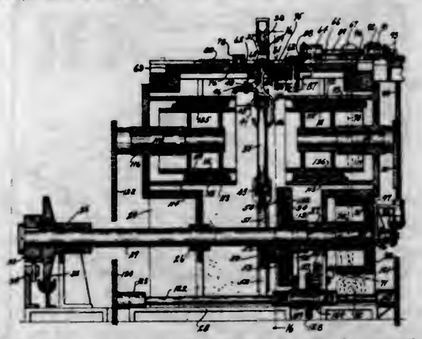


mentioned rollers, and means connecting said opposite end portion of said cord to one of the plates of said second button.

1,680,159. ATTACHMENT FOR MOUTHPIECES OF MUSICAL INSTRUMENTS. ROBERT JOHN MCVICKER, New York, N. Y. Filed May 16, 1925. Serial 30,821. 3 Claims. (Cl. 84—383.)

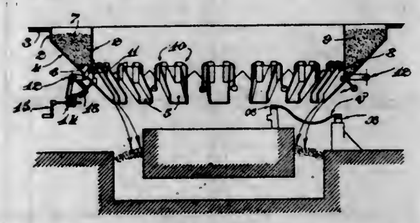
1. In combination with the mouthpiece of a musical instrument, a reed therefor, a ligature for clamping said reed to said mouthpiece, a cap, and means for holding said cap in an operative position over the end of said mouthpiece and for permitting the same to be moved with respect to said ligature to an inoperative position, and a cutting member carried by said cap for trimming the end of the reel when the cap is in operative position.

1,680,160. VEHICLE WHEEL. ALEXANDER MELDRUM, Syracuse, N. Y., assignor to Meldrum-Gabrielson Corporation, Syracuse, N. Y., a Corporation of New York. Filed Oct. 26, 1926. Serial No. 144,351. 5 Claims. (Cl. 301—85.)



1. In a wheel, in combination, a plurality of radially disposed spokes each having a sector-like inner end forming a part of a hub, said ends each abutting two adjacent ends along meeting faces, and means passing diagonally through said faces to lock the spokes together.

1,680,161. ADDITION MATERIAL FOR FERROUS METALS. PAUL D. MERICA, New York, N. Y., and THOMAS H. WICKENDEN, Roselle, N. J., assignors to The International Nickel Company, New York, N. Y., a Corporation of New Jersey. Filed Mar. 10, 1924. Serial No. 698,284. 11 Claims. (Cl. 75—45.)

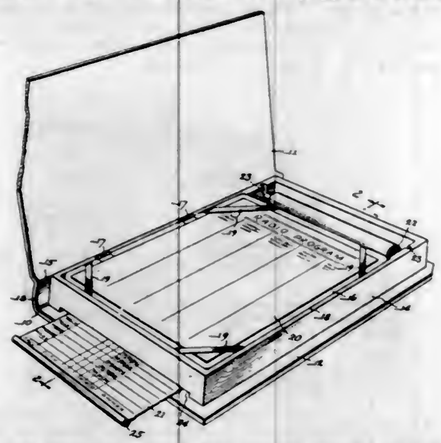


1. As an addition material for molten cast iron baths, metallic nickel having alloyed therewith another material sufficient in percentage to lower the melting point of the alloy to substantially that of cast iron.

1,680,162. TIRE-BUILDING APPARATUS. THOMAS MIDGLEY, Hampden, Mass., assignor to The Fisk Rubber Company, Chicopee Falls, Mass., a Corporation of Massachusetts. Original application filed Apr. 7, 1921, Serial No. 459,330, now Patent No. 1,558,904. Divided and this application filed Mar. 5, 1924. Serial No. 696,954. 5 Claims. (Cl. 154—10.)

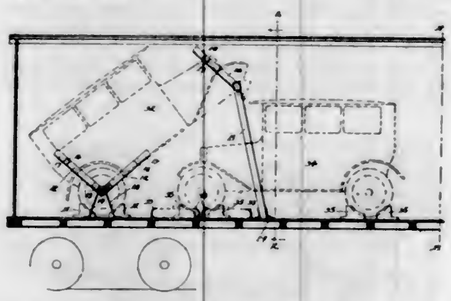
2. An apparatus of the class described comprising means for supporting a tire building core having a layer of tire building material mounted thereon, spaced annular members shaped to conform to the side portions of the core and adapted to press the material thereagainst, said members being adapted to receive and carry a bead filler in the annular space between them, and means adapted to shift the bead filler against the side of the core.

1,680,163. FEEDING APPARATUS FOR ELECTRIC FURNACES. PAUL LOUIS JOSEPH MIGUET, St.-Julien-de-Maurienne, France, assignor to Société Electrométallurgique de Montricher, St.-Julien-de-Maurienne, France. Original application filed July 8, 1926, Serial No. 121,189, and in France Nov. 4, 1925. Divided and this application filed Nov. 17, 1927. Serial No. 234,007. 1 Claim. (Cl. 221—118.)



A feeding apparatus for an electric furnace said apparatus having in combination, a feed hopper, partitions dividing said hopper into compartments, arranged in groups the compartment of each of said groups containing the ones conducting mixtures and the others additions of nonconducting material, a shutter for controlling the discharge of each of said compartments means for ensuring the individual opening of the shutters corresponding to the compartments of the conducting mixtures, means for ensuring simultaneously the opening of the shutters corresponding to the compartments of the additions and a common feed chute for every group of compartments.

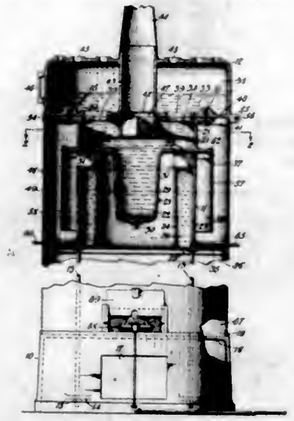
1,680,164. RADIO LOG AND PROGRAM DEVICE. THOMAS W. MONTROSE, Jersey City, N. J. Filed June 1, 1927. Serial No. 195,834. 3 Claims. (Cl. 40—85.)



1. A device comprising a case, a hinged leaf within said case, sheet-retaining means on said leaf, a log-sheet, a roller arranged in said case, said log-sheet having one end connected with and normally wound on

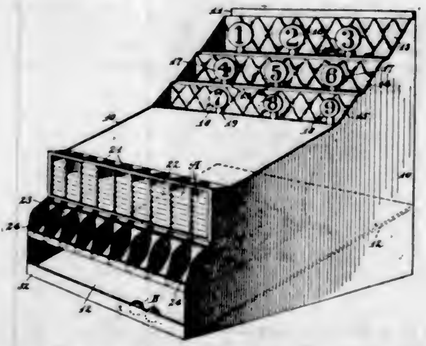
said roller, and the opposite end of said sheet extending through a wall of said case to provide a free end, the free end of said sheet adapted to be gripped to unwind

the log sheet to present any desired portion of said log-sheet exteriorly of the case, and means connected with the roller adapted to rotate the roller to rewind the log-sheet thereon.



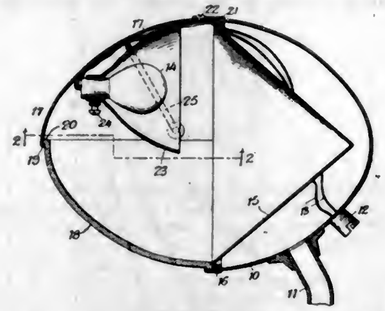
1,680,165. CAR LOADING. BENJAMIN R. MOORE, Detroit, Mich., assignor to Dodge Brothers, Inc., Hamtramck, Detroit, Mich., a Corporation of Maryland. Filed Sept. 24, 1927. Serial No. 221,750. 7 Claims. (Cl. 105—368.)

5. The combination with a railway box car, of means for sustaining a wheeled vehicle therein, comprising: chocks in which one pair of wheels of the vehicle are confined so that the vehicle may swing in a vertical plane about one axle; metal connectors one locked on the hub of each such wheel; thrust members connected in pairs with said connectors and extending therefrom divergently upward to the side wall of the car; a pair of struts and a pair of braces associated therewith, connected in supporting relation with the other axle of said vehicle, said struts being splayed outward and connected with the car body adjacent the junction of the floor and side walls, and said braces being splayed outward and connected with the car body adjacent the eaves, said struts and braces being respectively substantially tangent at their middles to imaginary cylinders having the first named axle as their axis.



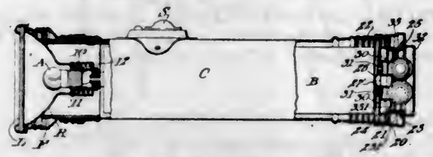
1,680,166. STEAM GENERATOR. LOUIS N. MOSS and JULIUS S. WESTON, Cedarhurst, N. Y. Filed Aug. 26, 1926. Serial No. 131,724. 5 Claims. (Cl. 122—161.)

1. In a steam generator, a combustion chamber, an interior section arranged above the combustion chamber, said interior section including heating walls forming intercommunicating water spaces and a heat chamber; said water spaces consisting of a water space surrounding said heat chamber, a water space above said heat chamber, and a water space extending into said heat chamber; relatively spaced inner and outer shells surrounding said interior section providing a tortuous passageway for the heat; a top section directly above said interior sec-



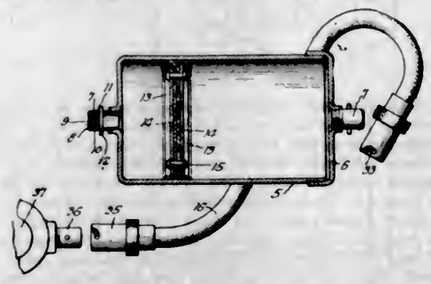
tion, said top section having a steam chamber and steam outlets, and water inlets establishing communication between the steam chamber and one of said water spaces, an uptake flue extending through said top section, radial flues establishing communication between said heat chamber and said passageway, and radial flues establishing communication between said passageway and said uptake flue.

1,680,167. AMUSEMENT DEVICE. ICHIRO NODA, Brooklyn, N. Y. Filed Jan. 6, 1928. Serial No. 244,937. 3 Claims. (Cl. 273—102.)



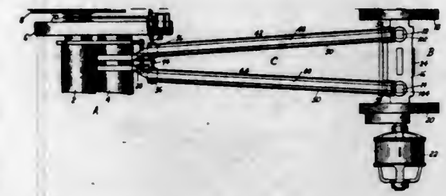
1. In an amusement apparatus, a cabinet including side walls, a forwardly and downwardly inclined bottom wall, a superposed horizontal partition, transversely spaced compartments disposed over the horizontal partition and each containing a vertical stack of articles constituting prizes, the lower ends of the compartments being spaced above the partition a distance equal to the depth of one of the articles, a delivery stall in front of each compartment and below the forward edge of the partition, transversely spaced targets mounted in the rear portion of said cabinet and projecting upwardly therefrom and a plunger operatively connected with each target and movable over the upper surface of the partition by the target when hit by a projectile for engaging with and effecting the ejection of the lowermost article of the stack into the delivery stall.

1,680,168. AUTOMOBILE HEADLIGHT. DAVID W. OHAVER, Rockville, Ind. Filed Jan. 6, 1927. Serial No. 159,324. 2 Claims. (Cl. 240—41.)



1. A headlight comprising an elongated oval-shaped casing, a transparent lens forming substantially one-fourth of said casing at the lower forward portion of the same, a conical reflector mounted opposite said lens in a position to project light through said lens, an auxiliary reflector mounted above said lens in opposed relation to said conical reflector, and a source of light in said auxiliary reflector adapted to have its rays projected onto the conical reflector and through the lens, said auxiliary reflector being pivotally supported on a transversely disposed pivot whereby the same may be swung about the same, substantially as set forth.

1,680,169. FLASH LIGHT. CHARLES OSEAN, Woodcliff, N. J., assignor to National Carbon Company, Inc., a Corporation of New York. Filed Mar. 23, 1922. Serial No. 546,090. 19 Claims. (Cl. 240—10.5.)



1. A closure for a flashlight casing comprising a tubular body having means for detachably coupling it to such casing, a spare lamp receptacle secured in said body and adapted to bear against a battery in said casing, and a removable cover for said receptacle.

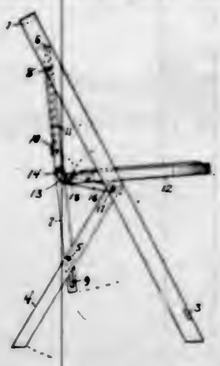
1,680,170. LUBRICATING SYSTEM. EARL F. PIERCE, Chicago, Ill., assignor to The Bassick Manufacturing Company, Chicago, Ill., a Corporation of Delaware. Filed Aug. 6, 1923. Serial No. 655,919. 1 Claim. (Cl. 221—47.4.)

Means for supplying lubricant to a bearing, comprising a cylindrical container having a piston therein, and a coupling member at each end of said container, said coupling members each comprising means for making detachable connections with a third coupling member.

1,680,171. APPARATUS FOR USE IN RUBBER FACTORIES. OSCAR D. HOLLENBECK, Racine, Wis. Filed Sept. 22, 1923. Serial No. 664,229. 1 Claim. (Cl. 18—2.)

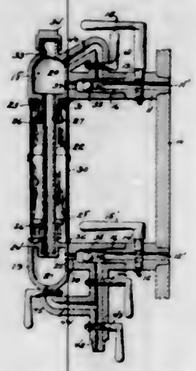
In an apparatus for the uses and purposes set forth, the combination of a warming mill for rubber stock, comprising heated rolls by which the rubber is sheeted and warmed so as to be plastic for subsequent operations, a plurality of conveyor belts, a direct driving connection for one of said conveyor belts driven from one of the rolls of the warming mill to drive the conveyor belts at the same speed as the mill, a flexible driving connection between said belts, and means to remove strips of rubber from the mill, the strips being conducted by said conveyors to points where they are automatically delivered as warmed, plastic rubber to separated locations for subsequent processing.

1,680,172. POLE. CHARLES F. PINE, Oklahoma City, Okla. Filed July 8, 1927. Serial No. 204,359. 1 Claim. (Cl. 189—23.)



A device of the character described comprising a standard tapering from one end to the opposite end, tapering flanges projecting laterally from the edge of the standards and formed integrally therewith, a base member formed integrally with the tapering standard and located at substantially right angles to the said standard, said flanges having portions disposed in flat contact with the base member and merging into and integrally connected with portions of the base member, said flanges, standard and base member being formed of a single sheet of metal, the portions of the flanges where connected to the base providing a reinforcing means between the base member, the standard and the flanges.

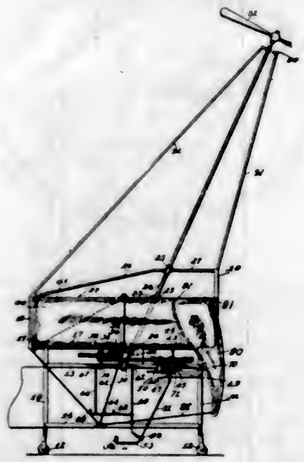
1,680,173. COLLAPSIBLE CHAIR. WILLIAM C. RASTETTER, Fort Wayne, Ind. Filed Nov. 17, 1924. Serial No. 750,370. 4 Claims. (Cl. 155—142.)



4. A collapsible chair including a frame having spaced legs and a pair of folding legs in pivotal connection therewith, pendant arms pivoted in the frame; means

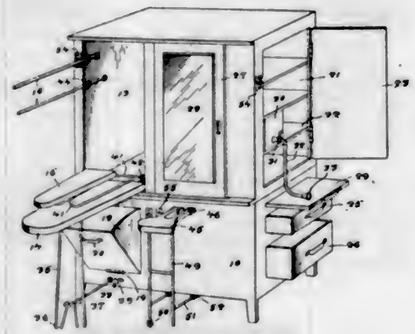
in connection with the folding legs and the pendant arms operable to limit outward swinging movement of said folding legs; toggle members having connected relation

with said frame and swinging arms; and a folding seat in connection with said toggle members and having actuating relation therewith.



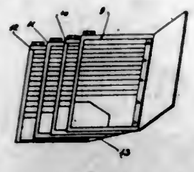
1,680,174. WATER GAUGE. JOHN RHODES and HOMER RHODES, Legrand, Iowa. Filed Jan. 25, 1926. Serial No. 83,737. 1 Claim. (Cl. 73—54.)

In a device of the class described, a water level indicating tube, valved means for connecting the upper end of the tube with a boiler, and means for connecting the lower end of the tube with the boiler, said means last named including a bracket having a main bore permitting of the flow of fluid directly between the tube and boiler, an automatically operated valve closing this bore under boiler pressure, if the tube is fractured, this valve being normally influenced uniformly on all portions of its surface by boiler pressure, a manually controlled valve controlling the same bore, and a valve controlled by-pass around the automatically operated valve and communicating directly with the water level indicating tube at a point below the level of the main bore and independently thereof, a discharge connection communicating with the by-pass and with said main bore, a valve in the by-pass adjacent to the main bore, and an additional valve in the discharge connection.



1,680,175. SOARING HELICOPTER. ABRAHAM RUDY, Washington, D. C. Filed May 14, 1927. Serial No. 191,361. 8 Claims. (Cl. 244—15.)

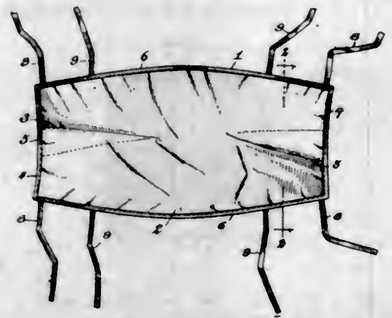
1. A soaring helicopter comprising a frame arranged in a vertical plane, a propeller shaft rotatably mounted on the frame, a sprocket mounted for rotation on the frame and provided with radially projecting lugs, a pair of levers pivotally mounted on said frame and having a short arm adapted to impactly coact with the lugs for causing rotation of the sprocket, the long arms of



the levers having foot engaging means and adapted to be rocked by the feet of the operator of the helicopter, and means operatively connecting the sprocket and shaft for causing rotation of the shaft.

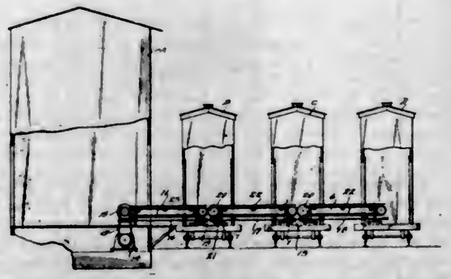
1,680,176. LAUNDRY CABINET. CHARLES WILLIAM SCHLEIER, Cleveland, Ohio. Filed July 28, 1926. Serial No. 125,504. 1 Claim. (Cl. 68—10.)

In combination, a cabinet having a bottom wall and an opening in one side, a wall below said opening, a transverse rod upon said bottom wall, an ironing board pivoted adjacent its inner end on said rod and adapted to be arranged vertically within the cabinet when not in use to be swung to a horizontal operative position outside of the cabinet, spaced supporting limbs pivoted on the under side of said board near the outer end thereof, the lower ends of said legs being adapted to engage the floor when the board is in operative position, said legs being formed at their lower ends with an upwardly directed medially disposed reentrant loop, a brace pivoted at one end to said loop and at its other end adapted to engage said wall, said brace and legs being adapted to fold into substantially parallelism with the board within the cabinet.



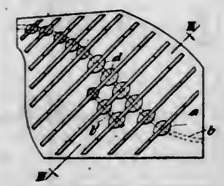
1,680,177. RECORD FILE. ARTHUR SCHWARZ, Vienna, Austria. Filed Apr. 29, 1926, Serial No. 105,559, and in Austria Jan. 23, 1926. 6 Claims. (Cl. 129—34.)

1. A record file consisting of a series of pockets overlapping at their top edges, and means for securing the pockets along one lateral edge, the pockets being closed at the other edges and having their openings at the overlapping edges.



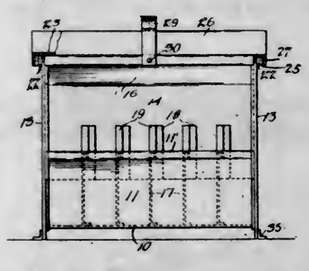
3. A record file consisting of a plurality of groups of pockets, and means for uniting the same in such a manner, that each group exposes to view a part of the group next underneath.

1,680,178. INFANT-NAPKIN PROTECTOR. FLORA M. SHAFER, Albany, N. Y. Filed Jan. 19, 1927. Serial No. 162,095. 2 Claims. (Cl. 128—284.)



1. An infant's napkin protector comprising a body of water proof material of substantially rectangular form, the body being narrowest at the ends and widening from the ends to the center thereof forming oppositely disposed and outwardly extending oval side edges when spread out in plan view and providing a baggy or hammock formation extending from end to end and side to side of the body when the opposite edges are parallel and all in a single plane, and means for uniting the lateral side edges of the body or blank to secure the garment upon the body of the infant.

1,680,179. LOADING MACHINE. WALTER FRANK SHELLEY, Wabuska, Nev. Filed Oct. 27, 1924. Serial No. 746,237. 6 Claims. (Cl. 198—92.)

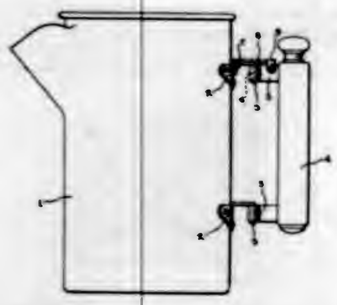


1. In an apparatus of the character described, the combination of a plurality of conveyors operatively connected end-to-end to form a series, each conveyor provided with a pair of tracks in end-to-end alignment with the tracks on the preceding conveyor the last conveyor in succession adapted to be lifted onto the tracks of the preceding line of conveyors and moved thereon when no longer in use.

1,680,180. SOUNDING BOARD FOR PIANOS. WILLIAM HENRY MERITON SIEGEL, Stade, near Hamburg, Germany. Filed July 5, 1924, Serial No. 724,329, and in Germany May 3, 1924. 4 Claims. (Cl. 84—192.)

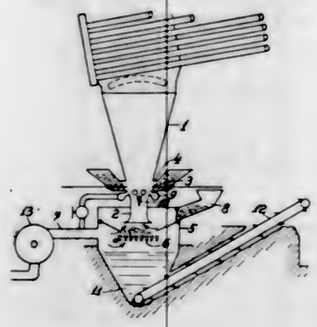
1. A sound board for use in pianos comprising a wooden board, wooden ribs on one face of said board, and struts having a flat face firmly attached to the sound board just in the rear of the usual bridge, said struts having a straight flat side edge firmly attached to a wooden rib.

1,680,181. CHICKEN FEEDER. JOHN D. SMITH, Tipton, Ind. Filed Sept. 14, 1926. Serial No. 135,417. 2 Claims. (Cl. 119—52.)



1. A poultry feeder comprising a trough, a hopper supported above said trough in spaced relation to the bottom of the same and providing a feed opening between the sides of the trough and the hopper, substantially triangular separator plates disposed transversely between the sides of the trough and the hopper and dividing said feed openings into compartments, said separator plates having their upper edges bent over to provide reinforcing flanges between the upper edges of the trough and the sides of the hopper, said separator plates having lateral flanges secured to the hopper and having their upper portions cut away to accommodate the upper edges of the trough, a top pivotally mounted on one side of the hopper, a latch at the opposite side of the hopper for holding the top in closed position, and reinforcing bars for each end of said top, said reinforcing bars having extensions projecting beyond the pivotally supported side of the top, said extensions being turned inwardly to engage a portion of the feeder for limiting the pivotal movement of the top, substantially as set forth.

1,680,182. DETACHABLE HANDLE FOR RECEPTACLES. WILLIAM S. STOCKTON, Roanoke, Va. Filed June 26, 1926. Serial No. 118,708. 1 Claim. (Cl. 53—3.)



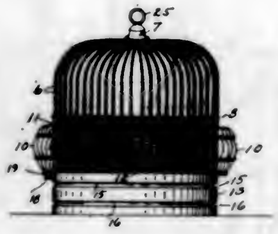
A receptacle having spaced brackets provided with pendent terminal arms paralleling the receptacle, and a detachable handle having lugs provided with sockets en-

gageable with said pendent arms upon upward movement of the handle with respect to the receptacle, one of the lugs of the handle being provided with a latch having a pivotal connection with the lug to be swung from a posi-

tion at an angle with the lug into parallelism with the latter, said latch having a downturned extremity engageable in a slot in the bracket with which the latch-carried lug is connected.

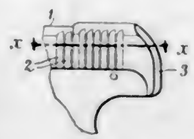
1,680,183. FUEL-DUST FURNACE. GÉZA SZIKLA and ARTHUR ROZINEK, Budapest, Hungary. Filed Jan. 24, 1925, Serial No. 4,448, and in Hungary Feb. 4, 1924. 4 Claims. (Cl. 110—28.)

1. A furnace for utilizing powdered fuel and the like, in a rising current of gaseous fluid, comprising, an upright shaft having an open lower end and of upwardly increasing cross sectional area, a chamber positioned below the lower end of the shaft and having a cross sectional area greater than that of the open lower end, a grate in the chamber positioned to receive material falling through the lower end of the shaft, and an inlet for gaseous fluid in the chamber.



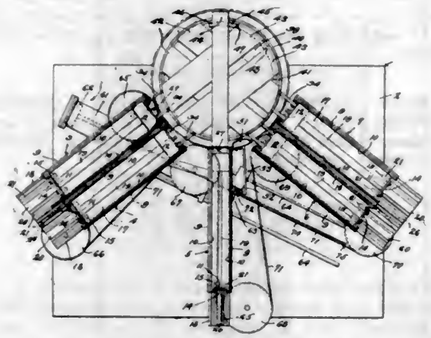
1,680,184. BIRD CAGE. JOHN H. VIEWEGH, Indianapolis, Ind. Filed Feb. 21, 1927. Serial No. 169,733. 4 Claims. (Cl. 119—17.)

1. A bird cage having a top centrally located member the lower sides of the cage being formed of sheet metal having an annular corrugation near its upper edge and having a wire ring in said corrugation and the upper sides and top of the cage being formed out of wires which extend from the inner side of the wire ring in the corrugation to the top centrally located member to both of which the wires are fastened leaving a space between the wires of the top and sheet metal sides, and said cage having other spacing and fastening means for the wires of the side and top between the wire ring and top member,



said cage also having a belt of woven wire above and next to the sheet metal side member sealed in the space between the metal side member and wires of the top.

1,680,185. METAL-BASE BIRD CAGE. JOHN H. VIEWEGH, Indianapolis, Ind. Filed May 25, 1927. Serial No. 194,176. 6 Claims. (Cl. 119—17.)

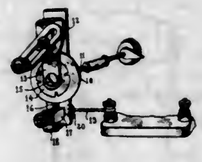


1. In a bird cage, the combination with a spaced apart wire superstructure having an outside horizontal wire ring attached to the outer side thereof near its lower end, of a sheet metal base member comprising a drum and a bottom water tight closure for the drum, said drum having an inside circular corrugation near its open end, the wire superstructure being inserted in the drum with its horizontal wire ring resting upon the corrugation, and means for removably securing the ring against the corrugation.

1,680,186. AUTOMATIC FIREARM. RUDOLF VON FROMMER, Budapest, Hungary. Filed Apr. 26, 1924, Serial No. 709,202, and in Austria May 29, 1923. 3 Claims. (Cl. 42—3.)

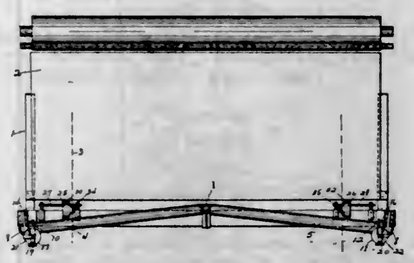
3. As a new article of manufacture, an inverted channel-shaped cap adapted to be attached to a firearm for concealing the hammer of the latter, the inner surfaces of the sides of the cap being provided with corrugations adapted to cooperate with complementary corrugations on the breech of a weapon, said cap having a recess to receive a fastening bolt on the weapon, said cap also having an aperture adjacent the recess to permit said bolt to be actuated.

1,680,187. FEEDING MECHANISM. ALBERT L. WATSON and GEORGE L. BARDEN, Penn Yan, N. Y. Filed Oct. 31, 1924. Serial No. 747,007. 11 Claims. (Cl. 1—13.6.)



1. In a device of the class described, a hoop-supporting table having an upstanding rim within which a hoop is adapted to be placed, chutes disposed in substantially radial relation to the table, feeders movable in the chutes, and means for actuating the feeders.

1,680,188. FLASH LIGHT. FREDERICK L. WEBER, Oakland, Calif., assignor to National Carbon Company, Inc., New York, N. Y., a Corporation of New York. Filed July 25, 1921. Serial No. 487,425. 12 Claims. (Cl. 240—10.5.)

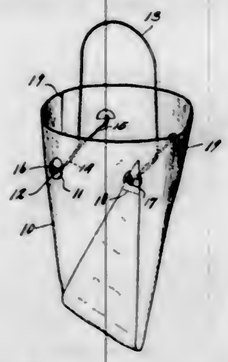


1. A flashlight comprising a cylindrical casing substantially devoid of any protuberances on the outer side thereof, a battery arranged therein and provided with a terminal at each end, a lamp at one end of said casing adapted to contact with one of said terminals, an insulated conductor provided on the inner side of said casing and connected to said lamp, a cap having a threaded engagement with the other end of said casing, a lamp storage receptacle on the inner end of said cap arranged to extend into said casing and contact with said conductor, said receptacle being formed of an electric conducting material and insulated from said cap, and electrical connections between said receptacle and the other of said terminals, said receptacle being cylindrical and provided with a cutaway portion whereby upon the rotation of the cap alternate engagement and disengagement between said receptacle and conductor will be effected.

1,680,189. CONTROLLABLE RESISTANCE DEVICE. HENRY J. WIEGAND, Milwaukee, and HORACE N. PACKARD, Wauwatosa, Wis., assignors to The Cutler-Hammer Mfg. Co., Milwaukee, Wis., a Corporation of Wisconsin. Filed Nov. 2, 1923. Serial No. 672,329. 3 Claims. (Cl. 201—76.)

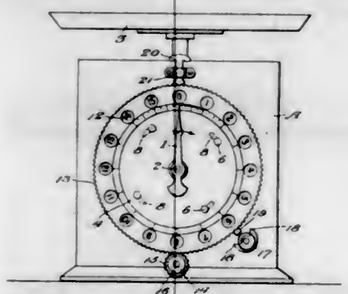
3. In a variable resistance device, the combination with relatively movable resistor and contactor elements each comprising relatively soft material, of an insulating support for said resistor to co-act with said contactor, said support having continuous grooves, to contain material of said resistor, and intermediate ridges to effect abrasion of said contactor, said grooves and ridges extending in directions having a component parallel to the direction of relative movement of said resistor and contactor, and also having a component angularly related to such direction.

1,680,190. WEB-GUIDING MECHANISM. GEORGE F. WIKLE, Milwaukee, Wis., assignor to The Fisk Rubber Company, Chicopee Falls, Mass., a Corporation of Massachusetts. Filed Apr. 17, 1924. Serial No. 707,157. 1 Claim. (Cl. 271—2.6.)



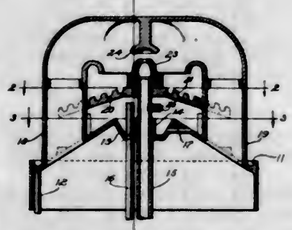
A device of the character described comprising two independently rotatable angularly positioned rolls over which a moving web is adapted to pass, independently electrically operated brake means associated with each of said rolls, actuators, pivoted for movement in the direction of web travel, positioned closely adjacent said rolls and adjacent the edges of the web at a point where the latter are unsupported, and switches mounted in said actuators and operable upon movement of the actuators about their pivots in the direction of web travel to actuate said brake means.

1,680,191. COLLAPSIBLE BUCKET. PEARL R. WOOLF, Oklahoma City, Okla. Filed Apr. 3, 1926. Serial No. 99,645. 1 Claim. (Cl. 229—53.)



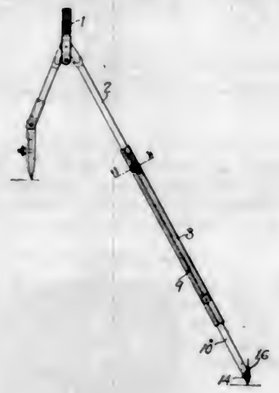
A collapsible bucket of the character described having a conical body formed of water-proof paper, the body being adapted to be folded upon itself and flattened for transportation, the body at four points being cut away in a semi-circle to form ears which are bent downward upon the body, a U-shaped bail, the extremities of the bail being extended laterally in opposite directions to

provide two parallel portions, the parallel portions at their extremities extending through the body and through said ears and said extremities being upwardly turned



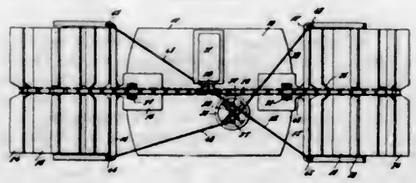
to form hooks, the transversely extending parallel portions of the bail acting to hold the mouth of the bucket in a distended condition.

1,680,192. WEIGHING MECHANISM. GEORGE L. ZUCKER, East Orange, N. J. Filed July 28, 1922. Serial No. 578,237. 14 Claims. (Cl. 265—68.)



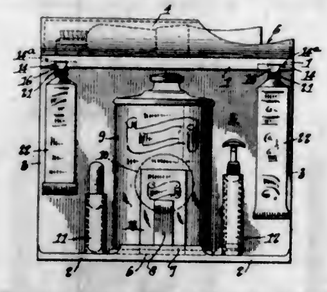
1. A weighing mechanism including a resettable dial having a plurality of sets of indications thereon progressively in opposite directions.

1,680,193. OIL BURNER. VITO AIELLO, White Plains, N. Y. Filed May 15, 1926. Serial No. 109,385. 3 Claims. (Cl. 158—91.)



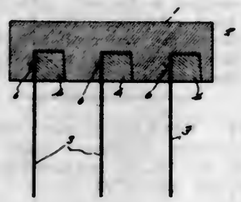
1. An oil burner which comprises a spill plate, substantially conical in shape, having a central cup and a peripheral groove, a discharge pipe connected to said groove, a substantially conical shaped burner plate disposed above the spill plate, an oil feeding pipe leading to the center of the burner plate and adapted to feed oil to the top of the burner plate and means between the two plates for permitting oil to flow from the oil feeding pipe into the cup of the spill plate whereby the under surface of the burner plate may be preliminarily heated.

1,680,194. DRAWING COMPASS HAVING A LENGTHENING DEVICE OF LEGS. KAZUB AKASHI, Tokyo, Japan. Filed July 16, 1923. Serial No. 651,981. 1 Claim. (Cl. 33—149.)



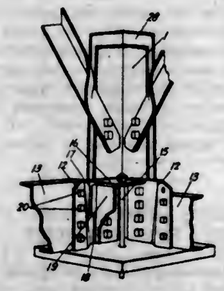
A drawing compass including a pin leg and a drawing instrument leg pivotally connected together, said pin leg being of uniform cross section throughout substantially its entire length, a split extension member tubular throughout its length and slidably mounted on the pin leg, a pin leg extension of the same cross section as the pin leg, extending into the tubular member and adjustable axially relatively to the latter, and screws engaging the pin leg and pin leg extension extending through the split and the tubular member and adjustably clamping the tubular member to the pin leg and the pin leg extension.

1,680,195. LOGGING BOAT. EDWARD B. ALLEN, Dunnellon, Fla. Filed Oct. 28, 1927. Serial No. 229,384. 1 Claim. (Cl. 115—19.)



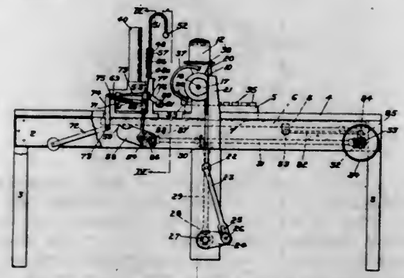
A boat, comprising a buoyant central section, carrying a power unit, a forward and rear pivoted buoyant drum with peripheral transverse paddles, a sprocket chain centrally of the paddles, driven by the power unit, and a steering post carrying diametrical crank arms linked to the opposite sides of each drum.

1,680,196. TOILET CASE. EARL C. AUSTIN, Bluefield, W. Va. Filed Sept. 13, 1927. Serial No. 219,303. 12 Claims. (Cl. 132—79.)



1. A toilet case having upper and lower ledges formed with article-holding pockets and spaced by a wall forming the back of the case, one of said ledges having recesses therein seating tube-holding heads.

1,680,197. BARN BROOM. RAYMOND F. BATEMAN, King City, Mo. Filed Apr. 13, 1927. Serial No. 183,513. 1 Claim. (Cl. 15—200.)



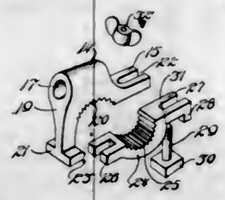
A broom of the class described comprising a head having grooves therein, a plurality of spring metal strips of L-shape having their shorter arms seated in the grooves, each strip having a tongue struck therefrom which is adapted to be pressed into the side of the groove and a filling piece inserted in each groove and bearing on the shorter arms for holding the spring metal strips therein.

1,680,198. DERRICK STRUCTURE FOR OIL, GAS, AND ARTESIAN WELLS. GORDON BATTELLE and HARRY M. RUNKLE, Columbus, Ohio, and WILLIAM B. TOBIN, Los Angeles, Calif., assignors to The International Derrick & Equipment Company, Columbus, Ohio, a Corporation of Ohio. Original application filed Oct. 15, 1921, Serial No. 507,822. Divided and this application filed Nov. 3, 1922. Serial No. 598,906. 6 Claims. (Cl. 189—13.)

1. Derrick structure comprising leg members formed in sections, three spaced girts, braces intersecting adjacent the middle girt, said braces terminating at their upper ends at the upper of said girts and at their lower ends immediately above the lower of said girts and a strap extending vertically from the lower girt to the middle girt and dividing the angle produced by said braces below their points of intersection.

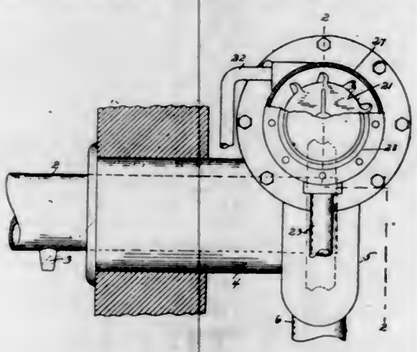
1,680,199. CAPPING MECHANISM. CHRISTIAN N. BERGMANN, Pittsburgh, Pa., assignor to Bergmann Packaging Machine Company, Pittsburgh, Pa., a Corporation of Delaware. Original application filed Jan. 17, 1923, Serial No. 613,235. Divided and this application filed Jan. 19, 1923. Serial No. 613,595. 7 Claims. (Cl. 226—92.)

7. In a package capping machine, the combination of a supporting frame having a longitudinal trackway, an intermittently movable package carrier thereon having pockets for open top packages, a superimposed cover magazine, means for selecting a cover therefrom, means for placing it within one of said packages, means for actuating the carrier and said cover placing means, and means adapted to be engaged by the carrier for regulating the operation of the cover selecting means.



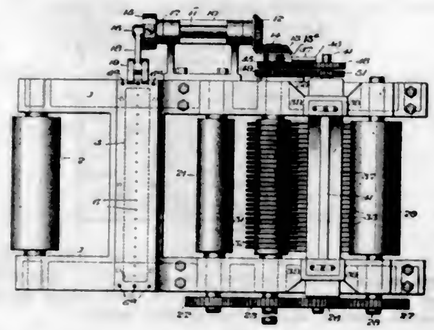
1,680,200. ROAD MAP. ANTONIO BLANCAFORT, La Garriga, Barcelona, Spain. Filed Dec. 18, 1926. Serial No. 155,623. 3 Claims. (Cl. 116—29.)

1. In an automatic road map, a casing, a route strip bearing an itinerary of the route carried by the casing, an indicating pointer movable along the itinerary, spaced sprocket gears supported in the ends of the casing, a sprocket chain trained about the gears and supporting the said pointer at one of its stretches, a rotary shaft extended into the casing, worms carried thereby, a rocking support supported by the casing, worm gears mounted thereon for engagement selectively with the worms upon the said shaft, sprocket gears carried by the worm



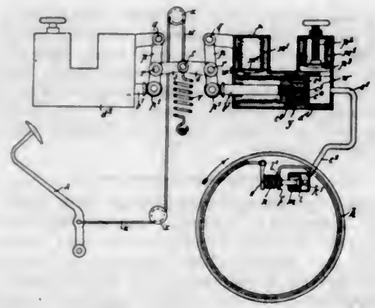
gears and over which the other stretch of the chain is trained, and means for rocking the said supporting member whereby to selectively engage either worm gear with its worm to change the course of travel of the said sprocket chain.

1,680,201. BATTERY LEAD CONNECTION OR CLAMP. JOHN P. BIHL and HENRY J. BIHL, Newport, Ky. Filed Apr. 22, 1926. Serial No. 103,991. 2 Claims. (Cl. 173—259.1.)



1. A battery lead connection or clamp comprising, in combination, a pair of independent separable jaw-members each of the latter having internally serrated or toothed arc-shape main-portions, one of said jaw-members being the main one that is provided at one end with a laterally-projecting T-shape arm and a socket for the securing-end of the lead wire or cable and at its other end provided with an open slot or recess, and the other one of said jaw-members being a locking one that is provided with an open slot or recess at one end for co-engagement with the said T-shape arm of the main jaw-member and at its other end provided with an open slot or recess that coincides and registers, in use, with the open slot or recess of the said main jaw-member, and a square-headed bolt that is adapted to engage the said registering open-slotted ends of the main and locking jaw-members and provided with a winged fastening-nut, substantially as shown and described.

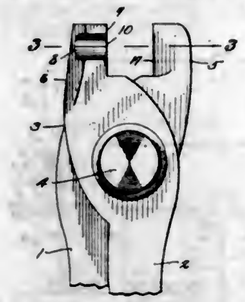
1,680,202. BOILER-TUBE CLEANER. FRANK BOWERS, Detroit, Mich., assignor, by mesne assignments, to Diamond Power Specialty Corporation, Detroit, Mich., a Corporation of Michigan. Filed Nov. 21, 1918. Serial No. 263,477. 4 Claims. (Cl. 122—392.)



1. The combination with a boiler tube cleaner, of a casing into which an extremity of said cleaner is extended, drive mechanism for the cleaner within said casing, a housing having screw-threaded engagement with said casing, a pair of aligned shafts within said housing, a turbine upon one of said shafts, a speed governor for the turbine upon the same shaft, a planetary drive connection between said shaft and the aligned shaft, and a drive connection between the latter shaft and the mechanism in said casing.

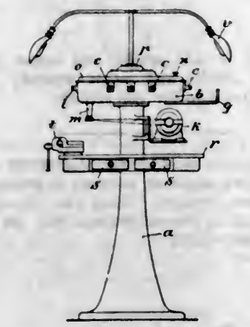
1,680,203. CREPE AND METHOD OF AND APPARATUS FOR MAKING THE SAME. WILLIAM H. CANNARD, Green Bay, Wis. Filed Apr. 7, 1924. Serial No. 704,867. 38 Claims. (Cl. 92—69.)

1. The hereindescribed method of producing crepe which includes the steps of moving a web lengthwise and, while in motion, forming corrugations therein in one direction, subjecting the corrugations to pressure to produce crinkles in the web, producing corrugations in the web which extend in a direction relatively different from that of the first-mentioned corrugations, and subjecting such corrugations to pressure to produce crinkles in the web.



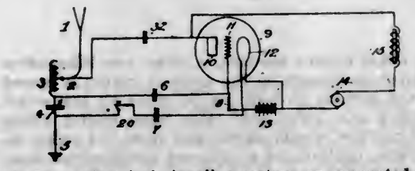
1,680,204. HYDRAULIC BRAKING APPARATUS. MAURICE CHARLES, Courbevoie, France. Filed July 6, 1926, Serial No. 120,728, and in France July 16, 1925. 9 Claims. (Cl. 188—170.)

5. A hydraulic braking system comprising in combination, a brake drum, a brake disposed within said brake drum, a spring carried by said brake for moving it into engagement with the inner periphery of said drum, a piston pump receiver opposing the action of said spring, a piston pump generator, a conduit interconnecting said generator and said receiver, an incompressible fluid in said conduit, fluid tight bellows disposed in said generator and receiver, a toggle associated with the piston in said generator, a brake pedal for operating said toggle, and a spring adapted to oppose the movement of said toggle.



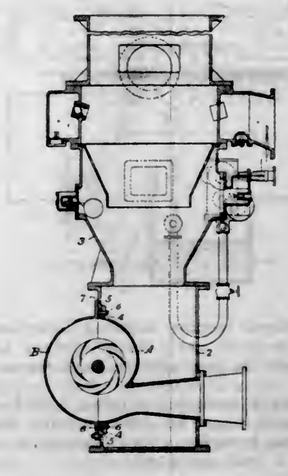
1,680,205. TONGS. JOHN J. CLINE, Alix, Ark. Filed Nov. 7, 1927. Serial No. 231,612. 1 Claim. (Cl. 81—51.)

A tool for loosening battery terminals, comprising pivotally connected levers provided with cooperating jaws, one jaw having a substantially flat surface, and having grooves which converge and intersect said surface, one groove being adapted for the reception of the end of the clamping bolt in a battery terminal, the other groove being adapted for the reception of one corner of the nut on the bolt, the grooves being of like construc-



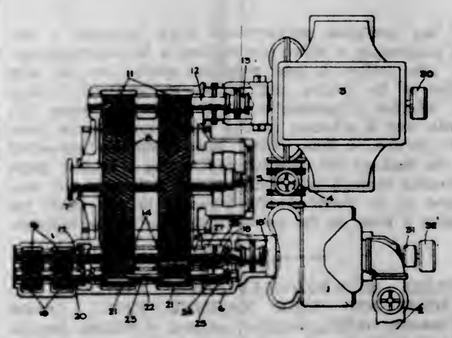
tion to provide for a reversal of the tool, the other jaw having a chisel edge for acquiring a hold on the inclined surface of one arm of a battery terminal.

1,680,206. DENTAL ENGINE. WALTER CORDES, Gotha, Germany. Filed Nov. 15, 1926, Serial No. 148,583, and in Germany Jan. 2, 1926. 8 Claims. (Cl. 32—5.)



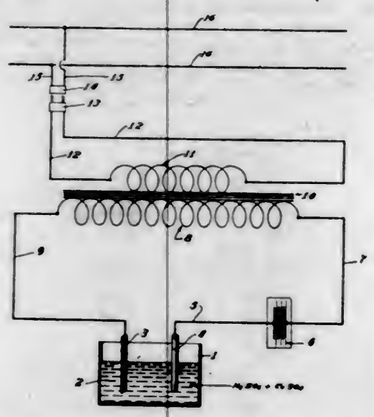
1. A dental engine, comprising in combination with an upright, a driving engine on said upright, a gear box on said upright above said driving engine, a plurality of spindles in said gear box, means for rotating said spindles from said engine, each of said spindles having means for holding a tool for grinding, cleaning, finishing, or polishing, and a plurality of selective means, one for each spindle for communicating to said spindles a rotating movement, whereby any one of the spindles may be operated singly or all may be operated simultaneously.

1,680,207. RADIO SIGNALING SYSTEM. LEE DE FOREST and CHARLES V. LOGWOOD, New York, N. Y., assignors to De Forest Radio Telephone and Telegraph Company, New York, N. Y., a Corporation of Delaware. Filed May 23, 1916. Serial No. 99,283. 14 Claims. (Cl. 250—8.)



9. In an electrical signaling system, an evacuated vessel containing two cold and one hot electrodes, a circuit including an inductance connecting two cold electrodes, a connection from said inductance to said hot electrode, and a plurality of condensers included in said connection.

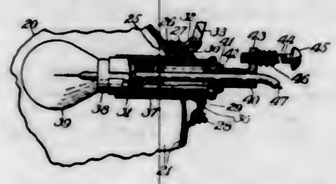
1,680,208. CENTRIFUGAL PUMP. RAYMOND N. EHRHART, Pittsburgh, Pa., assignor to Elliott Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed May 3, 1927. Serial No. 188,469. 6 Claims. (Cl. 103—103.)



1. A centrifugal pump, comprising a housing receiving the water supply for said pump, and a volute and discharge member for said pump comprising separable sections removably secured to said housing, one of said sections being located within the housing and the other of said sections being exteriorly secured to said housing.

1,680,209. SHIP-PROPULSION SYSTEM. WILLIAM L. R. EMMET, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Aug. 30, 1926. Serial No. 132,642. 8 Claims. (Cl. 74—59.)

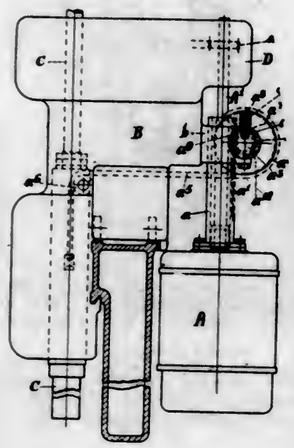
1. In combination, a plurality of rotatable clutch elements, means for exerting a force upon the elements which increases with their departure from relative angular correspondence in position to synchronize said elements, and means for operating said elements.



1,680,210. RECTIFIER ELECTROLYTE. EDGAR W. ENGLE, Lake Forest, Ill., assignor to Fansteel Products Company, Inc., North Chicago, Ill., a Corporation of New York. Filed Jan. 7, 1927. Serial No. 159,523. 5 Claims. (Cl. 175—318.)

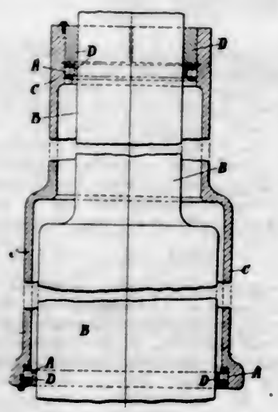
1. An electrolytic rectifier including a tantalum electrode, a lead electrode and a dilute sulphuric acid electrolyte to which has been added a small amount of cobalt sulphate.

3. In electrolytic apparatus including a lead electrode in sulphuric acid, means for preventing the decomposition of the lead including a small amount of a cobalt salt dissolved in said electrolyte.



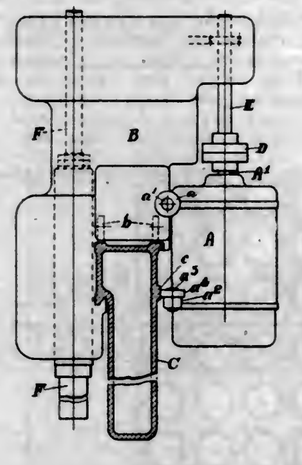
1,680,211. ANTIGLARE MOTOR-VEHICLE LAMP. JOHN F. FARMER, Indianapolis, Ind. Filed Nov. 30, 1925. Serial No. 72,372. 2 Claims. (Cl. 240—41.)

1. An anti-glare motor-vehicle lamp including a casing comprising a main portion and a forwardly-projecting side frame, a side reflector secured in the side frame of the casing and having an aperture therein, the reflector comprising a parabolic portion facing forwardly and a reflexing portion facing towards the parabolic portion, a lamp holder base adjustably supported on the back of the reflector and having a tubular guide extending through said aperture, and a lamp socket supported to be longitudinally adjusted in the guide for holding a lamp in the parabolic portion of the reflector.



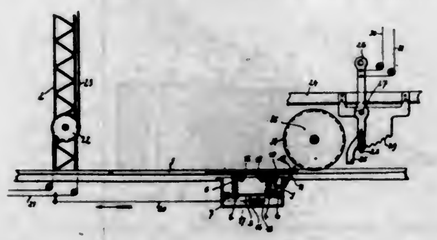
1,680,212. ELECTRICALLY-DRIVEN DRILLING MACHINE AND LIKE MACHINE TOOL. GEORGE FEATHER, Halifax, England, assignor to William Asquith Limited, Halifax, England. Filed Feb. 17, 1926, Serial No. 88,876, and in Great Britain Feb. 24, 1925. 5 Claims. (Cl. 77—28.)

1. A machine of the character described including a rotary vertical spindle slidably axially upwardly and downwardly, an electric motor having its armature shaft parallel with the spindle, said motor being movable upwardly and downwardly axially of its shaft, an operative connection between said spindle and shaft for driving the spindle from the shaft in the different relative



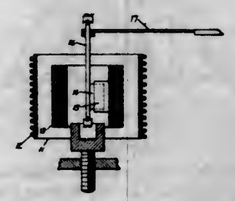
vertical positions of said spindle and motor, and means connecting said spindle and motor whereby the motor serves as a counterpoise for the spindle.

1,680,213. RADIAL-DRILLING MACHINE. GEORGE FEATHER, Halifax, England, assignor to William Asquith Limited, Halifax, England. Filed Feb. 17, 1926, Serial No. 88,877, and in Great Britain Feb. 24, 1925. 1 Claim. (Cl. 308—231.)



In a radial drilling machine, a pillar, two independent rings fitted frictionally on the pillar at vertically spaced points and movable vertically on the pillar, an arm socket surrounding said pillar, said rings being located within the end portions of said socket, said rings and socket being movable vertically as a unit, and anti-frictional bearings between said socket and rings to permit the socket to rotate freely around said rings.

1,680,214. ELECTRICALLY-DRIVEN RADIAL DRILL. GEORGE FEATHER, Halifax, England, assignor to William Asquith Limited, Halifax, England. Filed Feb. 17, 1926, Serial No. 88,879, and in Great Britain Feb. 24, 1925. 4 Claims. (Cl. 77—28.)

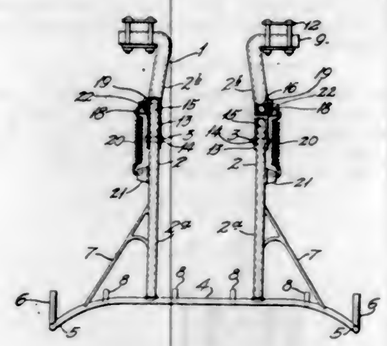


1. In a radial drill, a horizontal arm, a carriage movable thereon, a drill spindle mounted in said carriage at one side of said arm, an electric motor at the opposite side of said arm hinged to said carriage to swing downwardly by gravity toward said arm, the arm having a guiding surface and the motor having a portion movable along said surface, and an operative connection between said motor and spindle.

1,680,215. DEVICE FOR STOPPING RAILROAD VEHICLES INDEPENDENTLY OF THE DRIVER. PAUL FRIEDEL, Bohlen, Germany. Filed July 15, 1926, Serial No. 122,650, and in Germany June 14, 1926. 2 Claims. (Cl. 246—181.)

1. In a device for stopping railroad vehicles independently of the driver, the combination with a signal and brake operating lever on the vehicle and an actuating arm mounted on the track, of a resiliently supported platform adapted to be depressed by engagement with the wheels of the vehicle and to prepare said arm for engagement with the operating lever when thus depressed, a horizontally adjustable supporting plate for said platform, bolts connected to the platform and guided in said plate, supporting springs arranged on the bolts so as to bear against the plate and support the platform, springs tending to hold the platform against the track rail in operative position, and a rope acting on the supporting plate for shifting the latter and the platform out of operative position.

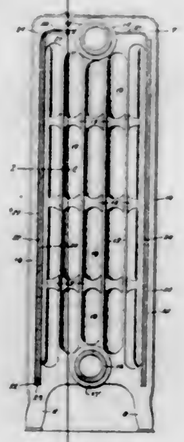
1,680,216. ELECTROMAGNETIC INSTRUMENT. WILHELM HERZOG, Charlottenburg, Germany, assignor to General Electric Company, a Corporation of New York. Filed Apr. 12, 1927, Serial No. 183,221, and in Germany July 10, 1926. 8 Claims. (Cl. 171—95.)



8. An electromagnetic measuring instrument of the deflection type provided with hysteresis error compensating means, said compensating means being adjustable for varying the magnitude of such compensation at all deflections and for varying the relative magnitude of such compensation at different deflections.

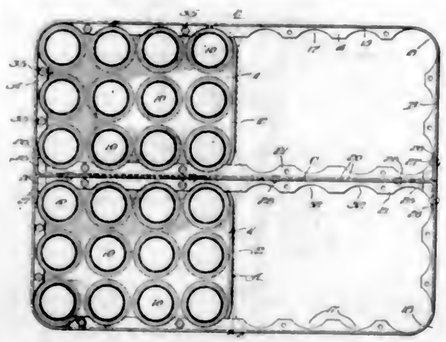
1,680,217. RADIO ALARM SIGNAL SYSTEM. RANDALL M. KEATOR, New York, N. Y., assignor to De Forest Radio Telephone & Telegraph Company, New York, N. Y., a Corporation of Delaware. Filed July 2, 1921, Serial No. 482,024. 2 Claims. (Cl. 250—33.)

1. The combination with radio transmitting apparatus of a casing therefor, of a metal post for supporting said casing and provided with a non-conducting portion extending above said casing, and a resonant antenna coil in a helix wound around the non-conducting portion of said post and connected to said apparatus.



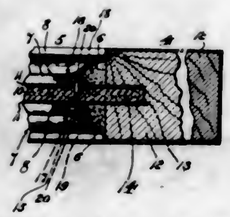
1,680,218. STALK BREAKER. WILLIAM H. KEUNE, Carlinville, Ill. Filed Mar. 26, 1927. Serial No. 178,628. 7 Claims. (Cl. 97—193.)

1. A stalk breaker for tractors, comprising a frame for mounting at the front of the tractor, the said frame including a horn-like stalk breaking bar at its forward end.



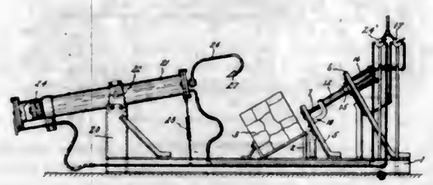
3. A stalk breaker for tractors, comprising an articulated frame for mounting at the front of the tractor; and ground shoes and stalk aligning fingers depending from the frame.

1,680,219. RADIATOR. ARCHER A. LANDON, Buffalo, N. Y., assignor to Landon Radiator Company, Incorporated, North Tonawanda, N. Y., a Corporation of New York. Filed Jan. 7, 1927. Serial No. 159,721. 3 Claims. (Cl. 257—151.)



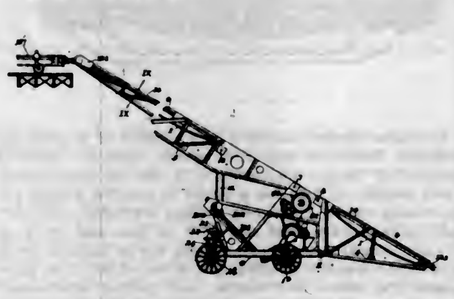
2. A radiator comprising a series of vertically disposed cast metal radiator sections each of said sections being formed to provide a plurality of longitudinally and laterally extending fluid conducting passages, bosses provided at the upper ends of said sections, nipples connecting said bosses, each radiator section being formed with webs connecting each of the portions forming the fluid conducting passages and providing an imperforate section, and at least two of said sections being formed on their corresponding sides with a pair of vertical beads, a shield comprising a longitudinally corrugated body portion and an upper flat end portion extending perpendicularly to said body portion, said corrugated body portion being supported under compression between said sections by said beads, and the flat end section extending inwardly and engaging the outer sides of said bosses.

1,680,220. MOUNTING FOR BAKING PANS. ADRIEN L. LANGEL, Chicago, Ill., assignor to Chicago Metallic Manufacturing Co., Chicago, Ill., a Corporation of Illinois. Filed Oct. 10, 1927. Serial No. 225,148. 9 Claims. (Cl. 53—6.)



1. The combination with a plurality of pans arranged in a row, each pan having a cup depending from a ledge which is laterally extended, of a common mounting for the several pans comprising an angle iron frame arranged to present an inwardly extending flange beneath the pan ledges, the frame being of rectangular contour and having portions of its flange cut away at the corners of the frame, and means extending through the flange and ledge of each pan for securing the latter to the frame, substantially as described.

1,680,221. FIREPROOF METAL DOOR. JOSIAH E. LEE, Erlanger, Ky., assignor to The Architectural Metal Products, Incorporated, Covington, Ky., a Corporation of Kentucky. Filed Sept. 7, 1926. Serial No. 134,037. 2 Claims. (Cl. 189—46.)

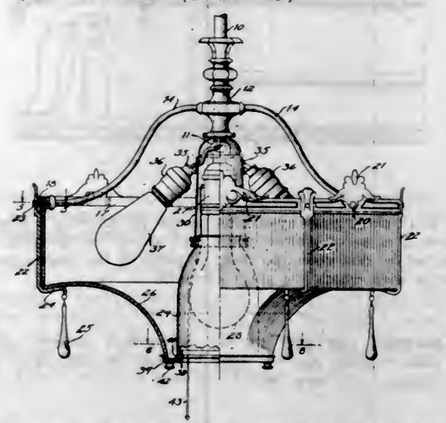


1. In a fire-proof metal door, the combination of a rectangular metallic shell having upright side-stiles and horizontal upper and lower connecting cross-rails, mouldings provided in spaced pairs along the inner edges of the said shell, spaced pairs of parallel flange-formations along the inner edges of said mouldings and having aligned pierced holes, cores or fillers in said shell, longitudinal grooves provided along the approximate center of the inner edges of said core members, aligned manholes made in the said mouldings in alignment with said pierced holes in the said flange-formations, a fire-proof panel fitting within the sight of said shell and having holes in its skirt aligning with said moulding man-holes and adapted to be set in clamping-engagement with said spaced pairs of flange-formations on the mouldings and provided with extended edges that seat in said longitudinal grooves along the inner edges of said core-members, and screw-bolts or the like passed through the said aligned man-holes and pierced bolt-holes into clamp-fastening engagement with the said flange-formations, substantially as shown and described.

1,680,222. BALE SPLITTER. PAUL W. LEHMAN, Milwaukee, Wis., assignor to The Fisk Rubber Company, Chicopee Falls, Mass., a Corporation of Massachusetts. Filed July 21, 1927. Serial No. 207,546. 3 Claims. (Cl. 18—2.)

3. A device of the character described comprising a pivotally supported fluid pressure cylinder, a hook secured to the piston rod thereof, a support positioned in line with the cylinder and in the path of travel of the hook adapted to support a bale of rubber inclined toward the hook, a pair of spikes carried by the piston of a second fluid pressure cylinder and reciprocable in a plane substantially parallel to the base of the bale, said spikes adapted to engage the lower portion of the bale on the side remote from the first named air cylinder, and valves to control the respective operations of the air cylinders.

1,680,223. STACKING MACHINE. WILLIAM K. LIGGETT, Columbus, Ohio, assignor to The Jeffrey Manufacturing Company, Columbus, Ohio, a Corporation of Ohio. Filed Dec. 15, 1920. Serial No. 431,007. 20 Claims. (Cl. 198—121.)

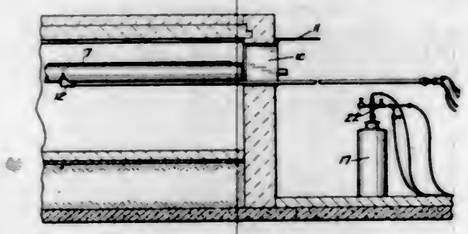


1. In a machine of the class described, the combination of a wheeled truck, a motor on said truck, a conveyor frame pivotally mounted on said support above said motor, means for adjusting said frame angularly, a second conveyor frame pivotally mounted on said truck above said motor adjacent the pivotal mounting of said first named frame, motor driven means for angularly adjusting said second frame, a single conveyor traversing said frames, a single diving element engaging said conveyor between the pivotal mountings of said frames, and driving connections from said motor to said conveyor driving means.

1,680,224. MANUFACTURE OF NEW CELLULOSE DERIVATIVES. LEON LILIENFELD, Vienna, Austria. Filed May 22, 1926, Serial No. 111,035, and in Austria May 30, 1925. 15 Claims. (Cl. 260—100.)

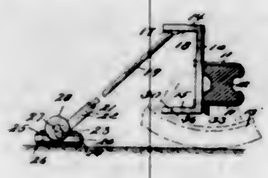
1. Process for making new cellulose compounds which process comprises acting on a cellulose-xanthate with an ester of an inorganic acid under substantially neutral condition.

1,680,225. LIGHTING FIXTURE. MATTHEW LUCKIESH, Cleveland, Ohio. Filed Dec. 30, 1925. Serial No. 78,267. 12 Claims. (Cl. 240—78.)



1. In a lighting fixture the combination with a glass bowl open at the top, and a bowl supporting frame about the top of the bowl, of a fixed frame, a hinge connection between the frames, a support for the fixed frame, a single downwardly extending lamp socket supported from the frame, a downwardly opening reflector disposed inside said bowl, and about the lamp socket and a plurality of obliquely disposed lamp sockets carried from the support and adapted to carry lamps inside said bowl, the frame and bowl being capable of being swung downwardly to clear the obliquely disposed lamps and the reflector.

1,680,226. DISPLAY STAND. WILLIAM H. MAGEE, Moundsville, W. Va., assignor to Fostoria Glass Co., Moundsville, W. Va., a Corporation of West Virginia. Filed Mar. 30, 1926. Serial No. 98,572. 7 Claims. (Cl. 211—37.)

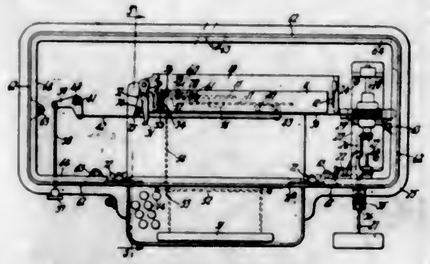


1. In a display stand for shoes, a nontiltable head including a downwardly inclined rear end provided with means formed thereon for supporting the heel of a shoe in varying vertical positions.

1,680,227. SHEET-GLASS PROTECTING MEANS AND METHOD. LEOPOLD MAMBOURG, Lancaster, Ohio, assignor to The Libbey-Owens Sheet Glass Company, Toledo, Ohio, a Corporation of Ohio. Filed Nov. 12, 1925. Serial No. 68,509. 17 Claims. (Cl. 49—17.)

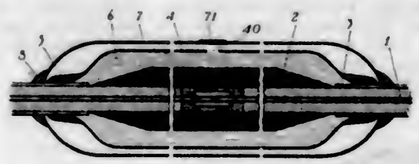
1. In sheet glass apparatus, means for drawing a sheet from a mass of molten glass, and means for spraying a protective film upon the sheet or parts of the glass apparatus with which the sheet contacts.

1,680,228. LIFTING JACK. AMOS ROY MARTY, Ada, Ohio. Filed Apr. 7, 1927. Serial No. 181,781. 5 Claims. (Cl. 254—86.)



1. The combination with the axle and wheel of a vehicle, of a jack, including a support connected to the axle, a swingingly mounted leg connected to the support, a ground-gripping member adjustably connected to the lower end of the leg, whereby the length of the leg may be increased or decreased, a guide for the leg carried by the support, and means for locking the leg in said guide when the leg is in lifting position.

1,680,229. FLEXIBLE STAY BOLT. WILLIAM POLLOCK, Pittsburgh, Pa. Filed Sept. 8, 1926. Serial No. 134,256. 2 Claims. (Cl. 85—1.5.)

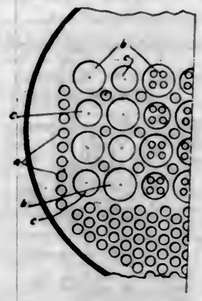


1. A boiler stay bolt comprising an end section having a central tapered and threaded portion, a straight threaded end portion and a wrench receiving opposite end portion; an intermediate section having a threaded socket in one end receiving the threaded end portion and having a ball socket in the remaining end; a second end section having a straight threaded body, a ball end held in said ball socket and a remaining end portion adapted to receive a wrench; and a tapered plug screwed on the last mentioned straight threaded portion, the smaller ends of the tapered threaded portion and of the plug confronting each other.

1,680,230. TYPEWRITING MACHINE. EDWARD G. ROWLEY, Belleville, N. J., assignor to Underwood Elliott Fisher Company, New York N. Y., a Corporation of Delaware. Filed June 30, 1926. Serial No. 119,542. 15 Claims. (Cl. 197—186.)

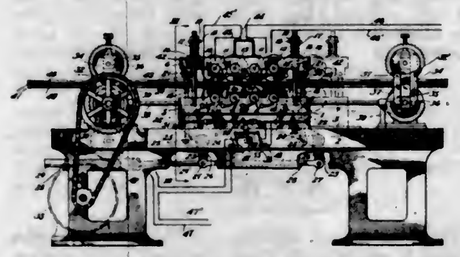
1. A sound-deadening casing for a typewriting machine having a carriage, escapement mechanism therefor, a platen, a line-spacing lever therefor, means for simultaneously line-spacing and returning the carriage, and means for locking the carriage from the outside of the casing in a manner to prevent the sliding movement of the carriage upon operation of the line-spacing means.

1,680,231. CABLE JOINT. DONALD M. SIMONS, Osborne, Pa., assignor, by mesne assignments, to General Cable Corporation, a Corporation of New Jersey. Filed Oct. 25, 1926. Serial No. 143,864. 1 Claim. (Cl. 173—268.)



The steps herein described in a method of jointing an insulated metal-sheathed cable whose insulation includes material of fluidity increasing with rise of temperature, which consists in bringing a sleeve to position around the electrically united cable ends, making low-temperature oil-tight union between the sleeve at its ends and the ends of the cut-away cable sheath, filling the so applied sleeve with liquid insulation, bringing a sleeve of metal to place around the sleeve first named, and uniting said second sleeve by wiped solder joint to the cable sheath.

1,680,232. FLUE SUPERHEATER. PETER THOMSEN, Cassel, Germany, assignor to The Superheater Company, New York, N. Y. Filed Mar. 1, 1926, Serial No. 91,463, and in Germany Mar. 2, 1925. 3 Claims. (Cl. 122—462.)



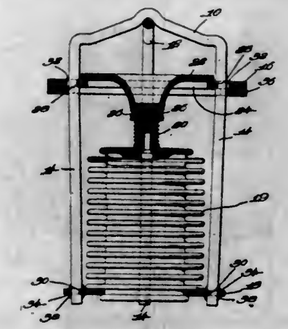
1. In apparatus of the class described, the combination of a pair of flue sheets; flues connecting them, the flues being of two different internal diameters and so arranged that tubes of the two diameters alternate in rows running in one direction; superheater headers parallel and

adjacent to one of the flue sheets, out of line with the flues, and at right angles to said rows of flues; and tubular superheater elements connected to said headers and

each looping into flues of different diameters, the arrangement being such that the steam flows last through a loop in a large flue.

1,680,233. ELECTRIC WELDING METHOD AND APPARATUS. ARTHUR J. TOWNSEND, Canton, Ohio, assignor, by mesne assignments, to The Columbia Steel Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Jan. 18, 1921. Serial No. 438,126. 14 Claims. (Cl. 219—4.)

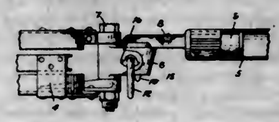
3. Apparatus for spot welding metal laminæ including electrodes in a welding circuit coacting on opposite sides of the material, means moving the material, and means closing the circuit and clamping the electrodes for moving them with the material under uniform perpendicular pressure during the welding period.



1,680,234. PLASTIC MATERIAL. WILLIAM BURTON WESCOTT, Boston, Mass., assignor to Rubber Latex Research Corporation, Boston, Mass., a Corporation of Massachusetts. Filed Jan. 13, 1927. Serial No. 161,026. 6 Claims. (Cl. 106—23.)

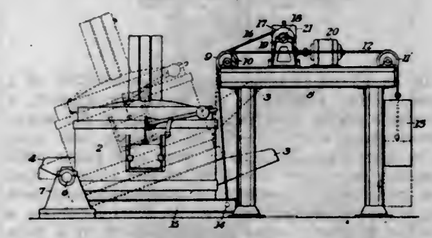
1. As a new plastic material, acid washed asbestos and uncoagulated latex.

6. The process of making asbestos containing plastics which comprises extracting asbestos with acid, washing and admixing the extracted asbestos with latex.



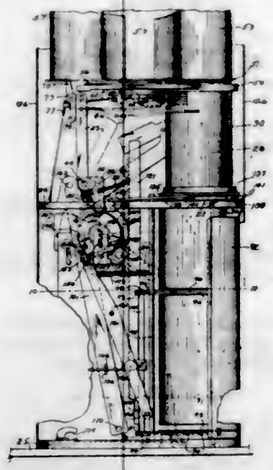
1,680,235. WATER CONTROL. JOHN E. WOODS, Brookline, Mass., assignor to Clifford Manufacturing Co., Boston, Mass., a Corporation of Delaware. Filed Mar. 17, 1927. Serial No. 176,111. 6 Claims. (Cl. 236—34.)

1. Temperature-controlled apparatus comprising a thermostat, a valve connected with the thermostat and movable thereby, a partition member provided with a valve opening and a plurality of support openings, longitudinal supports extending through the corresponding openings in the partition member and having shoulders designed to engage with the partition member on lateral movement of the longitudinal members with relation to



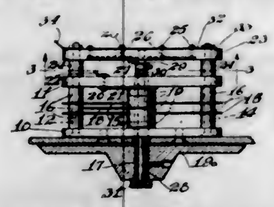
the openings, and means for rigidly locking the longitudinal members and partition member in position with the shoulders engaging the partition member.

1,680,236. DRAFT COUPLING. HARRY C. ZIMMERMAN, Washington, D. C. Filed Jan. 15, 1927. Serial No. 161,405. 4 Claims. (Cl. 280—33.15.) (Granted under the provisions of the act of Mar. 3, 1883, 22 Stat. L., 625, as amended Apr. 30, 1928.)



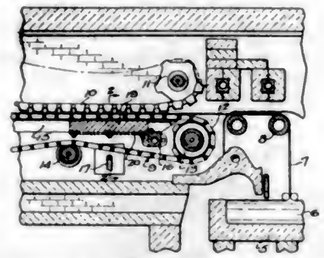
1. In a coupling for connecting a pair of vehicles, a draw bar arranged to be swivelly mounted on one of the vehicles and having a downwardly projecting tapered stud on its free end, a laterally swinging socket member carried by the other vehicle and having a tapered apertnre for receiving the stud, a latch mounted in the socket member and positioned to intersect the aperture therein, said latch formed with a recess conforming to the outline of the aperture in the socket member and the stud formed with a recess for receiving the latch when said latch is turned.

1,680,237. ELECTRIC FURNACE AND OPERATING MECHANISM THEREFOR. SAMUEL ARNOLD, 3d, Benavon, Pa. Filed Mar. 23, 1926. Serial No. 96,723. 13 Claims. (Cl. 266—15.)



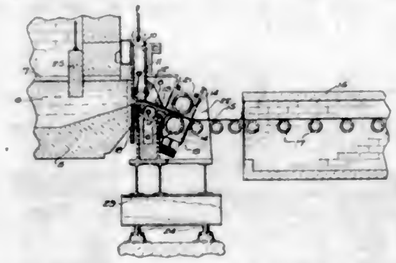
1. In a furnace installation, an electric furnace having a pivotal mounting above the bottom thereof, and operating mechanism positioned above the plane of the furnace and entirely at one side thereof for tilting the same about said mounting.

1,680,238. VENDING MACHINE. ROLLYN H. BAKER, Dayton, Ohio, assignor to The Baker Manufacturing Company, Dayton, Ohio, a Corporation of Ohio. Filed Dec. 6, 1919. Serial No. 342,973. 15 Claims. (Cl. 312—44.)



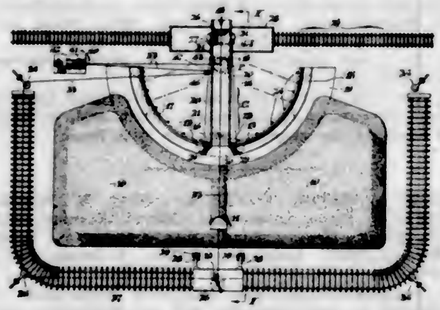
1. In a dispensing device, a tubular magazine adapted to accommodate a stack of nested cups, a dispensing mechanism at one end thereof whereby the cups are dispensed one at a time; a revoluble carrier containing a plurality of auxiliary magazines adapted to register with the dispensing magazine successively as the carrier rotates; an operating element whereby the dispensing means is actuated, a ratchet wheel on said carrier, a lever connected to and rocked by the operating element each time it is actuated, a pawl carried by said lever and adapted to engage the ratchet wheel and rotate it intermittently, and an arm carried by the pawl, adapted to engage the cups in the dispensing magazine and prevent the pawl engaging the ratchet wheel, until by its diminution in size the stack is removed from the path of the arm.

1,680,239. VARIABLE ELECTRICAL CONDENSER. JOHN C. BARRETT, Chicago, Ill. Filed Dec. 12, 1925. Serial No. 74,929. 2 Claims. (Cl. 175—41.5.)



1. In an electrical condenser, the combination of a variable section comprising an insulating support, a flat metallic stator plate carried thereby, a flat metallic rotor plate, and a first shaft carrying said rotor plate in spaced parallel relation with said stator plate for angular movement relatively thereto, and a fixed section comprising a plurality of fixed condensers each having a switch contact forming one of its terminals, a switch for selectively engaging said contacts by a turning movement, and a second shaft carrying said switch for turning it, said second shaft being movable axially to move said switch from its contact engaging position, and a spring tending to move said second shaft and said switch to the contact engaging position of the latter.

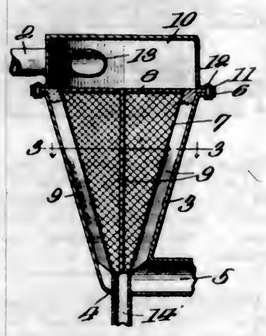
1,680,240. SHEET-GLASS-DRAWING APPARATUS. LEWIS D. BLACKSHERE, Charleston, W. Va., assignor to The Libbey-Owens Sheet Glass Company, Toledo, Ohio, a Corporation of Ohio. Filed Aug. 17, 1927. Serial No. 213,465. 7 Claims. (Cl. 49—17.)



1. The combination with an endless sheet glass drawing apparatus draw table, and means for heating the same, of means for protecting the sheet carrying run of said table from said heating means.

1,680,241. SHEET-GLASS APPARATUS. JAMES C. BLAIR, Toledo, Ohio, assignor to The Libbey-Owens Sheet Glass Company, Toledo, Ohio, a Corporation of Ohio. Filed June 24, 1926. Serial No. 118,159. 7 Claims. (Cl. 49—33.)

1. In sheet glass apparatus, a receptacle containing a mass of molten glass, a slab associated with the receptacle, means for flowing a relatively thick sheet of glass down the slab, and a pair of rolls arranged at the end of the slab for reducing the sheet in thickness, and means for moving the slab and rolls simultaneously.



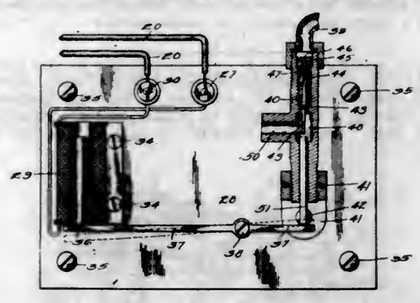
1,680,242. MATERIAL STORAGE AND HANDLING SYSTEM. ROBERT H. BEAUMONT, Radnor, Pa., assignor to R. H. Beaumont Co., Philadelphia, Pa., a Corporation of Pennsylvania. Filed May 6, 1926. Serial No. 107,099. 7 Claims. (Cl. 214—100.)

1. In a material storage and handling system of the character described, a drag scraper for reclaiming the material from the storage area, a cable with guide means

adjustable to determine linear travel of the scraper over different portions of the storage area, and a permanently pivoted elevating ramp with its lower end traversing a concentric track for alignment into the path of travel of the scraper.

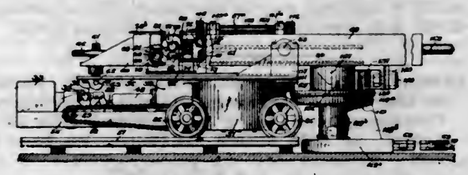
1,680,243. SCREENING DEVICE. FRANK J. BECKER, North Tonawanda, N. Y., assignor of one-half to Frank J. Moore, Buffalo, N. Y. Filed Dec. 31, 1923, Serial No. 683,693. Renewed Jan. 25, 1928. 5 Claims. (Cl. 209—250.)

1. A screening device of the kind described comprising a funnel-shaped shell having an opening in its bottom and a lateral discharge spout, said shell being provided with an annular flange at its upper edge, a ring disposed on said flange having depending converging ribs terminating short of the end of the shell, a funnel-shaped screen disposed on said ribs terminating short of the bottom of the shell adjacent the ends of the ribs, a closed circular cover having an annular flange disposed on said ring and provided with a tangentially disposed inlet, and bolts passing through said ring and flanges of the shell and cover respectively for securing said members together.



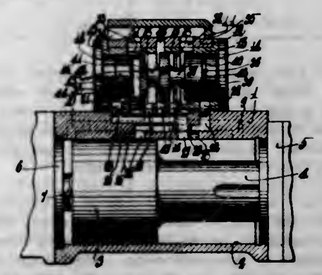
1,680,244. FASTENER. MOSES F. CARR, Lexington, Mass., assignor to Carr Fastener Company, Cambridge, Mass., a Corporation of Massachusetts. Original application filed Nov. 1, 1924, Serial No. 747,231. Divided and this application filed Aug. 25, 1925. Serial No. 52,328. 12 Claims. (Cl. 79—3.)

1. The method of forming a hollow pressed stud having a head, a neck and a shank portion with a shoulder between said head and neck, which comprises providing a neckless shell, forming a neck therein by lateral compression and subsequently pressing said head and shank relatively closer together to form said shoulder.



1,680,245. VALVE DEVICE FOR USE WITH PUMPING STRUCTURES. ALBERT PENN, Des Moines, Iowa, assignor of one-half to Ralph Penn, Des Moines, Iowa. Filed May 7, 1923. Serial No. 637,181. 1 Claim. (Cl. 137—139.)

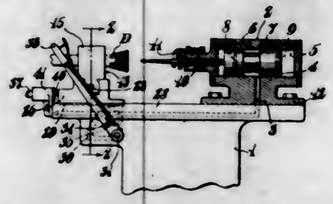
A valve structure of the class described comprising a valve body, a valve seat therein, a valve member adapted to coact therewith, a spring interposed between said valve member and said valve body for causing such coaction and electrically operated means for allowing said spring to maintain said valve seated, said means comprising a solenoid, an armature therein, a pivoted lever having said armature normally resting on one end thereof whereby energisation of said solenoid mag-



netizes the armature and causes it to exert a pull on said lever, the other end of which is adapted to coact with said valve member for opening the same when the solenoid is deenergized.

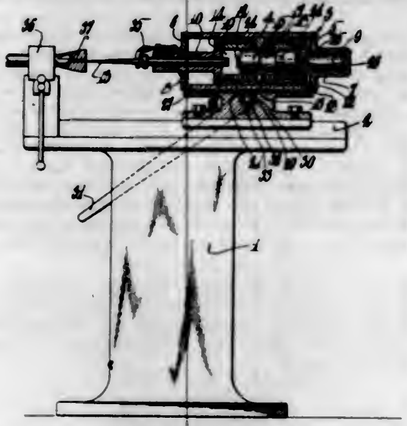
1,680,246. MINING MACHINE. FRANK CARTLIDGE, Cincinnati, Ohio, assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed June 20, 1918, Serial No. 240,969. Renewed Sept. 15, 1923. 104 Claims. (Cl. 262—28.)

1. In a mining machine, the combination with a guide disposable substantially against a face in which a kerf is being cut and a truck mounting therefor relative to which said guide is normally longitudinally extending and upon which said guide is adjustable while maintaining the plane thereof parallel to a horizontal line extending longitudinally of the guide, of cutting mechanism movable on said guide longitudinally thereof, said cutting mechanism being supported by said guide and being located beneath the same and being disposable substantially midway between the sides of said guide when the latter is in substantial abutment against the face.



1,680,247. ROCK-DRILLING MOTOR. CHARLES H. ALLEN, Claremont, N. H., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Apr. 7, 1922. Serial No. 550,460. 7 Claims. (Cl. 121—28.)

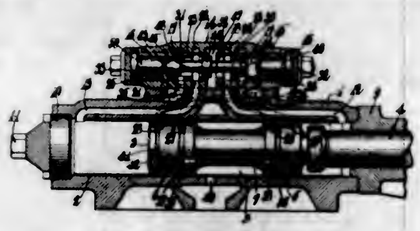
1. In a fluid pressure motor, a cylinder, a piston reciprocable therein, means forming distributing passages communicating with said cylinder adjacent the ends



thereof, a valve controlling said passages, and means for controlling said valve by the fluid in the ends of the cylinder which directly actuates the piston comprising throwing passages each communicating with the bore of the cylinder by a smaller port nearer the end thereof and a larger port nearer the center thereof.

1,680,248. DRILL-SHARPENING MECHANISM. FRANK M. LEE, Chicago, Ill., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Jan. 5, 1923. Serial No. 610,928. 3 Claims. (Cl. 76—5.)

3. In a hole opening mechanism, a stationary motor operated pinning device, a drill steel clamping device, actuating means for moving said clamping device longitudinally relative to said pinning device, means associated with said actuating means for normally holding said clamping device in a position remote from said pinning device, and means automatically controlled on movement of said clamping device for controlling the supply of operating fluid to said motor operated pinning device upon approach thereto of said clamping device.

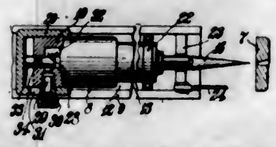


1,680,249. DRILL-SHARPENING MECHANISM. FRANK M. LEE, Chicago, Ill., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Jan. 5, 1923. Serial No. 610,929. 14 Claims. (Cl. 76—5.)

1. In a hole opening punching mechanism, a feed cylinder, a motor disposed within said feed cylinder and including a punch operating piston, and means for supplyig fluid pressure to the last mentioned motor including a passage extending from end to end thereof and controlled by a check valve at either end.

1,680,250. MOTOR. CHARLES H. ALLEN, Claremont, N. H., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Sept. 26, 1923. Serial No. 664,858. 11 Claims. (Cl. 121—28.)

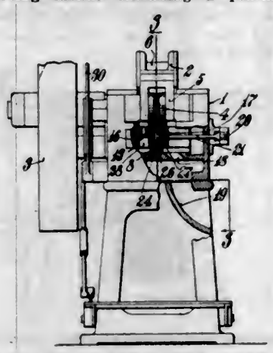
1. In a pressure fluid actuated motor, a cylinder, a piston reciprocable therein, means forming fluid distribution passages communicating with said cylinder, a valve controlling said passages, valve throwing means including means forming throwing passages opening into said cylinder for admitting live pressure fluid to the ends of said valve for throwing the latter during normal operation of the motor, and a movable abutment adapted to be actuated by said piston, said valve throwing means



also including means for admitting live pressure fluid to one end of said valve when movement of said piston is so limited by movement of said abutment to one extreme position of the latter that the piston overlies the communication of the corresponding throwing passage with the cylinder.

1,680,251. FORGING MACHINE. HALBERT B. HALVORSEN, Michigan City, Ind., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Apr. 20, 1925. Serial No. 24,419. 18 Claims. (Cl. 76—5.)

1. In combination, a bit sharpening machine having bit ejecting means, and means for twice interrupting movement of said bit after leaving the ejector but before leaving the machine.

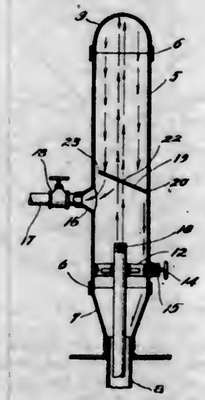


1,680,252. DRILL-FORGING MECHANISM. WADE H. WINEMAN, Michigan City, Ind., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Apr. 28, 1925 Serial No. 26,446. 8 Claims. (Cl. 76—5.)

1. A drill steel punch mechanism comprising a fluid actuated hammer punch, means for slidably supporting the same, mechanical means for feeding said hammer punch forwardly, and means whereby the same is automatically actuated upon actual engagement with a steel including a controlling valve initiating fluid flow to the punch hammer on engagement of the punch with a steel.

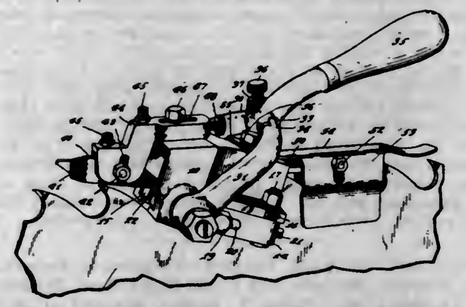
1,680,253. FORGING MACHINE. HALBERT B. HALVORSEN, Michigan City, Ind., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Sept. 29, 1925. Serial No. 59,346. 13 Claims. (Cl. 76—5.)

13. A forging machine comprising a reciprocable die, an element having slots of different sizes to receive different sized blanks, and movable laterally of the path of movement of said die to bring said slots into operative relation with said die, means for preventing lateral movement of said supporting means including a plurality of slots



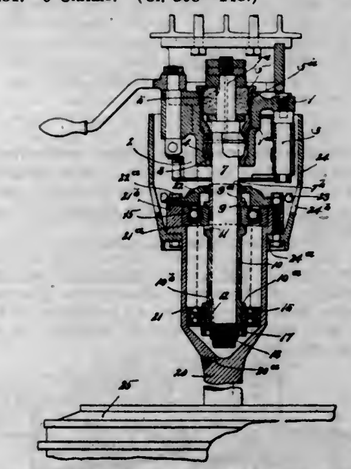
formed therein and a longitudinally movable member insertible therein, and feeding means for said blanks including said longitudinally movable member.

1,680,254. FORGING MACHINE. SVEN T. NELSON, Michigan City, Ind., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Dec. 19, 1925. Serial No. 76,538. 10 Claims. (Cl. 76—5.)



1. A drill steel punch comprising the combination of a motor, anvil mechanism disposed at one end of said motor having a plurality of anvil surfaces, a hole forming tool associated with said anvil mechanism, and means actuated by said motor and movable between said anvil surfaces for imparting to the latter blows to drive the tool in opposite directions.

1,680,255. WATER TRAP FOR GAS WELLS. EDWIN L. POSTON, Lansing, Kans., assignor of one-half to Daniel E. Alexander, Lansing, Kans. Filed Dec. 13, 1926. Serial No. 154,640. 2 Claims. (Cl. 183—2.7.)

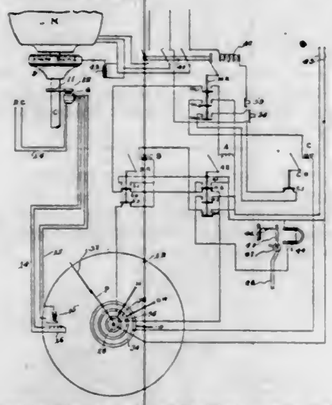


1. A water trap construction for gas well apparatus comprising a casing closed at its upper end and having its lower end portion in communication with the discharge outlet from the well, a gas outlet communicating with said casing at some distance above said well discharge outlet, and a transverse baffle member having one margin thereof secured to the interior wall of said casing at one side thereof and projecting in upwardly inclined relation across the interior of the casing, said baffle member having an approximately central opening in line with said well discharge outlet to permit the gas discharge therefrom to impinge against the closed end of the casing, the upper margin of said baffle member being spaced from the wall of the casing at a slight distance above said gas discharge outlet.

1,680,256. SWAGE SHAPER. JOHN F. PRIBNOW, Indianapolis, Ind., assignor to E. C. Atkins & Company, Indianapolis, Ind., a Corporation of Indiana. Filed July 31, 1924. Serial No. 729,214. 13 Claims. (Cl. 76—54.)

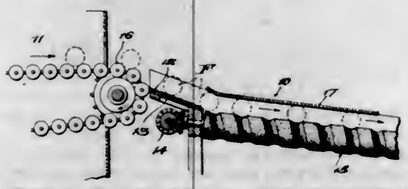
12. In a saw shaper, the combination of a shaper body, a pair of shaper jaws mounted therein and movable relatively to each other, a stop-support mounted on said shaper body and having depending flanges, a tooth-stop mounted between said flanges, a transverse clamping screw for clamping said tooth-stop between said flanges, and adjusting screws acting on said tooth-stop on opposite sides of said transverse clamping screw, said flanges having slots which receive said clamping screw and are transverse to the plane in which said shaper jaws are relatively movable.

1,680,257. GYRATORY CENTRIFUGAL. EUGENE ROBERTS, Salt Lake City, Utah, assignor to The Western States Machine Company, Salt Lake City, Utah, a Corporation of Utah. Filed May 9, 1925. Serial No. 29,231. 6 Claims. (Cl. 308—143.)



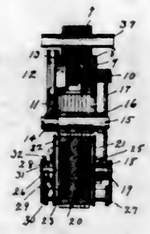
4. The combination of a gyratory spindle suspended from a universal joint, upper and lower anti-friction radial bearing elements mounted on said spindle to permit their withdrawal from the lower end of said spindle, a basket shaft provided at its upper end with an enlarged hollow extension forming an oil and bearing chamber surrounding said bearings, and a cover detachably secured to said chamber arranged to transmit the load thrust to one of said bearings and permit direct access to both bearings by the withdrawal of the shaft.

1,680,258. PROCESS OF GENERATING OR GRINDING GEAR TEETH. CHARLES H. SCHURR, Cleveland, Ohio. Filed June 21, 1923. Serial No. 646,922. 9 Claims. (Cl. 90—1.)



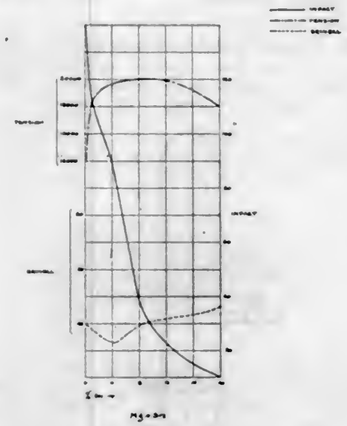
1. The method of generating the involute teeth of a gear or gear blank of known base circle diameter to have a preselected pressure angle, by engagement with a tool having a working face of different pressure angle, which consists first, of so positioning the gear or blank relatively to the tool face that a tangent to the base circle intersects the tool face perpendicularly at the same point at which the tangent meets a line drawn from the center of the base circle in the plane of the tangent at an angle with the tangent of 90 degrees minus the tool pressure angle; and second, of rolling the gear or blank in engagement with the tool on a circle whose radius is the line from the said center to said point of intersection.

1,680,259. CONTROL SYSTEM. GUILFORD L. SPENCER, Tinguaro, Matanzas, and VIRGIL E. METCALFE, Delicias, Oriente, Cuba; Emma F. Spencer, executrix of said Guilford L. Spencer, deceased, assignor to Emma F. Spencer. Filed Oct. 22, 1924. Serial No. 745,241. 12 Claims. (Cl. 172—239.)



1. In combination, a rotary machine, energy responsive means for controlling the operation of said machine, and means for furnishing energy to said energy responsive means in proportion to the energy developed by said rotary machine.

1,680,260. FRUIT-TREATING APPARATUS. ERNEST M. BROGDEX, Winter Haven, Fla., assignor to Brogdex Company, Winter Haven, Fla., a Corporation of Florida. Filed Nov. 26, 1921. Serial No. 518,033. 8 Claims. (Cl. 91—59.)

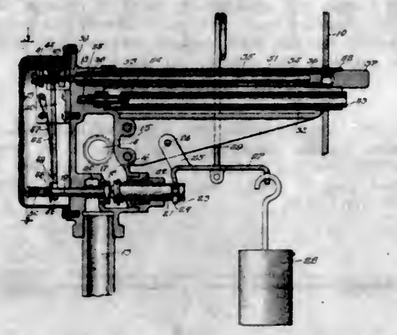


1. Fruit treating apparatus comprising the combination, with fruit brushing or polishing means, and means for feeding fruit thereto, of yielding means for supplying a semi-fluid or pasty composition to the fruit substantially as it is being fed to said brushing and polishing means.

1,680,261. BLAST MAGNETO. ALFRED U. DAVIS, Baltimore, Md., assignor to Davis Instrument Manufacturing Company, Incorporated, a Corporation of Maryland. Filed Nov. 8, 1926. Serial No. 147,097. 1 Claim. (Cl. 171—76.)

A blast magneto comprising a casing, a magnet secured within said casing, binding post at one end of said casing, an armature revolubly mounted in said casing, a contact disk secured to one side of said armature and insulated therefrom and having one end of the armature wire connected thereto, a contact plate in constant contact with said disk and connected with one of said binding posts, a pinion on one end of the armature shaft, a gear in mesh with said pinion, a shaft on which said gear is mounted, a pinion on opposite end of said last mentioned shaft, a sleeve to which the magnet plates are secured, a segment gear mounted in said sleeve and in mesh with the last-mentioned pinion, and having a recess in one side thereof, a pin projecting across said recess of said segment gear and means co-operating with said pin for turning the segment gear and revolving the said armature.

1,680,262. LIGHT METAL ALLOY. JOHN A. GANN, Midland, Mich., assignor to The Dow Chemical Company, Midland, Mich., a Corporation of Michigan. Filed Oct. 27, 1921, Serial No. 510,794. Renewed Aug. 26, 1926. 7 Claims. (Cl. 75—1.)

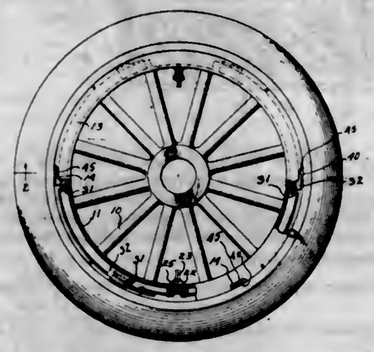


1. As a new product, an alloy containing not less than eighty nor more than ninety-nine and one-half per cent of magnesium, and not more than twenty nor less than one half of one per cent of tin.

1,680,263. PILOT AND BURNER CONTROL APPARATUS. FRANK A. GAUGER, ROY W. JOHNSON, and ARTHUR J. NEUSER, Milwaukee, Wis. Filed May 29, 1925. Serial No. 33,698. 6 Claims. (Cl. 158—99.)

1. In combination with a gas appliance having a casing and main burner therein; a Bunsen burner pilot tube

disposed exteriorly of said casing and having its flame end protruding therethrough adjacent the main burner



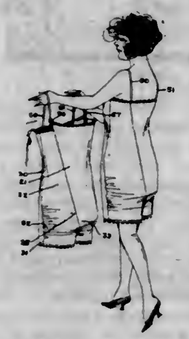
of the gas appliance; and an air connection between the air inlet of the Bunsen burner tube in rear of the flame and the interior of the casing.

1,680,264. PROCESS OF TREATING SOYA BEANS. OTIS JOHNSON, San Francisco, Calif., assignor to I. F. Laucks, Inc., Seattle, Wash., a Corporation of Washington. Filed May 27, 1924. Serial No. 716,214. 2 Claims. (Cl. 99—11.)

1. In the process of obtaining as a base for an adhesive a protein extract from a leguminous seed, the steps of soaking said seed matter in water not exceeding 160° Fahrenheit in temperature; grinding the seeds while in a moist state; adding water not exceeding 160° Fahrenheit in temperature together with an alkali; extracting the juice from the mass; separating the oil from the juice; adding a curding agent to the oil liberated juice; and removing the moisture from the curd, whereby is provided a base for an adhesive.

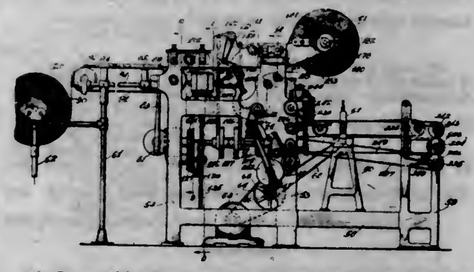
1,680,265. WHEEL. JOSEPH P. LAVIGNE, Detroit, Mich., assignor to Griffith, Lavigne & Hamel Company, Detroit, Mich., a Corporation of Michigan. Filed Oct. 28, 1926. Serial No. 144,714. 2 Claims. (Cl. 301—27.)

2. In a device of the character described a channeled felly, a rack adapted to slide therein, said rack having a slot provided with an abutment at one end, a rim supporting cam block in said slot and a compression spring co-operating with said abutment to tend to force said block toward the opposite end of said slot.



1,680,266. AUTOMATIC FASTENER. JOHN GALAT, Waterbury, Conn. Filed Apr. 26, 1926. Serial No. 104,594. 1 Claim. (Cl. 24—205.)

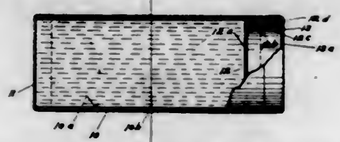
In a fastener for detachably uniting the adjacent edges of a pair of sheets, a row of plug links secured along the edge of one of said sheets, a row of socket links secured along the edge of the other sheet and interlocking with the links of the first row, a runner member for locking and unlocking said rows of links, each of said links having a pair of initially divergent



jaws for embracing one of said sheets and crimped thereon, each of said jaws having a pair of teeth to engage the material of said sheets, one of the teeth of each jaw being offset from another tooth thereof.

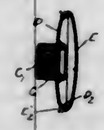
1,680,267. PROCESS OF MAKING UNDERGARMENTS OF INELASTIC MATERIAL. MARY D. NEILSON, Minneapolis, Minn. Filed June 22, 1920, Serial No. 390,731. Renewed Dec. 5, 1927. 3 Claims. (Cl. 2—78.)

1. The process of making undergarments which consists in forming a division along the lower portion of the longitudinal center line of a front part, providing a back part having excess length of material at its central portion extending below the bottom edges of the front part before the lower portion of the back part has been sewed into the garment, said excess length of material having a substantially straight bottom edge double the length of said division, uniting said back part along its side edges to the side edges of said front part, and uniting said bottom edge with the edges of said division with the center of said bottom edge at the meeting point of the edges of said division in the center of the front of the garment, whereby legs are formed with crotch fullness extending directly back from the center of the front of the garment.



1,680,268. ABSORBENT-PAD MACHINE. GEORGE WEISS, Chicago, Ill., assignor, by mesne assignments, to International Cellucotton Products Co., Chicago, Ill., a Corporation of Delaware. Filed Mar. 24, 1920. Serial No. 368,456. 23 Claims. (Cl. 223—15.)

16. In combination, a support, means for engaging a pad of filling material with a sheet of enclosing material and applying same to said support with the side margins of the sheet extending beyond the pad and the end

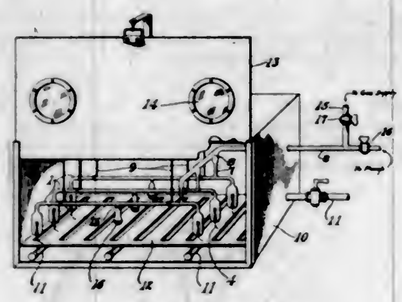


margins of the sheet also extending beyond the pad, a pair of opposed formers mounted on opposite sides of said support, mechanism for moving said formers in opposed directions and towards said pad to constitute in effect extensions of said pad, means for folding the side margins of the sheet over said pad and formers, means for withdrawing said formers subsequent to the folding operation, and means for moving said support to bring another portion thereof into association with said pad engaging means.

1,680,269. LUBRICANT CONTAINER FOR GREASE GUNS. SAMUEL K. WELLMAN, Cleveland Heights, and ALLEN A. GOULD, Cleveland, Ohio. Filed Dec. 18, 1925. Serial No. 76,139. 7 Claims. (Cl. 206—56.)

1. A container for lubricant adapted to cooperate with a discharge nozzle having pump mechanism adapted to suck lubricant from the container and force it out of the nozzle, said container comprising in combination a tubular side wall; a substantially flat end wall adapted to be opened to permit discharge of lubricant; and a second end wall fitting within the side wall and adapted to be moved therethrough like a piston by air pressure to discharge lubricant from the container, said piston-like end wall having a substantially flat front face, a flexible rearwardly turned annular seal portion to engage the side wall and form a substantially air-tight sliding seal therewith and a guide portion to engage the side wall at points distributed around the circumference thereof and substantially spaced lengthwise of the container from the annular seal portion.

1,680,270. KNOBBED NUT. FLOYD D. WENN and BRUCE M. STANNARD, Binghamton, N. Y., assignors to The Brewer-Titchener Corporation, Cortland, N. Y., a Corporation of New York. Filed July 16, 1927. Serial No. 206,194. 2 Claims. (Cl. 85—35.)



2. In a knobbed nut, an internally screw threaded nut body member provided with a tubular extension and a polygonal external surface, a backing disc having an apertured socket formed therein, the aperture being shaped to fit the extension of the nut and the extension being locked into engagement with the margin of the aperture and the base of the socket fitting the polygonal surface of the nut when swaged in place, and a crown plate engaging the periphery of the backing disc.

1,680,271. ARGON-MERCURY DISCHARGE TUBE. RAYMOND ROBERT MACHLETT, New York, N. Y., assignor to Rainbow Light, Inc., a Corporation of New York. Filed July 9, 1927. Serial No. 204,479. 4 Claims. (Cl. 176—122.)

1. An improved luminous tube containing an atmosphere of rarefied argon and mercury vapor, the latter being evolved uniformly from the surface of the glass walls of the tube.

1,680,272. LUMINOUS TUBE AND PROCESS OF MANUFACTURING THE SAME. RAYMOND R. MACHLETT, New York, N. Y., assignor to Rainbow Light, Inc., Long Island City, N. Y., a Corporation of New York. Filed Nov. 17, 1927. Serial No. 233,772. 12 Claims. (Cl. 176—122.)

1. An improved luminous tube, comprising a transparent tubular container having therein a rare gas of the atmosphere under reduced pressure, and interior electrodes within the tube of absobent conducting material having an alkali metal vapor occluded therein, substantially as set forth.

Patents No. 1,680,273 to 1,681,157

THE OFFICIAL GAZETTE OF THE United States Patent Office.

The OFFICIAL GAZETTE is mailed under the direction of the Superintendent of Documents, Government Printing Office, to whom all subscriptions should be made payable and all communications respecting the Gazette should be addressed. Issued weekly. Subscription, $10.00 per annum; including annual indexes, $11.50; single numbers, 25 cents each.
PRINTED COPIES OF PATENTS are furnished by the Patent Office at 10 cents each. For the latter, address the Commissioner of Patents, Washington, D. C.
CIRCULARS OF GENERAL INFORMATION concerning PATENTS or concerning TRADE-MARKS, PRINTS, and LABELS will be sent without cost on request to the Commissioner of Patents, Washington, D. C.

Vol. 373—No. 2. TUESDAY, AUGUST 14, 1928. Price—$10 per year.

New Divisions in the Patent Office.

Order No. 3,067, August 1, 1928, directs that the following new divisions be established:

DIVISION 57. Examiner: G. D. G. Nicolson.
Rooms 257, 274, 276, and 278 in Annex.

Class.
10. Bolt, Nail, Nut, Rivet, and Screw Making, from Division 13.
59. Chain, Staple, and Horseshoe Making, from Division 13.
63. Jewelry, from Division 5.
85. Driven, Headed and Screw-threaded Fastenings, from Division 13.
151. Nut and Bolt Locks, from Division 17.
164. Cutting and Punching Sheets and Bars, from Division 11.

DIVISION 58. Examiner: E. F. Dowell.
Rooms 268, 268, 270, and 272 in Annex.

Class.
51. Abrading, from Division 29.
197. Typewriting Machines, from Division 30.

DIVISION 59. Examiner: V. I. Richard.
Rooms 315, 317, 319, Patent Office Building.

Class.
23. Chemistry, from Division 6.
44. Fuel and Igniting Devices, from Division 49.
71. Fertilizers, from Division 25.
87. Oils, Fats and Glue, from Division 31.
149. Hides, Skins and Leather, from Division 11.
195. Alcohol, from Division 31.
222. Hydraulic Cement and Lime, from Division 31.

DIVISION 60. Examiner: R. L. Glass.
Rooms 209, 211, 213, 215, and 217 in Annex.

Class.
136. Batteries, from Division 16.
201. Resistances and Rheostats, from Division 16.
219. Electric Heating, from Division 8.
247. Electrical Conduits and Housings, from Division 42.
290. Prime-mover Dynamo Plants, from Division 26.

DIVISION 61. Examiner: G. E. Parks.
Rooms 267 and 269, Patent Office Building.

Class.
58. Horology, from Division 28.
161. Time Controlling Mechanism, from Division 28.
187. Elevators, from Division 47.
208. Velocipedes, from Division 49.
227. Fire-escapes, from Division 52.
228. Ladders, from Division 52.
242. Winding and Reeling, from Division 21.
254. Pushing and Pulling Implements, from Division 4.
258. Railway Mail Delivery, from Division 52.
304. Scaffolds, from Division 52.

DIVISION 62. Examiner: W. W. Cochran.
Rooms 245, 247, 249, 251 and 253 in Annex.

Class.
43. Fishing, Trapping, and Vermin Destroying, from Division 38.
45. Furniture, from Division 8.
46. Toys, from Division 7.
190. Baggage, from Division 40.
224. Package and Article Carriers, from Division 40.
272. Amusement and Exercising Devices, from Division 7.
273. Amusement Devices, Games, from Division 22.

The transfer of the following classes is hereby directed to take effect August 1, 1928:

Class.
7. Compound Tools, from Division 14 to Division 29.
8. Bleaching and Dyeing, from Division 25 to Division 6.
52. Explosive, Pyrotechnic, and Match Compositions, from Division 25 to Division 6.
61. Hydraulic and Earth Engineering, from Division 83 to Division 38.
81. Tools, from Division 14 to Division 29.
127. Sugar, Starch and Carbohydrates, from Division 25 to Division 6.
213. Railway Draft Appliances, from Division 48 to Division 41.
267. Spring Devices, from Division 47 to Division 45.

Examiner S. T. Bowen is assigned in charge of Division 58.

Examiner L. W. Worrell is assigned in charge of Division 14.

Condition of Applications Under Examination at Close of Business August 3, 1928.

(Total number of applications awaiting action, excluding Trade-Mark Division, 110,964; Trade-Mark Division, 1,897. Oldest new case, Oct. 4, 1927; oldest amended, Oct. 8, 1927. The dates given are 1927 except where † indicates 1928.)

Room No.	Divisions, Examiners, and Subjects of Inventions.	Oldest new application and oldest action by applicant awaiting office action. New.	Amended.	No. of application awaiting action.
112	1. LOEFFLER, F. A., Closure Operators; Fences; Gates; Tillage, Scattering Unloaders; Handling and Hoist Line Implements.	Dec. 24	†Jan 3	1,512
126	2. HADEN, C. F., Bee Culture; Dairy; Preserving; Presses; Tobacco	Jan. 9	†Jan. 10	1,613
331	3. LINDSEY, A., Heating; Metal Founding; Metallurgy; Metal Treatment	Nov. 21	Dec 27	1,573
234	4. MERRITT, A. D., Conveyers; Hoists; Handling Apparatus; Excavating	Oct. 10	Oct. 19	1,707
109*	5. MACNAB, J. F., Harvesters; Music; Acoustics; Sound Recording; Knotters	Oct. 10	Nov. 2	1,577
318	6. LEWERS, A. M., Carbon Chemistry; Dyeing; Explosives; Sugar and Starch	Dec. 6	Dec. 1	2,528
108	7. JARBOE, C. O., Optics; Photography	Nov. 2	Nov. 3	1,975
133	8. HENRY, C. C., Beds; Chairs; Kitchen and Table Articles; Racks and Cabinets	Nov. 14	Dec. 6	2,464
221	9. ADAMS, R. E., Pumps; Fluid and Fluid-Current Motors	†Feb. 20	†Feb. 20	1,629
118	10. HUNTER, O. F., Land Vehicles—Animal Draft Appliances, Bodies and Tops	Nov. 21	Dec. 9	1,869
148*	11. ARMSTRONG, H. C., Boots, Shoes, and Leggings; Button, Eyelet, and Rivet Setting; Harness; Leather Manufactures; Nailing and Stapling; Whip Apparatus.	†Jan. 24	†Jan. 19	1,018
380	12. PIERCE, P. P., Machine Elements	Nov. 2	Nov. 23	2,108
154*	13. CLIFT, J. W., Gear Cutting, Milling, and Planing; Metal Drawing; Metal Forging and Welding; Metal Rolling; Metal Working; Needle and Pin Making; Turning; Boring and Drilling.	Dec. 5	Nov. 21	1,280
102*	14. BRUMBAUGH, N. J., Farriery; Metal Bending; Metal Tools and Implements, Making; Sheet-Metal Ware, Making; Wire Fabrics; Wire Working; Metal Working, Assembling, and Blanks and Processes.	Nov. 2	Nov. 4	1,282
329	15. REDROW, W. L., Glass; Plastic Block and Earthenware Apparatus; Plastics	Dec. 1	Dec. 16	2,302
242*	16. SPENCER, C. J., Telegraphy; Telephony	Nov. 19	Dec. 5	1,139
307	17. RAFTER, G. S., Label Pasting and Paper Hanging; Ornamentation; Paper Manufactures; Printing; Type Casting; Sheet-Material Associating or Folding; Sheet or Web Feeding; Type Setting.	Nov. 30	Dec. 17	1,412
229	18. PORTER, M. E., Motors, Expansible-Chamber Type; Power Plants; Speed-Responsive Devices	Dec. 2	Dec. 13	1,891
246	19. GLASCOCK, E. S., Furnaces; Heating Systems; Liquid and Gaseous Fuel Burners; Stoves and Furnaces.	Dec. 8	Dec. 14	1,839
179	20. GROVE, S. D., Miscellaneous Hardware; Closure Fasteners; Locks and Latches; Safes; Undertaking	†Feb. 18	†Mar. 3	1,504
212	21. THURBER, W. L., Textiles; Cloth Finishing	Oct. 28	Dec. 14	1,107
244*	22. COLWELL, J. H., Aeronautics; Firearms, Ordnance, and Explosive Devices; Air Guns, Catapults, and Targets; Boats and Buoys; Ships; Marine Propulsion.	Nov. 14	Dec. 6	1,613
217	23. GROESBECK, W. D., Coin Handling; Recorders; Registers	Oct. 6	Oct. 27	1,136
147*	24. DURAS, C. O., Apparel; Apparel Apparatus; Garment Supporters; Sewing Machines	Oct. 6	Oct. 8	1,520
202*	25. LIGHTFOOT, J. H., Agitating; Butchering; Classifying Solids; Centrifugal-Bowl Separators; Milk; Threshing; Vegetable and Meat Cutters and Comminutors.	†Jan. 5	†Jan. 10	1,726
228*	26. RODGERS, J. S., Electricity, Generation; Motive Power	Nov. 10	Nov. 4	1,212
214	27. ANDERSON, L. S., Brush, Broom, and Mop Making; Brushing, Scrubbing, and General Cleaning; Laundry; Washing Apparatus.	†Jan. 14	†Jan. 9	1,377
225	28. BENSON, A. R., Internal-Combustion Engines	Nov. 14	Nov. 16	2,094
160*	29. MORRIS, B. N., Woodworking; Tools; Compound Tools	Dec. 14	Dec. 2	1,212
248	30. SHIPMAN, J. L., Automatic Temperature and Humidity Regulation; Illuminating Burners; Illumination; Thermostats and Humidostats.	Dec. 1	†Jan. 20	1,496
312	31. HOLMES, W. N., Ammonia, Water, and Wood Distillation; Charcoal and Coke; Gas, Heating and Illuminating; Mineral Oils.	Dec. 2	Dec. 3	2,774
249	32. BARTHOLOMEW, J. A., Gas and Liquid Contact Apparatus; Heat Exchange; Gas Separation	Nov. 9	Nov. 7	2,276
152	33. WYMAN, W. I., Bridges; Masonry and Concrete Structures; Metallic Building Structures; Roads and Pavements; Roofs; Wooden Buildings.	†Feb. 27	†Feb. 29	2,201
304	34. SIMPSON, G. R., Electricity-Transmission to Vehicles; Pneumatic Dispatch; Railways, Rolling Stock, Switches, and Signals; Store Service; Vehicle Fenders.	Oct. 13	Nov. 2	1,515
116*	35. REYNOLDS, E. C., Buckles, Buttons, Clasps, Etc.; Card and Sign Exhibiting; Signals; Toilet	†Feb. 13	†Feb. 17	1,693
105	36. MORTON, G. L., Automatic Weighers; Geometrical and Measuring Instruments; Force Measuring	†Jan. 24	†Jan. 20	1,925
224*	37. WEAVER, M. E., Electricity, Circuit Makers and Breakers	Nov. 2	Dec. 21	2,152
145	38. KRAFFT, C. F., Animal Husbandry; Earth Boring; Hydraulic and Earth Engineering; Mining, Quarrying, and Ice Harvesting; Stoneworking; Wells.	†Jan. 3	†Jan. 16	1,890
220	39. COWLES, A. W., Fluid-Pressure Regulators; Multiple Valves; Valves; Water Distribution	Oct. 4	Nov. 1	1,833
262*	40. OBERLIN, J. J., Bottles and Jars; Receptacles	Oct. 21	Dec. 5	2,782
125	41. BROWN, J. L., Land Vehicles, Wheels, and Axles; Resilient Tires and Wheels; Wheel Substitutes; Railway Draft Appliances.	Dec. 22	†Jan. 4	1,470
223*	42. CUTTING, H. O., Electric Signaling	Nov. 25	Dec. 12	2,047
124*	43. HOPKINS, F. M., Baths, Closets, Sinks, and Spittoons; Sewerage; Electricity, Medical and Surgical; Medicines; Surgery; Dentistry; Artificial Body Members.	Dec. 10	†Jan. 25	2,108
283	44. SHAFFER, C. H., Dispensing; Filling and Closing Portable Receptacles; Refrigeration	Nov. 12	Nov. 23	2,162
376	45. GILES, A. H., Pulleys and Shafting; Lubrication; Bearings and Guides; Spring Devices	Nov. 1	Nov. 1	2,439
233	46. WOLCOTT, C. L., Concentrating Evaporators; Fluid Sprinkling, Spraying, and Diffusing; Fire Extinguishers; Liquid Heaters and Vaporizers.	Oct. 14	Oct. 15	1,872
264	47. BARKER, H., Clutches and Power Stops; Brakes and Motors	Nov. 26	Dec. 8	2,013
212*	48. HOEPKE, O. B., Electricity, General Applications	Dec. 15	Dec. 10	1,535
230	49. EDINBURG, F. P., Check-Controlled Apparatus; Domestic Cooking Vessels; Ventilation; Driers; Liquid Separation or Purification.	Nov. 11	†Jan. 7	1,577
322	50. BLAKE, C. L., Plastic and Liquid Coating Compositions; Coating	Dec. 22	Dec. 24	2,547
240*	51. BACKUS, C. D., Radiant Energy, Wave Transmission	Dec. 2	Dec. 1	2,251
144	52. MORGAN, E. T., Supports; Chucks; Joint Packing; Pipe and Rod Joints or Couplings; Tool-Handle Fastenings.	Dec. 27	Dec. 28	2,156
201*	53. PECK, M. K., Books; Manifolding; Printed Matter; Stationery, Educational Appliances; Paper Files and Binders; Tents, Canopies, Umbrellas, and Canes; Curtains, Shades, and Screens.	Dec. 6	Dec. 5	1,785
341	54. LANE, C. H., Electric Lamps; Conductors; Vapor Electric Devices; Space Discharge Tubes	Nov. 22	Nov. 22	2,388
102	55. BOWEN, S. T., {Bread, Pastry, and Confection Making; Cutlery / Design	Nov. 10 / †June 18	Nov. 10 / †June 26	946 / 787
309	56. PORTER, F. J., Electrochemistry; Laminated Fabrics; Paper Making; Substance Preparation	Oct. 5	Oct. 21	2,544

DECISIONS IN PATENT AND TRADE-MARK CASES.

Court of Appeals of the District of Columbia.

GOLDRICK *v.* SCHROEDER.

No. 2,999. Decided March 5, 1928.

INTERFERENCE—PRIORITY—RIGHT TO MAKE THE CLAIMS.

Priority *Held* properly awarded to S. on the ground that the invention in issue is not disclosed in the application of G.

APPEAL from the Commissioner of Patents. Affirmed.

Mr. Donald A. Gardiner for Goldrick.

Mr. J. H. Milans and *Mr. C. T. Milans* for Schroeder.

Before MARTIN, Chief Justice, VAN ORSDEL, Justice, and SMITH, Judge U. S. Court of Customs Appeals.

MARTIN, *C. J.*:

An appeal in an interference proceeding. The invention in question relates to certain improvements in load-securing means for industrial trucks. The interference was declared between a reissue application filed by Goldrick upon a patent issued to him on December 19, 1922, and a patent issued to Schroeder on March 4, 1924. The issue, taken from claim 1 of the Schroeder patent, reads as follows, to wit:

> An attachment for a wheeled conveyor having elevating means, comprising a pivotally supported load supporting arm, means for connecting said arm with the elevator or conveyor, load clamping means over said arm, and means whereby the weight of the load on said arm will operate automatically to effect clamping of the load when the elevator is raised.

It is explained that—

> The appliance in both the Goldrick application and in the Schroeder patent are disclosed as overhanging the end of an industrial truck whereby the lower parts of the appliances, by proper maneuvering of the trucks, may be inserted under the load to engage the bottom of the load and raise it while permitting the operators to remain on the trucks to maneuver the trucks into engageable position relative to the load.

The controlling question in the case is whether there is a common invention embodied in the Schroeder structure and the Goldrick structure "in the terms of the count."

No testimony was taken by either party. A motion to dissolve the interference was filed by Schroeder, the junior party, on the ground that Goldrick had no right to make the claim constituting the issue, in view of his original disclosure. This motion was overruled, and the Examiner of Interferences thereupon awarded priority to Goldrick, the senior party. This decision was affirmed by the Examiners in Chief. But upon appeal the Commissioner of Patents held that Goldrick had no right to make the claim constituting the count of the issue. The Commissioner accordingly reversed the decision of the Examiners in Chief and awarded priority to Schroeder. This appeal followed.

In our opinion the decision of the Commissioner of Patents is right. As stated by the Commissioner when describing the constructions of the parts,

> it is difficult to discover any common inventive subject matter or how a knowledge of Goldrick's device could, in any way, aid in devising the construction of Schroeder.

It is plain, among other things, that Goldrick's construction does not conform to the requirement that—

> the weight of the load on said arm will operate automatically to effect clamping of the load when the elevator is raised.

In Schroeder's construction when the elevator is raised the clamping of the load is effected automatically by force of the weight of the load itself, operating by means of connecting levers as described in Schroeder's patent, whereas in Goldrick's construction this result does not automatically follow the elevation of the load, but is manually accomplished by the pulling of a cable by the operator before the load is actually lifted.

The decision of the Commissioner of Patents is affirmed.

International Convention Adhesion—Spanish Zone of Morocco.

This Office has been notified by the Secretary of State of the receipt of a notice from the Swiss Legation that the Spanish Government has adhered, for the Spanish Zone of Morocco, to the Convention of the Union for the Protection of Industrial Property as revised at The Hague on November 6, 1925, the adhesion to take effect July 27, 1928.

THOMAS E. ROBERTSON,
Commissioner of Patents.

Adverse Decisions in Interference.

In interferences involving the indicated claims of the following patents final decisions have been rendered that the respective patentees were not the first inventors with respect to the claims listed:

Pat. 1,524,060, J. T. Stoney, Hook mechanism, decided January 30, 1928, claim 3.

Pat. 1,558,762, A. Fabrizio, Torpedo, decided June 7, 1928, claims 1 and 2.

Pat. 1,614,561, A. A. Kramer, Tank, decided July 23, 1928, claim 8.

Pat. 1,646,925, E. E. Minard, Feed collet, decided July 2, 1928, claims 5 and 6.

Pat. 1,651,168, H. N. Vickerman, Filler cap for storage tank, decided July 2, 1928, claims 1 and 2.

Pat. 1,662,262, C. C. Gates, Antiskid device, decided June 22, 1928, claim 1.

Final decisions in interference have been rendered against the following trade-marks:

T. M. 89,625, Lubricating oil, J. C. Cochran, New York, N. Y. Registered December 31, 1912. Decided July 2, 1928.

T. M. 94,778, Grass, vegetable, flower, and farm seeds and bulbs, Weeber & Don, New York, N. Y. Registered December 30, 1913. Decided July 2, 1928.

T. M. 196,482, Player pianos, E. W. Warren, doing business as Antistone Player Company, Melbourne, Victoria, Australia. Registered March 17, 1925. Decided June 21, 1928.

T. M. 201,344, Fresh vegetables, fresh grapes, fresh cantaloupes. Lee & Hickcox, El Centro, Calif. Registered July 21, 1925. Decided June 25, 1928.

T. M. 214,124, Cheese, J. S. Hoffman Company, Chicago, Ill. Registered June 15, 1926. Decided July 6, 1928.

Patents—Reissues.

[PUBLIC No. 501, 70TH CONGRESS.]

[S. 2823.]

An Act amending the statutes of the United States with respect to reissue of defective patents.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 4916 of the Revised Statutes of the United States be, and the same is hereby, amended to read as follows:

"SEC. 4916. Whenever any patent is wholly or partly inoperative or invalid, by reason of a defective or insufficient specification, or by reason of the patentee claiming as his own invention or discovery more than he had a right to claim as new, if the error has arisen by inadvertence, accident, or mistake, and without any fraudulent or deceptive intention, the commissioner shall, on the surrender of such patent and the payment of the duty required by law, cause a patent for the same invention, and in accordance with the corrected specification, to be reissued to the patentee or to his assigns or legal representatives, for the unexpired part of the term of the original patent. Such surrender shall take effect upon the issue of the reissued patent, but in so far as the claims of the original and reissued patents are identical, such surrender shall not affect any action then pending nor abate any cause of action then existing, and the reissued patent to the extent that its claims are identical with the original patent shall constitute a continuation thereof and have effect continuously from the date of the original patent. The commissioner may, in his discretion, cause several patents to be issued for distinct and separate parts of the thing patented, upon demand of the applicant, and upon payment of the required fee for a reissue for each of such reissued letters patent. The specifications and claims in every such case shall be subject to revision and restriction in the same manner as original applications are. Every patent so reissued, together with the corrected specifications, shall have the same effect and operation in law, on the trial of all actions for causes thereafter arising, as if the same had been originally filed in such corrected form; but no new matter shall be introduced into the specification, nor in case of a machine patent shall the model or drawings be amended, except each by the other; but when there is neither model nor drawing, amendments may be made upon proof satisfactory to the commissioner that such new matter or amendment was a part of the original invention, and was omitted from the specification by inadvertence, accident, or mistake, as aforesaid."

Approved May 24, 1928.

Patent Suits.

[Notices under sec. 4921, R. S., as amended Feb. 18, 1922.]

968,576, C. R. Libby, Pneumatic-dispatch-tube apparatus, D. C., S. D. N. Y., Doc. E 29/104, *The Lamson Co.* v. *G. & G. Atlas Systems, Inc.* Dismissed May 25, 1928.

Adjudicated Patents.

(C. C. A. Mass.) The Barney patent, No. 885,135, for improvement in separable cuff buttons, *Held* not infringed. *Lyons* v. *Beer & Wilde Co.*, 26 F. (2d) 599.

(C. C. A. Tenn.) The Fitch patent, No. 1,011,598, for fireplace damper, claims 1 and 4 *Held* invalid. *Peerless Mfg. Co.* v. *Chattanooga Foundry & Roofing Co.*, 26 F. (2d) 667.

(C. C. A. Ind.) The Moomy patent, No. 1,068,691, for patch for rubber articles, *Held* invalid. *Moomy* v. *G. & J. Tire Co.*, 26 F. (2d) 589.

(C. C. A. Mont.) The Carson patent, No. 1,149,495, for smelting furnace, *Held* valid and infringed. *Carson Investment Co.* v. *Anaconda Copper Mining Co.*, 26 F. (2d) 651.

(C. C. A. Mont.) The Carson patent, No. 1,302,807, for smelting furnace, *Held* valid and infringed. *Id.*

(D. C. N. Y.) The Gullborg patent, No. 1,307,733, for grease-gun fittings and nipples, *Held* valid and infringed. *Bassick Mfg. Co.* v. *Adams Grease Gun Corporation*, 26 F. (2d) 722.

(D. C. N. Y.) The Gullborg patent, No. 1,307,734, for pin fitting and coupling for grease pump, claims 14 and 15 *Held* not infringed. *Bassick Mfg. Co.* v. *C. P. Rogers & Co.*, 26 F. (2d) 724.

(D. C. N. Y.) The Gullborg patent, No. 1,307,734, for grease-gun fittings and nipples, all claims except claim 12 *Held* valid and infringed. *Bassick Mfg. Co.* v. *Adams Grease Gun Corporation*, 26 F. (2d) 722.

(D. C. Mont.) The Perkins patent, No. 1,364,304, for concentration of minerals by flotation, claims 1–4 *Held* invalid for insufficient description, but, if valid, not infringed. *Metals Recovery Co.* v. *Anaconda Copper Mining Co.*, 26 F. (2d) 736.

(D. C. Md.) The Troll patent, No. 1,458,920, for platform scale for weighing vehicles on road, claims 2 and 15 *Held* not infringed and claim 5 *Held* invalid. *Black & Decker Mfg. Co.* v. *Baltimore Truck Tire Service Corporation*, 26 F. (2d) 686.

(D. C. N. Y.) The Zerk patent, No. 1,475,980, for construction of nozzle and nipple in grease pump, claims 2, 3, and 5 *Held* not infringed. *Bassick Mfg. Co.* v. *C. P. Rogers & Co.*, 26 F. (2d) 724.

(D. C. N. Y.) The Zerk patent, No. 1,475,980, for grease-gun fittings and nipples, *Held* valid and infringed. *Bassick Mfg. Co.* v. *Adams Grease Gun Corporation*, 26 F. (2d) 722.

(C. C. A. Ill.) The Heisel patent, No. 1,486,746, for power press, *Held* not infringed. *Cincinnati Galvanizing Co.* v. *Marquette Tool & Mfg. Co.*, 26 F. (2d) 593.

Changes in Classification.

Order No. 3,068, August 1, 1928, directs:

In *class 167, Medicines* (Division 43), abolish the following subclass, the patents formerly contained therein having been placed for the most part in the new subclasses, established in this order:

6 Insecticides.

In *class 167, Medicines* (Division 43), establish the following subclasses, the patents contained therein having been taken for the most part from class 167, Medicines, subclass 6, Insecticides, abolished in this order, and subclasses 3, Disinfectants, and 12, Disinfectants, Candles and holders:

13 Poisons
Insecticides, fungicides, germicides, and disinfectants
14 Inorganic
15 Arsenic,
16 Copper,
17 Halogen compounds,
18 Hypochlorites,
19 Mercury,
20 Sulphur
21 Lime-sulphur,
22 Organic
23 Carbon disulphide,
24 Plant extracts and powders
25 Essential oils,
26 Formaldehyde,
27 Oils and waxes
28 Mineral oils,
29 Tars,
30 Carbo-cyclic compounds
31 Phenolic,
32 Naphthalene,
33 Hetero-cyclic compounds
34 Nicotine,
35 Cyanogen compounds,
36 Animal dips and sprays.
37 Mothproofing,
38 Seed disinfecting,
39 Fumigants
40 Combustible
41 Candles,
42 Suspending agents, adhesives and spreaders,
43 Oil emulsions,
44 Neutralizing compositions,
45 Herbicides,
46 Rodenticides,
47 Warfare gases,
48 Baits.
49 Limes.

In *class 167, Medicines* (Division 43), change the title of subclass 8, Disinfectants, to read *Disinfecting apparatus*, and subclass 12, Disinfectants, Candles and holders, to read *Disinfecting apparatus, Candle holders.*

Trade-Marks Canceled.

27,401. Koji, moyashi, diastase, ferments of yeast, and converting agents. Jokichi Takamine, Chicago, Ill. Registered December 3, 1895. Canceled July 28, 1928.

59,212. Koji, moyashi diastase, ferments, and converting agents. Jokichi Takamine, New York, N. Y. Registered January 1, 1907. Canceled July 28, 1928.

122,980. Certain named chemicals. Newport Chemical Works, Incorporated, Portland, Me., and Milwaukee, Wis. Registered October 1, 1918. Canceled July 28, 1928.

125,045. Certain named undergarments. David L. Fine, Boston, Mass. Registered April 8, 1919. Canceled July 28, 1928.

131,301. Wrenches and socket-wrench sets. Lee Drulard, Detroit, Mich. Registered May 11, 1920. Canceled July 28, 1928.

144,473. Mattresses and pillows. Albert H. Slater, Paterson, N. J. Registered July 5, 1921. Canceled July 28, 1928.

150,556. Auto porch beds. The Schaefer Tent & Awning Co., Denver, Colo. Registered January 3, 1922. Canceled July 28, 1928.

158,723. Infants' coats. Madeleine Kuster, Ossining, N. Y. Registered September 12, 1922. Canceled July 28, 1928.

166,542. Candies. Betty Lou College Candy Company, Atlanta, Ga. Registered April 10, 1923. Canceled July 28, 1928.

184,065. Soaps. The Sydney Ross Co., Newark, N. J. Registered May 13, 1924. Canceled July 30, 1928.

WM. A. KINNAN,
First Assistant Commissioner.

Disclaimer.

1,673,515.—*Elmer G. Kimmich*, Akron, Ohio. CHAIN-FASTENING DEVICE. Patent dated June 19, 1928. Disclaimer filed July 28, 1928, by the patentee, assignee, *The Goodyear Tire & Rubber Company*, concurring.

Hereby enters this disclaimer to all of the claims in said application which are in the following words, to wit:

"1. A tire chain fastener comprising spaced substantially parallel walls, a tongue pivotally connected between the walls and adapted to lie therebetween when in closed position, and means constituting portions of the walls for yieldingly opposing displacement of the tongue from closed position, the tongue being formed with means to facilitate its movement to closed position.

"2. A tire chain fastener comprising spaced parallel walls provided at their upper edges with inturned portions, a tongue pivotally connected between the walls adjacent one edge of the fastener, said walls having beveled edge portions in alignment with the inturned portions adapted to force the walls apart as the tongue is moved to closed position between the walls.

"3. A tire chain fastener comprising a sheet folded to provide spaced parallel walls formed with reduced portions adjacent one edge of the fastener, a tongue pivotally secured between the walls and adapted to lie therebetween when in closed position, a hooked end constituting a part of the tongue and coacting with the reduced portions of the walls to form link receiving means, and means formed on the walls, for yieldingly opposing displacement of the tongue when in closed position.

"4. A tire chain fastener comprising spaced parallel walls having their upper edges inclined and provided with depressed portions, a tongue pivotally secured between the walls and adapted to lie therebetween when in closed position and means formed on the walls for coaction with the tongue to oppose displacement of the tongue from closed position between the walls."

TRADE-MARKS

OFFICIAL GAZETTE, AUGUST 14, 1928.

[VOL. 373. No. 2.]

The following trade-marks are published in compliance with section 6 of the act of February 20, 1905, as amended March 2, 1907. Notice of opposition must be filed within thirty days of this publication.

Marks applied for " under the ten-year proviso " are registrable under the provision in clause (b) of section 5 of said act as amended February 18, 1911.

As provided by section 1 of said act, a fee of ten dollars must accompany each notice of opposition.

KA·LO·RIC

For Plastic Mixture for Facial and Skin Treatment.
Claims use since Mar. 1, 1928.

Ser. No. 268,552. JACK MARGOLIS, Waterbury, Conn. Filed June 23, 1928.

For Chemical Bleaching Preparation for Laundry and Household Use.
Claims use since Dec. 1, 1926.

Ser. No. 268,623. MULKEY SALT CO., Detroit, Mich. Filed June 25, 1928.

For Salt.
Claims use since about May 18, 1928.

Ser. No. 268,811. QUIX INC., New York, N. Y. Filed June 28, 1928.

QUIX

For Preparation to Stop Runs in Hosiery.
Claims use since May 1, 1928.

CLASS 7.

Cordage.

Ser. No. 268,607. HENRY & ALLEN, Auburn, N. Y. Filed June 25, 1928.

SENTINEL

For Rope, Cord, and Twine.
Claims use since Mar. 19, 1928.

CLASS 8.

Smokers' Articles, Not Including Tobacco Products.

Ser. No. 266,834. SPANG NOVELTY CORPORATION, New York, N. Y. Filed May 22, 1928.

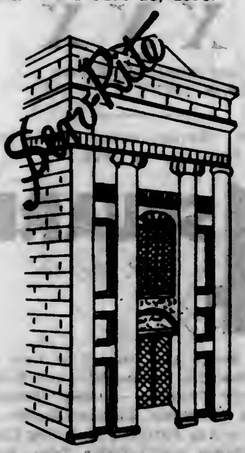
BATHO

For Base-Metal Containers for Cigarettes.
Claims use since about Mar. 15, 1928.

CLASS 10.

Fertilizers.

Ser. No. 269,110. GEORGIA CHEMICAL WORKS, Augusta, Ga. Filed July 5, 1928.



CARDINAL

For Fertilizers.
Claims use since 1905.

CLASS 11.

Inks and Inking Materials.

Ser. No. 268,555. THE NATIONAL BANK SUPPLY CO., Milwaukee, Wis. Filed June 23, 1928.

For Typewriter Ribbons and Carbon Paper.
Claims use since Jan. 2, 1927.

CLASS 12.

Construction Materials.

Ser. No. 252,722. THE MONARCH CEMENT COMPANY, Humboldt, Kans. Filed July 29, 1927.

For Portland Cement.
Claims use since 1909.

Ser. No. 262,389. BITUMULS CORPORATION, San Francisco, Calif. Filed Feb. 29, 1928.

BITUMULS

For All Kinds of Bituminous Compounds and Emulsions Miscible in Water, Used for Road-Making and Roofing Materials.

Claims use since Dec. 1, 1927.

Ser. No. 264,857. WELT & SONS PAPER COMPANY, Detroit, Mich. Filed Apr. 14, 1928.

TRIPLE

XXX

For Building and Insulating Papers.

Claims use Mar. 8, 1927.

Ser. No. 266,409. WEYERHAEUSER FOREST PRODUCTS, St. Paul, Minn. Filed May 14, 1928.

4 SQUARE

For Lumber, Rough and Dressed or Run to Any Pattern—Namely, Sawmill, Planing-Mill, and Sash, Door, and Millwork; Factory Products—Namely, Timbers, Railway Ties, Dimension Materials, Planks, Boards, Rough and Dressed or Run to Any Pattern; Finishing Lumber, Framing Lumber, Exterior and Interior Trim, Beams, Siding and Shakes, Shingles, Mouldings, Lath, Flooring, Sash, Doors, Frames, Posts, Poles, and Piling.

CLASS 13.

Hardware and Plumbing and Steam-Fitting Supplies.

Ser. No. 259,100. BRAKE EQUIPMENT AND SUPPLY COMPANY, Chicago, Ill. Filed Dec. 19, 1927.

For Repair Parts for Air-Brake Equipment—Namely, Bolts, Nuts, Studs, Valve Bushings, Valves, Cotters, Seats, Swivels, Screws, Stems, Valve Springs, Valve Caps, Cocks, Cock Handles, Cock Keys, Cock Caps, Nipples, Couplings, Valve Cages, Valve Caps, Valve Cases, Valve Plates, Keys, Washers, and Plugs.

Claims use since Feb. 1, 1923.

Ser. No. 267,295. THE A. & F. BROWN COMPANY, Elizabethport, N. J. Filed June 1, 1928.

AFB

For Bibs, Bushings, Caps, Steam Square-Head Cocks, Stop and Waste Cocks, Couplings, L's, T's, Gages, Nut Locks for Couplings and Other Parts, Nipples, Plugs, Unions, and Valves, All of Which are Metal Fittings for Metal Pipes and the Like.

Claims use since May 15, 1928.

Ser. No. 269,016. CARR CHAIN WORKS INC., Troy, N. Y. Filed July 3, 1928.

No claim is made to the representation of the article apart from the mark with which it is shown.

For Coil Chain, Crane Chain, Dredge Chain, Stud Chain, Log Chains, Stay Chains, Pole Chains, Stretcher Chains, Machine Chains, Tire Chains, and Other Chains Used in Hardware and Saddlery Lines.

Claims use since on or about Jan. 1, 1925.

CLASS 14.

Metals and Metal Castings and Forgings.

Ser. No. 266,412. AMERICAN SHEET AND TIN PLATE COMPANY, Pittsburgh, Pa. Filed May 15, 1928.

KEYSTONE COPPER STEEL
AMERICAN
SHEET AND TIN PLATE COMPANY
PITTSBURGH
APOLLO BEST BLOOM

No claim is made to the words "Copper Steel" and "Sheet and Tin Plate Company, Pittsburgh" apart from the mark as shown in the drawing.

For Rolled Iron and Steel Sheets and Plates, Copper Bearing Sheets and Plates, Galvanized Sheets and Plates, Tin and Terne Plates.

Claims use since Apr. 27, 1928.

Ser. No. 266,846. AMERICAN NICKELOID COMPANY, Peru, Ill. Filed May 23, 1928.

CHROMALOID

For Chromium-Coated Sheets and Chromium-Coated Rolls of Sheet Metal.

Claims use since May 11, 1928.

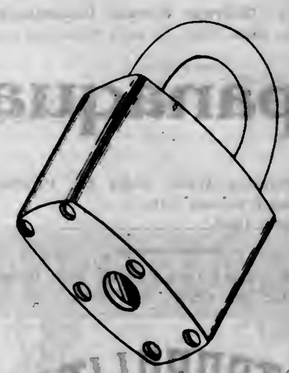
CLASS 15.

Oils and Greases.

Ser. No. 261,933. AMERICAN OIL WORKS CO., Titusville, Pa. Filed Feb. 20, 1928.

For Lubricating Oils and Greases.

Claims use since Feb. 1, 1927.



Ser. No. 265,778. CHICAGO MOTOR OIL COMPANY, Chicago, Ill. Filed May 2, 1928.

RED LOCK

For Lubricating Oils

Claims use since December, 1927.

Ser. No. 265,779. CHICAGO MOTOR OIL COMPANY, Chicago, Ill. Filed May 2, 1928.

For Lubricating Oils.

Claims use since December, 1927.

Ser. No. 266,290. H. F. WILCOX OIL & GAS COMPANY, Tulsa, Okla. Filed May 11, 1928.

The right to exclusive use of the words "Tulsa, Okla." is disclaimed apart from the other features of the mark shown. The lining of the drawing is for shading purposes only.

For Gasoline, Crude Oil, Illuminating Oil, Fuel Oil, and Lubricating Oil.

Claims use since Feb. 22, 1924.

CLASS 16.

Paints and Painters' Materials.

Ser. No. 262,475. JAMES A. MCCAFFERTY & SONS MANUFACTURING COMPANY, INC., also doing business as Roebling Color Works, Brooklyn, N. Y. Filed Mar. 1, 1928.

MACA-LITE

For Ready-Mixed Paints—Namely, Stains and Enamels.
Claims use since 1913.

Ser. No. 263,572. GÜNTHER WAGNER, Hanover, Germany. Filed Mar. 21, 1928.

Japanaqua

For Hand Printing Water Color for Printing from Wood Blocks and Linoleum Cuts.
Claims use since 1913.

Ser. No. 264,033. JOHN LUCAS & CO., INC., Philadelphia, Pa. Filed Mar. 30, 1928.

METROPOLITAN

For Dry, Paste, and Ready-Mixed Paints; Stains, Primers, Paste and Liquid Fillers for Wood, Paint Enamels, White Zinc, White Lead, Varnishes, Japans, and Dry and Fresco Paint and Pigment Colors Used for Mixing and Grinding in Oil or Other Vehicles and for Tinting Calcimines.
Claims use since 1887.

Ser. No. 266,575. BERRY BROTHERS, INCORPORATED, Detroit, Mich. Filed May 18, 1928.

BERRYLOID

For Lacquers, Reducers, Ready-Mixed Paint, and Primers.
Claims use since on or about Aug. 1, 1924.

Ser. No. 266,576. BERRY BROTHERS, INCORPORATED, Detroit, Mich. Filed May 18, 1928.

Berrycraft

For Varnish, Stain, Combination of Varnish and Stain, and Paint Enamel.
Claims use since on or about Oct. 1, 1912.

Ser. No. 267,105. ACME WHITE LEAD & COLOR WORKS, Detroit, Mich. Filed May 28, 1928.

SEAL-TEX

The word "Seal" is disclaimed apart from the mark shown in the drawing.
For Painters' Glass and Flat Finishes; Mixed, Ready-Mixed, Cold-Water, and Paste Paints; Varnishes, Lacquers, Painters' Wall Sizings, and Varnish Lacquers.
Claims use since about July 2, 1925.

Ser. No. 267,859. RINSHED-MASON CO., Detroit, Mich. Filed June 11, 1928.

RIMACO

For Paints, Paint Enamels, Varnishes, and Lacquers in Both Liquid and Paste Forms.
Claims use since January, 1928.

Ser. No. 267,860. RINSHED-MASON CO., Detroit, Mich. Filed June 11, 1928.

R-M

For Paints, Paint Enamels, Varnishes, and Lacquers in Both Liquid and Paste Forms.
Claims use since January, 1925.

Ser. No. 268,913. CAMEL LEAD, COLOR & CHEMICAL PRODUCTS MFG. CORP., Brooklyn, N. Y. Filed June 30, 1928.

For Colors in Oil, White Lead, and Combination White Lead.
Claims use since about Jan. 1, 1928.

CLASS 17.

Tobacco Products.

Ser. No. 268,147. DE NOBILI CIGAR COMPANY, New York, N. Y. Filed June 16, 1928.

No registration rights are claimed for the word "Sigari" apart from the mark shown in the drawing. The drawing is lined for the colors red and green.
For Cigars.
Claims use since Jan. 2, 1915.

Ser. No. 268,361. FEDERAL CIGAR COMPANY, INC., Red Lion, Pa. Filed June 20, 1928.

The drawing is lined to indicate the color red. The portrait shown in the drawing is fanciful.
For Cigars.
Claims use since Jan. 1, 1908.

Ser. No. 268,753. A. SANTAELLA & CO., INC., New York, N. Y. Filed June 27, 1928.

TONY'S TAMPA SPECIALS

No claim is made to the words "Tampa Specials" appearing on the drawing except in the particular arrangement and association shown.
For Cigars.
Claims use since June 15, 1928.

Ser. No. 269,041. STANDARD CIGAR COMPANY, Pittsburgh, Pa. Filed July 3, 1928.

SILVER WINGS

For Cigars.
Claims use since June 15, 1928.

Ser. No. 269,054. THOMAS E. OFIESH, Altoona, Pa. Filed July 3, 1928.

For Cigarettes.
Claims use since June 19, 1928.

CLASS 19.

Vehicles, Not Including Engines.

Ser. No. 240,863. THE KEMITEX PRODUCTS COMPANY, Akron, Ohio. Filed Dec. 2, 1926.

KEMI-SUEDE

No claim is made to the exclusive use of the word "Suede" apart from the mark as shown in the drawings.
For Automobile Sun Curtains and Storm Curtains.
Claims use since Apr. 14, 1925.

Ser. No. 267,420. HUPP MOTOR CAR CORPORATION, Detroit, Mich. Filed June 4, 1928.

The shading shown in the drawing represents the colors red and blue. No claim is made to the exclusive use of the wording shown in the drawing with the exception of the words "Hupp Mark."

For Used Automobiles.

Claims use since about May 23, 1928.

Ser. No. 268,693. HOUDE ENGINEERING CORPORATION, Buffalo, N. Y. Filed June 26, 1928.

HOO-DYE

For Automobile Accessories—Namely, Shock Absorbers.

Claims use since about September, 1920.

Ser. No. 268,694. HOUDE ENGINEERING CORPORATION, Buffalo, N. Y. Filed June 26, 1928.

HOUDAILLE

For Automobile Accessories—Namely, Shock Absorbers.

Claims use since November, 1918.

CLASS 20.

Linoleum and Oiled Cloth.

Ser. No. 266,508. ARMSTRONG CORK COMPANY, Pittsburgh and Lancaster, Pa. Filed May 17, 1928.

ACCOLIN

For Linoleum and Felt-Base Floor Coverings.

Claims use since May 7, 1928.

Ser. No. 269,091. CONGOLEUM-NAIRN, INC., Kearny, N. J. Filed July 5, 1928.

Gold-Seal

For Printed Linoleum, Plain Linoleum, and Cork Carpet.

Claims use since about Apr. 15, 1920.

Ser. No. 269,186. DEUTSCHE LINOLEUM-WERKE A.-G., Bietigheim, Germany. Filed July 6, 1928.

The trade-mark consists of the capital letters "D L" placed above the capital letter "W" on a dark-colored square and a small rectangular spot of the same color as the letters above the letter "L," the square being surrounded by a square line.

For Linoleum and Products Resembling Linoleum.

Claims use since Dec. 20, 1926.

CLASS 21.

Electrical Apparatus, Machines, and Supplies.

Ser. No. 248,874. BRADY MANUFACTURING CO., Detroit, Mich. Filed May 12, 1927.

No claim is made to the word "Lite" and the word "Portable" apart from the mark as shown.

For Portable Electric Lights.

Claims use since Jan. 4, 1927.

Ser. No. 258,634. THE HAMMARLUND MANUFACTURING COMPANY, INC., New York, N. Y. Filed Dec. 8, 1927.

MIDLINE

For Electric Condensers Particularly for Radio Receiver Circuits.

Claims use since about September, 1926.

Ser. No. 259,132. THE PILOT ELECTRIC MANUFACTURING CO. INC., Brooklyn, N. Y. Filed Dec. 19, 1927.

REDI-BLOX

For Audiofrequency and Radiofrequency Amplification and Detector Units for Radio Receiving Apparatus.

Claims use since Aug. 1, 1927.

Ser. No. 260,249. UTAH ELECTRIC RADIO COMPANY, Salt Lake City, Utah. Filed Jan. 17, 1928.

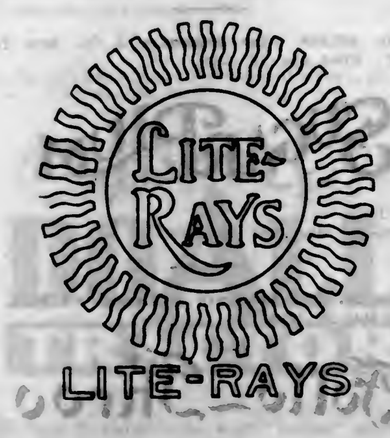
For Radio Receiving Sets and Parts Thereof.

Claims use since Sept. 20, 1927.

Ser. No. 261,602. C. J. ANDERSON & CO., Chicago, Ill. Filed Feb. 13, 1928.

For Electric Controllers for Motors, Automatic Starters and Control Devices for Motors, Electrical Switches, Hatchway Junction Boxes, Brake Magnets, Floor Selectors, Push-Button Stations, and Door Interlocks.

Claims use since 1923.



Ser. No. 263,274. LOCKE INSULATOR CORPORATION, Baltimore, Md. Filed Mar. 16, 1928.

REDHEAD

For Insulator Supporting Pins.

Claims use since Jan. 7, 1928.

Ser. No. 265,668. LITE RAY UTILITIES CORPORATION, also doing business as Lite-Rays Cooker Co., Plainfield, N. J. Filed Apr. 30, 1928.

For Electric Cookers and Bakers.

Claims use since Feb. 10, 1928.

Ser. No. 265,874. DIAMOND ELECTRIC CORPORATION, Newark, N. J. Filed May 4, 1928.

The vertical lines shown in the drawing upon the large diamond figure and also upon the narrow border of the rectangular figure indicate the color red. The dotted lines upon the small diamond figures are intended for shading only.

For Electrical Equipment Comprising Electron Tubes and Flash Lights.

Claims use since Apr. 5, 1928.

Ser. No. 266,910. BASTIAN-MORLEY CO., also doing business as Gas and Electric Heater Co., La Porte, Ind. Filed May 24, 1928.

INVINCIBLE

For Electric Water Heaters.

Claims use since Jan. 12, 1928.

Ser. No. 266,917. THE CUTLER-HAMMER MFG. CO., Milwaukee, Wis. Filed May 24, 1928.

The drawing is lined to indicate the colors orange and blue. No claim is made to the exclusive use of the words "Motor Control, Pioneer Manufacturers of Electric Control Apparatus," and "Milwaukee New York," apart from the mark shown in the drawing.

For Electric Motor Controllers.

Claims use since May 2, 1928.

Ser. No. 267,222. AUTOMATIC SIGNAL CORPORATION, New Haven, Conn. Filed May 31, 1928.

ASCO

For Automatic Electric Traffic-Control Systems.
Claims use since Sept. 1, 1927.

Ser. No. 267,244. CRESCENT INSULATED WIRE & CABLE CO. INC., Trenton, N. J. Filed May 31, 1928.

CRES CORD

Applicant disclaims exclusive use of the word "Cord" apart from the mark shown in the drawing.
For Rubber-Sheathed Portable Electric Cord.
Claims use since about April, 1928.

Ser. No. 267,539. THE CHASE-SHAWMUT COMPANY, Newburyport, Mass. Filed June 6, 1928.

"Awake at the Switch"

For Fuses, Fuse Wire, Fuse Links, Fuse Blocks, and Ground Clamps.
Claims use since Jan. 18, 1928.

Ser. No. 267,595. LEE-O-LECTRIC MFG. CO., INC., Monroe, Mich. Filed June 6, 1928.

"Snap"

For Electric Cigar Lighters.
Claims use since Mar. 17, 1928.

CLASS 22.

Games, Toys, and Sporting Goods.

Ser. No. 250,997. JUNIOR WHEEL GOODS CORPORATION, Kokomo, Ind. Filed June 23, 1927.

JUNIOR WHEEL GOODS CORP. BLUE RIBBON LINE SEAL OF QUALITY BUY THE BEST KOKOMO INDIANA U.S.A.

No claim is made to the exclusive use of the words "Blue Ribbon Line, Buy the Best, Kokomo, Indiana, U. S. A." apart from the mark as shown.
For Scooters, Kiddie Cars, Coaster Wagons, and Wheeled Toys.
Claims use since Aug. 19, 1926.

Ser. No. 263,671. SELCHOW AND RIGHTER CO., Brooklyn, N. Y. Filed Mar. 23, 1928.

IT?

For Card Games.
Claims use since Feb. 28, 1928.

Ser. No. 265,088. GEO. BORGFELDT & CO., New York, N. Y. Filed Apr. 19, 1928.

SUGAR PLUM

For Dolls.
Claims use since Mar. 22, 1928.

Ser. No. 267,131. BENJAMIN O. LANTZ, Oak Park, Ill. Filed May 28, 1928.

Follo-Thro

For Golf Clubs.
Claims use since May 23, 1928.

CLASS 23.

Cutlery, Machinery, and Tools, and Parts Thereof.

Ser. No. 252,847. INTERNATIONALE FEUERLÖSCHER-GESELLSCHAFT MIT BESCHRÄNKTER HAFTUNG, Berlin-Charlottenburg, Germany. Filed Aug. 1, 1927.

Total

For Portable Fire Extinguishers.
Claims use since 1912.

Ser. No. 254,354. MORRIS D. KOPPLE, New York, N. Y. Filed Sept. 3, 1927.

AUTOMACONE

For Automatic Machinery for the Production of Ice-Cream Cones.
Claims use since July 15, 1926.

Ser. No. 263,568. UNIVERSAL ROAD MACHINERY CO., Kingston, N. Y. Filed Mar. 21, 1928.

RELIANCE

For Road-Building and Quarry Equipment—Namely, Bucket Elevators, Belt Conveyors, Revolving Screens, Shaker Screens, Car Underloaders, Pulverizers, Automatic Feeders, Bin Gates, Chip Spreaders, Bar-Type and Revolving Grizzly Screens, and Coal Breakers.
Claims use since Jan. 1, 1920.

Ser. No. 264,001. ADVANCE-RUMELY COMPANY, La Porte, Ind. Filed Mar. 30, 1928.

RUMELY DOALL TRACTOR

No claim is made to the word "Tractor" apart from the association as shown.
For Tractors and Parts Thereof.
Claims use since about Mar. 24, 1928.

Ser. No. 264,048. THE PRESTO SIGNAL COMPANY, San Francisco, Calif. Filed Mar. 30, 1928.

PRESTO

The representation of the hand is disclaimed apart from the mark as shown.
For Mechanical Direction Indicators for Motor Vehicles.
Claims use since Feb. 1, 1928.

Ser. No. 265,956. DEMCO, INCORPORATED, Baltimore, Md. Filed May 5, 1928.

MARDO

For Vises and Spraying Outfits Comprising Air Pumps, Spray Guns, Air Purifiers, and Attachments Necessary to Operation for Domestic and Industrial Uses.
Claims use since Nov. 10, 1927.

Ser. No. 266,832. D. B. SMITH & COMPANY, INC., Utica, N. Y. Filed May 22, 1928.

INDIAN

For Hand and Power Operated Sprayers, Spray Pumps, Pumps, Fire Pumps, Spray Guns, and Air Brushes.
Claims use since on or about May 1, 1925.

Ser. No. 266,931. J. A. HENCKELS, Solingen, Germany. Filed May 24, 1928.

For Knife Letter Openers.
Claims use since 1731.

Ser. No. 267,121. HUDSON MANUFACTURING CO., Minneapolis, Minn. Filed May 28, 1928.

AIR-LINE

For Sprayers and Spraying Attachments for Household and Indus'rial Uses.
Claims use since about May 16, 1928.

Ser. No. 267,336. THE BLACK & DECKER MANUFACTURING CO., Towson, Md. Filed June 2, 1928.

For Electric Drilling Sets Sold as a Unit Comprising the Parts Thereof and the Case Therefor.
Claims use since May 16, 1928.

Ser. No. 267,884. AMERICAN-LAFRANCE AND FOAMITE CORPORATION, Elmira and New York, N. Y. Filed June 12, 1928.

ALFOAM

For Hand-Operated Portable and Stationary Fire-Extinguishing Apparatus and Parts Thereof.
Claims use since on or about Apr. 1, 1928.

Ser. No. 267,893. ANTHONY P. GIUNTA, doing business as Giunta Brothers Mfg. Co., Philadelphia, Pa. Filed June 12, 1928.

PRIMO

For Fruit Presses, Fruit and Cider Crushers, Macaroni Machines, and Kitchen Equipment, Such as Catsup Machines, Meat Grinders, Coffee Roasters, and Coffee Mills.
Claims use since Apr. 1, 1928.

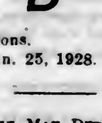
Ser. No. 268,257. ERNEST UFF, Chester, Pa. Filed June 18, 1928.

UFFTITE

For Beam Heads for Textile-Loom Beams.
Claims use since about Apr. 24, 1928.

Ser. No. 268,334. AMERICAN CUPTOR CORPORATION, New York, N. Y. Filed June 20, 1928.

For Machine for Vending Soft Drinks.
Claims use since May 1, 1928.



Ser. No. 268,491. THE DORR COMPANY, New York, N. Y. Filed June 22, 1928.

DETRITOR

For Apparatus for the Treatment of Solids Suspended in Liquids, and More Particularly for the Classification of Suspended Solids and the Removal of Such Solids—Namely, Classifiers, Bowl Classifiers, and Mechanically-Cleaned Grit Chambers.
Claims use since Feb. 21, 1928.

Ser. No. 268,493. FLEXIBLE ENGINEERING CORPORATION, New York, N. Y. Filed June 22, 1928.

DOUBLE-D

For Gears and Pinions.
Claims use since Jan. 25, 1928.

Ser. No. 268,875. THE MAY DEPARTMENT STORES COMPANY, St. Louis, Mo. Filed June 29, 1928.

MAYCO

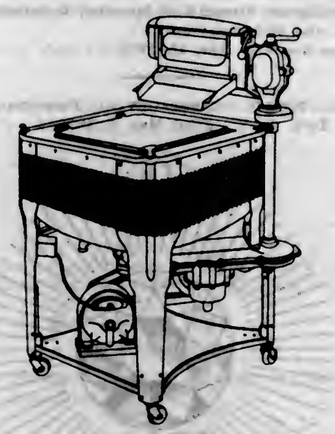
For Razor Blades.
Claims use since Apr. 1, 1928.

Ser. No. 268,966. CHRYSLER CORPORATION, Detroit, Mich. Filed July 2, 1928.

SILVER DOME

For Internal-Combustion Engines.
Claims use since June 15, 1928.

CLASS 24.



Laundry Appliances and Machines.

Ser. No. 269,069. ALTORFER BROS. COMPANY, East Peoria, Ill. Filed July 5, 1928.

The mark consists of a brown band around the body of the tub of the machine as well as around the body of the centrifugal drier. The drawing is lined for brown. No claim is made to the representation of the washing machine and centrifugal drier per se.
For Laundry Washing Machines of the Centrifugal Drier Type.
Claims use since on or about January, 1928.

Ser. No. 269,070. ALTORFER BROS. COMPANY, East Peoria, Ill. Filed July 5, 1928.

No claim is made to the representation of the washing machine per se. The mark consists of a brown band around the body of the tub of the machine. The drawing is lined for brown.
For Laundry Washing Machines of the Wringer Type.
Claims use since on or about January, 1928.

CLASS 25.

Locks and Safes.

Ser. No. 263,835. JOSEPH SPECTOR, New York, N. Y. Filed Mar. 27, 1928.

Applicant disclaims exclusive right to the use of the word "Protection" and the representation of a safe except as the same are used in connection with the other features of the mark shown in the drawing.
For Safes and Metal Filing Cabinets and Closets in the Nature of Safes.
Claims use since Feb. 16, 1928.

Ser. No. 267,961. INTERNATIONAL TIME RECORDING COMPANY OF NEW YORK, Endicott, N. Y. Filed June 18, 1928.

RECORDOLOCK

For Locks Having Provisions for Making a Record upon an Operation of the Lock.
Claims use since about Dec. 29, 1927.

Ser. No. 268,520. THE STANLEY WORKS, New Britain, Conn. Filed June 22, 1928.

The trade-mark consists of a yellow background forming the body of applicant's label and divided by a vertical line into two panels or fields. On the left of the vertical line appears the name "Stanley" in a notched oblong of blue-black color and the letters "S. W." in a heart of the same color, the drawing being lined to indicate such colors. No claim is made to a label per se.
For Window-Sash Fasteners, Latches, Bolts for Doors and Windows, Shutter Bars, and Door Fasteners.
Claims use since Mar. 29, 1928.

CLASS 26.

Measuring and Scientific Appliances.

Ser. No. 237,604. HOUSTON ENGINEERS, Houston, Tex. Filed Sept. 23, 1926.

H·E

For Apparatus for Ascertaining the Quantity and Quality of Fluid in an Earth Stratum in a Well Bore.
Claims use since Feb. 15, 1925.

Ser. No. 259,095. THE ANDERSON COMPANY, Gary, Ind. Filed Dec. 19, 1927.

MOTECTOR

For Devices for Showing and Warning of Abnormal Conditions in Combustion-Engine Cooling Systems.
Claims use since Nov. 12, 1927.

Ser. No. 259,713. THE DEVRY CORPORATION, Chicago, Ill. Filed Jan. 5, 1928.

DeVry Chicago

The word "Chicago" is disclaimed apart from the mark shown in the drawing.
For Moving-Picture Projectors, Cameras, Stereopticons, Screens for Use in Connection with Picture-Projecting Apparatus, Moving-Picture Films (Positive and Negative), and Lenses for Cameras and Picture-Projecting Apparatus.
Claims use since December, 1922.

Ser. No. 266,014. JOHN B. BASKERVILLE, Roanoke, Va., assignor to Impactograph Corporation, Roanoke, Va., a Corporation of Virginia. Filed May 7, 1928.

IMPACTOGRAPH

For Impact Recorders.
Claims use since September, 1927.

Ser. No. 266,057. TOLEDO SCALE COMPANY, Toledo, Ohio. Filed May 7, 1928.

REBUILT and CERTIFIED by TOLEDO SCALE CO. CERTIFIED Toledo, Ohio

The words "Rebuilt" and "Certified" as used in a descriptive sense and the words "Toledo, Ohio" are disclaimed apart from the mark as shown.
For Weighing Scales, Weighing Machines, Weighing Apparatus, Counting Machines, Dynamometers, Balance-Testing Machines, and Instruments for Measuring Tension, Resilience, Strength of Material, Resistance to Distortion, and Moisture Content.
Claims use since Apr. 15, 1928.

Ser. No. 266,178. TIFFANY-STAHL PRODUCTIONS, INC., New York, N. Y. Filed May 9, 1928.

For Moving Pictures.
Claims use since August, 1926.

CLASS 28.

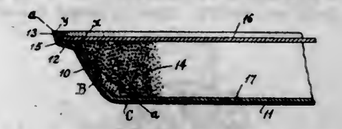
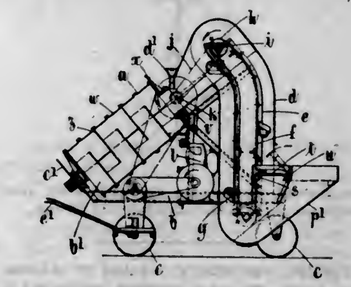
REISSUES

AUGUST 14, 1928.



17,065. POWER-STOPPING DEVICE. NOAH LOUIS DAUPLAISE, South Manchester, Conn., assignor to Nelson L. Jarvis, Palmer, Mass. Filed Oct. 20, 1927. Serial No. 227,596. Original No. 1,558,595, dated Oct. 27, 1925, Serial No. 697,681, filed Mar. 7, 1924. 9 Claims. (Cl. 192—116.5.)

1. In a machine of the character described, means for applying power to the machine, a lever for shutting off and turning on the power, yielding means adapted to urge the power lever towards off power position, a pivoted lever engaging the power lever to hold it on power position, a solenoid engaging one end of the pivoted lever, an idler wheel having an electric circuit therein and a separated portion and a freely movable metal member adapted to close the space in the circuit by gravity to energize the solenoid to operate the pivoted lever to release the power lever and throw it to an off power position and to remove away from the separated portion of the circuit by centrifugal action when the idler wheel is moving when the power lever is in on power position.



17,066. PIE PLATE. RICHARD M. SMYTHE, Boonton, N. J., assignor, by mesne assignments, to The Save-All Pie Plate Co., New York, N. Y., a Corporation of New York. Filed Jan. 7, 1928. Serial No. 245,223. Original No. 1,568,696, dated Jan. 5, 1926, Serial No. 655,238, filed Aug. 2, 1923. 2 Claims. (Cl. 53—6.)

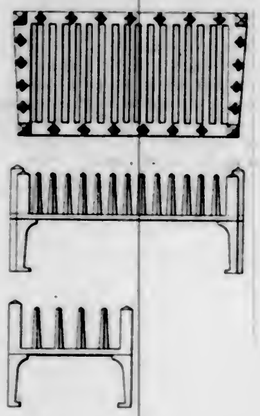
1. A pie plate comprising a circular bottom, a downwardly and inwardly sloping side wall, an upwardly and outwardly inclined border flange or brim extending from the upper portion of said side wall and an upwardly and outwardly flaring rim at the outer edge of said flange or brim, said inclined flange or brim merging into said side

wall on a downwardly slanting convexly curved juncture zone, and said flange or brim and said rim being run together by means of a distinct fillet.

17,067. MIXING MACHINE. JOHN VER MEHR, London, England. Filed Dec. 28, 1927. Serial No. 243,109. Original No. 1,583,892, dated May 11, 1926, Serial No. 638,533, filed May 12, 1923. 7 Claims. (Cl. 83—73.)

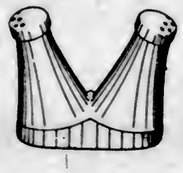
1. A mixing machine comprising in combination a rotatable mixing drum, partitions dividing said drum into a number of separate intercommunicating mixing compartments, means for feeding gauged batches of the several ingredients to be mixed into said drum at predetermined intervals, means whereby the contents of one mixing compartment of said drum pass into the next adjacent compartment during rotation of said drum at said predetermined intervals, and means whereby batches of completely mixed material are discharged from said drum at said predetermined intervals, whereby a plurality of gauged batches of said ingredients are mixed in said drum in separated relation at the same time.

DESIGNS



AUGUST 14, 1928.

75,996. ESCUTCHEON PLATE FOR RADIORECEIVERS OR THE LIKE. MILTON ALDEN, Springfield, Mass., assignor to Alden Manufacturing Company, Springfield, Mass., a Corporation of Massachusetts. Filed Dec. 3, 1926. Serial No. 19,917. Term of patent 7 years.



The ornamental design for an escutcheon plate for radioreceivers or the like substantially as shown.

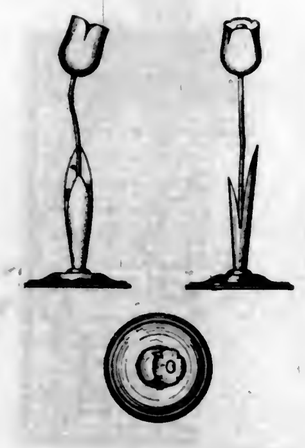
75,997. FIREPLACE GRATE. ALLAN C. AXFORD, San Francisco, Calif. Filed Jan. 11, 1928. Serial No. 24,289. Term of patent 14 years.

The ornamental design for a fireplace grate as shown.

75,998. SALT AND PEPPER SHAKER. HARRY N. BANEY, Muncie, Ind. Filed Nov. 17, 1927. Serial No. 24,183. Term of patent 3½ years.

The ornamental design for a salt and pepper shaker as shown.

75,999. OPTICAL MOUNTING. FREDERICK R. BISHOP, North Attleboro, Mass. Filed Feb. 21, 1927. Serial No. 20,843. Term of patent 14 years.

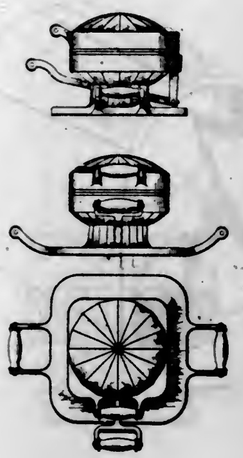


The ornamental design for an optical mounting, as shown.

76,000. TEXTILE FABRIC. JOHN S. BOYD, Williamstown, Mass., assignor, by mesne assignments, to Boyd Textile Corporation, Williamstown, Mass., a Corporation of Massachusetts. Filed Nov. 15, 1927. Serial No. 24,133. Term of patent 7 years.

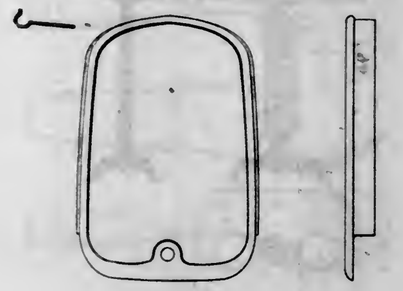
The ornamental design for a textile fabric, as shown.

76,001. HATRACK. JOHN BROCH, Corona, N. Y. Filed June 11, 1928. Serial No. 27,079. Term of patent 3½ years.



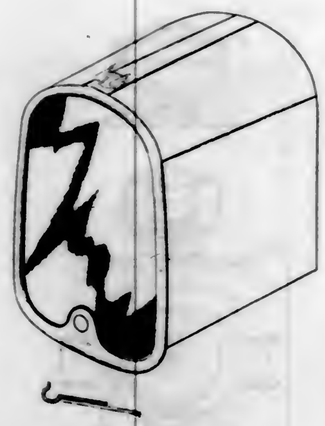
The ornamental design for a hatrack as shown.

76,002. AUTOMOBILE RADIATOR. CHARLES W. BURY, New York, N. Y. Filed Aug. 7, 1926. Serial No. 18,631. Term of patent 8½ years.



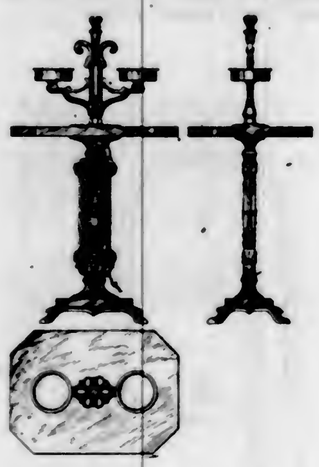
The ornamental design for an automobile radiator as shown.

76,003. ELECTRIC TOASTING DEVICE. CHARLES V. CHAMPION, Catlin, Ill. Filed Apr. 23, 1928. Serial No. 26,422. Term of patent 14 years.



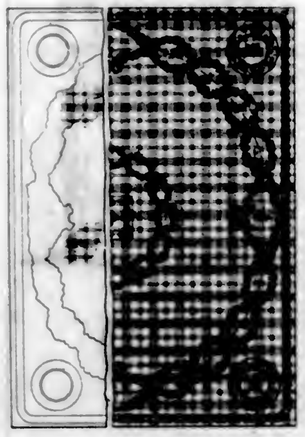
The ornamental design for an electric toasting device, substantially as shown.

76,004. RADIATOR SHELL. OLIVER H. CLARK, Detroit, Mich., assignor to Chrysler Corporation, Detroit, Mich., a Corporation of Delaware. Filed Nov. 21, 1927. Serial No. 24,219. Term of patent 14 years.



The ornamental design for a radiator shell, as shown.

76,005. COMBINED RADIATOR CASING AND HOOD. OLIVER H. CLARK, Detroit, Mich., assignor to Chrysler Corporation, Detroit, Mich., a Corporation of Delaware. Filed Nov. 28, 1927. Serial No. 24,316. Term of patent 14 years.



The ornamental design for a combined radiator casing and hood as shown.

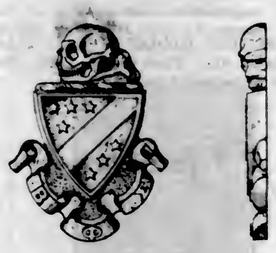
76,006. SMOKING STAND. JOHN M. COLUCCI, Brooklyn, N. Y. Filed June 12, 1928. Serial No. 27,092. Term of patent 7 years.

The ornamental design for a smoking stand, as shown.

76,007. TABLE COVER OR SIMILAR ARTICLE. HENRY W. DIECK, Brooklyn, N. Y., assignor to The Standard Textile Products Company, New York, N. Y., a Corporation of Ohio. Filed Sept. 22, 1927. Serial No. 23,502. Term of patent 3½ years.

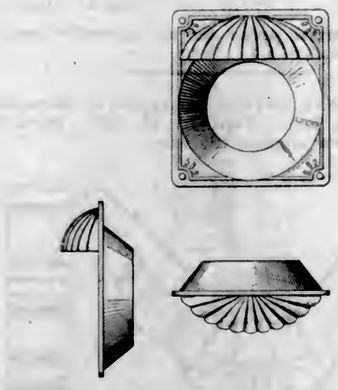
The ornamental design for a table cover or similar article, as shown and described.

76,008. GOBLET OR SIMILAR ARTICLE. JAMES DUNCAN DITHRIDGE, New York, N. Y., assignor to Bryce Brothers Company, Mount Pleasant, Pa., a Corporation of Pennsylvania. Filed May 4, 1928. Serial No. 26,562. Term of patent 14 years.



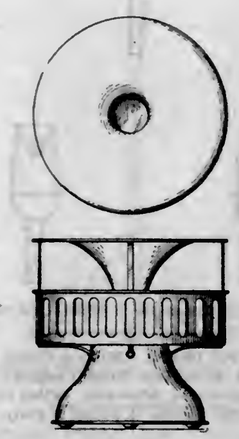
The ornamental design for a goblet or similar article, as shown.

76,009. DRAPERY-POLE END. AUGUST DLOUHY, Wallingford, Conn., assignor to H. L. Judd Company, Inc., Wallingford, Conn., a Corporation of Delaware. Filed Apr. 10, 1928. Serial No. 26,217. Term of patent 3½ years.



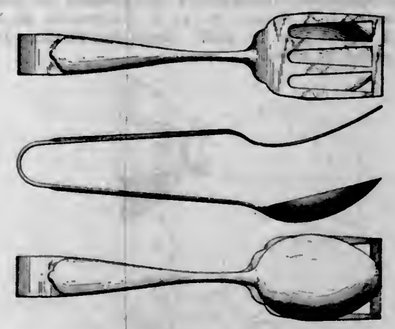
The ornamental design for a drapery pole end, as shown.

76,010. BADGE OR SIMILAR ARTICLE. CLEM D. EASLY, Elkhart, Ind. Filed Dec. 14, 1927. Serial No. 24,478. Term of patent 14 years.



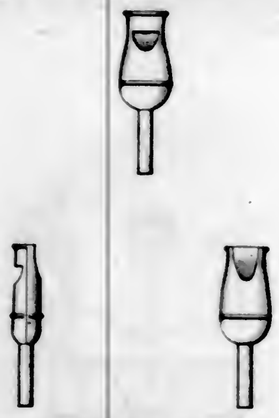
The ornamental design for a badge or similar article as shown.

76,011. DIAL FRAME. CHARLES D. FAGAN, Sharon, Pa., assignor to Sharpsville Boiler Works, Sharpsville, Pa., a Corporation of Pennsylvania. Filed July 5, 1927. Serial No. 22,663. Term of patent 14 years.



The ornamental design for a dial frame, substantially as shown and described.

76,012. ELECTRIC FAN. WILLIAM H. GINDER, Haddonfield, N. J., assignor to Electro Dental Manufacturing Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Mar. 31, 1928. Serial No. 26,086. Term of patent 14 years.

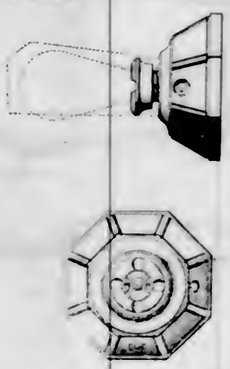


The ornamental design for an electric fan, substantially as shown.

76,013. COMBINED SPOON AND FORK OR SIMILAR ARTICLE. ALLAN A. GORDON, North Attleboro, Mass., assignor to Paye & Baker Manufacturing Co., North Attleboro, Mass. Filed Mar. 5, 1928. Serial No. 25,709. Term of patent 14 years.

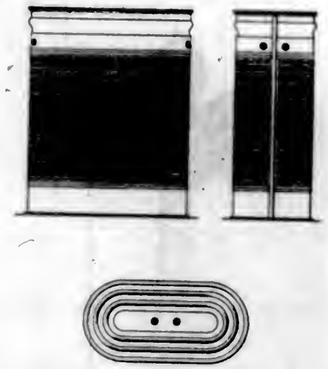
The ornamental design for a combined spoon and fork or similar article, as shown.

76,014. WHISTLE. CONRAD GREIN, Evansville, Ind. Filed Feb. 3, 1928. Serial No. 25,144. Term of patent 14 years.



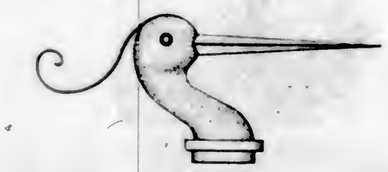
The ornamental design for a whistle, as shown.

76,015. KNITTED DRESS. MIRIAM GROSS, Milwaukee, Wis., assignor to Miriam Gross Company, Milwaukee, Wis., a Corporation of Wisconsin. Filed Oct. 10, 1927. Serial No. 23,707. Term of patent 7 years.



The ornamental design for a knitted dress as shown.

76,016. LIGHTING-FIXTURE WALL BRACKET. VAHAN HAGOPIAN, New York, N. Y., assignor to Pass & Seymour, Inc., Solvay, N. Y., a Corporation of New York. Filed Nov. 17, 1927. Serial No. 24,192. Term of patent 14 years.



The ornamental design for a lighting fixture wall bracket substantially as shown.

76,017. VENTILATED RODENTPROOF CLOTHES HAMPER. MAX HALPERT, New York, N. Y. Filed May 18, 1928. Serial No. 26,731. Term of patent 7 years.

The ornamental design for a ventilated rodent proof clothes hamper as shown.

76,018. AUTOMOBILE RADIATOR CAP. ALBERT T. R. HARDY, Atlanta, Ga. Filed Oct. 5, 1927. Serial No. 23,640. Term of patent 7 years.

The ornamental design for an automobile radiator cap, as shown.

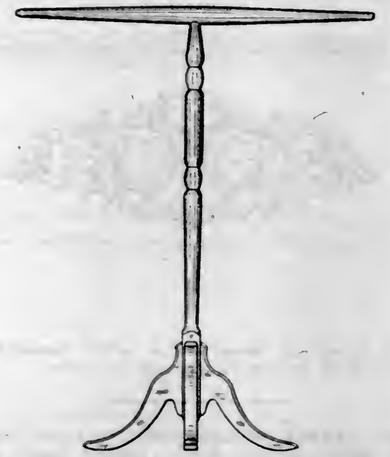
76,019. SIGNAL CASING. MATTHEW B. HITZEMANN, Hutchinson, Kans. Filed Oct. 19, 1927. Serial No. 23,794. Term of patent 3½ years.

The ornamental design for a signal casing, as shown.

76,020. BOOK END. ADA LUCILE JACK, Kansas City, Mo. Filed June 12, 1928. Serial No. 27,089. Term of patent 3½ years.

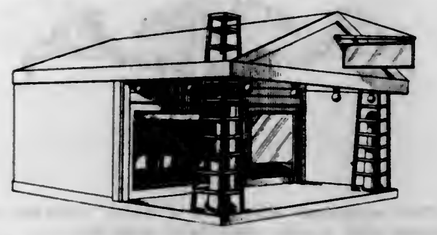
The ornamental design for a book end, as shown.

76,021. TEXTILE FABRIC. HARRY KATIMS and EMIL WEINER, New York, N. Y. Filed May 12, 1928. Serial No. 26,654. Term of patent 7 years.



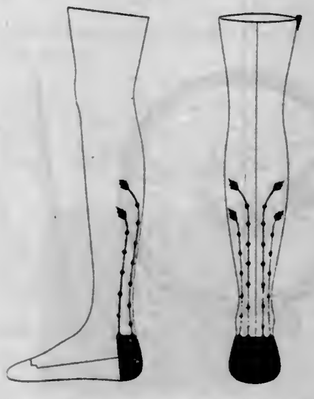
The ornamental design for a textile fabric as shown.

76,022. BOTTLE. PETER E. KEKENES, Washington, D. C. Filed Nov. 12, 1927. Serial No. 24,111. Term of patent 14 years.



The ornamental design for a bottle substantially as shown.

76,023. PORTABLE NEWSPAPER RACK. HARRY L. KUCHINS, St. Louis, Mo. Filed May 14, 1927. Serial No. 21,992. Term of patent 3½ years.



The ornamental design for a portable newspaper rack, as shown.
